AUTHOR INDEX

VOLUMES 201–250

A

Abatangelo, G., see Martelli, M. 231(1987)339
Abd-El-Nabey, B.A., see Tadros, A.B. 246(1988) 433
Abd El Wahab, F.M., see Shams El Din, A.M. 214(1986)567
Abel, P., see Xing, X.-K. 216(1987)261
Abraham, M., see Tadjeddine, A. 204(1986)229
Abruña, H.D., see Albarelli, M.J. 248(1988)77
Abruña, H.D., see Breikss, A.I. 201(1986)347
Abruña, H.D., see Cabrera, C.R. 209(1986)101
Abruña, H.D., see Gordon II, J.G. 210(1986)311
Abruña, H.D., see Kasem, K.K. 242(1988)87
Abyaneh, M.Y.
Formulation of current–time transients due to nucleation and coalescence of spherical-cap growth forms 209(1986)1
Acerete, C., Montero, J.F. and Reboiras, M.D.
Electrochemical behaviour of cellulosic cation membranes. Bi-ionic potentials in alkali systems 211(1986)113
Adami, F., Pham, M.-C., Lacaze, P.-C. and Dubois, J.-E.
In-situ investigation of the film growth mechanism using multiple internal reflection Fourier transform infrared spectroscopy (MIRFTIRS). Part II. Behaviour of iron and platinum electrodes in the presence of hexamethylenediamine in alkaline methanolic solutions 210(1986)295
Adami, F., see Pham, M.-C. 201(1986)413
Adey, W.R.
The sequence and energetics of cell membrane transductive coupling to intracellular enzyme systems 211(1986)447
Adžić, G., Despić, A.R. and Dražić, D.M.
Nucleation rings around a growing crystal 220(1987)169
Adžić, G.D., Despić, A.R. and Dražić, D.M.
Nucleation rings of $Ag_7O_8NO_3$ around dissolving silver crystals 241(1988)353
Adžić, G.D., Dražić, D.M. and Despić, A.R.
A method of obtaining a small number of nucleation sites and growing large crystal grains 239(1988)107
Adžić, R.R., see Anastasijević, N.A. 229(1987)305
Adžić, R.R., see Anastasijević, N.A. 229(1987)317
Adžić, R.R., see Anastasijević, N.A. 240(1988)239
Adzic, R.R., see Avramov-Ivic, M. 240(1988)161
Adžić, R.R., see Marković, N.M. 241(1988)309
Adžić, R.R., see Štrbac, S. 249(1988)291
Adžić, R.R., see Tripković, A.V. 205(1986)335
Adzic, R.R., see Vesovic, V. 218(1987)53
Adžić, R.R., Tripković, A.V. and Vešović, V.B.
Structural effects in electrocatalysis: oxidation of formic acid and hydrogen adsorption on platinum single-crystal stepped surfaces 204(1986)329
Aegerter, C., see Lorenz, W. 221(1987)33
Aegerter, C. and Lorenz, W.
Electronic non-equilibrium charge transfer kinetics in anodic dark and photocurrents on n-III–V-semiconductor electrodes 209(1986) 259
Aeiyach, S., Dubois, J.-E. and Lacaze, P.-C.
Electrochemical ring-opening polymerization of episulfides. Obtaining crystalline doped polyethylene and polypropylene sulfide films by anodic polarization 207(1986)117
Agostiano, A., Caselli, M. and Della Monica, M.
Adsorption stripping voltammetry of different solvated species of chlorophyll a in water + acetone mixtures 249(1988)89
Agostiano, A., Ceglie, A. and Della Monica, M.
Spectroelectrochemical behaviour of water bounded Chl *a* in the presence of various acceptors 231(1987)17
Agostiano, A. and Fong, F.K.
In vitro photoelectrochemical model of the *Z* scheme in green plant photosynthesis 231 (1987)325
Agostinho, S.M.L., see Da Costa, S.L.F.A. 220 (1987)259
Ahmed, M.E., see Kamal, M.M. 212(1986)485
Ahmed, M.E., see Temerk, Y.M. 212(1986)497
Ahmed, Z.A., see Kamal, M.M. 212(1986)485
Ahmed, Z.A., see Temerk, Y.M. 212(1986)497
Ahmed Basha, C., see Noel, M. 225(1987)93
Ai, N., see Matsuoka, H. 212(1986)235
Aikens, D.A., see Founta, A. 219(1987)221
Akiba, U., see Matsue, T. 234(1987)163
Al-Jaaf-Golze, K., see Plieth, W.J. 228(1987)283
Alabiso, G., see Scotto, V. 212(1986)347
Albahadily, F.N., see Luque de Castro, M.D. 219(1987)139
Albaladejo, J., see Molina, A. 227(1987)1
Albarelli, M.J., White, J.H., Bommarito, G.M., McMillan, M. and Abruña, H.D.
In-situ surface EXAFS at chemically modified electrodes 248(1988)77
Albert, H.-F. and Scholz, F.
On the drop time of a dropping electrode and on the bubble time of a bubble electrode 235(1987)107
Albery, W.J., Bartlett, P.N., Bycroft, M., Craston, D.H. and Driscoll, B.J.
Amperometric enzyme electrodes. Part III. A conducting salt electrode for the oxidation of four different flavoenzymes 218(1987)119
Albery, W.J., Bartlett, P.N., Cass, A.E.G. and Sim, K.W.
Amperometric enzyme electrodes. Part IV. An enzyme electrode for ethanol 218(1987) 127
Alcaraz, M.L., see Galvez, J. 247(1988)99
Alcaraz, M.L., see Galvez, J. 247(1988)119
Alcaraz, M.L., see Galvez, J. 249(1988)23

Alda, E., see Gómez, M.M. 206(1986)285
Aldaz, A., see Clavilier, J. 243(1988)419
Alemu, H. and Solomon, T.
Ion transfer across the immiscible water–*o*-nitrotoluene interface 237(1987)113
Allendoerfer, R.D., see Oudard, J.F. 241(1988) 231
Almirón, M.A., Camacho, L., Muñoz, E., Avila, J.L. and Sinisterra, J.V.
Electrochemical reduction of 4,4-dimethyl-1-phenyl-1-penten-3-one 241(1988)297
Aloisi, G., Guidelli, R., Jackson, R.A., Clark, S.M. and Barnes, P.
The structure of water at a neutral interface 206(1986)131
Alonso, C., González Velasco, J. and Arvia, A.J.
The interaction of CO_2 with gold electrodes in acid electrolyte followed through voltammetry 250(1988)183
Alonso, C., see Gómez, J. 240(1988)77
Alonso, C., see Gonzalez Herman, E. 223(1987) 277
Alonso, C., see Ocón, P. 206(1986)179
Alonso, C. and Gonzalez-Velasco, J.
Study of the electrooxidation of 1,2-propanediol on an Au electrode in basic medium 248(1988)193
Alonso Vante, N., see El Hajbi, A. 207(1986)127
Alonso Vante, N., see Li, X.-P. 242(1988)255
Alumaa, A., see Palm, U. 239(1988)333
Amatore, C., Anne, A., Florent, J.C. and Moiroux, J.
Mechanism of the electrochemical reduction of hydroxyiminoanthraquinones in DMF 207(1986)151
Amatore, C., Deakin, M.R. and Wightman, R.M.
Electrochemical kinetics at microelectrodes. Part IV. Electrochemistry in media of low ionic strength 225(1987)49
Amatore, C., Kelly, R.S., Kristensen, E.W., Kuhr, W.G. and Wightman, R.M.
Effects of restricted diffusion at ultramicroelectrodes in brain tissue. The pool model: Theory and experiment for chronoamperometry 213(1986)31
Amatore, C., Kuchynka, D.J. and Kochi, J.K.
Reactivity of carbonylmanganese radicals toward tributyltin hydride. Kinetics analysis of the anodic oxidation of $Mn(CO)_3[P(OPh)_3]_2^-$ 241(1988)181
Amatore, C.A., Deakin, M.R. and Wightman, R.M.
Electrochemical kinetics at microelectrodes. Part I. Quasi-reversible electron transfer at cylinders 206(1986)23
Amatore, C.A., Fosset, B., Deakin, M.R. and Wightman, R.M.
Electrochemical kinetics at microelectrodes. Part III. Equivalency between band and hemicylinder electrodes 225(1987)33
Amatore, C.A., Jutand, A. and Pflüger, F.
Nanosecond time resolved cyclic voltammetry. Direct observation of electrogenerated intermediates with bimolecular diffusion controlled decay using scan rates in the megavolt per second range 218(1987)361
Amatore, C.A., see Deakin, M.R. 215(1986)49
Amiconi, G., see Santucci, R. 211(1986)521
Amos, A.T., see Davison, S.G. 204(1986)173
Amos, L., see Sinha, S. 210(1986)323
Ananthapadmanabhan, P., see Sebastian, K.L. 230(1987)43
Anastasijevic, N., see Vesovic, V. 218(1987)53
Anastasijević, N.A., Štrbac, S. and Adžić, R.R.
Oxygen reduction on the Au (311) electrode surface in alkaline electrolyte 240(1988)239
Anastasijević, N.A., Vesović, V. and Adžić, R.R.
Determination of the kinetic parameters of the oxygen reduction reaction using the rotating ring–disk electrode. Part I. Theory 229(1987)305
Anastasijević, N.A., Vesović, V. and Adžić, R.R.
Determination of the kinetic parameters of the oxygen reduction reaction using the rotating ring–disk electrode. Part II. Applications 229(1987)317
Anderson, J.E., Bond, A.M. and Oldham, K.B.
Effect of sphericity on the voltammetric (polarographic) log plot for reversible amalgam formation 218(1987)1
Anderson, J.E., Myland, J.C. and Oldham, K.B.
Amalgam concentration at the surface of a spherical mercury electrode following a potential step 218(1987)41
Anderson, J.L., see Ou, T.-Y. 247(1988)1
Anderson, J.L., see Von Nehring, Q.G. 239 (1988)187
Anderson, M.R., see Chen, T.-Y.R. 222(1987)257
Anderson, M.R. and Evans, D.H.
Determination of electrochemical kinetic parameters using the Bond–Henderson–Oldham "global analysis" 230(1987)273
Andre, J.C., see Funk, Jr., M.O. 232(1987)127
Andreev, V.N., see Zucchini, G.L. 210(1986)161
Andreoli, R., see Fontanesi, C. 210(1986)181
Andreu, R., Molero, M. and González-Arjona, D.
Adsorption of chloride at the mercury/aqueous $LaCl_3$ interface 209(1986) 183
Andreu, R., Sanchez, F., Gonzalez-Arjona, D. and Rueda, M.
The reduction of Cr(III) in concentrated aqueous electrolytes at a DME. The influence of anions 210(1986)111
Andricacos, P.C., see Morrison, B. 215(1986)151
Andrieux, C.P., Garreau, D., Hapiot, P., Pinson, J. and Savéant, J.M.
Fast sweep cyclic voltammetry at ultra-microelectrodes. Evaluation of the method

for fast electron-transfer kinetic measurements 243(1988)321
Andrieux, C.P., Garreau, D., Hapiot, P. and Savéant, J.M.
Ultramicroelectrodes: cyclic voltammetry above one million V s^{-1} 248(1988)447
Andrieux, C.P. and Savéant, J.-M.
Homogeneous redox catalysis of electrochemical reactions. Electron transfers followed by a very fast chemical step 205 (1986)43
Ang, K.P., see Gunasingham, H. 215(1986)123
Ang, K.P., see Khoo, S.B. 216(1987)115
Angelinetta, C., Falciola, M. and Trasatti, S.
Heterogeneous acid–base equilibria and reaction order of oxygen evolution on oxide electrodes 205(1986)347
Angelinetta, C., Trasatti, S., Atanasoska, L.D. and Atanasoski, R.T.
Surface properties of $RuO_2 + IrO_2$ mixed oxide electrodes 214(1986)535
Angely, L., see Le Berre, V. 206(1986)115
Angely, L., see Le Berre, V. 218(1987)173
Angely, L., see Le Berre, V. 240(1988)117
Angerstein-Kozlowska, H., Conway, B.E., Hamelin, A. and Stoicoviciu, L.
Elementary steps of electrochemical oxidation of single-crystal planes of Au. Part II. A chemical and structural basis of oxidation of the (111) plane 228(1987)429
Anne, A., see Amatore, C. 207(1986)151
Anne, A., see Oturan, M.A. 242(1988)171
Anni, K., see Damaskin, B. 234(1987)31
Ansell, R.O., Gilmour, A. and Cole, R.J.
The role of oxygen ion diffusion in the electrode reactions of β'' alumina 244(1988) 123
Anson, F.C., see Bowers, M.L. 216(1987)249
Anson, F.C., see Che, C.-M. 226(1987)211
Anson, F.C., see Feldberg, S.W. 215(1986)11
Anson, F.C., see Gennett, T. 222(1987)151
Anson, F.C., see Ni, C.-L. 202(1986)101
Anson, F.C., see Webley, W.S. 229(1987)273
Anson, F.C., see Wong, K.-Y. 237(1987)69
Anthony, L.J., see Hanson, K.J. 234(1987)107
Antoniadou, S., Jannakoudakis, A.D., Karabinas, P. and Theodoridou, E.
Electromodification of carbon-fibre electrodes by 2-nitroso-1-naphthol 207(1986) 203
Antonini, G., see Brunori, M. 212(1986)159
Antonini, G., see Colosimo, A. 211(1986)79
Antonious, M.S., Etman, M. and Savy, M.
Electrochemical stabilization of illuminated single crystal WSe_2 anodes 242(1988)191
Aoki, K., Ishida, M. and Tokuda, K.
Voltammetry at microcylinder electrodes. Part VI. Second-order catalytic reaction of Fe(edta) with H_2O_2 245(1988)39
Aoki, K., Kaneko, H. and Nozaki, K.
Estimation of charge transfer kinetic parameters from irreversible cyclic voltammograms at carbon fiber electrodes 247(1988)29
Aoki, K., see Matsuda, H. 217(1987)1
Aoki, K., see Matsuda, H. 217(1987)15
Aoki, K., see Tanaka, M. 246(1988)1
Aoki, K., see Whelan, D.P. 202(1986)23
Aoki, K., Tokuda, K., Matsuda, H. and Osteryoung, J.
Reversible square-wave voltammograms. Independence of electrode geometry 207 (1986)25
Aoki, K., Tokuda, K. and Matsuda, H.
Theory of stationary current–voltage curves of redox-electrode reactions in hydrodynamic voltammetry. Part XI. Wall–jet electrodes 206(1986)37
Aoki, K., Tokuda, K. and Matsuda, H.
Voltammetry at microcylinder electrodes. Part V. Pulse voltammetric current–potential curves for quasi-reversible and totally irreversible electrode reactions 206(1986)47
Aoki, K., Tokuda, K. and Matsuda, H.
Hydrodynamic voltammetry at channel electrodes. Part VIII. Theory of reversible voltammograms for chronoamperometry and linear sweep voltammetry 209(1986)247
Aoki, K., Tokuda, K. and Matsuda, H.
Hydrodynamic voltammetry at channel electrodes. Part IX. Edge effects at rectangular channel flow microelectrodes 217(1987)33
Aoki, K., Tokuda, K. and Matsuda, H.
Theory of chronoamperometric curves at microband electrodes 225(1987)19
Aoki, K., Tokuda, K. and Matsuda, H.
Derivation of an approximate equation for chronoamperometric curves at microband electrodes and its experimental verification 230(1987)61
Aoki, K., Tokuda, K. and Matsuda, H.
Theory of stationary current–potential curves at microdisk electrodes for quasi-reversible and totally irreversible electrode reactions 235(1987)87
Aoki, K. and Kaneko, H.
Theory of irreversible cyclic voltammograms at microcylinder electrodes 247(1988)17
Aoki, K. and Kato, N.
Analysis of the cyclic voltammograms associated with deposition or precipitation of the electrochemical product 245(1988)51
Aoki, K. and Osteryoung, J.
Square wave voltammetry in a thin-layer cell 240(1988)45
Aoki, K. and Tokuda, K.
Linear sweep voltammetry at microband electrodes 237(1987)163
Aoki, S., see Imanishi, K. 242(1988)203
Arakawa, M. and Yamaki, J.-I.

The cathodic decomposition of propylene carbonate in lithium batteries 219(1987)273
Araki, T., see Fujihira, M. 205(1986)329
Aramata, A., see Kunimatsu, K. 207(1986)293
Aramata, A., see Nakajima, H. 201(1986)175
Araya, R., see Schrebler, R. 231(1987)523
Ardizzone, S.
The oxide/solution interface: specific effects of "indifferent" electrolytes 239(1988)419
Ardizzone, S. and Formaro, L.
AES depth profiling of electrochemically grown γ-FeOOH 246(1988)53
Ardizzone, S. and Formaro, L.
Composition and diffusion properties of γ-FeOOH deposited in sulphate solutions 247 (1988)185
Arévalo, A., see González, S. 209(1986)361
Arévalo, A., see González, S. 238(1987)367
Arévalo, A., see Souto, R.M. 216(1987)273
Arévalo, M.C., Farnia, G., Severin, M.G. and Vianello, E.
Kinetic analysis of a slow electron transfer coupled with a father–son reaction 220 (1987)201
Arfelli, M., see Razzini, G. 208(1986)85
Argese, E., Orsega, E.F., Enzo, S., Ugo, P. and Rigo, A.
An electrochemical investigation of the interaction between the superoxide ion and cations of group 2a in aqueous solutions 246 (1988)155
Ariño, C., see Casassas, E. 213(1986)235
Ariño, C., see Casassas, E. 215(1986)103
Armand, D., see Clavilier, J. 205(1986)267
Armand, D. and Clavilier, J.
Quantitative analysis of the distribution of the hydrogen adsorption states at platinum surfaces. Part I. Application to Pt (100) in sulphuric acid medium 225(1987)205
Armand, D. and Clavilier, J.
Quantitative analysis of the distribution of the hydrogen adsorption states at platinum surfaces. Part II. Application to Pt (110), stepped and polyoriented platinum surfaces in sulphuric acid medium 233(1987)251
Armstrong, F.A., Cox, P.A., Hill, H.A.O., Lowe, V.J. and Oliver, B.N.
Metal ions and complexes as modulators of protein–interfacial electron transport at graphite electrodes 217(1987)331
Armstrong, F.A. and Brown, K.J.
Studies of protein–electrode interactions by organosilyl derivatisation of pyrolytic graphite electrodes 219(1987)319
Armstrong, N.R., see Nanthakumar, A. 248 (1988)349
Armstrong, R.D.
The significance of exchange currents for the PVC/water interface 245(1988)113
Armstrong, R.D., Lindholm, B. and Sharp, M.
Impedance characteristics of a modified electrode 202(1986)69
Armstrong, R.D., see Lindholm, B. 235(1987)169
Armstrong, R.D. and Todd, M.
The role of PVC in ion selective electrode membranes 237(1987)181
Armstrong, R.D. and Todd, M.
Exchange of K^+ and Na^+ between water and PVC in the presence of different ionophores 248(1988)131
Arratia, A., see Schrebler, R. 231(1987)523
Arribas Jimeno, S., see Muñiz Alvarez, J.L. 209 (1986)339
Artuc, M., see Kappus, H. 232(1987)263
Aruchamy, A., Zhou, G. and Fujishima, A.
Photoelectrochemical study of the effect of inhibitor on the passivation of copper in sodium hydroxide aqueous electrolyte 244 (1988)333
Arvamuthan, S., see Levy Clement, C. 248 (1988)233
Arvia, A.J., see Alonso, C. 250(1988)183
Arvia, A.J., see Bilmes, S.A. 227(1987)183

Supramolecular phenomena in organic redox films at electrodes. Part II. The methylene blue/leucomethylene blue redox couple at the gold electrode 219(1987)183

SUBJECT INDEX

VOLUMES 201–250

A

Absolute electrode potential

The absolute electrode potential: an explanatory note 209(1986)417

Absorption spectroscopy

The role of intramolecular association in the electrochemical reduction of viologen dimers and trimers 243(1988)143

Acetaldehyde

Bioelectrochemical approach to the role of glutathione in strong ethanol ingestion 212 (1986)333

Acetic acid

Reinvestigation of the potential dependence of the adsorption of acetic acid on platinum electrodes by a radiotracer method 227(1987)223

Single crystal radio-electrochemistry: adsorption of acetic acid on well-defined Pt (111) surfaces 239(1988)413

Acetone

Adsorption stripping voltammetry of different solvated species of chlorophyll a in water + acetone mixtures 249(1988)89

Acetonitrile

Electrochemical and mechanistic studies of $[Re(CO)_3(dmbpy)Cl]$ and their relation to the catalytic reduction of CO_2 201(1986)347

Two-electron oxidation of *N,N,N′,N′*-tetramethyl naphthidine in acetonitrile. The reactivity of its dication to aromatic nucleophilic substitution by pyridine 201(1986)367

A study of the conditions for the electrodeposition of polythiophen in acetonitrile 206(1986)147

Electrochemical behaviour of 2-nitrophenylguanidines in acetonitrile 207(1986) 189

Polarographic study on the interaction between alkali metal cations and acyclic polyamines in acetonitrile 209(1986)297

Electrochemistry of thioxanthene, thioxanthone and related compounds in acetonitrile. Substituent effects and correlation of electrochemical behavior with molecular orbital calculations 210(1986)45

Electrolyte effects on the cyclic voltammetry of TCNQ and TCNE 215(1986)273

Surface ion pairing between electrochemically treated glassy carbon and alkali metal ions in acetonitrile 217(1987)453

Electrolyte effect on the electrochemical properties of poly(3-methylthiophene) thin films 218(1987)107

Electrochemical polymerization of paradialkoxybenzenes. Part I. Anodic oxidation of paradimethoxybenzene in dry acetonitrile 218 (1987)173

Application of transient electrochemical techniques to inlaid ultra-microelectrodes. Assessment of fabrication quality 218(1987)187

The electroreduction of 2- and 3-cyanopyridinium ions 220(1987)139

Electrochemical synthesis and study of polydiphenylamine 220(1987)287

Heterogeneous electron transfer kinetics for a variety of organic electrode reactions at the mercury–acetonitrile interface using either tetraethylammonium perchlorate or tetraheptylammonium perchlorate electrolyte 222(1987)129

Electrogenerated chemiluminescence. Part II. Emission from acetonitrile solutions containing no added luminescors 222(1987)331

Electroreduction of primary alkyl iodides in acetonitrile 226(1987)27

Electrochemical behavior of the Eu(III/II)–EDTA system on a mercury electrode in water + dimethylsulphoxide (DMSO), water + acetonitrile (AN) and water + hexamethylphosphortriamide (HMPT) mixtures 226(1987)315

Cathodic behaviour of $[(\eta^3\text{-}C_3H_5)Pd(Ph_2P\text{–}C_2H_4\text{–}PPh_2)]^+$ in acetonitrile solution: an electrochemical process involving very fast consecutive chemical reactions 230 (1987)165

The interaction of nesosteine and *trans*-sobrerol with electrogenerated superoxide ion in anhydrous and wet acetonitrile 231(1987)339

Polarographic studies on the interaction between macrocyclic compounds and cations or acids in acetonitrile 234(1987)251

The lithium salt of benzoquinone radical anion and voltammetric anomalies 235(1987)357

Electrochemistry of some *N*-substituted phospha-λ^5-azenes in acetonitrile. Mechanistic aspects, electrophoric group behavior, and substituent effects 236(1987)219

Solvent effects on the electrode kinetics of simple redox couples. Investigations on the electrochemical behaviour of the V(III)/V(II) system in water + acetonitrile mixtures 237 (1987)209

Electrochemistry of ferrocene in acetonitrile. Evidence for irreversible kinetic behavior due to passive film formation 237(1987)269

Flatband potential shift of n-type GaAs in CH_3CN containing different redox reagents 237 (1987)289

Electrochemical study of poly(PHAS) in acetonitrile and water + acetonitrile electrolytes 238(1987)183

Electrooxidative and electroreductive polymerization of 5-amino-1,10-phenanthroline ligand, iron and cobalt complexes in acetonitrile media 238(1987)197

Interfacial energetics of electrodeposited cadmium selenide in acetonitrile 239(1988)307

Poly(pyrrole-manganese tetraphenylporphyrin) film electrodes in acetonitrile solution 239(1988) 433

Interpretation of polyazulene electropolymerization considering faradaic current efficiency and capacitive current effects during the growth and redox switching steps 241(1988)211

Anomalous transient behavior in the electrogenerated chemiluminescence of 9,10-diphenylanthracene 242(1988)107

Easy preparation of electrodes modified by conjugated polypyridine films displaying coordinative properties and their effectiveness as mediators of electrocatalytic processes 242 (1988)131

Electrochemistry in near-critical and supercritical fluids. Part VI. The electrochemistry of ferrocene and phenazine in acetonitrile between 25 and 300 °C 243(1988)117

A voltammetric study of asymmetric viologens in an organic solvent, an aqueous solution and in vesicle systems 246(1988)337

Electrochemical synthesis and reactivity of 3,5-dicyano-1,2,4,6-tetramethylpyridinium 246 (1988)373

Influence of water on the electroreduction of 2-nitrophenylhydrazones in acetonitrile 246 (1988)399

Cathodic reduction of diphenyl selenide in acetonitrile 248(1988)381

The reaction between 1-methyl-4-phenylpyridinium (MPP^+) and superoxide anion in acetonitrile 250(1988)83

Voltammetry of the complexes of the platinum metals with organic sulphides in acetonitrile 250 (1988)95

On the nature of the transfer coefficient for ion transfer reactions 250(1988)225

Acetonitrile–tetrabutylammonium fluoroborate system

Correlation of the anodic peak potentials with the quantum mechanical properties of various vinyl compounds 237(1987)187

Acetonitrile + water mixture

Effect of non-aqueous solvents on the chemisorption and orientation of aromatic compounds at smooth polycrystalline platinum electrodes: naphthohydroquinone and tetrahydroxybiphenyl in water + acetonitrile solutions 201(1986)153

Acetylacetone

Ion–solvent interactions in acetylacetone. Part III. Gibbs energies of transfer of the chloride ion and its complex formation constants with other solvents 246(1988)207

Acetylcholine

The rate-limiting steps of the rising phase of miniature end plate currents in the mouse diaphragm 231(1987)153

Acetylcholine receptor

Molecular mechanisms of gated ion channels 212(1986)341

Acetylglycine

Adsorption of *N*-acetylglycine and *N*-benzoylglycine at the mercury–aqueous solution interface 210(1986)181

Acetylphenoxyalkyl ammonium salt

Electrochemical behaviour of 4-acetyl-1 phenoxyalkyl ammonium salts. An example of a system with adsorption of both substrate and reduction products 236(1987)253

Ac field

Evidence for ac fields produced by mammalian cells 231(1987)287

Acid

Polarographic study of poly(α-D-glutamic acid) in acid solutions 212(1986)193

Acid–base equilibrium

Heterogeneous acid–base equilibria and reaction order of oxygen evolution on oxide electrodes 205(1986)347

An ultraviolet spectral and polarographic investigation of the acid–base and complexation behaviour of oxytetracycline hydrochloride 214 (1986)199

Polarographic reduction of aldehydes and ketones. Part XXX. Effects of acid–base, hydration–dehydration and keto–enol equilibria on reduction of α-ketoglutaric and oxalacetic acid and their esters 226(1987)69

Acid corrosion

Inhibition of the acid corrosion of steel by 4-amino-3-hydrazino-5-thio-1,2,4-triazoles 246 (1988)433

Acid solution

The ellipsometric characterization of Pt + Cr alloy surfaces in acid solutions 205(1986)163

Thin-layer voltammetry of palladium in acid electrolytes 207(1986)279

The impedance of the Li^+/Li electrode in $SOCl_2$ containing acid electrolyte 237(1987)275

Acid wash

Stability of titanium tubes towards acid wash 214(1986)567

Ac impedance

CdTe electrodeposition. Some new data from ac impedance 202(1986)323

Ac impedance measurements at channel electrodes. The effect of convection 207(1986)309

Theory of electrode reactions of redox couples confined to electrode surfaces at monolayer levels. Part II. Cyclic voltammetry and ac impedance measurements 217(1987)15

The double layer at the interface between two immiscible electrolyte solutions. Part III. Capacitance of the water/1,2-dichloroethane interface 225(1987)65

Apparent ion-exchange current densities at valinomycin-based potassium ion-selective PVC membranes obtained with an ac-impedance method 229(1987)249

Aclacinomycin A

Polarographic modelling of metabolic processes of cancerostatic anthracyclines 212(1986)135

Ac polarography

Characteristic criteria for a reversible reaction in ac polarography 222(1987)11

A systematic approach to faradaic current, charging current and phase angle measurement by digital alternating current polarography 222 (1987)35

The mechanism of the electron-transfer reactions of cytochrome c_3 from *Desulfovibrio desulfuricans* Norway at a mercury electrode 223(1987)201

Ac response

Impedance spectroscopy and its use in analyzing the steady-state ac response of solid and liquid electrolytes 223(1987)25

The behavior of microdisk and microring electrodes. Mass transport to the disk in the unsteady state. The ac response 250(1988)277

Acridine chloride

Proton transfer across the water/nitrobenzene interface facilitated by acridine chloride 234 (1987)85

Acridine radical anion

Electrochemistry in near-critical and supercritical fluids. Part V. The dimerization of quinoline and acridine radical anions and dianions in ammonia from −70 °C to 150 °C 240(1988)253

Acrylamide/vinylpyridine gel

Structurally heterogeneous electrode films of acrylamide/vinylpyridine gels. Dynamics of ferricyanide mediated electrooxidation of ascorbic acid and their dependence on the electrode film structure and composition 236 (1987)113

Acrylonitrile

Ultramicroelectrodes for the study of the mechanism of electrosynthetic reactions. The hydrodimerisation of acrylonitrile 248(1988)229

Activated carbon suspension

Electrochemical polarization of activated carbon and graphite powder suspensions. Part II. Exchange of ions between electrolyte and pores 214(1986)295

Activated charcoal

Direct and alternating current voltammetry at an HMDE in solutions containing activated charcoal suspension 239(1988)91

Activation

Activation of electrode surfaces by isopolytungstates 223(1987)287

Activation control

The admittance of a simple electrocatalytic process coupled with an additional electrochemical adsorption reaction 240(1988)53

Activation energy

Kinetics of the outer-sphere electrochemical reduction of chlorophyll adsorbed on a metal electrode. Reorganization of the solvent 204 (1986)69

Activation energy for charge transfer reactions in membranes. Proton-translocating proteins 204 (1986)245

Activation energy of electrode reactions: the non-local effects 228(1987)329

Active substance

In vivo measurements of the translocation of electrochemically active substances across a biomembrane 231(1987)519

Activity coefficient

Activity coefficients for aqueous Na_2Succ solutions from emf measurements 230(1987)69

Determination of activity coefficients in aqueous solutions of trichloroacetic acid from emf measurements at 25 °C 230(1987)77

Activity coefficients of potassium salts in concentrated bovine serum albumin solutions 231(1987)489

Ac treatment

Activation of carbon fiber microelectrodes by alternating current electrochemical treatment 234(1987)119

Ac voltammetry

The interfacial behaviour of guanosine mono-, di- and triphosphate in solutions of varying pH at charged interfaces 212(1986)497

Voltammetric studies on the adsorption and association of cytidine dinucleotides in solutions of varying pH at charged interfaces 214(1986)391

Ac voltammetry: a control method for the damage to DNA caused in vitro by alkylating mutagens 227(1987)11

Direct and alternating current voltammetry at an HMDE in solutions containing activated charcoal suspension 239(1988)91

Acyclic polyamine

Polarographic study on the interaction between alkali metal cations and acyclic polyamines in acetonitrile 209(1986)297

Ad-atom

Electrocatalysis by ad-atoms. Part XVII. Electronegativity effect on oxygen donation by oxygen-adsorbing ad-atoms and steric hindrance by alkyl groups in S_{hole} control in aldehyde oxidation 201(1986)23

Underpotential deposition and electrocatalysis 201(1986)217

Electrocatalysis by ad-atoms. Part XVIII. Enhancement of carbon monoxide oxidation on rhodium and iridium electrodes by oxygen adsorbing ad-atoms 202(1986)125

Electrocatalysis by ad-atoms. Part XIX. Geometrical requirement in the oxygen donation step in glyoxylic acid oxidation enhanced by ad-atoms 202(1986)137

Electrocatalysis by ad-atoms. Part XX. Rate-determining step in methanol oxidation enhanced by oxygen-adsorbing ad-atoms 209(1986)151

Kinetics and mechanism of H and OH electrosorption on faceted (100) Pt electrodes in acid solutions 227(1987)183

Electrocatalysis by ad-atoms. Part XXI. Catalytic effects on the elementary steps in methanol oxidation by non-oxygen-adsorbing ad-atoms 229(1987)385

Electrocatalysis by ad-atoms. Part XXII. S_{hole} control by ad-atoms on HCOOH oxidation 249 (1988)253

Electrocatalysis by ad-atoms. Part XXIII. Design of platinum ad-electrodes for formic acid fuel cells with ad-atoms of the IVth and the Vth groups 250(1988)117

Electrochemical behavior of cytochrome *c* at a gold electrode modified by various (Cu, Sn, As, Sb, Bi, S and Se) ad-atoms 250(1988)201

Adenine

Electrochemical reduction of *ε*-adenine, *ε*-adenosine, and *ε*-NAD^+ in aqueous media 212 (1986)287

Adenine nucleotide

Reduction of adenine nucleotides at the mercury electrode 211(1986)317

Adenosine

Electrochemical reduction of *ε*-adenine, *ε*-adenosine, and *ε*-NAD^+ in aqueous media 212 (1986)287

Adhesion

Synthesis and characterization of new polyvinylchloride membranes for enhanced adhesion on electrode surfaces 202(1986)75

Adiabatic charge transfer

Quantum transition state theory: transport of a heavy charged particle 204(1986)85

Adiabatic electron transfer

A theory of adiabatic electron-transfer reactions 204(1986)31

Adiabatic limit

Dynamics of adiabatic electron transfer reactions at metal electrodes 230(1987)43

Adiabatic reaction

A unified model of the adiabatic reactions of electron transfer at metal electrodes 241(1988)45

Ad-ion

On the coverage dependence of the partial charge transfer coefficient 202(1986)1

Possible importance of adions in both the binding of Lewis bases and the electrocatalytic oxidation of dissolved organics at gold electrodes in aqueous media 210(1986)69

Adlattice

Adlattice structure and hydrophobicity of Pt (111) in aqueous potassium iodide solutions. Influence of pH and electrode potential 222 (1987)305

Lateral modification and organization of mixed adlattices on polycrystalline platinum electrodes 230(1987)205

Adlayer

Structural effects in electrocatalysis. Oxidation of D-glucose on Pt (100), (110) and (111) single crystal electrodes and the effect of upd adlayers of Pb, Tl and Bi 242(1988)221

Admittance

Electrochemical study of the polycrystalline gold electrode in dimethylsulphoxide 226(1987)295

The admittance of a simple electrocatalytic process coupled with an additional electrochemical adsorption reaction 240(1988)53

Adrenaline

Influence of polishing and of electrochemical pretreatment on the performance of glassy-carbon electrodes in electrochemical detection 201(1986)11

Adrenergic blocker

Transmembrane potentials in bilayer lipid membrane (BLM) induced by calcium channel and *β*-adrenergic blockers 212(1986)13

Adriamycin

Interaction of cationic drugs with lipids of the spinach thylakoid membrane 211(1986)497

Electrochemical study of the mechanism and kinetics of reductive glycoside elimination of adriamycin adsorbed on a mercury electrode surface 225(1987)187

Electrocatalytic reduction of oxygen at a pyrolytic graphite electrode modified by adriamycin and its 7-deoxyaglycone 246(1988) 385

Adsorbate

Raman spectroscopy of adsorbates on thin film electrodes deposited on silver substrates 217 (1987)397

Comparative study of CO adsorbates for different structures of platinum surfaces 227(1987)199

Identification of the adsorbate during methanol oxidation 229(1987)367

Direct proof of the hydrogen in the methanol adsorbate at platinum — an ECTDMS study 229(1987)377

Adsorbed film

Human fibrinogen adsorption onto surface-energy-controlled substrata 212(1986)27

Adsorbed hydrogen

In-situ X-ray diffraction studies of Pt electrode/solution interfaces 229(1987)125

Adsorbed intermediate

Kinetic theory of the open-circuit potential decay method for evaluation of behaviour of adsorbed intermediates. Analysis for the case of the H_2 evolution reaction 221(1987)1

COH and CO as adsorbed intermediates during methanol oxidation on platinum 238(1987)383

Adsorbed reactant

Square-wave voltammetry of an adsorbed reactant 248(1988)239

Adsorption

Adsorption of *p*-nitroaniline on platinum studied by modulated reflectance spectroscopy 201 (1986)163

Infrared spectra of carbon monoxide adsorbed on a smooth gold electrode. Part I. EMIRS spectra in acid and alkaline solutions 201(1986) 175

Radiotracer study of the adsorption of sulphuric acid on rhodized electrodes 201(1986)187

The model of two parallel condensers and the application of the Helmholtz formula to adsorption of polar surfactants from aqueous solutions 201(1986)247

1,1′-Trimethylenebisthymine as synthetic model of dinucleotide TpT. Electrochemical reduction 201(1986)329

On the adsorption of aliphatic alcohols on gold. Part II 201(1986)387

Adsorption and anodic oxidation of glycylglycine and some amino acids on a gold electrode 202(1986)147

Mechanism of electron transfer through monomolecular films of neutral organic species adsorbed at an electrode surface 202(1986)169

The determination, by ellipsometry, of the mode of adsorption on gold of some promoters of redox-protein direct electrochemistry 202(1986) 303

A theory of adiabatic electron-transfer reactions 204(1986)31

Adsorption on well-defined solid surfaces. Chloride adsorption on a (110) face of silver 204(1986)291

Adsorption of aliphatic monoethers of ethylene glycol (alkoxyethanol) at the free water surface and at the Hg/solution interface 204(1986)299

In situ infrared reflectance spectroscopic study of the adsorption of formic acid at a rhodium electrode 204(1986)315

Surface properties of polycrystalline platinum and their influence on formic acid oxidation 205(1986)151

A radiotracer study of the adsorption of H_2SO_4 at ruthenium electrodes 205(1986)259

Electrochemical adsorption behaviour of platinum stepped surfaces in sulphuric acid solutions 205(1986)267

Selective inhibition by tetraphenylphosphonium chloride 205(1986)299

Specific adsorption of ascorbate ions on a mercury electrode in the presence of potassium perchlorate 206(1986)285

Radiotracer study of the adsorption of H_2S at a platinized platinum electrode 206(1986)297

Direct evidence for interfacial condensation in the adsorption of tetrabutylammonium ions 206 (1986)307

Adsorption of pyridine at the polycrystalline gold–solution interface 207(1986)213

Electrochemical adsorption and phase formation on mercury in oxalate ion solutions 207(1986)263

Infrared spectra of carbon monoxide adsorbed on a smooth gold electrode. Part II. EMIRS and polarization-modulated IRRAS study of the adsorbed CO layer in acidic and alkaline solutions 207(1986)293

On the problem of phase transitions in electrochemical adsorption reactions 208(1986)69

Adsorption of chloride at the mercury/aqueous $LaCl_3$ interface 209(1986)183

Adsorption of 2,3-dimethylpyridine at the mercury/electrolyte interface 209(1986)203

Criteria of choice of adsorption parameters in the Grahame–Parsons model. Cesium adsorption on bismuth 209(1986)233

Adsorption of Tl(I) on mercury in azide media 209(1986)361

Investigation of chloroform adsorption on a platinum electrode by the tracer method 210 (1986)161

Adsorption of *N*-acetylglycine and *N*-benzoylglycine at the mercury–aqueous solution interface 210(1986)181

A potential- and charge-consistent model for the adsorption dependence of the semiconductor flatband potential 210(1986)197

Ionic adsorption from mixed electrolyte solutions at constant cationic strength 213(1986)327

Adsorption and film formation of uracil derivatives at the mercury/electrolyte interface in the presence of different supporting electrolytes 213(1986)339

Oxygen reduction on vacuum-deposited and adsorbed transition-metal phthalocyanine films 214(1986)523

Adsorption and reduction of formic acid on p-type silicon electrodes 215(1986)307

The effect of adsorbed carbon monoxide on hydrogen adsorption and hydrogen evolution on platinum 215(1986)357

Standard states and standard adsorption Gibbs energy of substances at electrode interfaces 216 (1987)21

On the adsorption of cadmium(II) ions on a HMDE from KF + thiourea aqueous solutions. A chronocoulometric study 216(1987)273

Comparison of experiments with calculations using double-layer models. Specific adsorption of Cs^+ on bismuth 218(1987)65

Irreversibility and reactant adsorption in differential pulse polarography 218(1987)77

Effect of overlying layers on the kinetics of multilayer adsorption involving electron transfer 218(1987)331

Digital simulation of the channel flow-through electrochemical cell. A theoretical study of the determination of solute adsorption on modified electrodes 222(1987)117

Kinetics of adsorption of electroinactive species at electrode surfaces. Alternating voltage excitation regime 222(1987)281

Comparison and discussion of some theories of the equilibrium electrical double layer in liquid electrolytes 223(1987)1

Redox reactions of quinones on carbon materials 223(1987)161

Adsorption of fulvic-like organic ligands and their Cd and Pb complexes at a mercury electrode 223(1987)235

Reactant adsorption in pulse polarography. Part V. Predominant adsorption of product 223 (1987)271

The galvanostatic double-pulse method in the study of the kinetics of stepwise electrode processes involving the adsorption of intermediates 224(1987)67

On the formation of two-dimensional condensed films at the interface mercury/ferron aqueous buffered solutions 224(1987)237

Raman spectroscopic investigation of aniline: adsorption and polymerisation 224(1987)253

Investigation of the adsorption kinetics of 2,3-dimethylpyridine at the mercury/electrolyte interface 224(1987)261

Adsorptive stripping voltammetric behaviour of folic acid 225(1987)241

The analysis of vibrational spectra of species adsorbed at the electrode–solution interface. A theoretical model for the effects of potential on the observed spectra 225(1987)267

Square-wave voltammetric peak current enhancements by adsorption and reversibility of the redox reaction 226(1987)239

Electrochemistry and photoelectrochemistry of chlorophyll on a metallic electrode. Part I. Properties of chlorophyll adsorption films on metals 227(1987)99

Adsorption of a mixture of sodium dodecyl sulphate and dodecyl alcohol on a mercury electrode and its effect on the electrochemical processes of cadmium(II) in sodium chloride solution 227(1987)129

Complexation and adsorption of thiourea in sulphate medium on electrochemically roughened silver electrodes 227(1987)159

Reinvestigation of the potential dependence of the adsorption of acetic acid on platinum electrodes by a radiotracer method 227(1987)223

Adsorption of phospholipids at the interface between two immiscible electrolyte solutions 227(1987)281

Aspects of the adsorption of chloride on silver revealed through surface enhanced Raman scattering 228(1987)229

The interaction of Br with Ag (110): comparison of electrochemical and gas-phase adsorption measurements 229(1987)87

Comparison of the ionic adsorption theories for the electrode/solution interface by computer simulation 234(1987)31

Adsorption of ferricyanide at Pt (111) as a function of electrode potential studied by Auger spectroscopy 234(1987)229

Effect of surface crystallographic orientation upon specific adsorption of azide at silver electrodes as examined by potential-difference infrared spectroscopy 235(1987)327

Voltammetric maxima of the third kind from reactant adsorption at the HMDE 235(1987)343

Ionic adsorption and the surface dipole potential 235(1987)387

On adsorption according to the lattice gas model (Ising model) 236(1987)21

Interfacial behaviour of oligoriboadenylates at the mercury–solution interface 237(1987)261

Electrochemical and photochemical oxidation of the deazapurine nucleotide drug tubercidin-5′-monophosphate 239(1988)161

Adsorption of alkanes on a bismuth electrode from an alcoholic medium 239(1988)333

Comparative electrochemical studies of *N*-methyl-*N*′-hexadecyl viologen monomolecular films formed by irreversible adsorption and the Langmuir–Blodgett method 239(1988)441

The admittance of a simple electrocatalytic process coupled with an additional electrochemical adsorption reaction 240(1988)53

Adsorption in double potential step chronocoulometry 241(1988)89

Radiotracer study of the adsorption of taurine at a platinized platinum electrode 241(1988)343

Adsorption of phospholipids at the interface between two immiscible electrolyte solutions. Part I. Equilibrium adsorption of phosphatidylcholines at the water/nitrobenzene interface 242(1988)277

The electrochemical reduction of oxygen on passive iron in alkaline solutions 243(1988)171

An irreversible structure sensitive adsorption step in bismuth underpotential deposition at platinum electrodes 243(1988)419

Underpotential deposition of silver on polyfaceted and electrochemically faceted Pt (100) electrodes. Application of the combined adsorption–desorption–nucleation and growth mechanism 244(1988)261

On the theory of ionic adsorption from binary electrolyte solutions at electrodes 246(1988)247

On the influence of adsorption of electroactive species on the polarographic determination of stability constants 246(1988)271

The adsorption of β-cyclodextrin on a dropping mercury electrode from aqueous solutions 246 (1988)423

Potentiostatic response when reactant and product are adsorbed at an electrode expanding with any power law or at a DME (expanding sphere electrode model) 247(1988)99

Theory of the EE mechanism with adsorption of the intermediate at an electrode expanding with any power law or at a DME (expanding sphere electrode model) 247(1988)119

An in-situ surface Fourier transform infrared study of the adsorption of isoquinoline at a stationary mercury electrode 247(1988)277

Adsorption of dicarboxylic ions on the (311) face of gold from solutions at constant cationic strength 248(1988)209

Adsorption of dimethylsulphoxide on the polycrystalline gold electrode from aqueous solutions 248(1988)399

Radiotracer study of the adsorption of Ca^{2+} ions on a platinized platinum electrode in acid medium 248(1988)411

The surface dipole moment of species adsorbed from a solution 249(1988)25

The adsorption of aniline on gold: a SERS study 250(1988)143

Adsorption coefficient

Adsorption of β-cyclodextrin on the mercury electrode from water and a water + ethanol mixture 247(1988)287

Adsorption isotherm

The adsorption of RNAse *A*, BSA and cytochrome *c* at the graphite powder | liquid interface using in parallel the adsorption isotherm plot and linear sweep voltammetry on graphite paste electrode 211(1986)103

Adsorption kinetics

Implicit calculation of boundary values in digital simulation applied to several types of electrochemical experiment 240(1988)27

Adsorption / nucleation mechanism

Phase transitions in mercury + quinoline derivative systems. The anodic formation of Hg(I)–8-hydroxyquinoline-5-sulfonic acid chelate 202(1986)203

Adsorption time

Pulsed amperometric detection of sulfur compounds. Part II. Dependence of response on adsorption time 209(1986)171

Adsorption voltammetry

The influence of ultra-violet irradiation on the determination of nickel and cobalt in natural waters by adsorption voltammetry 214(1986)21

Adsorptive accumulation

Stripping voltammetry with adsorptive accumulation for trace measurements of titanium 208(1986)383

Voltammetric determination of cyadox using adsorptive accumulation in a flow-through system 214(1986)115

Square-wave voltammetry of an adsorbed reactant 248(1988)239

Adsorptive preconcentration

Adsorptive stripping voltammetry of biomacromolecules with transfer of the adsorbed layer 214(1986)359

Adsorptive stripping differential pulse voltammetry

Adsorption stripping voltammetry of different solvated species of chlorophyll a in water + acetone mixtures 249(1988)89

Adsorptive stripping voltammetry

Trace measurements of tetracyclines using adsorptive stripping voltammetry 211(1986)147

Adsorptive stripping voltammetry of biomacromolecules with transfer of the adsorbed layer 214(1986)359

Determination of cytochrome *c* by adsorptive stripping voltammetry 221(1987)257

The application of adsorptive stripping voltammetry for a study of the reaction of human serum albumin with anti-human serum albumin 235(1987)317

Aerobic growth

An electrochemical study of energy-dependent potassium accumulation in *E. coli*. Part XI. The Trk system in anaerobically and aerobically grown cells 211(1986)417

Agarose

Electrode films of porous agarose impregnated with Nafion. Structural heterogeneity and its effects on electron transport 207(1986)73

Aging

Electrochemical oxidation of CO on Pt in acidic and alkaline solutions. Part I. Voltammetric study on the adsorbed species and effects of aging and Sn(IV) pretreatment 241(1988)163

Air pollution

Electromagnetic smog — a damage and stress factor? 231(1987)441

Alamethicin

Alamethicin induced conductances in lipid bilayers. Part II. Decomposition of the observed (compound) process 214(1986)427

Alamethicin induced conductances in lipid bilayers. Part III. Derivation of the properties of the elementary process from the (compound) observed process 214(1986)441

Albumin

The chlordiazepoxide–albumin binding. A bioelectrochemical approach 212(1986)471

Alcohol

Effects of L-ascorbic acid and its palmitoyl derivative on the peroxidation of linoleic acid in aqueous solutions containing alcohol 232(1987) 163

Active oxygens and the peroxidation of linoleic acid catalysed by degraded species of ascorbic acid 232(1987)171

Adsorption of alkanes on a bismuth electrode from an alcoholic medium 239(1988)333

Aldehyde

Electrocatalysis by ad-atoms. Part XVII. Electronegativity effect on oxygen donation by oxygen-adsorbing ad-atoms and steric hindrance by alkyl groups in S_{Ncbe} control in aldehyde oxidation 201(1986)23

Polarographic reduction of aldehydes and ketones. Part XXIV. Electroreduction of pyridinecarboxaldehydes in acidic solutions 213 (1986)245

Polarographic reduction of aldehydes and ketones. Part XXV. Electroreduction of pyridinecarboxaldehydes in aqueous buffered solutions 213(1986)255

Polarographic reduction of aldehydes and ketones. Part XXVI. Electroreduction and electrooxidation of pyridinecarboxaldehydes in alkaline solutions 213(1986)277

Polarographic reduction of aldehydes and ketones. Part XXVII. 1-Phenyl-1,2-propanedione 214(1986)237

Polarographic reduction of aldehydes and ketones. Part XXVIII. 1,2-Cyclohexanedione 214(1986)259

Formation, reactions and toxicity of aldehydes produced in the course of lipid peroxidation in cellular membranes 232(1987)187

Investigations on the oxidation of the carbamate pesticide Aminocarb 239(1988)187

Algorithm

Porous electrode modelling: quasi-stationary state 205(1986)91

Determination of the individual electrochemical parameters from a composite single dc wave by the Gauss–Newton method 206(1986)81

Amalgam concentration at the surface of a spherical mercury electrode following a potential step 218(1987)41

Aliphatic alcohol

On the adsorption of aliphatic alcohols on gold. Part II 201(1986)387

Alizarin red S

Charge-transport rates in polyelectrolyte films on electrodes. Disparate diffusion coefficients for alizarin red S with two separate electroactive centers 247(1988)339

Alkali etching

Hydrogen photoevolution at p-type silicon electrodes coated with discontinuous metal layers 228(1987)97

Alkali hydroxide

Chemical and electrochemical behaviour in molten alkali hydroxides. Part II. Electrochemistry of chalcogenide ions in the molten NaOH + KOH (49 mol%) eutectic mixture 250(1988)327

Alkali metal carbonate

Simulation of cyclic voltammetry for the linked mechanism of the hydrogen electrode reaction in molten carbonates 249(1988)155

Alkali metal ion

Ion carrier properties of nigericin studied by voltammetry at the interface of two immiscible electrolyte solutions 204(1986)267

Polarographic study on the interaction between alkali metal cations and acyclic polyamines in acetonitrile 209(1986)297

Electrochemical behaviour of cellulosic cation membranes. Bi-ionic potentials in alkali systems 211(1986)113

Surface ion pairing between electrochemically treated glassy carbon and alkali metal ions in acetonitrile 217(1987)453

Polarographic studies on the interaction between macrocyclic compounds and cations or acids in acetonitrile 234(1987)251

Alkaline phosphatase

Electrochemical conversion of lactoperoxidase, ceruloplasmin and alkaline phosphatase on mercury electrodes 211(1986)407

Electrochemical regulation of immobilized alkaline phosphatase activity 212(1986)205

Alkaline solution

Pulsed amperometric detection of sulfur compounds. Part I. Initial studies at platinum electrodes in alkaline solutions 209(1986)159

A photoelectrochemical study of passive copper in alkaline solutions 210(1986)213

Oxygen reduction on the Au (311) electrode surface in alkaline electrolyte 240(1988)239

Alkaloid

Square-wave voltammetry of berberine 219 (1987)281

Alkane

Adsorption of alkanes on a bismuth electrode from an alcoholic medium 239(1988)333

Alkylating agent

Charge transfer mechanism for carcinogenesis by alkylating and other agents 211(1986)305

Alkylation

Ac voltammetry: a control method for the damage to DNA caused in vitro by alkylating mutagens 227(1987)11

Alkyl iodide

Electroreduction of primary alkyl iodides in acetonitrile 226(1987)27

Alloxan

Derivation and experimental verification of approximate explicit equations in differential pulse polarography. Part III. Diagnostic criteria for characterization of first-order processes 241 (1988)291

Alloy

Application of an electroanalytical method to metal phase analysis 242(1988)63

Partial charge transfer in the underpotential deposition of metals. Part I. On the nature of the deposits and the kinetics of their formation 245 (1988)1

Electroreduction of Ni^{2+} and Fe^{2+} in a fused electrolyte. Formation of a two-component alloy and the role of the underpotential deposition 248(1988)369

Allyl halide

Electrocatalytic reactions in organized assemblies. Part III. Reduction of allyl halides by bipyridyl derivatives of cobalt in anionic and cationic micelles 240(1988)217

Alternating voltage

Kinetics of adsorption of electroinactive species at electrode surfaces. Alternating voltage excitation regime 222(1987)281

Alumina

Microporous aluminum oxide films at electrodes. Part II. Studies of electron transport in the Al_2O_3 matrix derivatized by adsorption of poly(4-vinylpyridine) 207(1986)49

Impedance studies of the cell Ag/Ag beta″ alumina/Ag 228(1987)417

Carbon composite electrodes containing alumina, layered double hydroxides, and zeolites 243 (1988)209

The role of oxygen ion diffusion in the electrode reactions of β'' alumina 244(1988)123

Aluminium

On the kinetics of the cathodic deposition of aluminium on glassy carbon and tungsten electrodes from $AlCl_3$ + NaCl + KCl melts 210 (1986)127

Application of cyclic voltammetry to the study of diffusion and metalliding processes 244(1988) 61

Electrodeposition of aluminium in aluminium chloride/1-methyl-3-ethylimidazolium chloride 248(1988)431

Aluminium bromide

Double-layer studies in a non-polar solvent consisting of Al_2Br_6 and KBr in ethylbenzene 229(1987)165

Aluminium chloride

The impedance of the Li^+/Li electrode in $SOCl_2$ containing acid electrolyte 237(1987)275

Aluminium electrode

Recent improvements in the study of the electrochemical interface by surface plasmon excitation 204(1986)229

Electrochemical formation of LiAl alloy in molten dimethylsulfone at 150 °C 209(1986)283

Effect of the addition of chloride on the anodic dissolution of aluminium through barrier films 242(1988)303

Aluminium ion

Potentiometric titration of aluminium with fluoride in organic solvent + water mixtures by use of a fluoride-selective electrode 248(1988)87

Amalgam

Effect of sphericity on the voltammetric (polarographic) log plot for reversible amalgam formation 218(1987)1

Amalgam concentration at the surface of a spherical mercury electrode following a potential step 218(1987)41

Electrode reactions at extremely negative potentials. Part II. The kinetics of the Ba(II)/Ba(Hg) electrode reaction in aqueous perchlorate solutions 236(1987)177

On the nature of the transfer coefficient for ion transfer reactions 250(1988)225

Amalgamated electrode

Product-selective electroreduction of 2,3,4,5,6-pentafluorobenzoic acid to 2,3,4,5,6-pentafluorobenzyl and 2,3,5,6-tetrafluorobenzyl alcohols using solid cathodes in aqueous sulfuric acid 238(1987)315

Amalgam electrode

Extension of the sensitivity limit of amalgam electrodes, in dilute aquatic media, based on the study of their oxidation process 236(1987)67

Amalgam formation

Pulse polarography: influence of amalgam formation on the current–potential curves in normal pulse polarography, reverse pulse polarography, differential normal pulse polarography and differential pulse polarography for a slow charge-transfer step 243(1988)241

Amalgam voltammetry

Amalgam voltammetric approach to heavy metal speciation in natural waters. Part I. Theoretical aspects and methodology 246(1988)15

Amavadine

Mediators for the oxidation of glutathione and other biological thiols 245(1988)131

Amino acid

Adsorption and anodic oxidation of glycylglycine and some amino acids on a gold electrode 202(1986)147

Electroanalytical chemistry of copper, lead and zinc complexes of amino acids at the ionic strength of seawater (0.70 *M* $NaClO_4$). Part III 208(1986)137

Amino-acid-modified gold electrode

Direct electrochemistry of horse-heart cytochrome *c* at amino acid-modified gold electrodes 213(1986)333

Aminoacridine

Use of 9-aminoacridine in the evaluation of liposome surface charge density: role of the adsorption on lipidic sites 231(1987)277

Aminoacrylic acid derivative

The electrochemistry of 2-aminoacrylic acid derivatives in acidic media as studied by background corrected pulse polarographic techniques and controlled potential electrolysis 218(1987)213

Aminocarb

Investigations on the oxidation of the carbamate pesticide Aminocarb 239(1988)187

Aminodiphenylamine

Growth mechanism in the electropolymerization of aniline and *p*-aminodiphenylamine 215(1986) 401

A conducting polymer derived from *para*-aminodiphenylamine 221(1987)69

Aminohydrazinothiotriazole

Inhibition of the acid corrosion of steel by 4-amino-3-hydrazino-5-thio-1,2,4-triazoles 246 (1988)433

Aminophenanthroline

Electrooxidative and electroreductive polymerization of 5-amino-1,10-phenanthroline ligand, iron and cobalt complexes in acetonitrile media 238(1987)197

Electrochemical behavior of 5-amino-1,10-phenanthroline and oxidative electropolymerization of tris[5-amino-1,10-phenanthroline]iron(II) 239(1988)175

Aminophenol

Amperometric determination of total amylase 246(1988)307

Aminophenylporphyrin

Redox and electrocatalytic properties towards dioxygen reduction of ruthenium tetra(*ortho*-aminophenyl)porphyrin complexes with various axial ligands 246(1988)139

Aminopyridine

Mechanism of the electrochemical oxidation of 2-aminopyridine at a pyrolytic graphite electrode 242(1988)209

Aminothiol

Electrochemical behaviour of aminothiol radioprotectors 212(1986)427

Aminotrinitrobenzene

Voltammetric and spectral study of some aminotrinitrobenzenes and their radical anions 214(1986)213

Ammonia

Photoassisted and electrochemical reduction of nitric acid to hydroxylamine and ammonia 209 (1986)405

Taking advantage of liquid ammonia to control the surface modification of silicon electrodes 216(1987)101

A study on the mechanism of the electrochemical reduction of the cobalt–dimethylglyoxime system in NH_3/NH_4Cl 216(1987)181

Electrocatalytic reduction of nitrate and nitrite to hydroxylamine and ammonia using metal cyclams 224(1987)199

Erratum on the determination of the shift between the potential scales in liquid ammonia solutions and in aqueous solutions 225(1987)263

In situ modification of the energetic structure of the n-GaP/NH_3 junction in the presence of solvated electrons 246(1988)29

Ammonium acetate

Electrodeposition of lead on copper in acidic ammonium acetate solutions 243(1988)435

Ammonium nitrate

Potentiometric study of the cadmium(II)–chloride and cadmium(II)–bromide association equilibria in ammonium nitrate + dimethyl sulphoxide melts 225(1987)111

Amnion

Temperature effect on ion transport through the isolated human amnion. Part I. Electrophysiological studies 211(1986)383

Effect of external anion substitution on the conductance of the isolated human amnion 211 (1986)431

Amniotic membrane

The human amniotic membrane: One membrane or several membranes? 211(1986)427

Amorphous metal

Electrocatalysis by amorphous metals of hydrogen and oxygen evolution in alkaline solution 201(1986)61

Amperometric electrode

Amperometric enzyme electrodes. Part III. A conducting salt electrode for the oxidation of four different flavoenzymes 218(1987)119

Amperometric enzyme electrodes. Part IV. An enzyme electrode for ethanol 218(1987)127

Amperometry

Kinetic model of amperometric selective electrodes with immobilized bacteria 212(1986)5

Amperometric detection of nitrates using a flow-through membrane detector 214(1986)125

Electrochemical detection for liquid chromatography using the wall–jet cell/ultramicroelectrode detector 216(1987)115

Electrochemical immobilisation of enzymes. Part I. Theory 224(1987)27

Amperometric immunoassays 231(1987)89

Comparative studies of electrochemical phase formation by amperometric and microscopic methods. Part I. Nucleation kinetics in dilute solutions of mercury nitrate 235(1987)237

Comparative studies of electrochemical phase formation by amperometric and microscopic methods. Part II. Nucleation kinetics in the presence of surfactants 235(1987)249

Amperometry at precipitate-based electrodes 242(1988)77

Amperometric determination of total amylase 246(1988)307

The behavior of microdisk and microring electrodes. Mass transport to the disk in the unsteady state. Chronopotentiometry 250(1988) 257

Amylase

Amperometric determination of total amylase 246(1988)307

Anaerobic growth

An electrochemical study of energy-dependent potassium accumulation in *E. coli*. Part XI. The Trk system in anaerobically and aerobically grown cells 211(1986)417

Anaesthetic gas

The electro-reduction of the anaesthetic gas isoflurane 244(1988)203

Analysis

The transfer of anions at the aqueous/organic solutions interface studied by current-scan polarography with the electrolyte dropping electrode 210(1986)147

Analytical application of submicroelectrodes in solutions containing little or no supporting electrolyte 213(1986)189

Improved method of the determination of traces of surfactants by means of suppression of the polarographic maximum of the first kind 218 (1987)93

Spectroelectrochemical determination of trace concentrations by diffusion layer imaging 220 (1987)41

The sodium responsive tungsten bronze electrode. An electrode for sodium ion analysis of DNA solutions 220(1987)225

Surface-enhanced Raman scattering (SERS) on silver electrodes as a technical tool in the study of the electrochemical reduction of cyanopyridines and in quantitative analysis 220 (1987)339

Quantitative analysis of the distribution of the hydrogen adsorption states at platinum surfaces. Part I. Application to Pt (100) in sulphuric acid medium 225(1987)205

A kinetic analysis of the oxidation of methanol at platinum-based electrodes by quantitative determination of the reaction products using liquid chromatography 225(1987)281

Polarographic analysis of human serum albumin–benzodiazepine interactions 231(1987) 535

Singlet oxygen in biological systems 232(1987)91

An electroanalytical approach to the determination of lipid peroxides 232(1987)127

Characterization and rapid evaluation of electrochemically oxidizable components in normal and pathological urine 232(1987)137

Quantitative analysis of the distribution of the hydrogen adsorption states at platinum surfaces. Part II. Application to Pt (110), stepped and polyoriented platinum surfaces in sulphuric acid medium 233(1987)251

Determination of trace water in propylene carbonate using hexafluoroacetone 234(1987)107

Voltammetric determination of indole in micellar and emulsified media 234(1987)175

Determination of antimony in seawater by cathodic stripping voltammetry 235(1987)275

Chemical analysis of the ionic content of hydrous iridium oxide films 240(1988)171

Electroanalytical investigations. Part VIII. The use of an expanding simulation space in the simulation of electrochemical reaction–diffusion models with orthogonal collocation 241(1988)17

Quantitative analytical assay of small amounts of technetium by stripping chronopotentiometry at a glassy carbon electrode 241(1988)125

Application of an electroanalytical method to metal phase analysis 242(1988)63

Amperometry at precipitate-based electrodes 242(1938)77

Electroanalysis with modified carbon paste electrodes. Coordination trends, selectivity and sensitivity 242(1988)87

Improved electronic equipment for square-wave amperometry 244(1988)91

Electroanalytical study of the pesticide Guthion 244(1988)221

A voltammetric study of thiazolidine-4-carboxylic acid on mercury electrodes 245(1988) 157

Amperometric determination of total amylase 246(1988)307

Preparation and application of conducting polymers containing chemically active counterions for analytical purposes 247(1988)145

The transfer of carboxylate and sulphonate anions at the aqueous/organic solution interface studied by polarography with the electrolyte solution dropping electrode 249(1988)109

Aniline

Growth mechanism in the electropolymerization of aniline and *p*-aminodiphenylamine 215(1986) 401

Raman spectroscopic investigation of aniline: adsorption and polymerisation 224(1987)253

Electropolymerization of aniline intercalated in montmorillonite 233(1987)291

Spectroelectrochemical evidence for an intermediate in the electropolymerization of aniline 236(1987)189

Cyclic potential sweep electropolymerization of aniline. The role of anions in the polymerization mechanism 239(1988)387

Catalytic electrosynthesis of conducting polymers 244(1988)115

Electrochemical and electropolymerization reactions of undiluted anilines and pyrrole 245 (1988)321

The adsorption of aniline on gold: a SERS study 250(1988)143

Animal cell

Electroporative gene transfer (electrotransfection): a method for strain improvement of animal cells 231(1987)253

Anion

The reduction of Cr(III) in concentrated aqueous electrolytes at a DME. The influence of anions 210(1986)111

The transfer of anions at the aqueous/organic solutions interface studied by current-scan polarography with the electrolyte dropping electrode 210(1986)147

Cyclic potential sweep electropolymerization of aniline. The role of anions in the polymerization mechanism 239(1988)387

Anion adsorption

Experimental study of Volta potentials in water/nitrobenzene systems with anion adsorption 204(1986)273

Oxide formation on gold single crystal stepped surfaces 249(1988)291

Anion effect

Single crystal electrochemistry of rhodium. Anion effects and order/disorder transitions of clean and silver coated Rh (111) surfaces 244(1988)147

Anion equilibration

The kinetics of anion equilibration of human erythrocytes in phosphate-containing media of low chloride concentration 211(1986)67

Anion exchange membrane

Proton leakage through perfluorinated anion exchange membranes 210(1986)329

Anion size

Charge-controllable polypyrrole/polyelectrolyte composite membranes. Part II. Effect of incorporated anion size on the electrochemical oxidation–reduction process 224(1987)123

Anion sorption

Combined electrochemical and radiotracer study of anion sorption from aqueous solutions into polypyrrole films 230(1987)257

Anion substitution

Effect of external anion substitution on the conductance of the isolated human amnion 211 (1986)431

Anisotropic etching

The potential dependence of silicon anisotropic etching in KOH at 60 °C 238(1987)103

Annihilation

Anomalous transient behavior in the electrogenerated chemiluminescence of 9,10-diphenylanthracene 242(1988)107

Anodic coupling

Electroactive polymeric films from oxidative coupling of oligophenyls 213(1986)53

Electroactive charge transfer polymers from anodic coupling of dibenzo-crown ethers. Part III. Intrinsic redox properties and preliminary use as electrode modifiers 240(1988)117

Anodic dark current

Electronic non-equilibrium charge transfer kinetics in anodic dark and photocurrents on n-III–V-semiconductor electrodes 209(1986)259

Anodic deposition

Multiple layer formation in the anodic deposition of $Hg_2C_2O_4$ 227(1987)147

Anodic dissolution

On the role of chemical steps in the anodic dissolution of illuminated n-type GaAs electrodes 228(1987)77

Effect of the addition of chloride on the anodic dissolution of aluminium through barrier films 242(1988)303

Anodic film

Electrical and mechanical breakdown of anodic films on tungsten in aqueous electrolytes 248 (1988)99

Electrical breakdown and pitting in anodic films on tungsten in halogen ion-containing solutions 248(1988)117

Anodic oxidation

Adsorption and anodic oxidation of glycylglycine and some amino acids on a gold electrode 202(1986)147

Electroactive charge-transfer polymers from anodic coupling of dibenzo-crown ethers. Part II. Influence of the complexing properties of the polyether rings 206(1986)115

Complementary study of the mechanism of anodic chlorine evolution in nitromethane 210 (1986)251

Anodic oxidation of mercury in the presence of thioether acids. Methylthioacetic acid 213(1986) 65

Effect of the oxygen layer at solid Ru electrodes on hydrogen oxidation in acid solution 214 (1986)547

Investigation of two radical intermediates in the anodic oxidation of 1,4-dihydropyridines by electrochemiluminescence 215(1986)179

An investigation of the sulphur(−II)/sulphur(0) system on gold electrodes 216(1987)213

Electrochemical polymerization of paradialkoxybenzenes. Part I. Anodic oxidation of paradimethoxybenzene in dry acetonitrile 218 (1987)173

Some specific features of the catalytic role of upd foreign metal adatoms and water on the anodic oxidation of absolute methanol on Pt 221(1987)175

Anodic oxidation of heterogeneous germanium amalgam 226(1987)331

Kinetics of the anodic oxidation of isopropanol on chromium/titanium-oxide electrodes 229 (1987)339

Rotating-disc electrode studies of the anodic oxidation of iodide in concentrated iodine + iodide solutions 239(1988)149

Reactivity of carbonylmanganese radicals toward tributyltin hydride. Kinetics analysis of the anodic oxidation of $Mn(CO)_3[P(OPh)_3]_2^-$ 241 (1988)181

AES depth profiling of electrochemically grown γ-FeOOH 246(1988)53

Anodic peak potential

Correlation of the anodic peak potentials with the quantum mechanical properties of various vinyl compounds 237(1987)187

Anodic polarization

Electrochemical ring-opening polymerization of episulfides. Obtaining crystalline doped polyethylene and polypropylene sulfide films by anodic polarization 207(1986)117

Effect of Sb on the electrochemical properties of $Pb/PbSO_4/H_2SO_4$ and $Pb/PbO/PbSO_4/H_2SO_4$ electrodes 218(1987) 135

Anodic polymerization

Kinetics of polyaniline formation and redox processes 242(1988)243

Anodic stripping voltammetry

Theoretical considerations on square wave and differential pulse voltammetry applied in anodic stripping with use of mercury film electrodes 213(1986)177

Application of ASV for trace metal speciation. Part V. The pseudo-polarography of zinc by RGCE 214(1986)37

Application of ASV for trace metal speciation. Part VI. A computerized pseudopolarographic system 214(1986)95

Dc anodic stripping voltammetry at the mercury-film wall–jet electrode 215(1986)123

Trace metal speciation by ASV. Part VII. Interaction of zinc with Cl^-, NO_3^-, I^-, SO_4^{2-} and OH^- 226(1987)253

An iridium based mercury film electrode. Part II. Comparison of mercury-film electrode behaviors: theory versus reality 239(1988)113

Anodic stripping voltammetry at ultramicroelectrodes for metal speciation studies in aqueous solutions of low ionic strength 246 (1988)297

Anodic wave

Determination of stability constants from polarographic anodic signals for metal complexes with some S-containing ligands 241(1988)113

Anthracene

Background subtraction for rapid scan voltammetry 209(1986)77

Fast sweep cyclic voltammetry at ultra-microelectrodes. Evaluation of the method for fast electron-transfer kinetic measurements 243 (1988)321

Anthracene film

Background subtraction for rapid scan voltammetry 209(1986)77

Anthracycline

Mechanism of the electrochemical reduction of hydroxyiminoanthraquinones in DMF 207 (1986)151

Polarographic modelling of metabolic processes of cancerostatic anthracyclines 212(1986)135

Influence of the antitumour antibiotics daunomycin and violamycin B I on membranes of human erythrocytes. Passive electrical investigations 231(1987)81

Electrocatalytic reduction of oxygen at a pyrolytic graphite electrode modified by adriamycin and its 7-deoxyaglycone 246(1988) 385

Anthraquinone

Behaviour of some poly(pyrrole–anthraquinone) films in DMSO electrolytes 219(1987)165

Electrocatalytic reduction of O_2 at electrodes modified by films of redox polymers with anthraquinone moieties 225(1987)177

Electrochemical study of poly(PHAS) in acetonitrile and water + acetonitrile electrolytes 238(1987)183

Electrocatalytic effects of redox polymer films on the reduction of O_2 on silicon semiconductors 245(1988)191

Anthraquinone sulphonate

Phospholipid monolayers of di-oleoyl lecithin (di-O-PC) at the mercury/water interface. Effects on faradaic reactions 248(1988)167

Anti-human serum albumin

The application of adsorptive stripping voltammetry for a study of the reaction of human serum albumin with anti-human serum albumin 235(1987)317

Antibacterial activity

Electrochemical reduction of 2,4-diamino-5-(3,4,5-trimethoxybenzyl)-6-chloropyrimidine 213(1986)111

Antibiotic

Potentiometric measurement of lipoic acid reduction in microbial cultures. Part III. Experimental investigation and modeling of the effects exerted by beta-lactam antibiotics on the potential–time signals 231(1987)43

Antibody

Amperometric immunoassays 231(1987)89

Anticancer drug

Polarographic modelling of metabolic processes of cancerostatic anthracyclines 212(1986)135

Electrochemistry of platinum complexes. Part I. Polarographic reduction mechanism with reference to electrochemical detection 238(1987) 297

Antigen

Amperometric immunoassays 231(1987)89

Antihistaminic syrup

Diphenhydramine-sensitive membrane electrodes based on poly(vinylchloride) matrices and their use in drug analysis 233(1987)29

Antileukemic drug

Electrochemical oxidation of 6-thioguanine 207 (1986)101

Antimony

Determination of antimony in seawater by cathodic stripping voltammetry 235(1987)275

Antimony electrode

Effect of Sb on the electrochemical properties of $Pb/PbSO_4/H_2SO_4$ and $Pb/PbO/PbSO_4/H_2SO_4$ electrodes 218(1987) 135

Antineoplastic agent

Electrochemistry of podophyllotoxin derivatives. Part II. Oxidation of teniposide and some epipodophyllotoxin derivatives 220(1987)101

Antioxidative capacity

The effects of physical exercise on the antioxidative capacity of the liver 232(1987)231

Antiradiation drug

A voltammetric study of thiazolidine-4-carboxylic acid on mercury electrodes 245(1988) 157

Antitumour drug

Influence of the antitumour antibiotics daunomycin and violamycin B I on membranes of human erythrocytes. Passive electrical investigations 231(1987)81

Apical membrane potential

Enterocyte development studied by electrophysiological methods 212(1986)509

Applied field

On the representation of the applied field at a charged interface 227(1987)237

On the representation of the applied field at a charged interface: reply to remarks of P. Nikitas 227(1987)245

Applied potential

Raman spectroscopy investigation of the silver oxide/silver electrode. Influence of experimental conditions 227(1987)21

Approximate method

Derivation and experimental verification of approximate explicit equations in differential pulse polarography. Part II. Second-order processes 201(1986)237

Derivation and experimental verification of approximate explicit equations in differential pulse polarography. Part III. Diagnostic criteria for characterization of first-order processes 241 (1988)291

Approximation

Mass transport to channel and tubular electrodes: the "Singh and Dutt approximation" 238(1987)43

Aprotic medium

An electrochemical study of the molecular and ionic dissociation of NO_2Cl in aprotic media 209(1986)323

Electrocatalysis of the nitration of naphthalene by N_2O_4 in aprotic media 225(1987)125

Aprotic solvent

Ion-pair effects on the electroreduction and electrochromic properties of *ortho*-chloranil in dipolar aprotic solvents 216(1987)203

Aquatic medium

Extension of the sensitivity limit of amalgam electrodes, in dilute aquatic media, based on the study of their oxidation process 236(1987)67

Aqueous/organic solution interface

The transfer of anions at the aqueous/organic solutions interface studied by current-scan polarography with the electrolyte dropping electrode 210(1986)147

The transfer of carboxylate and sulphonate anions at the aqueous/organic solution interface studied by polarography with the electrolyte solution dropping electrode 249(1988)109

Aqueous pore

Transient aqueous pores in bilayer membranes: a statistical theory 211(1986)211

Conduction onset criteria for transient aqueous pores and reversible electrical breakdown in bilayer membranes 211(1986)229

Aqueous proton

The reorganization energy of the aqueous proton 249(1988)15

Aqueous solution

The solvation potential at the interface between water and methanol + water mixtures 215(1986) 63

Aquo complex

H/D isotope effect on outer sphere electron exchange 204(1986)21

ARMCO–iron substrate

The relationship between the underpotential deposition of zinc and the penetration of hydrogen in ARMCO–iron substrates 248(1988) 421

Aromatic anhydride

Electrochemistry of organic acceptor compounds: aromatic anhydrides 238(1987)215

Aromatic compound

Effect of non-aqueous solvents on the chemisorption and orientation of aromatic compounds at smooth polycrystalline platinum electrodes: naphthohydroquinone and tetrahydroxybiphenyl in water + acetonitrile solutions 201(1986)153

Solvent and ion pairing effects on the reaction entropy for the electroreduction of aromatic molecules 219(1987)209

The electrosorption valency of organic electrosorbates. Part II. Aromatic and heterocyclic compounds 229(1987)141

Aromatic ester

Electrochemical screening for electron acceptors: aromatic esters 207(1986)161

Aromatic nucleophilic substitution

Two-electron oxidation of *N,N,N′,N′*-tetramethyl naphthidine in acetonitrile. The reactivity of its dication to aromatic nucleophilic substitution by pyridine 201(1986)367

Electrochemically stimulated $S_{RN}1$ reactions on aromatic rings substituted by two leaving groups. The case of 4-bromo- and 2-bromo-phenyl methyl sulphones 218(1987)367

Array geometry

Diffusion to ensembles of microelectrodes 240 (1988)61

Arsenic ion

Dc polarographic study of catalytic hydrogen evolution in the Pt(IV)–As(III) system 247 (1988)329

Ascorbate ion

Specific adsorption of ascorbate ions on a mercury electrode in the presence of potassium perchlorate 206(1986)285

Radical-trapping antioxidants *in vitro* and *in vivo* 232(1987)219

Ascorbic acid

Effects of L-ascorbic acid and its palmitoyl derivative on the peroxidation of linoleic acid in aqueous solutions containing alcohol 232(1987) 163

Active oxygens and the peroxidation of linoleic acid catalysed by degraded species of ascorbic acid 232(1987)171

Structurally heterogeneous electrode films of acrylamide/vinylpyridine gels. Dynamics of ferricyanide mediated electrooxidation of ascorbic acid and their dependence on the electrode film structure and composition 236 (1987)113

Association equilibrium

Potentiometric study of the cadmium(II)–chloride and cadmium(II)–bromide association equilibria in ammonium nitrate + dimethyl sulphoxide melts 225(1987)111

Asymmetric membrane

Electrochemistry of asymmetric membranes 211 (1986)477

Atomic scale resolution

An in-situ scanning tunneling microscopy study of Au (111) with atomic scale resolution 248 (1988)451

Atomic stability

Study of the atomic stability of Ag (111) and Ag (100) electrodes in contact with NaF solutions 218(1987)319

ATP

Comparison of ATP synthesis efficiencies in ATPase proteoliposomes of different complexities 212(1986)167

ATPase

Absorption and conversion of electric field energy by membrane bound ATPases 211(1986)457

An investigation of $\Delta\tilde{\mu}_{H^+}$ activation of chloroplast ATPase 212(1986)111

Comparison of ATP synthesis efficiencies in ATPase proteoliposomes of different complexities 212(1986)167

Interaction of calmodulin antagonists with yeast. Comparison with the effect of miconazole, dio-9 and ethidium on Sr^{2+} uptake, K^+ efflux and plasmamembrane ATPase activity 212(1986)519

A spin probe study of the water associated with a steady-state level of phosphoenzyme of the Ca-ATPase 231(1987)457

The state of water associated with the phosphoenzyme of the Ca-ATPase of sarcoplasmic reticulum. A spin probe study 231 (1987)473

ATP synthase

Proton flow through the intramembrane sector of the ATP synthase complex of bovine heart mitochondria 231(1987)147

Auger electron spectroscopy

AES depth profiling of electrochemically grown γ-FeOOH 246(1988)53

Electro-oxidation of thiosulphate ion on gold. Study by means of cyclic voltammetry and Auger electron spectroscopy 250(1988)443

Auger spectroscopy

Electrodeposition of Pb onto Pt (111) surfaces containing iodine adlattices. Studies by low-energy electron diffraction and Auger spectroscopy 213(1986)293

Characterization of single-crystal electrode surfaces as a function of potential and pH by Auger spectroscopy and LEED. Pt (111) in aqueous $CaCl_2$ and HCl solutions 217(1987)101

Structure and composition of the Pt(s) [6(111) × (111)] step-terrace surface vs. pH and potential in aqueous Br^- solutions. Studies by LEED and Auger spectroscopy 217(1987)111

Adsorption of ferricyanide at Pt (111) as a function of electrode potential studied by Auger spectroscopy 234(1987)229

Electrochemical reactivity of 2,2′,5,5′-tetrahydroxybiphenyl and related compounds adsorbed at Pt (111) surfaces: studies by EELS, LEED, Auger spectroscopy and cyclic voltammetry 245(1988)253

Autocatalysis

Electron-transfer reactions and associated conformational changes. The effect of disproportionation on the oxidation of dixanthylene at elevated temperatures 233(1987) 63

Autocatalytic evolution

From biological membrane processes to industrial membrane technologies 231(1987)121

Autoinhibition

Electrochemical behaviour of 4-acetyl-1 phenoxyalkyl ammonium salts. An example of a system with adsorption of both substrate and reduction products 236(1987)253

Automation

Automatic on-line measurement of substrates in fermentation liquids with enzyme electrodes 231 (1987)399

Computer automation of polarographic analyzer PAR 384B and development of specific implementation software 250(1988)293

Autoxidation

Activation of oxygen by metal complexes and its relevance to autoxidative processes in living systems 232(1987)29

Avarol

Electrochemical reactivity of biologically active quinone/hydroquinone sesquiterpenoids on glassy carbon electrodes 231(1987)567

Avarone

Electrochemical reactivity of biologically active quinone/hydroquinone sesquiterpenoids on glassy carbon electrodes 231(1987)567

Axial ligand

Electrochemical and photoelectrochemical consequences of "doping" zinc tetraphenylporphyrin with axial pi acid ligands 221(1987)83

Redox and electrocatalytic properties towards dioxygen reduction of ruthenium tetra(*ortho*-aminophenyl)porphyrin complexes with various axial ligands 246(1988)139

Azide

Azide binding to cytochrome *c* oxidase. Effects on the oxidation–reduction and spectral properties of cytochromes *a* and a_3 231(1987) 369

Site of azide interaction with cytochrome *c* oxidase in submitochondrial particles from pigeon breast muscle 231(1987)383

Azide ion

Adsorption of Tl(I) on mercury in azide media 209(1986)361

Effect of surface crystallographic orientation upon specific adsorption of azide at silver electrodes as examined by potential-difference infrared spectroscopy 235(1987)327

The interpretation of solution electrolyte vibrational bands in potential-difference infrared spectroscopy 239(1988)55

Surface electrochemistry of the anodic N_2 generation reaction at Pt and Au, and the discovery of cathodic N_2 evolution 249(1988)217

Azo group

Electrochemical reduction of Fast Sulphone Black-F, a bisazo dye 235(1987)225

Azopyridine

Mechanism of the electrochemical oxidation of 2-aminopyridine at a pyrolytic graphite electrode 242(1988)209

B

Background correction

The electrochemistry of 2-aminoacrylic acid derivatives in acidic media as studied by background corrected pulse polarographic techniques and controlled potential electrolysis 218(1987)213

Background subtraction

Background subtraction for rapid scan voltammetry 209(1986)77

Backward feed and exhaust anode

Application of a backward feed and exhaust (BFE) type methanol anode to zinc electrowinning 205(1986)125

Reduction of the cell voltage in copper electrowinning by using the methanol BFE anode 246(1988)313

Bacteriorhodopsin

Charge motion inside the bacteriorhodopsin molecule 211(1986)437

Bacterium

Kinetic model of amperometric selective electrodes with immobilized bacteria 212(1986)5

Electroadsorption of bacteria on porous carbon and graphite electrodes 231(1987)175

Is DNA transport driven by the proton electrochemical potential difference in the naturally transformable bacteria, *Streptococcus pneumoniae*? 231(1987)269

Band-edge shift

In situ modification of the energetic structure of the n-GaP/NH_3 junction in the presence of solvated electrons 246(1988)29

Band electrode

Diffusion current at a band electrode by an integral equation method 215(1986)29

Electrochemical kinetics at microelectrodes. Part II. Cyclic voltammetry at band electrodes 215 (1986)49

Electrochemical kinetics at microelectrodes. Part III. Equivalency between band and hemicylinder electrodes 225(1987)33

Bandgap

On the accessibility of the bandgap on semiconductor interfaces by non-equilibrium Fermi energies of electrons and holes 239(1988)9

Barium ion

Electrode reactions at extremely negative potentials. Part II. The kinetics of the Ba(II)/Ba(Hg) electrode reaction in aqueous perchlorate solutions 236(1987)177

Barrier film

Effect of the addition of chloride on the anodic dissolution of aluminium through barrier films 242(1988)303

Base electrolyte ion

Study on the transfer of the base electrolyte ion TBA^+ across the water/nitrobenzene interface by the linear current scanning method 234(1987) 71

Base metal oxide

Base metal oxides as promotors for the electrochemical oxidation of methanol 240 (1988)349

Basicity

Electrochemical reduction of substituted nitrobenzenes in *N,N*-dimethylformamide containing proton donating agents. Effect of the double layer on the basicity of the nitro group 226(1987)61

Electro-organic reactions. Part 34. Kinetic basicities of some electrogenerated organic dianions and the competition between protonation and reproportionation 250(1988)373

Basic medium

Study of the electrooxidation of 1,2-propanediol on an Au electrode in basic medium 248(1988)193

Battery

Electrochemical formation of LiAl alloy in molten dimethylsulfone at 150 °C 209(1986)283

Effect of Sb on the electrochemical properties of $Pb/PbSO_4/H_2SO_4$ and $Pb/PbO/PbSO_4/H_2SO_4$ electrodes 218(1987) 135

A kinetic investigation of the manganese dioxide electrode with a rotating quartz frequency balance 228(1987)455

Rechargeable manganese oxide electrodes. Part II. Physically modified materials 238(1987)93

Belousov–Zhabotinsky system

The Belousov–Zhabotinsky system catalyzed by ferroin. Experimental behaviour and theoretical pattern 211(1986)485

Control of the oscillation parameters in the Belousov–Zhabotinsky system by means of mixed catalysts 231(1987)243

Benzene

Electrochemical preparation of a polyparaphenylene film and a polyparaphenylene/polyacrylamine functional film 229(1987)215

Solvent effect on electrochemical polymerization of aromatic compounds 242(1988)203

Benzimidazobenzophenanthroline polymer

A benzimidazobenzophenanthroline polymer molecular transistor fabricated using club sandwich electrodes 222(1987)193

Benzodiazepine

Charge transfer mechanism for benzodiazepine (BZ) action. Correlation of reduction potential of BZ iminium with structure and drug activity 212(1986)407

Polarographic analysis of human serum albumin–benzodiazepine interactions 231(1987) 535

Benzonitrile

Electrochemical and spectroscopic properties of dicobalt cofacial porphyrins in non-aqueous media. Influence of the interporphyrin distance on the redox, spectrophotometric and EPR properties of the cobalt centers 234(1987)277

Benzophenone

Polarographic behaviour and degradation studies of triazolam 214(1986)275

Benzoquinone

Catalysis of quinone–hydroquinone redox reactions at polypyrrole benzenesulphonate-coated platinum electrodes 220(1987)55

The lithium salt of benzoquinone radical anion and voltammetric anomalies 235(1987)357

The effect of carbon dioxide on the electroreduction of 1,4-benzoquinone 248(1988) 159

Benzotriazole

An electrochemical and SERS investigation of the influence of pH on the effectiveness of some corrosion inhibitors of copper 217(1987)187

Spectroelectrochemical study of the corrosion of a copper electrode in deaerated 1.0 *M* HCl solutions containing Fe(III). Effect of the corrosion inhibitor benzotriazole 220(1987)259

Benzoylglycine

Adsorption of *N*-acetylglycine and *N*-benzoylglycine at the mercury–aqueous solution interface 210(1986)181

Benzylviologen

Spectroelectrochemical behaviour of water bounded Chl *a* in the presence of various acceptors 231(1987)17

Berberine

Square-wave voltammetry of berberine 219 (1987)281

Beta-lactam antibiotic

Potentiometric measurement of lipoic acid reduction in microbial cultures. Part III. Experimental investigation and modeling of the effects exerted by beta-lactam antibiotics on the potential–time signals 231(1987)43

Betaine

Electronic and solvent electron-transfer rate parameters from charge-transfer spectroscopy of betaine-1 and the $[Fe(CN)_6]^{4-}$ · dimethyl viologen ion pair 204(1986)45

Bi-ionic potential

Electrochemical behaviour of cellulosic cation membranes. Bi-ionic potentials in alkali systems 211(1986)113

Bicarbonate ion

Two-dimensional electrocrystallisation of $PbCO_3$ and $Pb_3(CO_3)_2(OH)_2$ on lead amalgam electrodes in sodium carbonate and bicarbonate solutions 233(1987)237

Bilayer film electrode

Electronically conducting poly-tris(5,5′-bis{(3-acrylyl-1-propoxy)carbonyl}-2,2′-bipyridine)ruthenium-modified electrodes. Studies of bilayer films and solution redox reactions 213(1986)203

Bilayer lipid membrane

Redox reactions in lipid bilayers and membrane bioenergetics 211(1986)19

Transient aqueous pores in bilayer membranes: a statistical theory 211(1986)211

Conduction onset criteria for transient aqueous pores and reversible electrical breakdown in bilayer membranes 211(1986)229

A quantitative theory of reversible electrical breakdown in bilayer membranes 211(1986)243

Chemical modification of the bilayer lipid membrane biosensor dipolar potential 211(1986) 371

Microtubule-dependent membrane interactions studied in two types of double bilayer membrane systems 211(1986)395

Transmembrane potentials in bilayer lipid membrane (BLM) induced by calcium channel and β-adrenergic blockers 212(1986)13

Voltammetric studies of electron-conducting modified bilayer lipid membranes 212(1986)185

The interfacial bioelectrochemistry of lipid bilayer membranes: Laplace plane analysis 212 (1986)361

Cyclic voltammetry of dye-modified BLMs 212 (1986)435

Alamethicin induced conductances in lipid bilayers. Part II. Decomposition of the observed (compound) process 214(1986)427

Alamethicin induced conductances in lipid bilayers. Part III. Derivation of the properties of the elementary process from the (compound) observed process 214(1986)441

Electrical properties of a purified complex of α-latrotoxin and its receptor incorporated into planar lipid bilayers 231(1987)361

Modeling of bilayer lipid membrane (BLM) behavior by electrochemical equivalent cells 231 (1987)409

Bilayer membrane

A photochargeable device composed of bilayer membranes of poly(3-methylthiophene) and Prussian Blue 227(1987)255

Bile pigment

A study of the electrochemical reduction of bilirubin and its derivatives 231(1987)101

Bilirubin

A study of the electrochemical reduction of bilirubin and its derivatives 231(1987)101

Binary-collision model

Methodology for ion neutralization at solid/electrolyte interfaces 204(1986)173

Binary electrolyte

Steady state current flow in solid binary electrolyte cells 225(1987)1

On the theory of ionic adsorption from binary electrolyte solutions at electrodes 246(1988)247

Binuclear complex

Structural consequences of electron-transfer reactions. Part XIV. Fast charge-transfer reactions of binuclear complexes undergoing large changes in metal–metal bond lengths 222 (1987)151

Biochemical pathway

Light-driven hydrogen peroxide production as a way to solar energy conversion 232(1987)71

Bioelectric field

Evidence for ac fields produced by mammalian cells 231(1987)287

Bioelectrochemistry

Bioelectrochemistry, bioenergetics, and bioelectromagnetics: a conference report on the 8th International Symposium on Bioelectrochemistry and Bioenergetics 211 (1986)187

Bioelectrochemical approach to the role of glutathione in strong ethanol ingestion 212 (1986)333

The interfacial bioelectrochemistry of lipid bilayer membranes: Laplace plane analysis 212 (1986)361

The chlordiazepoxide–albumin binding. A bioelectrochemical approach 212(1986)471

Bioelectrochemistry in biotechnology: results and trends of the XIth Jena symposium, 22–27.9.1986 (Erfurt) 231(1987)161

Bioelectromagnetics

Bioelectrochemistry, bioenergetics, and bioelectromagnetics: a conference report on the 8th International Symposium on Bioelectrochemistry and Bioenergetics 211 (1986)187

Bioenergetics

Redox reactions in lipid bilayers and membrane bioenergetics 211(1986)19

Bioelectrochemistry, bioenergetics, and bioelectromagnetics: a conference report on the 8th International Symposium on Bioelectrochemistry and Bioenergetics 211 (1986)187

Biofuel cell

Biofuel anode for cell reactions involving nicotinamide adenine dinucleotide as a charge carrier 212(1986)479

Biological damage

Role of metal complexes in the formation–detoxication action of active oxygen species 232(1987)21

Biological object

Electrochemical method for the assessment of oxygen consumption in biological objects with an uneven distribution of respiration centres 226(1987)193

Biological sample

Square wave voltammetry — a rapid and reliable determination method of Zn, Cd, Pb, Cu, Ni and Co in biological and environmental samples 214 (1986)51

Biological substrate

The reaction between 1-methyl-4-phenylpyridinium (MPP^+) and superoxide anion in acetonitrile 250(1988)83

Biological thiol

Mediators for the oxidation of glutathione and other biological thiols 245(1988)131

Biomacromolecule

Electrochemical behaviour of biological macromolecules 211(1986)275

Adsorptive stripping voltammetry of biomacromolecules with transfer of the adsorbed layer 214(1986)359

Biomembrane

Phospholipid monolayers at the mercury/water interface 202(1986)253

Ion binding to a membrane with surface charge layers 211(1986)173

The significance of interfacial charge and proton displacements for the mechanism of energy transduction in biomembranes 212(1986)273

A proposed mechanism underlying the process of Ca^{2+}-mediated transfer of DNA across biological membranes 231(1987)111

From biological membrane processes to industrial membrane technologies 231(1987)121

Novel tools for determining mechanically induced modifications of membrane structure: electrochemical and fluorescence methods 231 (1987)303

Electromagnetic fields and biomembranes. Report on the First International School held at Pleven, 6–12 October 1986 231(1987)323

In vivo measurements of the translocation of electrochemically active substances across a biomembrane 231(1987)519

Biosensor

Chemical modification of the bilayer lipid membrane biosensor dipolar potential 211(1986) 371

Biosensors using flower petal structures 222 (1987)343

Biotechnology

Bioelectrochemistry in biotechnology: results and trends of the XIth Jena symposium, 22–27.9.1986 (Erfurt) 231(1987)161

Biotoxicity

Phospholipid monolayers of di-oleoyl lecithin at the mercury/water interface 244(1988)99

Biphenyl halide

Electron and hydrogen atom transfers in the electrochemical reduction of biphenyl halides in dimethylformamide and acetonitrile studied by means of Fourier transform faradaic admittance measurements (FT-FAM) 201(1986)315

Bipyridine complex

The growth of compact layers at the electrode interface. Part I. Complexes of cobalt, nickel and iron with 2,2′-bipyridine and 2,2′,2″-terpyridine in aqueous sodium perchlorate 206(1986)269

Bipyridyl

Paths of the electroreduction of 2,2′-bipyridyl 226(1987)117

Studies of the limiting currents associated with several oxidation reactions mediated by tris(2,2′-bipyridyl)iron(III) incorporated in Nafion® films on carbon electrodes 230(1987)109

Bipyridyl derivative

Electrochemistry of bipyridyl derivatives of cobalt in solutions of anionic and cationic micelles 233(1987)173

Electrocatalytic reactions in organized assemblies. Part III. Reduction of allyl halides by bipyridyl derivatives of cobalt in anionic and cationic micelles 240(1988)217

Bipyridyl–polypyrrole film electrode

Electropolymerisation and redox properties of bipyridyl–polypyrrole and Cu(II) bipyridyl–polypyrrole film electrodes 205(1986) 309

Birth-and-death process

Nucleation on active sites. Part III. Nucleation modelled as a pure birth process and nucleation modelled as a birth-and-death process 215(1986)1

Bisazo dye

Electrochemical reduction of Fast Sulphone Black-F, a bisazo dye 235(1987)225

Bismuth

Criteria of choice of adsorption parameters in the Grahame–Parsons model. Cesium adsorption on bismuth 209(1986)233

Comparison of experiments with calculations using double-layer models. Specific adsorption of Cs^+ on bismuth 218(1987)65

Bismuth analysis

Square-wave polarography of bismuth 214 (1986)103

Bismuth electrode

Adsorption of alkanes on a bismuth electrode from an alcoholic medium 239(1988)333

Bismuth ion

Coadsorption of Bi(III) and Cl^- at a mercury electrode 241(1988)329

An irreversible structure sensitive adsorption step in bismuth underpotential deposition at platinum electrodes 243(1988)419

Bismuth oxide

Rechargeable manganese oxide electrodes. Part II. Physically modified materials 238(1987)93

Bismuth phosphate

A phosphate-sensitive electrode based on $BiPO_4$-modified glassy carbon 214(1986)135

Bis(octaalkoxymethylphthalocyaninato)-lutetium film

Electrochromism of octaalkoxymethyl-substituted lutetium diphthalocyanine 237(1987) 61

Bivalent cation

The influence of electrostatic interactions on the binding of bivalent cations to polynucleotides 214(1986)343

Blank period

Chronopotentiometry with non-linear perturbation functions at the DME with a preceding blank period 227(1987)1

Blastomere

Electrofusion of rat and mouse blastomeres 211 (1986)513

Bleomycin

Role of metal complexes in the formation–detoxication action of active oxygen species 232(1987)21

Blocked electrode

Transient mass transfer at partially blocked electrodes: a way to characterize topography 238(1987)67

Bond–Henderson–Oldham "global analysis"

Determination of electrochemical kinetic parameters using the Bond–Henderson–Oldham "global analysis" 230(1987)273

Bond-stretching

Kinetic behaviour of electrochemical proton discharge in relation to the proton source and its environment 204(1986)111

Bone

Some biological effects of electromagnetic fields 211(1986)39

Woodward, J., Immobilized cells and enzymes: a practical approach 211(1986)144

Boundary concentration

Implicit calculation of boundary values in digital simulation applied to several types of electrochemical experiment 240(1988)27

Bovine heart

Proton flow through the intramembrane sector of the ATP synthase complex of bovine heart mitochondria 231(1987)147

Electrochemical behaviour of cytochrome *c* at low potentials 231(1987)297

Bovine serum albumin

Activity coefficients of potassium salts in concentrated bovine serum albumin solutions 231(1987)489

Brain

Lipid peroxidation and brain mitochondrial damage induced by ethanol 232(1987)211

Brain edema

Role of peroxides in the cerebral transmembrane ion fluxes and their relevance to ischemic brain edema 232(1987)307

Brdička type catalytic current

Brdička-type catalytic currents of hemoglobins. Part III. pH dependence of the catalytic current — an indication of quaternary structure changes? 231(1987)71

Breakdown voltage

Electronic current and breakdown characteristics of tantalum oxide films 239(1988)125

Brightener

Effect of brightener on copper plating. In situ investigation by the PAS technique 243(1988)475

Bromate ion

Photocurrent kinetics during electron emission from a metal into an electrolyte solution. Part IX. Electrode reactions of the intermediates generated in the bromate ion reduction on mercury 241(1988)247

Bromate reduction

Control of the oscillation parameters in the Belousov–Zhabotinsky system by means of mixed catalysts 231(1987)243

Bromide ion

Structure and composition of the Pt(s) [6(111) × (111)] step-terrace surface vs. pH and potential in aqueous Br^- solutions. Studies by LEED and Auger spectroscopy 217(1987)111

The oxidation of chloride ions and bromide ions on ruthenium dioxide electrodes 225(1987)159

Ligation of iron(II) by bromide ions in the redox chemistry of iron porphyrins. Effect of molecular superstructures 237(1987)131

A study of the electrosorption of bromide and iodide ions on gold using the quartz crystal microbalance 243(1988)343

C

Bromine

The interaction of Br with Ag (110): comparison of electrochemical and gas-phase adsorption measurements 229(1987)87

Bromobiphenyl

Electrocatalytic reactions in organized assemblies. Part I. Reduction of 4-bromobiphenyl in cationic and non-ionic micelles 240(1988)201

Bromonitrile

Electrochemical reduction of bromonitriles: Mechanism and polarographic maxima 235 (1987)209

Bromophenol blue

Ion transfer of bromophenol blue across liquid–liquid interfaces 220(1987)235

Bromophenylmethylsulphone

Electrochemically stimulated $S_{RN}1$ reactions on aromatic rings substituted by two leaving groups. The case of 4-bromo- and 2-bromo-phenyl methyl sulphones 218(1987)367

Bubble electrode

On the drop time of a dropping electrode and on the bubble time of a bubble electrode 235(1987) 107

The bubble electrode — a new electrode for the combination of voltammetry, electrolysis and electron spin resonance spectrometry 245(1988) 105

Bubble time

On the drop time of a dropping electrode and on the bubble time of a bubble electrode 235(1987) 107

Buffer solution

Effect of methylviologen on the hydrogen evolution at mercury electrodes in aqueous buffer solutions 230(1987)177

Butyrolactone

Ion size evaluation for $LiClO_4$ solutions in selected mixtures of γ-butyrolactone with ethers 250(1988)165

Cadmium

Determination of copper, cadmium and lead in seawater by cathodic stripping voltammetry of complexes with 8-hydroxyquinoline 215(1986)111

Dc anodic stripping voltammetry at the mercury-film wall–jet electrode 215(1986)123

The single crystal metal–non-aqueous solvent interface. Underpotential deposition of Cd on Ag (111) in propylene carbonate 216(1987)261

Cadmium complex

Determination of stability constants of some cadmium complexes by polarographic techniques in the presence of electrode adsorption 213 (1986)235

Cathodic generation of $CdSe_xTe_{1-x}$ at Te film electrodes 215(1986)249

Adsorption of fulvic-like organic ligands and their Cd and Pb complexes at a mercury electrode 223(1987)235

Cadmium electrode

Shape and propagation rate of monatomic layers upon electrocrystallization of cadmium onto a screw-dislocation-free (0001) crystal face 208 (1986)153

Cadmium halide

Potentiometric study of the cadmium(II)–chloride and cadmium(II)–bromide association equilibria in ammonium nitrate + dimethyl sulphoxide melts 225(1987)111

Cadmium ion

On the catalytic effect of thiourea on the electrochemical reduction of cadmium(II) ions at the DME from aqueous 1 *M* KF solutions 201 (1986)33

Application of ASV for trace metal speciation. Part VI. A computerized pseudopolarographic system 214(1986)95

Electrochemistry of cadmium ion at the water/nitrobenzene interface 214(1986)465

On the adsorption of cadmium(II) ions on a HMDE from KF + thiourea aqueous solutions. A chronocoulometric study 216(1987)273

The reduction mechanism of Cd(II) at mercury in dimethylsulfoxide containing tetraethylammonium perchlorate 221(1987)129

Adsorption of a mixture of sodium dodecyl sulphate and dodecyl alcohol on a mercury electrode and its effect on the electrochemical processes of cadmium(II) in sodium chloride solution 227(1987)129

Derivation and experimental verification of approximate explicit equations in differential pulse polarography. Part III. Diagnostic criteria for characterization of first-order processes 241 (1988)291

The catalysis of the electrochemical reduction of cadmium ions by chloride ions. A mechanistic study in mixed 1 *M* KF + KCl aqueous solutions at the dropping mercury electrode 245(1987)167

Phospholipid monolayers of di-oleoyl lecithin (di-O-PC) at the mercury/water interface. Effects on faradaic reactions 248(1988)167

Cadmium selenide

Photocapacitance spectroscopy of thin film cadmium selenide electrodes 216(1987)41

Interfacial energetics of electrodeposited cadmium selenide in acetonitrile 239(1988)307

Cadmium sulphide

A particle size effect in the sensitization of TiO_2 electrodes by a CdS deposit 204(1986)225

Surface states on cadmium sulfide and the influence of etching 205(1986)291

The problem of light-induced oxygen production at catalyst-loaded CdS suspensions 228(1987)45

Size quantization in small colloidal CdS particles studied with stopped flow spectrometry 228 (1987)55

Cadmium telluride

CdTe electrodeposition. Some new data from ac impedance 202(1986)323

Recombination and charge transfer at the illuminated n-CdTe/electrolyte interface. Simplified kinetic model 220(1987)179

Cadmium telluride electrode

Effects of electrolytes on the photoelectrochemical reduction of carbon dioxide at illuminated p-type cadmium telluride and p-type indium phosphide electrodes in aqueous solutions 249(1988)143

Calcium antagonist

Transmembrane potentials in bilayer lipid membrane (BLM) induced by calcium channel and β-adrenergic blockers 212(1986)13

Calcium ion

Differences in permeability of dioleoylphosphatidylcholine model membranes containing saturated or unsaturated phosphatidic acids 211(1986)167

Effect of Ca^{2+} on electrobioluminescence of *Lampito Mauritii* 211(1986)341

Radiotracer study of the adsorption of CN^- ions and simultaneous adsorption of Ca^{2+} and CN^- ions at a platinized platinum electrode in alkaline medium. Novel experimental evidence for cation adsorption induced by strongly chemisorbed anions 215(1986)369

Characterization of single-crystal electrode surfaces as a function of potential and pH by Auger spectroscopy and LEED. Pt (111) in aqueous $CaCl_2$ and HCl solutions 217(1987)101

Combined electrochemical and radiotracer (cyclic voltradiometric) study of the motion of counter-ions in tetracyanoquinodimethane modified electrodes 218(1987)297

A proposed mechanism underlying the process of Ca^{2+}-mediated transfer of DNA across biological membranes 231(1987)111

Iron-induced Ca^{2+} release from rat liver mitochondria *via* H_2O_2 metabolism 232(1987) 203

Radiotracer study of the adsorption of Ca^{2+} ions on a platinized platinum electrode in acid medium 248(1988)411

Calculus

Errors arising from carrying out integration, and other operations of calculus, on digitally acquired data 208(1986)1

Calmodulin antagonist

Interaction of calmodulin antagonists with yeast. Comparison with the effect of miconazole, dio-9 and ethidium on Sr^{2+} uptake, K^+ efflux and plasmamembrane ATPase activity 212(1986)519

Camelus dromedarius

A potentiometric study on the redox properties of hemoglobin from *Camelus dromedarius* 211 (1986)521

Camphor

On diffusion-controlled film formation and dissolution 205(1986)303

Camphor sulphonate

Two-dimensional nucleation according to an exponential law with diffusion-controlled growth in the adsorption of camphor-10-sulfonate at the mercury/electrolyte interface 250(1988)159

Capacitance

Electrochemical adsorption reactions (EAR). Part II. Relation between large signal response and small signal (impedance) data 210(1986)21

Effects of resistance and capacitance on the chronoamperometry of polymer-coated electrodes as modeled by a finite elements digital simulation 216(1987)11

The double layer at the interface between two immiscible electrolyte solutions. Part III. Capacitance of the water/1,2-dichloroethane interface 225(1987)65

Ellipsometric study of the Ag (single crystal)/NaF interface with a view to obtaining the electron distribution profile 229(1987)19

Capacitance relaxation method

A capacitance relaxation method for studying surface states at the semiconductor–liquid junction 225(1987)79

Capacitive current

Interpretation of polyazulene electropolymerization considering faradaic current efficiency and capacitive current effects during the growth and redox switching steps 241(1988)211

Non-conventional normal pulse polarographic techniques with a static mercury electrode for applications at very low reactant concentrations 246(1988)283

Capacitor

On the non-linear response to charging of a relaxing capacitor 237(1987)1

Capacity

Conductivity and capacity of polythiophene films: impedance study 244(1988)311

Effect of molecular interactions at the interface. Part II. The metal/non-aqueous electrolyte interface 247(1988)57

Capacity–potential curve

Study of gold low-index faces in KPF_6 solutions. Part II. Analysis of the experimental results 236 (1987)267

The temperature dependence of the double-layer properties of gold faces in perchloric acid solutions. Part II. The (110) gold face 236(1987) 283

Capillary method

Shape and propagation rate of monatomic layers upon electrocrystallization of cadmium onto a screw-dislocation-free (0001) crystal face 208 (1986)153

Capillary tip

A test of the maximum bubble pressure method for electrocapillary measurements 237(1987)27

Capillary tube technique

New possibilities for obtaining more accurate results of self-diffussion coefficients by adapting the capillary tube technique 216(1987)89

Captopril

Determination of Captopril using adsorptive cathodic differential pulse stripping voltammetry with the HMDE 230(1987)99

Carbamate

Investigations on the oxidation of the carbamate pesticide Aminocarb 239(1988)187

Carbazole

Electrochemical synthesis and properties of polycarbazole films in protic acid media 246 (1988)73

Synthesis and properties of film electrodes from *N*-substituted carbazoles in acid medium 246 (1988)87

Carbene anion radical

The electrochemical reduction of diazodimedone. Kinetics and thermodynamics of the formation of the carbene anion radical 218(1987)227

Carbinol

Electrochemical behaviour of 4-acetyl-1 phenoxyalkyl ammonium salts. An example of a system with adsorption of both substrate and reduction products 236(1987)253

Carbon

On the effect of the Fe^{2+}/Fe^{3+} redox couple on oxidation of carbon in hot H_3PO_4 213(1986)161

Redox reactions of quinones on carbon materials 223(1987)161

Carbonate ion

Gas electrode reactions in molten carbonate media. Part I. Exchange current density of oxygen reduction in (Li + K)CO_3 eutectic at 650 °C 206 (1986)229

Gas electrode reactions in molten carbonate media. Part II. Oxygen reduction kinetics on conductive oxide electrodes in (Li + K)CO_3 eutectic at 650 °C 206(1986)241

Gas electrode reactions in molten carbonate media. Part III. Temperature dependence of oxygen reduction kinetics in (Li + K)CO_3 eutectic 209(1986)125

Two-dimensional electrocrystallisation of $PbCO_3$ and $Pb_3(CO_3)_2(OH)_2$ on lead amalgam electrodes in sodium carbonate and bicarbonate solutions 233(1987)237

Carbon composite electrode

Carbon composite electrodes containing alumina, layered double hydroxides, and zeolites 243 (1988)209

Carbon dioxide

Electrochemical and mechanistic studies of [Re(CO)$_3$(dmbpy)Cl] and their relation to the catalytic reduction of CO_2 201(1986)347

Electrocatalytic reduction of carbon dioxide to methanol. Part III. Use of an electrochemical photocell 201(1986)359

The electrochemical reduction of aqueous carbon dioxide to methanol at molybdenum electrodes with low overpotentials 205(1986)219

Electrocatalytic reduction of carbon dioxide to methanol. Part IV. Assessment of the current–potential curves leading to reduction 206(1986)209

Photoassisted electro-reduction of CO_2 on p-GaAs in the presence of Ni cyclam^{2+} 206(1986) 333

Electrochemical coating of a platinum electrode by a poly(pyrrole) film containing the *fac*-Re(2,2′-bipyridine)(CO)$_3$Cl system. Application to electrocatalytic reduction of CO_2 207(1986)315

Electrocatalysis of CO_2 reduction at surface modified metallic and semiconducting electrodes 209(1986)101

An electroanalytical investigation on the nickel-promoted electrochemical conversion of CO_2 to CO 219(1987)259

Electrocatalytic reduction of CO_2 to methanol. Part VIII. Photoassisted electrolysis and electrochemical photocell with n-TiO_2 anode 220(1987)333

The behaviour of electrodispersed platinum electrodes for the voltammetric electrooxidation of reduced carbon dioxide 224(1987)189

Formation of ethyl alcohol in the photocatalytic reduction of carbon dioxide by SiC and ZnSe/metal powders 225(1987)287

Electroreduction of carbon dioxide to carbon monoxide in molten LiCl + KCl, LiF + KF + NaF, $Li_2CO_3 + Na_2CO_3 + K_2CO_3$ and $AlCl_3$ + NaCl 235(1987)369

Reduction of carbon dioxide on partially-immersed Au plate electrode and Au–SPE electrode 238(1987)247

An in-situ FTIR study of the electroreduction of CO_2 by CoPc-coated edge graphite electrodes 241(1988)361

Reduction of CO_2 and CO to methane on Cu foil electrodes 245(1988)223

Photocatalytic reduction of carbon dioxide with metal-loaded SiC powders 247(1988)333

The effect of carbon dioxide on the electroreduction of 1,4-benzoquinone 248(1988) 159

Effects of electrolytes on the photoelectrochemical reduction of carbon dioxide at illuminated p-type cadmium telluride and p-type indium phosphide electrodes in aqueous solutions 249(1988)143

Catalysis of the electrochemical reduction of carbon dioxide by iron("0") porphyrins 249 (1988)347

The interaction of CO_2 with gold electrodes in acid electrolyte followed through voltammetry 250(1988)183

Carbon electrode

The electrical double layer of carbon and graphite electrodes. Part III. Charge and dimensional changes at wide potential range 206(1986)101

The electrochemistry of hexacyanoruthenate at carbon electrodes and the use of ruthenium compounds as mediators in the glucose/glucose oxidase system 206(1986)327

Surface ion pairing between electrochemically treated glassy carbon and alkali metal ions in acetonitrile 217(1987)453

Preparation and characterization of carbon-based fuel-cell electrodes with platinum-group bimetallic catalysts 223(1987)91

Electroreduction of primary alkyl iodides in acetonitrile 226(1987)27

The electrical double layer of carbon and graphite electrodes. Part IV. Dependence of carbon electrode dimensions and electrical capacity on pH 227(1987)41

Studies of the limiting currents associated with several oxidation reactions mediated by tris(2,2′-bipyridyl)iron(III) incorporated in Nafion® films on carbon electrodes 230(1987)109

Electroadsorption of bacteria on porous carbon and graphite electrodes 231(1987)175

Electron transport in biological processes. Deoxyribonucleic acid degradation and its relationship with the electrochemical behaviour of hydroxyquinone derivatives 231(1987)523

Ac-impedance studies of carbon electrodes coated with poly-4-vinylpyridine films containing the $Fe(CN)_6^{3-/4-}$ redox couple 235(1987)169

Characterization and spectroelectrochemical studies of soluble polymerized 3-methoxythiophene 236(1987)239

Electrochemical behavior of 5-amino-1,10-phenanthroline and oxidative electropolymerization of tris[5-amino-1,10-phenanthroline]iron(II) 239(1988)175

Electrocatalytic reactions in organized assemblies. Part V. Dehalogenation of 4,4′-dibromobiphenyl in cationic micelles at bare and clay-modified carbon electrodes 245(1988)331

Electrodeposition of metal–trithioanthrone films 249(1988)281

Carbon felt electrode

Catalysis of 1,2-dibromo-1,2-diphenylethane reduction on platinum and carbon felt electrodes coated by polypyrrole films containing 4,4′-bipyridinium groups. Effects of film thickness, film composition and comparison with homogeneous catalysis 224(1987)111

Carbon fibre electrode

Electromodification of carbon-fibre electrodes by 2-nitroso-1-naphthol 207(1986)203

Signal-to-noise enhancement using carbon fiber electrodes in the photoelectroanalytical detection of tris(2,2′-bipyridine)ruthenium(II) 208(1986)77

Application of carbon-fiber microelectrodes to the study of non-conductive inverse microemulsions. Interpretation of the diffusion coefficients 210(1986)205

Analytical application of submicroelectrodes in solutions containing little or no supporting electrolyte 213(1986)189

Electrosorption of organics on three dimensional carbon fiber electrodes 214(1986)303

Electrochemical detection for liquid chromatography using the wall–jet cell/ultramicroelectrode detector 216(1987)115

Activation of carbon fiber microelectrodes by alternating current electrochemical treatment 234(1987)119

Estimation of charge transfer kinetic parameters from irreversible cyclic voltammograms at carbon fiber electrodes 247(1988)29

Carbon monoxide

Infrared spectra of carbon monoxide adsorbed on a smooth gold electrode. Part I. EMIRS spectra in acid and alkaline solutions 201(1986) 175

Electrocatalysis by ad-atoms. Part XVIII. Enhancement of carbon monoxide oxidation on rhodium and iridium electrodes by oxygen adsorbing ad-atoms 202(1986)125

Chemisorbed CO on a polycrystalline platinum electrode. The effect of conditioning of the surface and of partial pressure of CO 206(1986) 197

Infrared spectra of carbon monoxide adsorbed on a smooth gold electrode. Part II. EMIRS and polarization-modulated IRRAS study of the adsorbed CO layer in acidic and alkaline solutions 207(1986)293

Infrared spectroscopic study of methanol and formic acid adsorbates on a platinum electrode. Part I. Comparison of the infrared absorption intensities of linear CO(a) derived from CO, CH_3OH and HCOOH 213(1986)149

The effect of adsorbed carbon monoxide on hydrogen adsorption and hydrogen evolution on platinum 215(1986)357

Infrared spectroscopic study of methanol and formic acid adsorbates on a platinum electrode. Part II. Role of the linear CO(a) derived from methanol and formic acid in the electrocatalytic oxidation of CH_3OH and HCOOH 218(1987)155

Comparative study of CO adsorbates for different structures of platinum surfaces 227(1987)199

Lateral modification and organization of mixed adlattices on polycrystalline platinum electrodes 230(1987)205

The in-situ preparation of well-defined, single crystal electrodes 230(1987)221

New results for the electrosorption of methanol on polycrystalline platinum in acid medium obtained by programmed potential voltammetry 234(1987)315

Electroreduction of carbon dioxide to carbon monoxide in molten LiCl + KCl, LiF + KF + NaF, Li_2CO_3 + Na_2CO_3 + K_2CO_3 and $AlCl_3$ + NaCl 235(1987)369

Vibrational spectroscopy on platinum single-crystal electrodes. Part I. In-situ infrared spectroscopic studies of the adsorption and oxidation of CO on Pt (111) in sulphuric acid 239(1988)347

Adsorption of CO on a Pt electrode in acidic solution. IR-active and -inactive CO's adsorbed in the double-layer region 240(1988)281

Reactant structural effects on the formation and electro-oxidation of adsorbed carbon monoxide from small organic molecules at platinum as studied by time-resolved FTIR spectroscopy 240(1988)341

Mechanisms of formic acid, methanol, and carbon monoxide electrooxidation at platinum as examined by single potential alteration infrared spectroscopy 241(1988)143

Electrochemical oxidation of CO on Pt in acidic and alkaline solutions. Part I. Voltammetric study on the adsorbed species and effects of aging and Sn(IV) pretreatment 241(1988)163

Reduction of CO_2 and CO to methane on Cu foil electrodes 245(1988)223

Infrared spectra of CO adsorbed on palladium and platinum electrodes co-existing with another adsorbed species in acidic solution 245(1988)245

Carbon paste electrode

The kinetics of some substituted catechol/*o*-quinone couples at a carbon paste electrode 206 (1986)167

Electrochemical behavior of iron–1,10-phenanthroline complexes at a carbon paste electrode 219(1987)139

Electroanalysis with modified carbon paste electrodes. Coordination trends, selectivity and sensitivity 242(1988)87

The zeolite-modified carbon paste electrode 246 (1988)461

Ensembles of carbon paste ultramicroelectrodes 249(1988)339

Carbon substrate

Electrochemical preparation of electrodes modified with non-stoichiometric mixed-valent tungsten(VI, V) oxides 248(1988)305

Carbon support

Methanol oxidation on unsupported and carbon supported Pt + Ru anodes 240(1988)133

Carbonyl group

Hydration–dehydration of the electroactive group on the electrochemical behaviour of pyridoxal-5′-phosphate 212(1986)325

Carbonylmanganese radical

Reactivity of carbonylmanganese radicals toward tributyltin hydride. Kinetics analysis of the anodic oxidation of $Mn(CO)_3[P(OPh)_3]_2^-$ 241 (1988)181

Carboxylate ion

The transfer of carboxylate and sulphonate anions at the aqueous/organic solution interface studied by polarography with the electrolyte solution dropping electrode 249(1988)109

Carcinogenesis

Charge transfer mechanism for carcinogenesis by alkylating and other agents 211(1986)305

Ac voltammetry: a control method for the damage to DNA caused in vitro by alkylating mutagens 227(1987)11

Carotenoid band shift

Calibration of the carotenoid band shift and the response of the external membrane potential probe oxonol VI with diffusion potentials in (proteo)liposomes and chloroplasts 212(1986)55

Carotenoid pigment

Investigation of electrochemical double-layer effects on chromatophore membranes of photosynthetic bacteria 214(1986)407

CASIDIE computer program

Calculation, simulation and interpretation of electrochemical impedances. Part I. Presentation of the CASIDIE computer program 205(1986)77

Catalase

Deficiency in the catalase activity in human precancerous stages of *Xeroderma pigmentosum*. Comparison with XP, AT and Blomm's cultured fibroblasts and SV_{40} transformed human cell extracts 232(1987)271

Catalysis

Catalysis of 1,2-dibromo-1,2-diphenylethane reduction on platinum and carbon felt electrodes coated by polypyrrole films containing 4,4'-bipyridinium groups. Effects of film thickness, film composition and comparison with homogeneous catalysis 224(1987)111

The catalysis of the electrochemical reduction of cadmium ions by chloride ions. A mechanistic study in mixed 1 *M* KF + KCl aqueous solutions at the dropping mercury electrode 245(1987)167

Catalysis of the electrochemical oxidation of CH_3OH by molybdenum-modified platinum 248(1988)181

Catalysis of the electrochemical reduction of carbon dioxide by iron("C") porphyrins 249 (1988)347

Catalyst

New oxygen cathodes for fuel cells with organic fuels 210(1986)277

The role of ligands in the electrochemical behaviour and catalytic activity of molybdenum-containing catalyst for dinitrogen fixation under mild conditions 217(1987)425

Redox behaviour of the dicobalt cofacial porphyrin Co_2FTF4 and related complexes adsorbed on graphite electrodes 220(1987)247

The effect of cobalt ions on the catalytic hydrogen evolution at a mercury electrode 226(1987)51

Preparation of highly dispersed Pt + Ru alloy clusters and the activity for the electrooxidation of methanol 229(1987)395

Control of the oscillation parameters in the Belousov–Zhabotinsky system by means of mixed catalysts 231(1987)243

Mechanistic aspects of reaction selectivities on surfactant-modified Pd and Pt electrodes and catalysts 235(1987)131

Surface modifications with heteropoly and isopoly oxometalates. Part III. Electrode modification procedures. The necessity of proton interference during the electrodeposition of the h.e.r. catalysts 247(1988)157

The role of phase transfer catalysts in two phase redox reactions 247(1988)203

Voltammetric characteristics of the RuO_2 film electrode in relation to the catalytic properties of RuO_2 for the photochemical production of hydrogen 247(1988)253

Catalytic activity

A polynuclear mixed-valent ruthenium oxide/cyanoruthenate composite that yields thin coatings on a glassy carbon electrode with high catalytic activity toward methanol oxidation 220 (1987)295

Catalytic influence of underpotential-deposited submonolayers of heavy metals on D-glucose oxidation on various noble metal electrodes in alkaline media 237(1987)93

Distribution of oxometalates on polymer-covered electrodes. Compared catalytic activity of these new polymers and the corresponding oxometalates in solution 243(1988)481

Catalytic current

Brdička-type catalytic currents of hemoglobins. Part III. pH dependence of the catalytic current — an indication of quaternary structure changes? 231(1987)71

Catalytic deactivation mechanism

Theory of the chronoamperometric and polarographic response of the catalytic-deactivation mechanism 249(1988)23

Catalytic electrodeposition

Catalytic electrosynthesis of conducting polymers 244(1988)115

Catalytic mechanism

Chronopotentiometry at a DME. Effects of electrode sphericity on the chronopotentiometric response of a catalytic mechanism 245(1988)61

Catalytic reaction

Voltammetry at microcylinder electrodes. Part VI. Second-order catalytic reaction of Fe(edta) with H_2O_2 245(1988)39

Catalytic reduction

Electrochemical and mechanistic studies of $[Re(CO)_3(dmbpy)Cl]$ and their relation to the catalytic reduction of CO_2 201(1986)347

Research on chemically modified electrodes. Catalytic reduction of dioxygen at a cobalt phthalocyanine-doped polyaniline film electrode 246(1988)101

Catechol

The kinetics of some substituted catechol/*o*-quinone couples at a carbon paste electrode 206 (1986)167

Cathodic stripping voltammetry of catechol and some catecholamines 214(1986)191

Nitrogen fixation. Part I. Electrochemical reduction of titanium compounds in the presence of catechol and N_2 in MeOH or THF 230(1987) 143

Determination of antimony in seawater by cathodic stripping voltammetry 235(1987)275

Nitrogen fixation. Part II. Nitrogen reduction by electrochemically generated vanadium(II) promoted by various organic ligands in basic methanol 250(1988)385

Catecholamine

Cathodic stripping voltammetry of catechol and some catecholamines 214(1986)191

Cathodic behaviour

Cathodic behaviour of $[(\eta^3\text{-}C_3H_5)Pd(Ph_2P\text{–}C_2H_4\text{–}PPh_2)]^+$ in acetonitrile solution: an electrochemical process involving very fast consecutive chemical reactions 230 (1987)165

Cathodic coupling

Redox polymer films from cathodic coupling of 4,4′-dibromobenzophenone and 2,7-dibromofluorenone 215(1986)377

Cathodic decomposition

The cathodic decomposition of propylene carbonate in lithium batteries 219(1987)273

Cathodic deposition

On the kinetics of the cathodic deposition of aluminium on glassy carbon and tungsten electrodes from $AlCl_3$ + NaCl + KCl melts 210 (1986)127

Cathodic hydrogen evolution

Cathodic hydrogen evolution on mercury from aqueous solutions of dilute acids at temperatures higher than 100 °C 204(1986)131

Cathodic reduction

The growth of ordered films during the cathodic reduction of a tetraalkylammonium ion 209 (1986)91

Cathodic reduction of diphenyl selenide in acetonitrile 248(1988)381

Cathodic stripping voltammetry

Adsorption stripping square-wave voltammetry of copper ions in the presence of thiourea 214 (1986)65

Cathodic stripping voltammetry of catechol and some catecholamines 214(1986)191

Cathodic stripping voltammetry of thioether acids. Methylthioacetic and 2,2′-thiobisacetic acids 215(1986)103

Determination of copper, cadmium and lead in seawater by cathodic stripping voltammetry of complexes with 8-hydroxyquinoline 215(1986)111

Determination of Captopril using adsorptive cathodic differential pulse stripping voltammetry with the HMDE 230(1987)99

Determination of antimony in seawater by cathodic stripping voltammetry 235(1987)275

Cathodic stripping voltammetry of 2-thioorotic acid at the hanging mercury drop electrode 237 (1987)105

Determination of cystine and cysteine in seawater using cathodic stripping voltammetry in the presence of Cu(II) 239(1988)137

Cation exchange

Transient peak membrane potential in a liquid membrane system generated by pH jump: non-linear response to perturbation 231(1987)193

Cationic drug

Interaction of cationic drugs with lipids of the spinach thylakoid membrane 211(1986)497

Cationic ionophore

Application of the general model of osmotic and ionic equilibria of a cell to human erythrocytes suspended in isotonic unbuffered NaCl + KCl + sucrose media in the presence of cationic ionophore 231(1987)223

Can the membrane potential of human erythrocytes suspended in isotonic unbuffered NaCl + KCl + sucrose media in the presence of cationic ionophore Triton X-100 be considered as the equilibrium membrane potential? 231 (1987)231

Cationic micelle

Electrocatalytic reactions in organized assemblies. Part I. Reduction of 4-bromobiphenyl in cationic and non-ionic micelles 240(1988)201

Cationic polymer

Electronically conducting poly-tris(5,5′-bis[(3-acrylyl-1-propoxy)carbonyl]-2,2′-bipyridine)ruthenium-modified electrodes. Studies of bilayer films and solution redox reactions 213(1986)203

Cationic strength

Adsorption of dicarboxylic ions on the (210) gold face from solutions at constant cationic strength 240(1988)291

Adsorption of dicarboxylic ions on the (311) face of gold from solutions at constant cationic strength 248(1988)209

Cationic surfactant

Micellar complexes of energy transfer 211(1986) 95

Cell

Steady state current flow in solid binary electrolyte cells 225(1987)1

Dielectrophoresis of individual cells. Experimental methods and results 231(1987)549

Cell division

Directional control of yeast cell division by electric stimulus 212(1986)235

Cell emf

Activity coefficients for aqueous Na_2Succ solutions from emf measurements 230(1987)69

Determination of activity coefficients in aqueous solutions of trichloroacetic acid from emf measurements at 25 °C 230(1987)77

Reduction of the cell voltage in copper electrowinning by using the methanol BFE anode 246(1988)313

Cell fusion

Mechanisms of membrane processes, electric gene transfer and cell fusion. Report on the workshop held at the "Zentrum für Interdisziplinäre Forschung" in Bielefeld on 3–4 April 1986 231 (1987)7

Electric-field-induced morphological alterations and fusion of hepatocytes 231(1987)9

Cell membrane

The sequence and energetics of cell membrane transductive coupling to intracellular enzyme systems 211(1986)447

Non-linear ionic fluxes in an electrically exposed cell 212(1986)89

Microelectrode studies in cultured epithelial cells 231(1987)141

Formation, reactions and toxicity of aldehydes produced in the course of lipid peroxidation in cellular membranes 232(1987)187

Cell technology

The impedance of the Li^+/Li electrode in $SOCl_2$ 209(1986)351

Cellulose membrane

Investigation of ion transfer across the membrane-stabilized interface of two immiscible electrolyte solutions. Part I 217(1987)253

CE mechanism

First- and second-order chemical–electrochemical mechanisms. Extraction of standard potential, equilibrium and rate constants from linear sweep voltammetric curves 208(1986)197

Kinetic currents in normal pulse polarography (NPP). Current–potential curves for an electrode process with a preceding chemical reaction (CE mechanism) 243(1988)263

The behavior of microdisk and microring electrodes. Mass transport to the disk in the unsteady state. The effects of coupled chemical reactions: the CE mechanism 250(1988)285

Cereal

Voltammetric determination of Cu, Cd, Hg, Pb and Zn in cereals 226(1987)263

Cerebral ischemia

Role of peroxides in the cerebral transmembrane ion fluxes and their relevance to ischemic brain edema 232(1987)307

Ceruloplasmin

Electrochemical conversion of lactoperoxidase, ceruloplasmin and alkaline phosphatase on mercury electrodes 211(1986)407

Cesium ion

Criteria of choice of adsorption parameters in the Grahame–Parsons model. Cesium adsorption on bismuth 209(1986)233

Comparison of experiments with calculations using double-layer models. Specific adsorption of Cs^+ on bismuth 218(1987)65

Chain length

pH and chain length dependence of phosphatidic acid phase transition parameters 231(1987)509

Chalcogenide ion

Chemical and electrochemical behaviour in molten alkali hydroxides. Part II. Electrochemistry of chalcogenide ions in the molten NaOH + KOH (49 mol%) eutectic mixture 250(1988)327

Chalcogenide particle

Electrode surface modification through Nafion-attached transition-metal cluster chalcogenide particles 229(1987)223

Channel electrode

Channel and tubular electrodes 205(1986)1

Linear sweep voltammetry at channel electrodes 206(1986)57

Ac impedance measurements at channel electrodes. The effect of convection 207(1986)309

Hydrodynamic voltammetry at channel electrodes. Part VIII. Theory of reversible voltammograms for chronoamperometry and linear sweep voltammetry 209(1986)247

Hydrodynamic voltammetry at channel electrodes. Part IX. Edge effects at rectangular channel flow microelectrodes 217(1987)33

Mass transport to channel and tubular electrodes: the "Singh and Dutt approximation" 238(1987)43

The relationship between mass transport to channel and rotating disk electrodes 245(1988) 287

On the transposition of theoretical equations or working curves for rotating disk electrodes to those for channel electrodes and vice versa. Comments on a paper by Unwin and Compton 245(1988)299

A reply to comments by Tokuda on our paper "The relationship between mass transport to channel and rotating disk electrodes" 245(1988) 303

Channel flow cell

Hydrodynamic effects on the macromorphology of electrodeposited zinc and flow visualization. A flat plate electrode in a channel flow cell 249 (1988)35

Chara corallina

Membrane impedance of internodal cells of *Chara corallina* obtained by analysis of low level transients 231(1987)131

Effect of dinitrophenol on membrane potential, membrane resistance and chlorophyll fluorescence of *Chara corallina* internodal cells at various pH values 231(1987)165

Charcoal particle

Direct and alternating current voltammetry at an HMDE in solutions containing activated charcoal suspension 239(1988)91

Charge carrier

Charge carrier dynamics in the picosecond time domain in photoelectrochemical cells 204(1986) 211

Charge density

Condensed thymine films at the mercury/water interface. Part III. Thermodynamic analysis 218 (1987)273

Charged hard sphere model

Solvent effects in a non-primitive electrolyte model 247(1988)73

Charged interface

The effect of pH on the adsorption and the association of cytidine, cytidine-5′-monophosphate and cytidine-5′-diphosphate at the charged interface 212(1986)485

The interfacial behaviour of guanosine mono-, di- and triphosphate in solutions of varying pH at charged interfaces 212(1986)497

Voltammetric studies on the adsorption and association of cytidine dinucleotides in solutions of varying pH at charged interfaces 214(1986)391

On the representation of the applied field at a charged interface 227(1987)237

On the representation of the applied field at a charged interface: reply to remarks of P. Nikitas 227(1987)245

Charged particle

A potential- and charge-consistent model for the adsorption dependence of the semiconductor flatband potential 210(1986)197

Charged wall

Some general statistical-mechanical considerations on the entropy of a solvent

monolayer or multilayer against a charged wall 250(1988)23

Charge injection

One dimensional Onsager model for dye sensitized charge injection into semiconductors 228(1987)69

Charge motion

Charge motion inside the bacteriorhodopsin molecule 211(1986)437

Charge propagation current

Chronocoulometric and rotating disc electrode determination of the charge propagation current through poly-4-vinylpyridine films containing hexachloroiridate anions 250(1988)341

Charge separation

The charge separation process in non-homogeneous electrolyte solutions 241(1988)57

Charge storage device

The kinetics of charging and discharging of iridium oxide films in aqueous and non-aqueous media 240(1988)185

Charge transfer

Some remarks on the theory of chemical elementary processes with charge transfer in condensed systems 204(1986)13

Activation energy for charge transfer reactions in membranes. Proton-translocating proteins 204 (1986)245

Pulse polarography: current–potential curves in normal pulse polarography, reverse pulse polarography, differential normal pulse polarography and differential pulse polarography for a slow charge-transfer step 205(1986)21

Adsorption of pyridine at the polycrystalline gold–solution interface 207(1986)213

On the polarographic reduction of nitrate ion in the presence of zirconium(IV) 208(1986)117

Electronic non-equilibrium charge transfer kinetics in anodic dark and photocurrents on n-III–V-semiconductor electrodes 209(1986)259

Charge transfer mechanism for carcinogenesis by alkylating and other agents 211(1986)305

Charge transfer mechanism for benzodiazepine (BZ) action. Correlation of reduction potential of BZ iminium with structure and drug activity 212(1986)407

Dependence of heterogeneous charge transfer rate on coordination environment in $MoO(L\text{–}L)(S_2CNEt_2)_2$ complexes 213(1986)169

Charge transfer across a polymer gel/liquid interface. A voltammetric detector for a flow system 217(1987)213

Recombination and charge transfer at the illuminated n-CdTe/electrolyte interface. Simplified kinetic model 220(1987)179

Electronic non-equilibrium charge transfer mechanisms in alternating photocurrents on semiconductor electrodes 221(1987)33

A comparison of anodic charge-transfer kinetics between dark p-type and illuminated n-type $GaP/Fe(CN)_6^{4-}$ interfaces 221(1987)187

Characteristic criteria for a reversible reaction in ac polarography 222(1987)11

Clay modified electrodes. Part VII. The electrochemical behavior of tetrathiafulvalenium-montmorillonite modified electrodes 229(1987)191

Modeling of bilayer lipid membrane (BLM) behavior by electrochemical equivalent cells 231 (1987)409

On the accessibility of the bandgap on semiconductor interfaces by non-equilibrium Fermi energies of electrons and holes 239(1988)9

Analysis of a quasi-reversible two-electron cyclic voltammetric wave for an organometallic Ir(III)/Ir(I) couple at platinum and mercury electrodes 239(1988)253

Charge transfer across a polymer gel/liquid interface: the polyvinyl chloride + nitrobenzene gel/water interface 241(1988)133

Pulse polarography: influence of amalgam formation on the current–potential curves in normal pulse polarography, reverse pulse polarography, differential normal pulse polarography and differential pulse polarography for a slow charge-transfer step 243(1988)241

Partial charge transfer in the underpotential deposition of metals. Part I. On the nature of the deposits and the kinetics of their formation 245 (1988)1

Partial charge transfer in the underpotential deposition of metals. Part II. Mercury deposition on polycrystalline gold electrodes 245(1988)21

Effects of quasi-reversible charge transfer on chronocoulometric relaxations in linearly adsorbing systems 246(1988)233

Effects of quasi-reversible charge transfer on chronocoulometric relaxations in non-linearly adsorbing systems 246(1988)241

Theory of irreversible cyclic voltammograms at microcylinder electrodes 247(1988)17

Orbital-energy-resolved partial charge transfer in chemisorption and electrochemical processes on semiconductors 250(1988)37

Charge transfer coefficient

Determination of the kinetic parameters for the Ti(III)/Ti(IV) couple using a rotating disk electrode 209(1986)275

Kinetic analysis of the picrate ion transfer across the interface between two immiscible electrolyte solutions from impedance measurements at the equilibrium potential 242(1988)291

Charge transfer polymer

Electroactive charge transfer polymers from anodic coupling of dibenzo-crown ethers. Part III. Intrinsic redox properties and preliminary use as electrode modifiers 240(1988)117

Charge transfer reaction inverse photoemission spectroscopy

Charge transfer reaction inverse photoemission spectroscopy (CTRIPS). Part II. Electrode specificity 228(1987)293

Charge-transfer spectroscopy

Electronic and solvent electron-transfer rate parameters from charge-transfer spectroscopy of betaine-1 and the $[Fe(CN)_6]^{4-}$ · dimethyl viologen ion pair 204(1986)45

Charge transport

Porous electrode modelling: quasi-stationary state 205(1986)91

Electrode kinetics of electroactive electropolymerized polymers deposited on graphite electrode surfaces 217(1987)239

Electrochemistry of tetracyanoquinodimethane polymer-modified electrodes. Effect of polymer film composition on site–site interactions 217 (1987)313

Hexachloroiridate(III/IV) on polymer-coated electrodes. Investigation of the membrane permeability and the charge-transport mechanism 229(1987)239

Diffusion-migration for one-dimensional mixed conduction in thin layers at steady state 238 (1987)1

Transient charge transport through modified electrodes by EHD impedance 244(1988)325

Charge-transport rates in polyelectrolyte films on electrodes. Disparate diffusion coefficients for alizarin red S with two separate electroactive centers 247(1988)339

Temperature dependence of charge transport processes in surface deposited redox polymer layers 250(1988)207

Charging

The kinetics of charging and discharging of iridium oxide films in aqueous and non-aqueous media 240(1988)185

Charging current

A systematic approach to faradaic current, charging current and phase angle measurement by digital alternating current polarography 222 (1987)35

Fast sweep cyclic voltammetry at ultra-microelectrodes. Evaluation of the method for fast electron-transfer kinetic measurements 243 (1988)321

Chemical equilibrium

Electroanalytical investigations. Part VI. The simulation of fast chemical equilibrium reactions in cyclic voltammetric reaction–diffusion models with spline collocation 217(1987)225

Electroanalytical investigations. Part VII. The simulation of fast chemical equilibrium reactions in cyclic voltammetric reaction–diffusion models with a combination of the heterogeneous equivalent technique and orthogonal collocation 235(1987)57

Chemical kinetics

Product distribution in preparative-scale electrolysis. Part VIII. Transition between fast and slow chemical kinetics. Application to mechanisms involving one or two first-order consecutive chemical steps 236(1987)31

Chemically sensitive semiconductor device

Synthesis and characterization of new polyvinylchloride membranes for enhanced adhesion on electrode surfaces 202(1986)75

Chemical potential

Standard states and the Frumkin adsorption isotherm for substances at electrode interphases 244(1988)53

Chemical reaction

An analysis of electrochemical reactions followed by series or complex chemical reactions 243 (1988)1

Chemical trapping

Singlet oxygen in biological systems 232(1987)91

Chemical vapour transport

Preparation and electrochemical characterization of WSe_2 electrodes having a wide range of doping densities 234(1987)133

Chemiluminescence

Visualization of the edge effect with electrogenerated chemiluminescence 221(1987) 251

Electrogenerated chemiluminescence. Part IL. Emission from acetonitrile solutions containing no added luminescors 222(1987)331

Singlet oxygen in biological systems 232(1987)91

Chemiosmotic coupling

A non-linear kinetic model of chemiosmotic energy coupling 211(1986)193

Chemisorption

Effect of non-aqueous solvents on the chemisorption and orientation of aromatic compounds at smooth polycrystalline platinum electrodes: naphthohydroquinone and tetrahydroxybiphenyl in water + acetonitrile solutions 201(1986)153

Chemisorbed CO on a polycrystalline platinum electrode. The effect of conditioning of the surface and of partial pressure of CO 206(1986) 197

Radiotracer study of the adsorption of CN^- ions and simultaneous adsorption of Ca^{2+} and CN^- ions at a platinized platinum electrode in alkaline medium. Novel experimental evidence for cation adsorption induced by strongly chemisorbed anions 215(1986)369

Mixed pseudo-potential approach to the on-top chemisorption of atomic hydrogen on the (100) silver surface 216(1987)29

Electrocatalytic oxidation of ethylene glycol. Part III. In-situ infrared reflectance spectroscopic study of the strongly bound species resulting from its chemisorption at a platinum electrode in aqueous medium 216(1987)169

Kinetics of hydroquinone chemisorption at polycrystalline platinum electrodes. The effect of surface roughness 217(1987)121

Hydrogenative/cathodic stripping of iodine chemisorbed on smooth polycrystalline platinum electrodes 219(1987)327

Electroactivity of strongly-adsorbed redox centers: reduction of iodine chemisorbed on platinum in aprotic solvent 221(1987)281

The influence of orientation on the electrocatalytic hydrogenation of hydroquinone chemisorbed at smooth polycrystalline platinum electrodes 239(1988)375

Ab initio cluster model approach to the chemisorption of hydrogen on mercury 241 (1988)105

Reversible redox, hydrodesulfurization and anodic oxidation of chemisorbed thiophenols. A comparison at platinum and gold electrodes 241 (1988)199

Partial charge transfer in the underpotential deposition of metals. Part I. On the nature of the deposits and the kinetics of their formation 245 (1988)1

Electrocatalytic hydrogenation and oxidation of model coal-derived compounds chemisorbed at smooth polycrystalline Pt: a survey 247(1988)241

Effect of Pb adatoms on the chemisorption of formic acid at a smooth polycrystalline rhodium electrode in acid medium. A quantitative EMIRS investigation 249(1988)265

Orbital-energy-resolved partial charge transfer in chemisorption and electrochemical processes on semiconductors 250(1988)37

Chemotherapeutic agent

Electrochemistry of methotrexate and its metabolites. Part II. Reduction of 7-hydroxymethotrexate 220(1987)323

Chemotherapy

Voltammetric measurement of *cis*-dichlorodiammineplatinum(II) following interfacial accumulation at mercury electrodes 212(1986)395

Chloranil

Ion-pair effects on the electroreduction and electrochromic properties of *ortho*-chloranil in dipolar aprotic solvents 216(1987)203

Electrochromism of the *o*-CA/*o*-$CA^{\cdot-}$ system in display cells 240(1988)321

Chlorate formation

An analysis of electrochemical reactions followed by series or complex chemical reactions 243 (1988)1

Chlordiazepoxide

The chlordiazepoxide–albumin binding. A bioelectrochemical approach 212(1986)471

Chloride ion

Adsorption on well-defined solid surfaces. Chloride adsorption on a (110) face of silver 204(1986)291

Adsorption of chloride at the mercury/aqueous $LaCl_3$ interface 209(1986)183

Influence of Cl^- ions on the photoelectrochemical behaviour of the Cu/H_3PO_4 system 210(1986)247

Complementary study of the mechanism of anodic chlorine evolution in nitromethane 210 (1986)251

The kinetics of anion equilibration of human erythrocytes in phosphate-containing media of low chloride concentration 211(1986)67

Sodium perchlorate and chloride ion pairs 214 (1986)519

Electrochemical and SEM characterization of Ag electrodes roughened by potential sweep and potential step processes in aqueous chloride and chloride + pyridine media 217(1987)79

The oxidation of chloride ions and bromide ions on ruthenium dioxide electrodes 225(1987)159

Aspects of the adsorption of chloride on silver revealed through surface enhanced Raman scattering 228(1987)229

Combined electrochemical and radiotracer study of anion sorption from aqueous solutions into polypyrrole films 230(1987)257

Coadsorption of Bi(III) and Cl^- at a mercury electrode 241(1988)329

Amperometry at precipitate-based electrodes 242(1988)77

Effect of the addition of chloride on the anodic dissolution of aluminium through barrier films 242(1988)303

The catalysis of the electrochemical reduction of cadmium ions by chloride ions. A mechanistic study in mixed 1 *M* KF + KCl aqueous solutions at the dropping mercury electrode 245(1987)167

Ion–solvent interactions in acetylacetone. Part III. Gibbs energies of transfer of the chloride ion and its complex formation constants with other solvents 246(1988)207

Chlorination

The evaluation of electrochemical reaction rate data using first order analytical models 248 (1988)1

Chlorine

Light-induced electron transfer and photoelectrocatalysis of chlorine evolution at FeS_2 electrodes 204(1986)185

Complementary study of the mechanism of anodic chlorine evolution in nitromethane 210 (1986)251

Application of the convolution potential sweep voltammetric method to the chlorine evolution reaction in nitromethane 221(1987)61

State of surface oxide films at Pt anodes and "volcano" behaviour in electrocatalysis for anodic Cl_2 evolution 224(1987)163

Mechanism of chlorine evolution on oxide anodes. Study of pH effects 228(1987)393

Chlorobenzene

Analytical application of submicroelectrodes in solutions containing little or no supporting electrolyte 213(1986)189

Chloroform

Investigation of chloroform adsorption on a platinum electrode by the tracer method 210 (1986)161

Chlorogallium phthalocyanine

Chemical modification of GaPc–Cl thin film photoelectrodes 248(1988)349

Chloronitrobenzene

Inclusion complexes of isomeric chloronitrobenzenes with α- and β-cyclodextrins studied by polarography. Analysis of the possibilities of the method 226(1987)137

Chlorophyll

Kinetics of the outer-sphere electrochemical reduction of chlorophyll adsorbed on a metal electrode. Reorganization of the solvent 204 (1986)69

Electrochemistry and photoelectrochemistry of chlorophyll on a metallic electrode. Part I. Properties of chlorophyll adsorption films on metals 227(1987)99

Electrochemistry and photoelectrochemistry of chlorophyll on a metallic electrode. Part II. Photoreaction of adsorbed chlorophyll 227 (1987)115

Photoresponse of native photosynthetic systems and chlorophyll-containing films on metal electrodes 228(1987)109

Spectroelectrochemical behaviour of water bounded Chl *a* in the presence of various acceptors 231(1987)17

Effect of dinitrophenol on membrane potential, membrane resistance and chlorophyll fluorescence of *Chara corallina* internodal cells at various pH values 231(1987)165

Adsorption stripping voltammetry of different solvated species of chlorophyll a in water + acetone mixtures 249(1988)89

Chloroplast

The electrochemical mechanism of photosystem II functioning in chloroplasts 205(1986)245

Redox reactions in lipid bilayers and membrane bioenergetics 211(1986)19

Calibration of the carotenoid band shift and the response of the external membrane potential probe oxonol VI with diffusion potentials in (proteo)liposomes and chloroplasts 212(1986)55

An investigation of $\Delta\bar{\mu}_{H^+}$ activation of chloroplast ATPase 212(1986)111

The significance of interfacial charge and proton displacements for the mechanism of energy transduction in biomembranes 212(1986)273

Photoresponse of native photosynthetic systems and chlorophyll-containing films on metal electrodes 228(1987)109

Chloroplast thylakoid

Dielectric spectroscopy of energy coupling membranes: Chloroplast thylakoids 212(1986)45

Cholamido-propyldimethylammoniopropane sulphonate

A somewhat unusual desad peak observed with the protein-solubilizing detergent CHAPS 222 (1987)271

Chromatography

Digital simulation of the channel flow-through electrochemical cell. A theoretical study of the determination of solute adsorption on modified electrodes 222(1987)117

Chromatophore membrane

Investigation of electrochemical double-layer effects on chromatophore membranes of photosynthetic bacteria 214(1986)407

Chromium

The formation of the passive layer on Cr in 0.5 *M* H_2SO_4. A combined electrochemical and surface analytical study 228(1987)365

Chromium ammine

Laser-induced electron ejection at metal surfaces. Evidence for photoelectroreduction of cobalt(III) and chromium(III) ammines by direct heterogeneous electron transfer 228(1987)265

Chromium ion

The reduction of Cr(III) in concentrated aqueous electrolytes at a DME. The influence of anions 210(1986)111

The analysis of dissolved Cr^{3+} with the rotating ring–disc technique and its application to the corrosion of Cr in the passive state 216(1987)229

The effect of underpotential deposition of heavy metals on the kinetics of the cathodic reduction of chromium(VI) and persulphates on platinum 237(1987)137

Electrokinetics of the reduction of chromium(VI) ions entrapped in chromium-modified passive iron electrodes 241(1988)265

Chemical and electrochemical equilibria and kinetics in aqueous Cr(III)/Cr(II) chloride solutions 244(1988)179

Electrooxidative formation and characteristics of Cr(III)–thio complexes at mercury electrodes 247(1988)215

Chromium/titanium oxide electrode

Kinetics of the anodic oxidation of isopropanol on chromium/titanium-oxide electrodes 229 (1987)339

Chromophore

A polymer-film based photoelectrode containing immobilized quencher and chromophore polymer blends 224(1987)59

Chromosome

Some biological effects of electromagnetic fields 211(1986)39

Chronoamperometry

A Laplace space rate/mechanism analysis of the two-electron chronoamperometric oxidation of *o*-dianisidine in sulfuric acid medium 202(1986)37

A simple computer-based method for calculation of kinetic parameters from chronoamperometric and chronocoulometric data 209(1986)57

Hydrodynamic voltammetry at channel electrodes. Part VIII. Theory of reversible voltammograms for chronoamperometry and linear sweep voltammetry 209(1986)247

Effects of restricted diffusion at ultramicroelectrodes in brain tissue. The pool model: Theory and experiment for chronoamperometry 213(1986)31

Effects of resistance and capacitance on the chronoamperometry of polymer-coated electrodes as modeled by a finite elements digital simulation 216(1987)11

Chronoamperometric current at hemicylinder and band microelectrodes: theory and experiment 217(1987)417

Theory of chronoamperometric curves at microband electrodes 225(1987)19

Electrochemical study of the mechanism and kinetics of reductive glycoside elimination of adriamycin adsorbed on a mercury electrode surface 225(1987)187

Anodic oxidation of heterogeneous germanium amalgam 226(1987)331

Derivation of an approximate equation for chronoamperometric curves at microband electrodes and its experimental verification 230 (1987)61

Simplifications in the theory of step experiments at microelectrodes 235(1987)97

The theory of chronoamperometry for the investigation of electrocrystallization. Mathematical description and analysis in the case of diffusion-controlled growth 236(1987)1

Reactivity of carbonylmanganese radicals toward tributyltin hydride. Kinetics analysis of the anodic oxidation of $Mn(CO)_3[P(OPh)_3]_2^-$ 241 (1988)181

One-electron and two-electron reductions of 1-methyl-4-phenyl pyridinium (MPP^+) 242(1988) 171

Voltammetry at geometrically uneven electrodes. Part I. Chronoamperometry at model electrodes with rectangular hollow or protrusive surfaces 246(1988)1

Unified treatment of single potential step voltammetries at a plane electrode and at the DME. New polarisation modes 247(1988)37

The effect of carbon dioxide on the electroreduction of 1,4-benzoquinone 248(1988) 159

Electrodeposition of aluminium in aluminium chloride/1-methyl-3-ethylimidazolium chloride 248(1988)431

A comparison of the chronoamperometric response at inlaid and recessed disc microelectrodes 249(1988)1

Theory of the chronoamperometric and polarographic response of the catalytic-deactivation mechanism 249(1988)23

The behavior of microdisk and microring electrodes. Mass transport to the disk in the unsteady state. Chronoamperometry 250(1988) 269

Electro-organic reactions. Part 34. Kinetic basicities of some electrogenerated organic dianions and the competition between protonation and reproportionation 250(1988)373

Chronocoulometry

Electrode films of porous agarose impregnated with Nafion. Structural heterogeneity and its effects on electron transport 207(1986)73

Adsorption of pyridine at the polycrystalline gold–solution interface 207(1986)213

A simple computer-based method for calculation of kinetic parameters from chronoamperometric and chronocoulometric data 209(1986)57

On the adsorption of cadmium(II) ions on a HMDE from KF + thiourea aqueous solutions. A chronocoulometric study 216(1987)273

A formalism for performing chronocoulometry at a stationary planar or spherical electrode. Part I. Theoretical treatment with Langmuirian adsorption 224(1987)1

Electrochemical behavior of the Eu(III/II)–EDTA system on a mercury electrode in water + dimethylsulphoxide (DMSO), water + acetonitrile (AN) and water + hexamethylphosphortriamide (HMPT) mixtures 226(1987)315

Adsorption of pyridine at the Au (100)–solution interface 238(1987)333

The kinetics of charging and discharging of iridium oxide films in aqueous and non-aqueous media 240(1988)185

Adsorption in double potential step chronocoulometry 241(1988)89

Effects of quasi-reversible charge transfer on chronocoulometric relaxations in linearly adsorbing systems 246(1988)233

Effects of quasi-reversible charge transfer on chronocoulometric relaxations in non-linearly adsorbing systems 246(1988)241

Unified treatment of single potential step voltammetries at a plane electrode and at the DME. New polarisation modes 247(1988)37

Chronocoulometric study of electrode kinetics in the case of an adsorbed redox couple. Progesterone electroreduction on mercury from aqueous solutions 248(1988)55

Electrochemistry of the nickel–cyanide system at mercury electrodes. Part III. The role of intermediate products in the mechanism of $Ni(CN)_4^{2-}$ electroreduction at mercury electrodes 248(1988)139

Chronocoulometric and rotating disc electrode determination of the charge propagation current through poly-4-vinylpyridine films containing hexachloroiridate anions 250(1988)341

Chronopotentiometry

An electrochemical study of the oxidation of thiazolidine-4-carboxylic acid on platinum electrodes 209(1986)339

Cyclic voltammetry and chronopotentiometry with cyclic linear current scanning of terramycin at the water/nitrobenzene interface 214(1986)459

Electrochemistry of cadmium ion at the water/nitrobenzene interface 214(1986)465

Chronopotentiometry with programmed current at an electrode expanding with any power law. Theoretical study of an ECE mechanism 219 (1987)1

Chronopotentiometry at a dropping mercury electrode. Effects of electrode sphericity on the potential–time curves and the transition times of an ECE mechanism 219(1987)13

Chronopotentiometry with non-linear perturbation functions at the DME with a preceding blank period 227(1987)1

Proton transfer across the water/nitrobenzene interface facilitated by acridine chloride 234 (1987)85

Chronopotentiometric study of titanium in molten NaCl + KCl + K_2TiF_6 239(1988)203

Implicit calculation of boundary values in digital simulation applied to several types of electrochemical experiment 240(1988)27

Theoretical study of the chronopotentiometric response with programmed current of electrode processes with regeneration mechanisms 241 (1988)33

Chronopotentiometry at a DME. Effects of electrode sphericity on the chronopotentiometric response of a catalytic mechanism 245(1988)61

Electrodeposition of aluminium in aluminium chloride/1-methyl-3-ethylimidazolium chloride 248(1988)431

The behavior of microdisk and microring electrodes. Mass transport to the disk in the unsteady state. Chronopotentiometry 250(1988) 257

Cisplatin

Voltammetric measurement of *cis*-dichlorodiammineplatinum(II) following interfacial accumulation at mercury electrodes 212(1986)395

Electrochemistry of platinum complexes. Part I. Polarographic reduction mechanism with reference to electrochemical detection 238(1987) 297

Citric acid

The electrochemical behaviour of Nb(V)/Nb(IV) in aqueous citrate solutions studied at the dropping mercury electrode 206(1986)153

Clay-modified electrode

Clay modified electrodes. Part VII. The electrochemical behavior of tetrathiafulvalenium-montmorillonite modified electrodes 229(1987)191

Clay modified electrodes. Part VIII. Electrochemical behavior at montmorillonite and polypyrrole–montmorillonite films on platinum and glassy carbon electrodes 234(1987)347

On the nature of electroactive sites in clay-modified electrodes 236(1987)43

Polypyrrole–clay-modified electrodes 243(1988) 367

Electrocatalytic reactions in organized assemblies. Part V. Dehalogenation of 4,4′-dibromobiphenyl in cationic micelles at bare and clay-modified carbon electrodes 245(1988)331

Effects of the solution pH on the electrochemical behaviour of $Ru(bpy)_3^{2+}$ and $Fe(CN)_6^{3-}$ ions at a clay-modified electrode 249(1988)133

Cleavage

One-electron cleavage of sulphones in the presence of nitrones as spin traps 238(1987)393

Catalytic behaviour of polymeric coatings in cathodic cleavage reactions: the importance of using polyfluorene 240(1988)355

Clinical analysis

A study of the electrochemical reduction of bilirubin and its derivatives 231(1987)101

Cluster model

Quantum chemical calculations on the electrical double layer at the metal/vacuum interface. Part I. Hartree–Fock cluster descriptions 208(1986) 243

Quantum chemical calculations on the electrical double layer at the metal/vacuum interface. Part II. Properties of single crystal surfaces 208 (1986)257

Ab initio cluster model approach to the chemisorption of hydrogen on mercury 241 (1988)105

Cluster size

A computer simulation of nucleation 241(1988)79

Coadsorption

Coadsorption of Bi(III) and Cl^- at a mercury electrode 241(1988)329

A study of HSO_4^- and SO_4^{2-} co-adsorption on a platinum electrode in sulfuric acid by in-situ FT-IR reflection absorption spectroscopy 243 (1988)203

Coal-derived compound

Electrocatalytic hydrogenation and oxidation of model coal-derived compounds chemisorbed at smooth polycrystalline Pt: a survey 247(1988)241

Coalescence

Formulation of current–time transients due to nucleation and coalescence of spherical-cap growth forms 209(1986)1

Cobalt

The influence of ultra-violet irradiation on the determination of nickel and cobalt in natural waters by adsorption voltammetry 214(1986)21

The induction of SERS on smooth Ag by the deposition of Ni and Co 217(1987)411

Cobalt ammine

Metal substrate effects upon the kinetics of simple electrochemical reactions. The reduction of cobalt(III) ammines at single-crystal gold faces 209(1986)109

Laser-induced electron ejection at metal surfaces. Evidence for photoelectroreduction of cobalt(III) and chromium(III) ammines by direct heterogeneous electron transfer 228(1987)265

Cobalt "capped" porphyrin

Spectroelectrochemistry of cobalt "capped" porphyrins 202(1986)111

Cobalt complex

A study on the mechanism of the electrochemical reduction of the cobalt–dimethylglyoxime system in NH_3/NH_4Cl 216(1987)181

Dealing with unequal diffusivities among reactants in kinetic studies at rotating disk and ring–disk electrodes. The reduction of H_2O_2 as catalyzed by Co^{II}(cyclam) and Fe(II) 216(1987) 249

Electrocatalysis of dioxygen reduction in aqueous acid and base by multimolecular layer films of electropolymerized cobalt tetra(*o*-aminophenyl)porphyrin 217(1987)271

Redox behaviour of the dicobalt cofacial porphyrin Co_2FTF4 and related complexes adsorbed on graphite electrodes 220(1987)247

Redox and electrocatalytic properties of cobalt–bipyridyl–polypyrrole film electrodes 224(1987)95

An electrochemical examination of the coordination of O_2 and O_2^- with a Co^{II}-macrocyclic complex in dimethylsulfoxide 229 (1987)273

Electrochemistry of bipyridyl derivatives of cobalt in solutions of anionic and cationic micelles 233(1987)173

Electrooxidative and electroreductive polymerization of 5-amino-1,10-phenanthroline ligand, iron and cobalt complexes in acetonitrile media 238(1987)197

Electrocatalytic reactions in organized assemblies. Part III. Reduction of allyl halides by bipyridyl derivatives of cobalt in anionic and cationic micelles 240(1988)217

Indirect electroorganic reactions mediated by multivalent metal ion–macrocyclic polyamine complexes 243(1988)393

Cobalt derivative

Spectro-electrochemistry of cobalt and iron tetrasulphonated phthalocyanines 213(1986)217

Cobalt ion

Pulsed laser-induced photopotentials at the cobalt-photosensitized ZnO/electrolyte interface 215(1986)161

The effect of cobalt ions on the catalytic hydrogen evolution at a mercury electrode 226(1987)51

Electrochemical and spectroscopic properties of dicobalt cofacial porphyrins in non-aqueous media. Influence of the interporphyrin distance on the redox, spectrophotometric and EPR properties of the cobalt centers 234(1987)277

Electroanalysis with modified carbon paste electrodes. Coordination trends, selectivity and sensitivity 242(1988)87

Hydrophilic and hydrophobic domains in the flat protein conformomer as a cause of double step polarographic waves 248(1988)387

Cobalt nitride

Reduction of oxygen to water on cobalt-nitride thin film electrodes prepared by the reactive RF sputtering technique 250(1988)73

Cobalt phthalocyanine

Adsorption and reduction of iron and cobalt phthalocyanines in DMSO at glassy carbon and pyrolytic graphite electrodes 234(1987)297

An in-situ FTIR study of the electroreduction of CO_2 by CoPc-coated edge graphite electrodes 241(1988)361

Research on chemically modified electrodes. Catalytic reduction of dioxygen at a cobalt phthalocyanine-doped polyaniline film electrode 246(1988)101

Cobalt porphyrin

Application of a polymer solid electrolyte for the vapor-phase electrocatalysis of dioxygen reduction by some cobalt porphyrins 238(1987) 259

Cobalt tetraaza macrocyclic complex

Correlation of heterogeneous electron transfer rates with structural change in cobalt tetraaza macrocyclic complexes 250(1988)107

Codeposition

Electrodeposition of zinc + nickel alloy phases and electrochemical stripping studies of the anomalous codeposition of zinc 221(1987)211

Coelomocyte

Secretory differences in electrobioluminescence of *Lampito mauritii* upon segmentary electron input 231(1987)105

COH species

Evidence for COH as an adsorbed intermediate in the anodic oxidation of methanol by ECDTMS and SNIFTIRS 242(1988)327

Collagen

Polyvinylalcohol–collagen membranes for enzyme immobilization 212(1986)149

Colloid

Light-induced reduction of cytochrome *c* by colloidal TiO_2 212(1986)125

Size quantization in small colloidal CdS particles studied with stopped flow spectrometry 228 (1987)55

Compartmental structure

Regulation of enzyme activity by direct electric fields in compartmental systems 231(1987)205

Complex

Calculation of differential pulse polarographic curves for the reduction of complexes 216(1987)1

Complexation

An ultraviolet spectral and polarographic investigation of the acid–base and complexation behaviour of oxytetracycline hydrochloride 214 (1986)199

Complexation and adsorption of thiourea in sulphate medium on electrochemically roughened silver electrodes 227(1987)159

Complex formation constant

Ion–solvent interactions in acetylacetone. Part III. Gibbs energies of transfer of the chloride ion and its complex formation constants with other solvents 246(1988)207

Complex impedance

Frequency analysis of electrochemical step responses. Complex and operational impedances 205(1986)59

Complexing agent

Preparation and application of conducting polymers containing chemically active counterions for analytical purposes 247(1988)145

Composite electrode

Urania–scandia + Pt composite electrodes for use in solid electrolyte cells 202(1986)93

Composite membrane

Microstructural enhancement of mass transport through Nafion + Nuclepore composite membranes 235(1987)299

Composite polymer

The mechanism of electrodeposition of composite polymers including polypyrrole 227(1987)229

Computer

A flexible function generator for computer-based electrochemical instruments 224(1987)277

Computer-assisted voltammetry

Computer-assisted voltammetry with a multi-level random signal. Part I. Generation of input potential signal and sampling timing of the response current 235(1987)117

Computer experiment

On the theory of ionic adsorption from binary electrolyte solutions at electrodes 246(1988)247

Computerized pseudopolarographic system

Application of ASV for trace metal speciation. Part VI. A computerized pseudopolarographic system 214(1986)95

Computer simulation

A computer simulation of two-dimensional growth 214(1986)589

Concentrated electrolyte

The reduction of Cr(III) in concentrated aqueous electrolytes at a DME. The influence of anions 210(1986)111

Condensation

On the two modes of condensation displayed by thiourea at the mercury–water interface 226 (1987)267

A sodium effect on the two-dimensional condensation of 6-methyl-uracil 236(1987)309

The two-dimensional condensation of 2-methyl-4,6-dihydroxy-pyrimidine at the water/mercury interface 249(1988)311

Some additional observations on coumarin condensation 249(1988)321

Condensed film

Condensed thymine films at the mercury/water interface. Part I. General features 201(1986)133

Condensed thymine films at the mercury/water interface. Part II. Effects on electrode kinetics 201(1986)145

Condensed thymine films at the mercury/water interface. Part IV. Stochastic measurements 218 (1987)287

On the formation of two-dimensional condensed films at the interface mercury/ferron aqueous buffered solutions 224(1987)237

Condensed thymine films at the mercury/water interface. Part V. Phase transitions 230(1987)241

Condensed system

Some remarks on the theory of chemical elementary processes with charge transfer in condensed systems 204(1986)13

On the study of thermal and optical processes in condensed media 204(1986)141

Conditioning

Chemisorbed CO on a polycrystalline platinum electrode. The effect of conditioning of the surface and of partial pressure of CO 206(1986) 197

Conductance

Effect of external anion substitution on the conductance of the isolated human amnion 211 (1986)431

Voltammetric studies of electron-conducting modified bilayer lipid membranes 212(1986)185

Alamethicin induced conductances in lipid bilayers. Part II. Decomposition of the observed (compound) process 214(1986)427

Alamethicin induced conductances in lipid bilayers. Part III. Derivation of the properties of the elementary process from the (compound) observed process 214(1986)441

Conductance of 1–1 electrolytes in methanol solutions from −45 to +25 °C 214(1986)485

Proton flow through the intramembrane sector of the ATP synthase complex of bovine heart mitochondria 231(1987)147

Effect of temperature on peritubular cell membrane potential and potassium conductance in isolated perfused proximal tubules of the mouse 231(1987)419

Ion size evaluation for $LiClO_4$ solutions in selected mixtures of γ-butyrolactone with ethers 250(1988)165

Conducting film

Preparation and electrocatalytic properties of conducting films of polypyrrole containing platinum microparticulates 240(1988)89

Conducting organic salt

Amperometric enzyme electrodes. Part IV. An enzyme electrode for ethanol 218(1987)127

Conducting polymer

Electronically conducting poly-tris(5,5′-bis[(3-acrylyl-1-propoxy)carbonyl]-2,2′-bipyridine)ruthenium-modified electrodes. Studies of bilayer films and solution redox reactions 213(1986)203

A conducting polymer derived from *para*-aminodiphenylamine 221(1987)69

Poly-(3-methylpyrrole-4-carboxylic acid): an electronically conducting ion-exchange polymer 225(1987)273

Electrochemical polymerization of β-substituted and β,β′-disubstituted selenophenes 238(1987) 225

Catalytic electrosynthesis of conducting polymers 244(1988)115

Conducting salt electrode

Amperometric enzyme electrodes. Part III. A conducting salt electrode for the oxidation of four different flavoenzymes 218(1987)119

Conduction

Conduction onset criteria for transient aqueous pores and reversible electrical breakdown in bilayer membranes 211(1986)229

Diffusion–migration impedances for finite, one-dimensional transport in thin-layer and membrane cells. Part II. Mixed conduction cases: Os(III)/Os(II)ClO_4 polymer membranes including steady-state I–V responses 219(1987) 23

Conductive film

Electrochemical separation of the inner monolayer in methylene blue/leucomethylene blue conductive films induced by a sulphur-modified gold surface 250(1988)427

Conductive oxide electrode

Gas electrode reactions in molten carbonate media. Part II. Oxygen reduction kinetics on conductive oxide electrodes in $(Li + K)CO_3$ eutectic at 650 °C 206(1986)241

Conductive pathway

Microelectrode studies in cultured epithelial cells 231(1987)141

Conductivity

Electrochemical behaviour of aminothiol radioprotectors 212(1986)427

Voltammetric measurements with microelectrodes in low-conductivity systems 220 (1987)31

Influence of the experimental conditions on the performance of the electrokinetic detector 226 (1987)227

Conductivity and capacity of polythiophene films: impedance study 244(1988)311

New organic electrolytes: tris(dialkylamino)sulfonium salts: $(R_2N)_3S^+X^-$ 248(1988)363

Conformational change

Electron-transfer reactions and associated conformational changes. The effect of disproportionation on the oxidation of dixanthylene at elevated temperatures 233(1987) 63

Electron transfer reactions and associated conformational changes. Electrochemical reduction of *trans*-1,2-diiodocyclohexane 240 (1988)227

Conical electrode

Currents in thin layer electrochemical cells with spherical and conical electrodes 238(1987)9

Conifer needle

Electromagnetic smog — a damage and stress factor? 231(1987)441

Constant electrode charge

Criteria of choice of adsorption parameters in the Grahame–Parsons model. Cesium adsorption on bismuth 209(1986)233

Contact angle

Effects of KOH solution on the surface properties of Teflon 213(1986)43

A test of the maximum bubble pressure method for electrocapillary measurements 237(1987)27

Continuum model

Solvent effect on the rate of homogeneous and electrochemical electron exchange 247(1988)85

Controlled doping

Polymerisation of terthiophene at controlled doping level 250(1988)219

Controlled potential electrolysis

Controlled-potential electrolysis at a membrane-coated electrode. Part III. Effect of the electric field in the dielectric 211(1986)353

The electrochemistry of 2-aminoacrylic acid derivatives in acidic media as studied by background corrected pulse polarographic techniques and controlled potential electrolysis 218(1987)213

Ion transfer of bromophenol blue across liquid–liquid interfaces 220(1987)235

A search for conditions permitting model behavior of the $Fe(CN)_6^{3-/4-}$ system 226(1987) 305

Novel oxidation processes for the methyltin compounds $(CH_3)_4Sn$, $(CH_3)_3SnCl$, $(CH_3)_2SnCl_2$ and CH_3SnCl_3 at mercury electrodes in dichloromethane 227(1987)29

Electrochemical synthesis and reactivity of 3,5-dicyano-1,2,4,6-tetramethylpyridinium 246 (1988)373

Controlled release

Electrochemically controlled binding and release of salicylate, $TCNQ^{\cdot -}$ and ferrocyanide from films of oligomeric 3-methoxythiophene 247 (1988)173

Convection

Ac impedance measurements at channel electrodes. The effect of convection 207(1986)309

The onset of buoyancy-induced convection at a micro-mosaic electrode 229(1986)429

Convective diffusion

Calculation of convective-diffusion current at multiple strip electrodes in a rectangular flow channel. Implications for electrochemical detection 205(1986)101

Hydrodynamic voltammetry at channel electrodes. Part IX. Edge effects at rectangular channel flow microelectrodes 217(1987)33

Convolution potential sweep voltammetry

Application of the convolution potential sweep voltammetric method to the chlorine evolution reaction in nitromethane 221(1987)61

Coordination chemistry

An electrochemical examination of the coordination of O_2 and O_2^- with a Co^{II}-macrocyclic complex in dimethylsulfoxide 229 (1987)273

Involvement of coordination chemistry during electron transfer in the stabilization of the pyrite (FeS_2) photoanode 242(1988)255

Coordination environment

Dependence of heterogeneous charge transfer rate on coordination environment in $MoO(L–L)(S_2CNEt_2)_2$ complexes 213(1986)169

Coordination sphere

Redox series of complexes with a mixed coordination sphere $[Ru(bpy)_2(5,5'$-$COOEtbpy)]^{2+}$ 222(1987)161

Copper

Thermokinetic instability of electrode processes. Part II. Transpassive dissolution of copper in nitrate solutions 207(1986)11

A photoelectrochemical study of passive copper in alkaline solutions 210(1986)213

Influence of Cl^- ions on the photoelectrochemical behaviour of the Cu/H_3PO_4 system 210(1986)247

Geometric influences on the spontaneous passivation of copper in alkaline hexacyanoferrate(III) solutions under conditions of free convection 213(1986)75

Determination of copper, cadmium and lead in seawater by cathodic stripping voltammetry of complexes with 8-hydroxyquinoline 215(1986)111

Dc anodic stripping voltammetry at the mercury-film wall–jet electrode 215(1986)123

An electrochemical and SERS investigation of the influence of pH on the effectiveness of some corrosion inhibitors of copper 217(1987)187

An in situ study on the mechanism of the electrochemical dissolution of copper in oxygenated sulphuric acid. An application of the quartz microbalance 219(1987)311

Electrodeposition of lead on copper in acidic ammonium acetate solutions 243(1988)435

Underpotential deposition of copper and silver on polycrystalline ruthenium electrodes 244 (1988)249

Photoelectrochemical study of the effect of inhibitor on the passivation of copper in sodium hydroxide aqueous electrolyte 244(1988)333

Electrochemical nucleation and growth of copper on polycrystalline palladium 248(1988)219

Copper acetylide

Photoelectrochemistry of *para*-diethynylbenzene copper(I) acetylides deposited as thin films onto copper electrodes 207(1986)247

Copper ad-atom

The influence of Cu adatoms on a Pt electrode on the oxidation of formic acid 218(1987)327

Copper analysis

Adsorption stripping square-wave voltammetry of copper ions in the presence of thiourea 214 (1986)65

Copper complex

Electroanalytical chemistry of copper, lead and zinc complexes of amino acids at the ionic strength of seawater (0.70 *M* $NaClO_4$). Part III 208(1986)137

Electrochemical properties of copper–PDT complexes 214(1986)507

In situ observation of copper redox in a polymer modified electrode using EXAFS spectroelectrochemistry 240(1988)361

Differential pulse polarographic studies of copper(II)–polyamine complexes at low ligand concentrations 241(1988)281

Copper electrode

Electrooxidation of formaldehyde on Cu + Ni alloy electrodes in alkaline solutions 201(1986)47

Photoelectrochemistry of *para*-diethynylbenzene copper(I) acetylides deposited as thin films onto copper electrodes 207(1986)247

Photoeffect on a Cu anode during electropolishing 210(1986)229

Open-circuit potential decay investigation of the surface layer of an electropolished Cu anode 210(1986)237

Observation of morphological relaxation of copper and silver electrodes in solution using a quartz microbalance 216(1987)127

Spectroelectrochemical study of the corrosion of a copper electrode in deaerated 1.0 *M* HCl solutions containing Fe(III). Effect of the corrosion inhibitor benzotriazole 220(1987)259

Copper electrowinning

Reduction of the cell voltage in copper electrowinning by using the methanol BFE anode 246(1988)313

Copper foil electrode

Reduction of CO_2 and CO to methane on Cu foil electrodes 245(1988)223

Copper indium selenide

Surface treatments of n-$CuInSe_2$ polycrystalline electrodes for photoelectrochemical applications 208(1986)85

Copper ion

Binding of copper(II) and zinc(II) ions on various lignins 214(1986)331

Competition between the rearrangement of electrodeposited overlayers of copper on platinum and the hydrogen electrode reactions 229(1987)327

Determination of cystine and cysteine in seawater using cathodic stripping voltammetry in the presence of Cu(II) 239(1988)137

Study of the platinum/electrolyte interface using surface plasmon excitation at stratified electrodes. Part II. Optical behaviour of Pt/H_2SO_4 and $Pt/H_2SO_4 + Cu^{2+}$ systems 246 (1988)43

Electrode kinetics of the Cu(II)/Cu(I) system at platinum in water + dimethylsulphoxide (DMSO) mixtures 250(1988)61

On the nature of the transfer coefficient for ion transfer reactions 250(1988)225

Copper oxide

Electrochemical behaviour of copper oxide in molten dimethyl sulfone at 150 °C 233(1987)189

Electrochemical behaviour of $CuO + V_2O_5$ systems in molten dimethyl sulfone at 150 °C 242(1988)181

Copper oxide electrode

Electron transfer reactions to soluble redox couples at $Ba_2YCu_3O_7$ and CuO electrodes 249 (1988)205

Copper plating

Effect of brightener on copper plating. In situ investigation by the PAS technique 243(1988)475

Copper salt

Behaviour of some copper(II) salts in propylene carbonate. Standard electrode potential of the Cu^{2+}/Cu system at 25 °C 245(1988)123

Copper sulphate

Diffusion coefficients of silver ions in $CuSO_4$ + H_2SO_4 solutions 249(1988)123

Correlation approach

Many-body effects in electrochemisorption. Part II. Operator averages and MF–HF limits 229 (1987)67

Correlation equation

Consideration of electrochemical dimerization reactions in terms of the perturbation molecular orbital theory. Part II. Determination of the parameters of the correlation equation 209 (1986)43

Corrosion

Electrochemical reduction of Nafion 117 208 (1986)109

Photoelectrochemical and chemical corrosion inhibition of n-type GaAs in highly concentrated iodide solutions 209(1986)219

Investigation of corrosion of a rotating iron electrode in HNO_3 by in-situ Raman spectroscopy 210(1986)259

An example of microbiologically influenced corrosion. The behaviour of stainless steels in natural seawater 212(1986)347

Electrochemical and spectroscopic methods of characterizing lead corrosion films 222(1987)347

The determination and characterisation of apparent ion-exchange currents at PVC/water interfaces 245(1988)117

Corrosion inhibitor

An electrochemical and SERS investigation of the influence of pH on the effectiveness of some corrosion inhibitors of copper 217(1987)187

Spectroelectrochemical study of the corrosion of a copper electrode in deaerated 1.0 *M* HCl solutions containing Fe(III). Effect of the corrosion inhibitor benzotriazole 220(1987)259

Corrosion potential

The electrochemical behaviour of Zircaloy-4 electrodes in acid iodide solution 240(1988)299

Evaluation of pit volume by measurement of corrosion potential fluctuations for type 304 stainless steel 241(1988)385

Corrosion rate

Measurement of corrosion rates by the large-amplitude exponential relaxation technique 215 (1986)393

Coulometry

Electrochemical and xanthine oxidase-catalyzed oxidation of 6-thioxanthine 233(1987)49

Electroanalytical study of the pesticide Guthion 244(1988)221

Characterization of sulfur layers from reduced sulfur dioxide on porous platinum black/Teflon electrodes 246(1988)193

Coulostatic perturbation

Laser-induced temperature-jump coulostatics for the investigation of heterogeneous rate processes. Theory and application 248(1988)255

Coumarin

Phase transition processes displayed by coumarin monolayers at the water–mercury interphase 214(1986)597

Some additional observations on coumarin condensation 249(1988)321

Counter electrode

The microelectrode coupled with a collecting counter electrode 244(1988)339

Counter ion

The effect of the counter ion concentration on the electrochemistry of tetracyanoquinodimethane polymer film electrodes 201(1986)301

Electron hopping between fixed sites. "Diffusion" and "migration" in counter-ion conservative redox membranes at steady state 242(1988)1

Counter ion displacement

Diffusion-migration for one-dimensional mixed conduction in thin layers at steady state 238 (1987)1

Critical temperature

Electrochemistry at $YBa_2Cu_3O_7$ superconductor electrodes at temperatures above T_c 243(1988)465

Crotonic aldehyde

Electrodimerization of crotonic aldehyde in aqueous media on a mercury electrode 239 (1988)239

Crown ether

Potassium ion transport processes across the interface of an immiscible liquid pair in the presence of crown ethers 210(1986)137

Crystal

Nucleation on active sites. Part IV. Invention of an electronic method of counting the number of crystals as a function of time; and the discovery of nucleation rate dispersion 239(1988)17

Crystalline electrode

Quantum chemical calculations on the electrical double layer at the metal/vacuum interface. Part I. Hartree–Fock cluster descriptions 208(1986) 243

Crystallographic orientation

Electrochemical faceting and preferred crystallographic orientation of rhodium electrodes 221(1987)229

Electrochemical procedure for the development of large active surface area platinum electrodes with preferred crystallographic orientations 221 (1987)239

Effect of surface crystallographic orientation upon specific adsorption of azide at silver electrodes as examined by potential-difference infrared spectroscopy 235(1987)327

Changes in real surface area, crystallographic orientation and morphology of platinum electrodes caused by periodic potential treatments: phenomenological approach 239 (1988)67

The influence of the crystallographic orientation on the double layer parameters of the Au/dimethylsulphoxide interface 241(1988)373

Crystallography

Dependence of the kinetics of proton reduction at gold electrodes on the surface crystallographic orientation 223(1987)171

The influence of surface crystallography on the rate of hydrogen evolution at Pt electrodes 226 (1987)351

Crystal violet

Surface Raman spectroscopy at Pt electrodes 228(1987)219

Current distribution

Current distribution at a submicrodisc electrode 227(1987)271

Current enhancement

Square-wave voltammetric peak current enhancements by adsorption and reversibility of the redox reaction 226(1987)239

Current–potential curve

Theory of stationary current–voltage curves of redox-electrode reactions in hydrodynamic voltammetry. Part XI. Wall–jet electrodes 206 (1986)37

Voltammetry at microcylinder electrodes. Part V. Pulse voltammetric current–potential curves for quasi-reversible and totally irreversible electrode reactions 206(1986)47

Electrocatalytic reduction of carbon dioxide to methanol. Part IV. Assessment of the current–potential curves leading to reduction 206(1986)209

Linear sweep voltammetry at the tubular graphite electrode. Part III. Quasi-reversible processes 207(1986)41

Theory of electrode reactions of redox couples confined to electrode surfaces at monolayer levels. Part I. Expression of the current–potential relationship for simple redox reactions 217 (1987)1

Experimental study of illumination effects on the cathodic current–voltage curve on n-GaAs 223 (1987)215

Voltammetry of metal complex systems with different diffusion coefficients of the species involved. Part III. The current–potential relation for the general case including association/dissociation kinetics 235(1987)1

Pulse polarography: theory for the current–potential curves of an EE mechanism 235(1987)71

Theory of stationary current–potential curves at microdisk electrodes for quasi-reversible and totally irreversible electrode reactions 235(1987) 87

Pulse polarography: influence of amalgam formation on the current–potential curves in normal pulse polarography, reverse pulse polarography, differential normal pulse polarography and differential pulse polarography for a slow charge-transfer step 243(1988)241

Kinetic currents in normal pulse polarography (NPP). Current–potential curves for an electrode process with a preceding chemical reaction (CE mechanism) 243(1988)263

Current-scan polarography

The transfer of anions at the aqueous/organic solutions interface studied by current-scan polarography with the electrolyte dropping electrode 210(1986)147

Current transient

Formulation of current–time transients due to nucleation and coalescence of spherical-cap growth forms 209(1986)1

Partial charge transfer in the underpotential deposition of metals. Part I. On the nature of the deposits and the kinetics of their formation 245 (1988)1

Curve fitting

A simple computer-based method for calculation of kinetic parameters from chronoamperometric and chronocoulometric data 209(1986)57

Cyadox

Voltammetric determination of cyadox using adsorptive accumulation in a flow-through system 214(1986)115

Cyanide ion

Polarization modulation infrared spectroscopic measurements of thiocyanate and cyanide at the silver electrode/aqueous electrolyte interface by means of Kretschmann's ATR prism configuration 215(1986)93

Radiotracer study of the adsorption of CN^- ions and simultaneous adsorption of Ca^{2+} and CN^- ions at a platinized platinum electrode in alkaline medium. Novel experimental evidence for cation adsorption induced by strongly chemisorbed anions 215(1986)369

Raman spectroscopy of adsorbates on thin film electrodes deposited on silver substrates 217 (1987)397

Cyanopyridine

Surface-enhanced Raman scattering (SERS) on silver electrodes as a technical tool in the study of the electrochemical reduction of cyanopyridines and in quantitative analysis 220 (1987)339

Cyanopyridinium ion

The electroreduction of 2- and 3-cyanopyridinium ions 220(1987)139

Cyclam

Photoassisted electro-reduction of CO_2 on p-GaAs in the presence of Ni cyclam^{2+} 206(1986) 333

Indirect electroorganic reactions mediated by multivalent metal ion–macrocyclic polyamine complexes 243(1988)393

Cyclic linear current scanning

Cyclic voltammetry and chronopotentiometry with cyclic linear current scanning of terramycin at the water/nitrobenzene interface 214(1986)459

Cyclic potential sweep

Electrodeposition of polythiophene, polypyrrole and polyaniline by the cyclic potential sweep method 235(1987)259

Cyclic potential sweep electropolymerization of aniline. The role of anions in the polymerization mechanism 239(1988)387

Cyclic voltammetry

A method for estimation of hydrogen peroxide based on mediated electron transfer reactions of peroxidases at electrodes 201(1986)1

Electrocatalysis by amorphous metals of hydrogen and oxygen evolution in alkaline solution 201(1986)61

Theory of cyclic voltammetry for reversible electrodeposition of insoluble products 201 (1986)199

The effect of the counter ion concentration on the electrochemistry of tetracyanoquinodimethane polymer film electrodes 201(1986)301

Use of microelectrodes for the study of a fast chemical step in an electrode reaction 202(1986) 83

Photoactivity on the passivated lead electrode in H_2SO_4 under illumination during cyclic voltammetry within the potential range between $PbSO_4$/PbO and PbO_2/O_2 regions 202(1986)241

Stability and electrocatalytic activity of the oxo-bridged dimer $[(bpy)_2(H_2O)RuORu(OH_2)(bpy)_2]^{4+}$ in basic solutions 205(1986)185

Calculation of reversible cyclic voltammograms at spherical electrodes 206(1986)1

The influence of water on the electrodeposition of polypyrrole in acetonitrile 206(1986)139

The kinetics of some substituted catechol/*o*-quinone couples at a carbon paste electrode 206 (1986)167

Interfacial spectroelectrochemical Raman study of the silver/1,10-phenanthroline system in chloride medium 207(1986)127

Electrochemical behaviour of 2-nitrophenylguanidines in acetonitrile 207(1986) 189

Cyclic voltammetry and differential pulse voltammetry of rescinnamine 208(1986)127

Characterization of $NiCo_2O_4$ electrodes for O_2 evolution. Part I. Electrochemical characterization of freshly prepared $NiCo_2O_4$ electrodes 208(1986)273

Characterization of $NiCo_2O_4$ electrodes for O_2 evolution. Part III. Ageing phenomena of $NiCo_2O_4$ electrodes 208(1986)323

The hydrogen region of the cyclic voltammetry of Pd: the effect of pH and anion 209(1986)371

Possible importance of adions in both the binding of Lewis bases and the electrocatalytic oxidation of dissolved organics at gold electrodes in aqueous media 210(1986)69

A cyclic-voltammetric study of glucose oxidation on a gold electrode 211(1986)157

Voltammetric studies of electron-conducting modified bilayer lipid membranes 212(1986)185

Voltammetric measurement of *cis*-dichlorodiammineplatinum(II) following interfacial accumulation at mercury electrodes 212(1986)395

Cyclic voltammetry of dye-modified BLMs 212 (1986)435

Polarographic behaviour and degradation studies of triazolam 214(1986)275

Cyclic voltammetry and chronopotentiometry with cyclic linear current scanning of terramycin at the water/nitrobenzene interface 214(1986)459

Electrochemistry of cadmium ion at the water/nitrobenzene interface 214(1986)465

Surface properties of $RuO_2 + IrO_2$ mixed oxide electrodes 214(1986)535

Electrochemical kinetics at microelectrodes. Part II. Cyclic voltammetry at band electrodes 215 (1986)49

Investigation of two radical intermediates in the anodic oxidation of 1,4-dihydropyridines by electrochemiluminescence 215(1986)179

Electrolyte effects on the cyclic voltammetry of TCNQ and TCNE 215(1986)273

Anodic overoxidation of poly-*p*-phenylene in aqueous electrolytes 216(1987)157

Theory of electrode reactions of redox couples confined to electrode surfaces at monolayer levels. Part II. Cyclic voltammetry and ac impedance measurements 217(1987)15

An electrochemical investigation of the redox properties of lumiflavin in acidic media 217 (1987)65

Electroanalytical investigations. Part VI. The simulation of fast chemical equilibrium reactions in cyclic voltammetric reaction–diffusion models with spline collocation 217(1987)225

New aspects of the electrochemistry of heteropolyacids. Part II. Coupled electron and proton transfers in the reduction of silicotungstic species 217(1987)287

Dimerization of electrogenerated Mo(V) in sulphuric acid solutions 217(1987)305

Combined electrochemical and radiotracer (cyclic voltradiometric) study of the motion of counter-ions in tetracyanoquinodimethane modified electrodes 218(1987)297

A coupled voltammetric and radiometric (voltradiometric) study of the simultaneous adsorption of hydrogen and anions at platinized platinum electrodes 218(1987)337

Nanosecond time resolved cyclic voltammetry. Direct observation of electrogenerated intermediates with bimolecular diffusion controlled decay using scan rates in the megavolt per second range 218(1987)361

Electrochemical behavior of iron–1,10-phenanthroline complexes at a carbon paste electrode 219(1987)139

Electrogenerated $R_4N(Hg)_5$ films: stoichiometry and substituent effects 219(1987)247

Catalysis of quinone–hydroquinone redox reactions at polypyrrole benzenesulphonate-coated platinum electrodes 220(1987)55

Kinetic analysis of a slow electron transfer coupled with a father–son reaction 220(1987)201

Electrochemical oxidation of ethyl 3-oxo-3-phenyl-2-phenylhydrazonopropionate 220(1987) 311

Cyclic voltammetric studies of nitrato complexes of various metal ions in molten $LiNO_3 + KNO_3$ at 180 °C 221(1987)115

Thin-layer spectroelectrochemical investigations on the electrode mechanism of murexide complex with dysprosium 221(1987)143

Electrochemical reduction of 1,1,4,4-tetraphenylbutatriene 222(1987)257

Cyclic voltammetry and quartz microbalance electrogravimetry of IgG and anti-IgG reactions on silver 223(1987)67

Redox reactions of quinones on carbon materials 223(1987)161

Electrochemical study of the mechanism and kinetics of reductive glycoside elimination of adriamycin adsorbed on a mercury electrode surface 225(1987)187

Inclusion complexes of isomeric chloronitrobenzenes with α- and β-cyclodextrins studied by polarography. Analysis of the possibilities of the method 226(1987)137

Electrochemical study of the polycrystalline gold electrode in dimethylsulphoxide 226(1987)295

The influence of surface crystallography on the rate of hydrogen evolution at Pt electrodes 226 (1987)351

New aspects of the electrochemistry of heteropolyacids. Part IV. Acidity dependent cyclic voltammetric behaviour of phosphotungstic and silicotungstic heteropolyanions in water and *N,N*-dimethylformamide 227(1987)77

An electrochemical examination of the coordination of O_2 and O_2^- with a Co^{II}-macrocyclic complex in dimethylsulfoxide 229 (1987)273

Nitrogen fixation. Part I. Electrochemical reduction of titanium compounds in the presence of catechol and N_2 in MeOH or THF 230(1987) 143

Determination of electrochemical kinetic parameters using the Bond–Henderson–Oldham "global analysis" 230(1987)273

A spectroelectrochemical study of carboxymethylated cytochrome-*c* 231(1987)27

Cyclic voltammetric study of glucose oxidation on an oxide-covered platinum electrode in the presence of an underpotential-deposited thallium layer 231(1987)59

Modeling of bilayer lipid membrane (BLM) behavior by electrochemical equivalent cells 231 (1987)409

Electrochemical reactivity of biologically active quinone/hydroquinone sesquiterpenoids on glassy carbon electrodes 231(1987)567

Researches on chemically modified electrodes. Part XXIV. Preparation and characterization of Nafion polymer film modified electrodes containing Fe(II)–phen complex 233(1987)19

Electrochemical and xanthine oxidase-catalyzed oxidation of 6-thioxanthine 233(1987)49

Characteristics of a glassy carbon electrode modified in a mixture of osmium tetroxide and hexacyanoruthenate 233(1987)87

Proton transfer across the water/nitrobenzene interface facilitated by acridine chloride 234 (1987)85

Study of gold low index faces in KPF_6 solutions. Part I. Experimental behaviour and determination of the points of zero charge 234 (1987)93

Electrocatalytic oxidation of NADH by ferrocene derivatives and the influence of cyclodextrin complexation 234(1987)163

Electroanalytical investigations. Part VII. The simulation of fast chemical equilibrium reactions in cyclic voltammetric reaction–diffusion models with a combination of the heterogeneous equivalent technique and orthogonal collocation 235(1987)57

Direct electrochemistry of native and 4-chloro-3,5-dinitrophenyl (CDNP)-substituted cytochrome *c* at surface-modified gold and pyrolytic graphite electrodes 235(1987)153

Electrochemical behaviour of a heme model complex in aqueous solution 235(1987)179

On the nature of electroactive sites in clay-modified electrodes 236(1987)43

Electrochemical process in electrochromic films of lutetium diphthalocyanine 236(1987)163

Electrochemical in situ EPR evidence of two polaron–bipolaron states in polyaniline 236 (1987)199

Electrochemistry of some *N*-substituted phospha-λ^5-azenes in acetonitrile. Mechanistic aspects, electrophoric group behavior, and substituent effects 236(1987)219

Characterization and spectroelectrochemical studies of soluble polymerized 3-methoxythiophene 236(1987)239

Correlation of the anodic peak potentials with the quantum mechanical properties of various vinyl compounds 237(1987)187

Cyclic voltammetry at the tubular electrode. Part II. Quasi-reversible and totally irreversible processes 238(1987)33

Formation of a higher palladium oxide in the oxygen evolution potential range 238(1987)115

The electrochemistry of molten $K_2S_2O_7$ + K_2SO_4 + V_2O_5 electrolytes 238(1987)163

Electrochemical polymerization of β-substituted and β,β'-disubstituted selenophenes 238(1987) 225

Cyclic voltammetric studies on nitrosubstituted *N*(thioacyl)piperidines and morpholines 239 (1988)227

Analysis of a quasi-reversible two-electron cyclic voltammetric wave for an organometallic Ir(III)/Ir(I) couple at platinum and mercury electrodes 239(1988)253

Unusual quasi-reversibility (UQR) or apparent non-kinetic hysteresis in cyclic voltammetry. An elaboration upon the implications of N-shaped free energy relationships as explanation 240 (1988)1

The kinetics of charging and discharging of iridium oxide films in aqueous and non-aqueous media 240(1988)185

Charge transfer across a polymer gel/liquid interface: the polyvinyl chloride + nitrobenzene gel/water interface 241(1988)133

Reactivity of carbonylmanganese radicals toward tributyltin hydride. Kinetics analysis of the anodic oxidation of $Mn(CO)_3[P(OPh)_3]_2^-$ 241 (1988)181

Electrokinetics of the reduction of chromium(VI) ions entrapped in chromium-modified passive iron electrodes 241(1988)265

Cyclic voltammetric and potentiometric behavior of tetracyanoquinodimethane polymer film electrodes. Effect of the nature and the concentration of the supporting electrolyte 242 (1988)265

Fast sweep cyclic voltammetry at ultra-microelectrodes. Evaluation of the method for fast electron-transfer kinetic measurements 243 (1988)321

Application of cyclic voltammetry to the study of diffusion and metalliding processes 244(1988) 61

Single crystal electrochemistry of rhodium. Anion effects and order/disorder transitions of clean and silver coated Rh (111) surfaces 244(1988)147

On the origin of the "unusual splitting" of voltammograms of the Pt (111) electrode 244 (1988)347

Analysis of the cyclic voltammograms associated with deposition or precipitation of the electrochemical product 245(1988)51

Electrochemical reactivity of 2,2′,5,5′-tetrahydroxybiphenyl and related compounds adsorbed at Pt (111) surfaces: studies by EELS, LEED, Auger spectroscopy and cyclic voltammetry 245(1988)253

Effects of solution pH on the voltammetric behaviour of ferrous/ferric ions at zeolite-modified electrodes 246(1988)63

Theory of irreversible cyclic voltammograms at microcylinder electrodes 247(1988)17

Estimation of charge transfer kinetic parameters from irreversible cyclic voltammograms at carbon fiber electrodes 247(1988)29

The effect of carbon dioxide on the electroreduction of 1,4-benzoquinone 248(1988) 159

A pyrolytic carbon film electrode for voltammetry. Part V. Characterization and comparison with the glassy carbon electrode by electrochemical pretreatment in basic solution 248(1988)283

Electrochemical preparation of electrodes modified with non-stoichiometric mixed-valent tungsten(VI, V) oxides 248(1988)305

Studies of surface-modified glassy carbon electrodes obtained by electrochemical treatment. Its effect on $Ru(bpy)_3^{2+}$ adsorption and the electron-transfer rates of the Fe^{2+}/Fe^{3+} couple 248(1988)321

New organic electrolytes: tris(dialkylamino)sulfonium salts: $(R_2N)_3S^+X^-$ 248(1988)363

Adsorption of dimethylsulphoxide on the polycrystalline gold electrode from aqueous solutions 248(1988)399

The relationship between the underpotential deposition of zinc and the penetration of hydrogen in ARMCO–iron substrates 248(1988) 421

Electrodeposition of aluminium in aluminium chloride/1-methyl-3-ethylimidazolium chloride 248(1988)431

Ultramicroelectrodes: cyclic voltammetry above one million V s^{-1} 248(1988)447

Cyclic voltammetry of polyaniline: interpretation of the middle peak 249(1988)97

Simulation of cyclic voltammetry for the linked mechanism of the hydrogen electrode reaction in molten carbonates 249(1988)155

Electrochemical behavior of cytochrome c_3 from *Desulfovibrio vulgaris* Hildenborough. Promoter activity at the pyrolytic graphite electrode 249 (1988)241

The reaction between 1-methyl-4-phenylpyridinium (MPP^+) and superoxide anion in acetonitrile 250(1988)83

Electroanalytical simulations. Part IX. The simulation of a second-order chemical reaction preceding a reversible electron transfer under cyclic voltammetric conditions using orthogonal collocation 250(1988)237

Long-range structural effects in the anomalous voltammetry on ultra-high vacuum prepared Pt (111) 250(1988)301

Electrochemical reduction of isonicotinic amide in a strong acid medium 250(1988)399

Electro-oxidation of thiosulphate ion on gold. Study by means of cyclic voltammetry and Auger electron spectroscopy 250(1988)443

Cyclic voltammothermometry

Study of the prussian blue/prussian white redox reaction by cyclic voltammothermometry 236 (1987)209

Cyclodextrin

Structure changes of viologen + β-cyclodextrin inclusion complex corresponding to the redox state of viologen 210(1986)265

Inclusion complexes of isomeric chloronitrobenzenes with α- and β-cyclodextrins studied by polarography. Analysis of the possibilities of the method 226(1987)137

Electrocatalytic oxidation of NADH by ferrocene derivatives and the influence of cyclodextrin complexation 234(1987)163

The adsorption of β-cyclodextrin on a dropping mercury electrode from aqueous solutions 246 (1988)423

Adsorption of β-cyclodextrin on the mercury electrode from water and a water + ethanol mixture 247(1988)287

Cyclohexanedione

Polarographic reduction of aldehydes and ketones. Part XXVIII. 1,2-Cyclohexanedione 214(1986)259

Cyclohexanone

Reduction of 2-cyclohexen-1-one in aqueous media on a mercury electrode 215(1986)293

Cyclohexanone as an effective hydride interceptor at platinum electrodes in non-aqueous media. Characterization via effects on the electrogenerated chemiluminescence of 9,10-diphenylanthracene 242(1988)123

Cyclohexene

Electron transfer reactions and associated conformational changes. Electrochemical reduction of *trans*-1,2-diiodocyclohexane 240 (1988)227

Cyclohexenone

Electrohydrodimerization of 4,4-dimethyl-2-cyclohexen-1-one in dimethylformamide on a mercury electrode 227(1987)67

Cyclooctene

Epoxidation of *cis*-cyclooctene by molecular oxygen electrocatalysed by polypyrrole–manganese porphyrin film modified electrodes 250(1988)191

Cyclopentenone

Electrohydrodimerization of 2-cyclopenten-1-one in basic aqueous media on a mercury electrode 227(1987)55

Cyclovoltammetric current

Calculation of reversible cyclic voltammograms at spherical electrodes 206(1986)1

Cylindrical electrode

Electrochemical kinetics at microelectrodes. Part IV. Electrochemistry in media of low ionic strength 225(1987)49

Cysteamine

Electrochemical behaviour of aminothiol radioprotectors 212(1986)427

Cysteine

Determination of cystine and cysteine in seawater using cathodic stripping voltammetry in the presence of Cu(II) 239(1988)137

Cystine

Determination of cystine and cysteine in seawater using cathodic stripping voltammetry in the presence of Cu(II) 239(1988)137

Cytidine

Effect of C(5) methylation on self- and heteroassociation of cytidine in aqueous solution 212(1986)449

The effect of pH on the adsorption and the association of cytidine, cytidine-5′-monophosphate and cytidine-5′-diphosphate at the charged interface 212(1986)485

Cytidine dinucleotide

Voltammetric studies on the adsorption and association of cytidine dinucleotides in solutions of varying pH at charged interfaces 214(1986)391

Cytochrome *c*

Electrochemical behavior of horse heart cytochrome *c* in acid solutions using a 6-mercaptopurine-modified gold electrode 206 (1986)341

Intra-molecular hydrogen bonding in surface-modified gold electrodes and the effect of specific anions on the electrochemistry of cytochrome *c* 208(1986)395

An electrochemical study of the stability of cytochrome c_3 from *Desulfovibrio desulfuricans* Norway strain 211(1986)57

The adsorption of RNAse *A*, BSA and cytochrome *c* at the graphite powder|liquid interface using in parallel the adsorption isotherm plot and linear sweep voltammetry on graphite paste electrode 211(1986)103

Light-induced reduction of cytochrome *c* by colloidal TiO_2 212(1986)125

Direct electrochemistry of horse-heart cytochrome *c* at amino acid-modified gold electrodes 213(1986)333

Electrocatalytic oxidation of cytochrome-*c* at a quaternized poly-4-vinylchloride/ferricyanide modified gold surface 215(1986)385

Redox behavior of cytochrome *c* immobilized into a lecithin monolayer and deposited onto SnO_2 by the Langmuir–Blodgett technique 216 (1987)289

Direct electrochemistry of bacterial cytochrome c_{551} at surface-modified gold electrodes 217 (1987)129

Surface substitution reactions at modified gold electrodes and their effect on the electrochemistry of horse heart cytochrome *c* 217(1987)141

Relationship of two electroactive forms of horse heart cytochrome *c* at gold and glassy carbon electrodes in water and methanol 218(1987)251

Determination of cytochrome *c* by adsorptive stripping voltammetry 221(1987)257

Determination of unimolecular electron transfer rate constants for strongly adsorbed cytochrome *c* on tin oxide electrodes 221(1987)265

The mechanism of the electron-transfer reactions of cytochrome c_3 from *Desulfovibrio desulfuricans* Norway at a mercury electrode 223(1987)201

Electrochemistry and spectroelectrochemistry of cytochrome *c* at a platinum electrode 226(1987) 199

A spectroelectrochemical study of carboxymethylated cytochrome-*c* 231(1987)27

Electrochemical behaviour of cytochrome *c* at low potentials 231(1987)297

Direct electrochemistry of native and 4-chloro-3,5-dinitrophenyl (CDNP)-substituted cytochrome *c* at surface-modified gold and pyrolytic graphite electrodes 235(1987)153

The effects of temperature and electrolyte at acidic and alkaline pH on the electron transfer reactions of cytochrome *c* at In_2O_3 electrodes 239(1988)291

IR reflectance studies of electron transfer promoters for cytochrome *c* on a gold electrode 245(1988)275

Electrochemical and spectroscopic characterization of a gold plated reticulated vitreous carbon thin-layer electrode 248(1988)341

Electrochemical behavior of cytochrome c_3 from *Desulfovibrio vulgaris* Hildenborough. Promoter activity at the pyrolytic graphite electrode 249 (1988)241

Electrochemical behavior of cytochrome *c* at a gold electrode modified by various (Cu, Sn, As, Sb, Bi, S and Se) ad-atoms 250(1988)201

Cytochrome *c* oxidase

Conformational transitions in the regulation of cytochrome *c* oxidase activity 211(1986)79

Molecular control of cytochrome oxidase activity 212(1986)159

Azide binding to cytochrome *c* oxidase. Effects on the oxidation–reduction and spectral properties of cytochromes *a* and a_3 231(1987) 369

Site of azide interaction with cytochrome *c* oxidase in submitochondrial particles from pigeon breast muscle 231(1987)383

The role of peroxides in mitochondrial reduction of dioxygen to water 232(1987)51

Cytoskeleton

Microtubule-dependent membrane interactions studied in two types of double bilayer membrane systems 211(1986)395

Cytotoxicity

Effects of organic peroxides on human epidermal keratinocytes 232(1987)263

D

Daunomycin

Influence of the antitumour antibiotics daunomycin and violamycin B I on membranes of human erythrocytes. Passive electrical investigations 231(1987)81

Dc polarography

The coupling of the double-layer admittance and the faradaic admittance of a stepwise electrode reaction complicated by adsorption of the reactants with experimental verification on the reduction of pyrazine 202(1986)271

A critical study of the use of logarithmic analysis as a criterion for elucidation of the reaction mechanism of electrodimerization processes in dc polarography 213(1986)23

Dc polarographic study of catalytic hydrogen evolution in the Pt(IV)–As(III) system 247 (1988)329

Dc wave

Determination of the individual electrochemical parameters from a composite single dc wave by the Gauss–Newton method 206(1986)81

Determination of the individual electrochemical parameters from a single composite dc wave by the Gauss–Newton method: dc wave composed of three waves 223(1987)79

Deazapurine nucleotide

Electrochemical and photochemical oxidation of the deazapurine nucleotide drug tubercidin-5′-monophosphate 239(1988)161

Deconvolution

Quantitative analysis of the distribution of the hydrogen adsorption states at platinum surfaces. Part II. Application to Pt (110), stepped and polyoriented platinum surfaces in sulphuric acid medium 233(1987)251

Degradation study

Polarographic behaviour and degradation studies of triazolam 214(1986)275

Dehalogenation

Electrocatalytic reactions in organized assemblies. Part V. Dehalogenation of 4,4′-dibromobiphenyl in cationic micelles at bare and clay-modified carbon electrodes 245(1988)331

Dehydration

Hydration–dehydration of the electroactive group on the electrochemical behaviour of pyridoxal-5′-phosphate 212(1986)325

Dehydrodimerisation

The evaluation of electrochemical reaction rate data using first order analytical models 248 (1988)1

Density-functional theory

Solvent effects in a non-primitive electrolyte model 247(1988)73

Deoxyribonucleic acid

Electrochemical behaviour of biological macromolecules 211(1986)275

Charge transfer mechanism for carcinogenesis by alkylating and other agents 211(1986)305

Direct excitation of internal modes of DNA by microwaves 212(1986)63

Electron exchange between mercury and denatured DNA strands 214(1986)373

The sodium responsive tungsten bronze electrode. An electrode for sodium ion analysis of DNA solutions 220(1987)225

Ac voltammetry: a control method for the damage to DNA caused in vitro by alkylating mutagens 227(1987)11

A proposed mechanism underlying the process of Ca^{2+}-mediated transfer of DNA across biological membranes 231(1987)111

Is DNA transport driven by the proton electrochemical potential difference in the naturally transformable bacteria, *Streptococcus pneumoniae*? 231(1987)269

Electron transport in biological processes. Deoxyribonucleic acid degradation and its relationship with the electrochemical behaviour of hydroxyquinone derivatives 231(1987)523

Role of metal complexes in the formation–detoxication action of active oxygen species 232(1987)21

Formation and reaction of peroxyl radicals of polynucleotides and DNA in aqueous solution 232(1987)147

Solvent effects in a non-primitive electrolyte model 247(1988)73

Depolarization

On the coverage dependence of the partial charge transfer coefficient 202(1986)1

Electrodeposition of zinc + nickel alloy phases and electrochemical stripping studies of the anomalous codeposition of zinc 221(1987)211

Deposition

The mechanism of the deposition of manganese dioxide. Part II. Electrode impedance studies 201(1986)113

The mechanism of the deposition of manganese dioxide. Part III. Rotating ring–disc studies 201 (1986)123

An iridium-based mercury-film electrode. Part I. Selection of substrate and preparation 216 (1987)53

Gamma-irradiated polymer-modified mercury film electrodes 222(1987)243

Analysis of the cyclic voltammograms associated with deposition or precipitation of the electrochemical product 245(1988)51

Composition and diffusion properties of γ-FeOOH deposited in sulphate solutions 247 (1988)185

Deposition potential

Electrochemisorption of hexahydroxyplatinate(IV) on thin titania films 228(1987)471

Depth profiling

AES depth profiling of electrochemically grown γ-FeOOH 246(1988)53

Desad peak

A somewhat unusual desad peak observed with the protein-solubilizing detergent CHAPS 222 (1987)271

Desulfocibrio desulfuricans

An electrochemical study of the stability of cytochrome c_3 from *Desulfovibrio desulfuricans* Norway strain 211(1986)57

The mechanism of the electron-transfer reactions of cytochrome c_3 from *Desulfovibrio desulfuricans* Norway at a mercury electrode 223(1987)201

Desulfocibrio vulgaris

Electrochemical behavior of cytochrome c_3 from *Desulfovibrio vulgaris* Hildenborough. Promoter activity at the pyrolytic graphite electrode 249 (1988)241

Detection limit

Influence of the experimental conditions on the performance of the electrokinetic detector 226 (1987)227

Cathodic stripping voltammetry of 2-thioorotic acid at the hanging mercury drop electrode 237 (1987)105

Non-conventional normal pulse polarographic techniques with a static mercury electrode for applications at very low reactant concentrations 246(1988)283

Detection system

The development of redox-modified electrodes as charge-accumulating devices for use in higher sensitivity detection systems 250(1988)417

Detergent

Modification of human erythrocyte membrane potentials by the action of the polyoxyethylene detergent Triton X-100 211(1986)7

A somewhat unusual desad peak observed with the protein-solubilizing detergent CHAPS 222 (1987)271

Detoxication

Induction of selenium-glutathione peroxidase by stimulation of metabolic hydrogen peroxide production *in vivo* 232(1987)247

Diabetes

Monosaccharide autoxidation: a potential source of oxidative stress in diabetes? Model reactions with nucleotides and protein 232(1987)283

Diacetyl

Derivation and experimental verification of approximate explicit equations in differential pulse polarography. Part III. Diagnostic criteria for characterization of first-order processes 241 (1988)291

Dialkylpyrrolidinium ion

Electrogenerated $R_4N(Hg)_5$ films: stoichiometry and substituent effects 219(1987)247

Diaminoacridine

Effect of poly(α-D-glutamic acid) on the polarographic reduction of 3,6-diaminoacridines 244(1988)235

Diaminoanthraquinone

Quinone molecular films derived from 1,5-diaminoanthraquinone 235(1987)381

Diamino(trimethoxybenzyl)chloropyrimidine

Electrochemical reduction of 2,4-diamino-5-(3,4,5-trimethoxybenzyl)-6-chloropyrimidine 213(1986)111

Dianisidine

A Laplace space rate/mechanism analysis of the two-electron chronoamperometric oxidation of *o*-dianisidine in sulfuric acid medium 202(1986)37

Diaryl sulphur compound

Electrochemistry of thioxanthene, thioxanthone and related compounds in acetonitrile. Substituent effects and correlation of electrochemical behavior with molecular orbital calculations 210(1986)45

Diazodimedone

The electrochemical reduction of diazodimedone. Kinetics and thermodynamics of the formation of the carbene anion radical 218(1987)227

Dibenzo-crown ether

Electroactive charge-transfer polymers from anodic coupling of dibenzo-crown ethers. Part II. Influence of the complexing properties of the polyether rings 206(1986)115

Complex formation of methyl viologen and diquat with macrocyclic ether dibenzo-24-crown-8 240(1988)105

Electroactive charge transfer polymers from anodic coupling of dibenzo-crown ethers. Part III. Intrinsic redox properties and preliminary use as electrode modifiers 240(1988)117

Dibromobenzophenone

Redox polymer films from cathodic coupling of 4,4′-dibromobenzophenone and 2,7-dibromofluorenone 215(1986)377

Dibromobiphenyl

Electrocatalytic reactions in organized assemblies. Part V. Dehalogenation of 4,4′-dibromobiphenyl in cationic micelles at bare and clay-modified carbon electrodes 245(1988)331

Dibromodiphenylethane

Catalysis of 1,2-dibromo-1,2-diphenylethane reduction on platinum and carbon felt electrodes coated by polypyrrole films containing 4,4′-bipyridinium groups. Effects of film thickness, film composition and comparison with homogeneous catalysis 224(1987)111

Dibromofluorenone

Redox polymer films from cathodic coupling of 4,4′-dibromobenzophenone and 2,7-dibromofluorenone 215(1986)377

Dibromopyridine

Easy preparation of electrodes modified by conjugated polypyridine films displaying coordinative properties and their effectiveness as mediators of electrocatalytic processes 242 (1988)131

Dicarboxylic ion

Adsorption of dicarboxylic ions on the (311) face of gold from solutions at constant cationic strength 248(1988)209

Dichlorobiphenyl

Oxidation of 4,4′-dichlorobiphenyl at a ruthenium dioxide anode 213(1986)329

Dichlorodiammineplatinum

Voltammetric measurement of *cis*-dichlorodiammineplatinum(II) following interfacial accumulation at mercury electrodes 212(1986)395

Dichloromethane

Reversible oxidation processes in dichloromethane for triethyl-, diethyl-, trimethyl-, and dimethyllead compounds at mercury electrodes 218(1987)197

Novel oxidation processes for the methyltin compounds $(CH_3)_4Sn$, $(CH_3)_3SnCl$, $(CH_3)_2SnCl_2$ and CH_3SnCl_3 at mercury electrodes in dichloromethane 227(1987)29

Dichlorophenolindophenol

Spectroelectrochemical behaviour of water bounded Chl *a* in the presence of various acceptors 231(1987)17

Dicobalt cofacial porphyrin

Redox behaviour of the dicobalt cofacial porphyrin Co_2FTF4 and related complexes adsorbed on graphite electrodes 220(1987)247

Electrochemical and spectroscopic properties of dicobalt cofacial porphyrins in non-aqueous media. Influence of the interporphyrin distance on the redox, spectrophotometric and EPR properties of the cobalt centers 234(1987)277

Dicyclohexylcarbodiimide

Studies on the binding of dicyclohexylcarbodiimide to the mitochondrial bc_1 complex 212(1986)301

Dielectric constant

The role of PVC in ion selective electrode membranes 237(1987)181

Dielectric dispersion

Transition dipole–solvent interaction in optical electron transfer 228(1987)153

Dielectric interlayer

Electrochemistry and photoelectrochemistry of chlorophyll on a metallic electrode. Part II. Photoreaction of adsorbed chlorophyll 227 (1987)115

Dielectric permittivity

Activation energy of electrode reactions: the non-local effects 228(1987)329

Dielectric saturation

The standard Gibbs energy of ion resolvation and non-linear dielectric effects 235(1987)23

Dielectric spectroscopy

Dielectric spectroscopy of protein translational diffusion in prokaryotic membranes and membrane vesicles 211(1986)183

Dielectric spectroscopy of energy coupling membranes: Chloroplast thylakoids 212(1986)45

Dielectrophoresis

Evidence for ac fields produced by mammalian cells 231(1987)287

Dielectrophoresis of individual cells. Experimental methods and results 231(1987)549

Diethynylbenzene

Photoelectrochemistry of *para*-diethynylbenzene copper(I) acetylides deposited as thin films onto copper electrodes 207(1986)247

Differential capacitance

Condensed thymine films at the mercury/water interface. Part III. Thermodynamic analysis 218 (1987)273

Comparison and discussion of some theories of the equilibrium electrical double layer in liquid electrolytes 223(1987)1

Differential capacity

Adsorption of 2,3-dimethylpyridine at the mercury/electrolyte interface 209(1986)203

Capacity of semiconductor electrodes with multiple bulk electronic states. Part I. Model and calculations for discrete states 228(1987)135

Study of gold low index faces in KPF_6 solutions. Part I. Experimental behaviour and determination of the points of zero charge 234 (1987)93

On the non-linear response to charging of a relaxing capacitor 237(1987)1

Adsorption of alkanes on a bismuth electrode from an alcoholic medium 239(1988)333

Adsorption of β-cyclodextrin on the mercury electrode from water and a water + ethanol mixture 247(1988)287

Differential equation

Electrochemical digital simulation by Runge–Kutta integration 240(1988)17

Differential normal pulse polarography

Pulse polarography: current–potential curves in normal pulse polarography, reverse pulse polarography, differential normal pulse polarography and differential pulse polarography for a slow charge-transfer step 205(1986)21

Differential pulse polarography

Derivation and experimental verification of approximate explicit equations in differential pulse polarography. Part II. Second-order processes 201(1986)237

Pulse polarography: current–potential curves in normal pulse polarography, reverse pulse polarography, differential normal pulse polarography and differential pulse polarography for a slow charge-transfer step 205(1986)21

Electroanalytical chemistry of copper, lead and zinc complexes of amino acids at the ionic strength of seawater (0.70 *M* $NaClO_4$). Part III 208(1986)137

An electrochemical study of the stability of cytochrome c_3 from *Desulfovibrio desulfuricans* Norway strain 211(1986)57

Differential pulse-polarographic determination of formaldehyde in lung surfactant 211(1986)89

Electrode process of glutamate dehydrogenase in differential pulse polarography 211(1986)329

Calculation of differential pulse polarographic curves for the reduction of complexes 216(1987)1

Irreversibility and reactant adsorption in differential pulse polarography 218(1987)77

Redox behaviour of the dicobalt cofacial porphyrin Co_2FTF4 and related complexes adsorbed on graphite electrodes 220(1987)247

Differential pulse polarographic studies of copper(II)–polyamine complexes at low ligand concentrations 241(1988)281

Derivation and experimental verification of approximate explicit equations in differential pulse polarography. Part III. Diagnostic criteria for characterization of first-order processes 241 (1988)291

The role of intramolecular association in the electrochemical reduction of viologen dimers and trimers 243(1988)143

Differential pulse voltammetry

Cyclic voltammetry and differential pulse voltammetry of rescinnamine 208(1986)127

Theoretical considerations on square wave and differential pulse voltammetry applied in anodic stripping with use of mercury film electrodes 213(1986)177

Voltammetric determination of Cu, Cd, Hg, Pb and Zn in cereals 226(1987)263

A spectroelectrochemical study of carboxymethylated cytochrome-*c* 231(1987)27

Examination of staircase, normal pulse and differential pulse voltammetry at inlaid ultramicroelectrodes using a computerized multi-time-domain measurement method 241 (1988)1

A pyrolytic carbon film electrode for voltammetry. Part V. Characterization and comparison with the glassy carbon electrode by electrochemical pretreatment in basic solution 248(1988)283

Electrochemical behavior of cytochrome c_3 from *Desulfovibrio vulgaris* Hildenborough. Promoter activity at the pyrolytic graphite electrode 249 (1988)241

Diffusion

Electron hopping between fixed sites. Equivalent diffusion and migration laws 201(1986)211

A simple computer-based method for calculation of kinetic parameters from chronoamperometric and chronocoulometric data 209(1986)57

Effects of restricted diffusion at ultramicroelectrodes in brain tissue. The pool model: Theory and experiment for chronoamperometry 213(1986)31

Electroanalytical investigations. Part VI. The simulation of fast chemical equilibrium reactions in cyclic voltammetric reaction–diffusion models with spline collocation 217(1987)225

Propagational inadequacy of the Hopscotch finite difference algorithm: the enhancement of performance when used with an exponentially expanding grid for simulation of electrochemical diffusion problems 222(1987)101

The transient response of electrodes coated with membrane-type polymer films under conditions of diffusion and migration of the redox ions 237(1987)13

Diffusion-migration for one-dimensional mixed conduction in thin layers at steady state 238 (1987)1

Electron hopping between fixed sites. "Diffusion" and "migration" in counter-ion conservative redox membranes at steady state 242(1988)1

Application of cyclic voltammetry to the study of diffusion and metalliding processes 244(1988) 61

Diffusional impedance

Diffusional impedance of stationary microelectrodes 215(1986)139

Diffusional relaxation

The charge separation process in non-homogeneous electrolyte solutions 241(1988)57

Diffusion coefficient

Pulse polarography of metal/polyelectrolyte complexes and operation of the mean diffusion coefficient 202(1986)57

Application of carbon-fiber microelectrodes to the study of non-conductive inverse microemulsions. Interpretation of the diffusion coefficients 210(1986)205

Voltammetry of metal complex systems with different diffusion coefficients of the species involved. Part I. Analytical approaches to the limiting current for the general case including association/dissociation kinetics 234(1987)1

Voltammetry of metal complex systems with different diffusion coefficients of the species involved. Part II. Behaviour of the limiting current and its dependence on association/dissociation kinetics and lability 234(1987)17

Voltammetry of metal complex systems with different diffusion coefficients of the species involved. Part III. The current–potential relation for the general case including association/dissociation kinetics 235(1987)1

Chronopotentiometric study of titanium in molten NaCl + KCl + K_2TiF_6 239(1988)203

Electroanalysis with modified carbon paste electrodes. Coordination trends, selectivity and sensitivity 242(1988)87

The role of oxygen ion diffusion in the electrode reactions of β'' alumina 244(1988)123

Composition and diffusion properties of γ-FeOOH deposited in sulphate solutions 247 (1988)185

Charge-transport rates in polyelectrolyte films on electrodes. Disparate diffusion coefficients for alizarin red S with two separate electroactive centers 247(1988)339

Diffusion coefficients of silver ions in $CuSO_4$ + H_2SO_4 solutions 249(1988)123

Diffusion control

On diffusion-controlled film formation and dissolution 205(1986)303

Voltammetric response for the diffusion-controlled electrodeposition onto growing hemispherical nuclei 243(1988)57

Diffusion-controlled decay

Nanosecond time resolved cyclic voltammetry. Direct observation of electrogenerated intermediates with bimolecular diffusion controlled decay using scan rates in the megavolt per second range 218(1987)361

Diffusion-controlled growth

The theory of chronoamperometry for the investigation of electrocrystallization. Mathematical description and analysis in the case of diffusion-controlled growth 236(1987)1

Note on a theory of three-dimensional electrochemical nucleation with diffusion-controlled growth 247(1988)135

Two-dimensional nucleation according to an exponential law with diffusion-controlled growth in the adsorption of camphor-10-sulfonate at the mercury/electrolyte interface 250(1988)159

Diffusion current

Diffusion current at a band electrode by an integral equation method 215(1986)29

Frequency response of the limiting diffusion current to a magnetic field perturbation 227 (1987)275

Novel tools for determining mechanically induced modifications of membrane structure: electrochemical and fluorescence methods 231 (1987)303

Diffusion to ensembles of microelectrodes 240 (1988)61

Diffusion equation

Theory of chronoamperometric curves at microband electrodes 225(1987)19

Diffusion layer

The relationship between mass transport to channel and rotating disk electrodes 245(1988) 287

Diffusion layer imaging

Spectroelectrochemical determination of trace concentrations by diffusion layer imaging 220 (1987)41

Diffusion-migration impedance

Diffusion-migration impedances for finite, one-dimensional transport in thin layer and membrane cells. An analysis of derived electrical quantities and equivalent circuits 210(1986)1

Diffusivity

Dealing with unequal diffusivities among reactants in kinetic studies at rotating disk and ring–disk electrodes. The reduction of H_2O_2 as catalyzed by Co^{II}(cyclam) and Fe(II) 216(1987) 249

Digital acquisition

Errors arising from carrying out integration, and other operations of calculus, on digitally acquired data 208(1986)1

Kinetic theory of the open-circuit potential decay method for evaluation of behaviour of adsorbed intermediates. Analysis for the case of the H_2 evolution reaction 221(1987)1

Digital simulation

Electrochemical digital simulation by Runge–Kutta integration 240(1988)17

Implicit calculation of boundary values in digital simulation applied to several types of electrochemical experiment 240(1988)27

Dihydropyridine

Investigation of two radical intermediates in the anodic oxidation of 1,4-dihydropyridines by electrochemiluminescence 215(1986)179

One-electron and two-electron reductions of 1-methyl-4-phenyl pyridinium (MPP^+) 242(1988) 171

Electrochemical synthesis and reactivity of 3,5-dicyano-1,2,4,6-tetramethylpyridinium 246 (1988)373

Dihydropyridine derivative

Electrochemical oxidation of *N*-substituted 1,4- and 1,2-dihydropyridine derivatives. Studies using the rotating ring–disk electrode and ESR 226(1987)103

Dihydroxyazo dye

Stripping voltammetry with adsorptive accumulation for trace measurements of titanium 208(1986)383

Diiodocyclohexane

Electron transfer reactions and associated conformational changes. Electrochemical reduction of *trans*-1,2-diiodocyclohexane 240 (1988)227

Diketone

Linear relationships between ligand composition and reversible half-wave potentials of ruthenium(III) and ruthenium(II) complexes with two kinds of β-diketones 246(1988)225

Dilute acid

Cathodic hydrogen evolution on mercury from aqueous solutions of dilute acids at temperatures higher than 100 °C 204(1986)131

Dimedone-2-arylazo derivative

Polarographic behaviour of dimedone-2-arylazo derivatives in alcoholic aqueous media 201 (1986)101

Dimensional change

The electrical double layer of carbon and graphite electrodes. Part III. Charge and dimensional changes at wide potential range 206(1986)101

Dimerization

Consideration of electrochemical dimerization reactions in terms of the perturbation molecular orbital theory. Part II. Determination of the parameters of the correlation equation 209 (1986)43

Dimerization of electrogenerated Mo(V) in sulphuric acid solutions 217(1987)305

Electrochemistry in near-critical and supercritical fluids. Part V. The dimerization of quinoline and acridine radical anions and dianions in ammonia from −70 °C to 150 °C 240(1988)253

Dimerization rate constant

One-electron and two-electron reductions of 1-methyl-4-phenyl pyridinium (MPP^+) 242(1988) 171

Dimethoxybenzene

Electrochemical polymerization of paradialkoxybenzenes. Part I. Anodic oxidation of paradimethoxybenzene in dry acetonitrile 218 (1987)173

Dimethylaminobenzonitrile

Surface-enhanced Raman spectroscopy of *p*-dimethylaminobenzonitrile: Field dependence and molecular orientation 214(1986)675

Dimethylbianthrone

Use of microelectrodes for the study of a fast chemical step in an electrode reaction 202(1986) 83

Dimethylformamide

Kinetics and mechanism of the V(III) + e^- ⇄ V(II) reaction at a mercury electrode in water + dimethylformamide mixtures 201(1986)283

Electrode reactions of nickel(II)–, copper(II)– and zinc(II)–8-quinolinethiolato complexes in *N,N*-dimethylformamide 205(1986)209

Electrochemical reduction mechanism of 5(1H)-pyrromethenones in dimethylformamide on a mercury electrode 211(1986)125

Electrochemical properties of copper–PDT complexes 214(1986)507

Heterogeneous one-electron exchange of silicotungstic heteropolyanion in dimethylformamide 219(1987)355

The electrochemistry of ferrocene in non-aqueous solvents 221(1987)165

Study of the reactions of 9-nitroanthracene anion radicals and dianions in dimethylformamide by the controlled potential constant-voltage electrolysis method 224(1987)273

Electrochemical reduction of substituted nitrobenzenes in *N,N*-dimethylformamide containing proton donating agents. Effect of the double layer on the basicity of the nitro group 226(1987)61

Electrohydrodimerization of 4,4-dimethyl-2-cyclohexen-1-one in dimethylformamide on a mercury electrode 227(1987)67

Electrochemical reduction of bromonitriles: Mechanism and polarographic maxima 235 (1987)209

Reaction entropies in quinone reduction in *N,N*-dimethylformamide and propionitrile 242 (1988)323

Dimethylglyoxime

Electrochemical reduction of Ni(II) on the hanging mercury drop electrode in the presence of dimethylglyoxime 214(1986)157

A study on the mechanism of the electrochemical reduction of the cobalt–dimethylglyoxime system in NH_3/NH_4Cl 216(1987)181

Dimethylphenylpentenone

Electrochemical reduction of 4,4-dimethyl-1-phenyl-1-penten-3-one 241(1988)297

Dimethylpyridine

Adsorption of 2,3-dimethylpyridine at the mercury/electrolyte interface 209(1986)203

Investigation of the adsorption kinetics of 2,3-dimethylpyridine at the mercury/electrolyte interface 224(1987)261

Dimethylpyrrolidinium tetrafluoroborate

The growth of ordered films during the cathodic reduction of a tetraalkylammonium ion 209 (1986)91

Dimethylsulphone

Electrochemical formation of LiAl alloy in molten dimethylsulfone at 150 °C 209(1986)283

Electrochemical formation of a magnesium vanadium bronze $Mg_xV_2O_5$ in sulfone-based electrolytes at 150 °C 218(1987)241

Electrochemical behaviour of copper oxide in molten dimethyl sulfone at 150 °C 233(1987)189

Electrochemical behaviour of $CuO + V_2O_5$ systems in molten dimethyl sulfone at 150 °C 242(1988)181

Dimethylsulphoxide

1,1′-Trimethylenebisthymine as synthetic model of dinucleotide TpT. Electrochemical reduction 201(1986)329

Electrode kinetic studies of the $Zn^{2+}/Zn(Hg)$ and $Li^+/Li(Hg)$ couples in dimethylsulphoxide + propylene carbonate solvent systems 207 (1986)177

Behaviour of some poly(pyrrole–anthraquinone) films in DMSO electrolytes 219(1987)165

The reduction mechanism of Cd(II) at mercury in dimethylsulfoxide containing tetraethylammonium perchlorate 221(1987)129

Potentiometric study of the cadmium(II)–chloride and cadmium(II)–bromide association equilibria in ammonium nitrate + dimethyl sulphoxide melts 225(1987)111

Solvent structure at the mercury/solution interface in dimethylsulphoxide 226(1987)283

Electrochemical study of the polycrystalline gold electrode in dimethylsulphoxide 226(1987)295

Electrochemical behavior of the Eu(III/II)–EDTA system on a mercury electrode in water + dimethylsulphoxide (DMSO), water + acetonitrile (AN) and water + hexamethylphosphortriamide (HMPT) mixtures 226(1987)315

An electrochemical examination of the coordination of O_2 and O_2^- with a Co^{II}-macrocyclic complex in dimethylsulfoxide 229 (1987)273

Adsorption and reduction of iron and cobalt phthalocyanines in DMSO at glassy carbon and pyrolytic graphite electrodes 234(1987)297

Cyclic voltammetric studies on nitrosubstituted *N*(thioacyl)piperidines and morpholines 239 (1988)227

Solvent effect on the rate of homogeneous and electrochemical electron exchange 247(1988)85

Adsorption of dimethylsulphoxide on the polycrystalline gold electrode from aqueous solutions 248(1988)399

Electrode kinetics of the Cu(II)/Cu(I) system at platinum in water + dimethylsulphoxide (DMSO) mixtures 250(1988)61

Dimethyl viologen

Electronic and solvent electron-transfer rate parameters from charge-transfer spectroscopy of betaine-1 and the $[Fe(CN)_6]^{4-}$ · dimethyl viologen ion pair 204(1986)45

Dimyristoylphosphatidate

Differences in permeability of dioleoylphosphatidylcholine model membranes containing saturated or unsaturated phosphatidic acids 211(1986)167

Dinitrophenol

Effect of dinitrophenol on membrane potential, membrane resistance and chlorophyll fluorescence of *Chara corallina* internodal cells at various pH values 231(1987)165

Dioctyl sebacate

The role of PVC in ion selective electrode membranes 237(1987)181

Dioleoyl lecithin

Phospholipid monolayers of di-oleoyl lecithin at the mercury/water interface 244(1988)99

Phospholipid monolayers of di-oleoyl lecithin (di-O-PC) at the mercury/water interface. Effects on faradaic reactions 248(1988)167

Dioleoylphosphatidylcholine

Differences in permeability of dioleoylphosphatidylcholine model membranes containing saturated or unsaturated phosphatidic acids 211(1986)167

Dioxypurine

Electrochemical oxidation of 6,8-dioxypurine 223(1987)143

Diphenhydramine hydrochloride-selective electrode

Diphenhydramine-sensitive membrane electrodes based on poly(vinylchloride) matrices and their use in drug analysis 233(1987)29

Diphenylanthracene

Electrogenerated chemiluminescence. Part XLVIII. Electrochemistry and electrogenerated chemiluminescence of bis(2,4,6-trichlorophenyl) oxalate–luminescer systems 238(1987)277

Anomalous transient behavior in the electrogenerated chemiluminescence of 9,10-diphenylanthracene 242(1988)107

Cyclohexanone as an effective hydride interceptor at platinum electrodes in non-aqueous media. Characterization via effects on the electrogenerated chemiluminescence of 9,10-diphenylanthracene 242(1988)123

Diphenyl selenide

Cathodic reduction of diphenyl selenide in acetonitrile 248(1988)381

Diphthalocyanine film

The rare earth substitution effect on the electrochemistry of diphthalocyanine films in contact with an acidic aqueous medium 249 (1988)181

Dipolar potential

Chemical modification of the bilayer lipid membrane biosensor dipolar potential 211(1986) 371

Dipole

Determination of the potential due to a surface distribution of dipole systems with several imaging planes. Application to organic adsorption 239(1988)447

Dipole moment

The surface dipole moment of species adsorbed from a solution 249(1988)25

Dipole–solvent interaction

Transition dipole–solvent interaction in optical electron transfer 228(1987)153

Diquat

Complex formation of methyl viologen and diquat with macrocyclic ether dibenzo-24-crown-8 240(1988)105

Directional control

Directional control of yeast cell division by electric stimulus 212(1986)235

Disaggregation constant

Surface free energy as the potential in oligomeric equilibria: prediction of hemoglobin disaggregation constant 231(1987)349

Disc electrode

Thermokinetic instability of electrode processes. Part II. Transpassive dissolution of copper in nitrate solutions 207(1986)11

Discharge process

In-situ Raman spectroscopy of manganese dioxide during the discharge process 243(1988) 219

Dispersion shift

Transition dipole–solvent interaction in optical electron transfer 228(1987)153

Disproportionation

Electron-transfer reactions and associated conformational changes. The effect of disproportionation on the oxidation of dixanthylene at elevated temperatures 233(1987) 63

Electrochemistry of a lutetium diphthalocyanine film in contact with an acidic aqueous medium 233(1987)77

Dissociation reaction

A pulse polarographic measurement of the kinetics of dissociation of the $[Ru^{III}(edta)]_2$ dimer 202(1986)101

Dissolved-oxygen electrode

Silicone membrane-covered dissolved-oxygen electrode insensitive to flow and medium properties 206(1986)321

Dissolved organic

Possible importance of adions in both the binding of Lewis bases and the electrocatalytic oxidation of dissolved organics at gold electrodes in aqueous media 210(1986)69

Disulphide bond

Electrochemical conversion of lactoperoxidase, ceruloplasmin and alkaline phosphatase on mercury electrodes 211(1986)407

Dithiothreitol

An investigation of $\Delta\bar{\mu}_{H^+}$ activation of chloroplast ATPase 212(1986)111

Dixanthylene

Electron-transfer reactions and associated conformational changes. The effect of disproportionation on the oxidation of dixanthylene at elevated temperatures 233(1987) 63

Dodecyl alcohol

Adsorption of a mixture of sodium dodecyl sulphate and dodecyl alcohol on a mercury electrode and its effect on the electrochemical processes of cadmium(II) in sodium chloride solution 227(1987)129

Donnan Exclusion Failure

Donnan exclusion failure in low anion site density membranes containing valinomycin 223 (1987)51

Doping

Electrochemical and photoelectrochemical consequences of "doping" zinc tetraphenylporphyrin with axial pi acid ligands 221(1987)83

Electroactive charge transfer polymers from anodic coupling of dibenzo-crown ethers. Part III. Intrinsic redox properties and preliminary use as electrode modifiers 240(1988)117

Doping density

Preparation and electrochemical characterization of WSe_2 electrodes having a wide range of doping densities 234(1987)133

Double layer

The double-layer capacity of *sp* metals 205 (1986)323

Double layer structure at the interface between two immiscible electrolyte solutions 206(1986)69

The electrical double layer of carbon and graphite electrodes. Part III. Charge and dimensional changes at wide potential range 206(1986)101

Quantum chemical calculations on the electrical double layer at the metal/vacuum interface. Part I. Hartree–Fock cluster descriptions 208(1986) 243

Quantum chemical calculations on the electrical double layer at the metal/vacuum interface. Part II. Properties of single crystal surfaces 208 (1986)257

Uniformity of the electrical double layer on oxides 208(1986)401

The reduction of Cr(III) in concentrated aqueous electrolytes at a DME. The influence of anions 210(1986)111

Note on the behaviour of the (111) gold face in electrolytic solutions 210(1986)303

Investigation of electrochemical double-layer effects on chromatophore membranes of photosynthetic bacteria 214(1986)407

Membrane transport associated with double-layer charging of polymer modified electrodes 216 (1987)241

Comparison of experiments with calculations using double-layer models. Specific adsorption of Cs^+ on bismuth 218(1987)65

Comparison and discussion of some theories of the equilibrium electrical double layer in liquid electrolytes 223(1987)1

The double layer at the interface between two immiscible electrolyte solutions. Part III. Capacitance of the water/1,2-dichloroethane interface 225(1987)65

Electrochemical reduction of substituted nitrobenzenes in *N,N*-dimethylformamide containing proton donating agents. Effect of the double layer on the basicity of the nitro group 226(1987)61

Application of the Gouy–Chapman–Stern–Grahame model of the electrical double layer to the determination of single ion activities of KF aqueous solutions 226(1987)341

The electrical double layer of carbon and graphite electrodes. Part IV. Dependence of carbon electrode dimensions and electrical capacity on pH 227(1987)41

The temperature dependence of the double-layer properties of gold faces in perchloric acid solutions. Part I. The (210) gold face 229(1987) 107

Double-layer studies in a non-polar solvent consisting of Al_2Br_6 and KBr in ethylbenzene 229(1987)165

The double layer of single crystal gold electrodes in liquid and solid $HClO_4 \cdot 5.5\ H_2O$ 230(1987)281

The temperature dependence of the double-layer properties of gold faces in perchloric acid solutions. Part II. The (110) gold face 236(1987) 283

Adsorption of CO on a Pt electrode in acidic solution. IR-active and -inactive CO's adsorbed in the double-layer region 240(1988)281

The influence of the crystallographic orientation on the double layer parameters of the Au/dimethylsulphoxide interface 241(1988)373

The electrical double layer at the mercury/solution interface in organic solvents 244(1988)1

The temperature dependence of the double layer parameters of the (111) face of silver 244(1988) 133

Double layer admittance

The coupling of the double-layer admittance and the faradaic admittance of a stepwise electrode reaction complicated by adsorption of the reactants with experimental verification on the reduction of pyrazine 202(1986)271

Double-layer capacitance

The growth of compact layers at the electrode interface. Part I. Complexes of cobalt, nickel and iron with 2,2′-bipyridine and 2,2′,2″-terpyridine in aqueous sodium perchlorate 206(1986)269

Double-layer capacity

Electrochemical study of the polycrystalline gold electrode in dimethylsulphoxide 226(1987)295

The double layer capacity of jellium with pseudopotentials 229(1987)39

The influence of a faradaic process on the double-layer capacity 229(1987)181

Double potential step chronocoulometry

Adsorption of Tl(I) on mercury in azide media 209(1986)361

Dropping mercury electrode

On the catalytic effect of thiourea on the electrochemical reduction of cadmium(II) ions at the DME from aqueous 1 *M* KF solutions 201 (1986)33

The coupling of the double-layer admittance and the faradaic admittance of a stepwise electrode reaction complicated by adsorption of the reactants with experimental verification on the reduction of pyrazine 202(1986)271

The electrochemical behaviour of Nb(V)/Nb(IV) in aqueous citrate solutions studied at the dropping mercury electrode 206(1986)153

Electrochemical behaviour of 2-nitrophenylguanidines in acetonitrile 207(1986) 189

The reduction of Cr(III) in concentrated aqueous electrolytes at a DME. The influence of anions 210(1986)111

Determination of stability constants of some cadmium complexes by polarographic techniques in the presence of electrode adsorption 213 (1986)235

Chronopotentiometry with programmed current at an electrode expanding with any power law. Theoretical study of an ECE mechanism 219 (1987)1

Chronopotentiometry at a dropping mercury electrode. Effects of electrode sphericity on the potential–time curves and the transition times of an ECE mechanism 219(1987)13

Photocurrents due to the capture of dry and hydrated electrons by nucleic acid molecules 226(1987)171

Chronopotentiometry with non-linear perturbation functions at the DME with a preceding blank period 227(1987)1

Effect of methylviologen on the hydrogen evolution at mercury electrodes in aqueous buffer solutions 230(1987)177

On the drop time of a dropping electrode and on the bubble time of a bubble electrode 235(1987) 107

Modification of the liophobization method of DME glass capillaries against a polar liquid and their use in non-aqueous solvents 240(1988)317

Theoretical study of the chronopotentiometric response with programmed current of electrode processes with regeneration mechanisms 241 (1988)33

Electrochemical reduction of 4,4-dimethyl-1-phenyl-1-penten-3-one 241(1988)297

Pulse polarography: influence of amalgam formation on the current–potential curves in normal pulse polarography, reverse pulse polarography, differential normal pulse polarography and differential pulse polarography for a slow charge-transfer step 243(1988)241

Chronopotentiometry at a DME. Effects of electrode sphericity on the chronopotentiometric response of a catalytic mechanism 245(1988)61

The catalysis of the electrochemical reduction of cadmium ions by chloride ions. A mechanistic study in mixed 1 *M* KF + KCl aqueous solutions at the dropping mercury electrode 245(1987)167

An electrochemical investigation of the interaction between the superoxide ion and cations of group 2a in aqueous solutions 246 (1988)155

The adsorption of β-cyclodextrin on a dropping mercury electrode from aqueous solutions 246 (1988)423

Unified treatment of single potential step voltammetries at a plane electrode and at the DME. New polarisation modes 247(1988)37

Potentiostatic response when reactant and product are adsorbed at an electrode expanding with any power law or at a DME (expanding sphere electrode model) 247(1988)99

Theory of the EE mechanism with adsorption of the intermediate at an electrode expanding with any power law or at a DME (expanding sphere electrode model) 247(1988)119

Theory of the chronoamperometric and polarographic response of the catalytic-deactivation mechanism 249(1988)23

An electrochemical cell for voltammetric studies using a dropping mercury electrode in solutions of high resistivity 249(1988)327

Drop time

On the drop time of a dropping electrode and on the bubble time of a bubble electrode 235(1987) 107

The adsorption of β-cyclodextrin on a dropping mercury electrode from aqueous solutions 246 (1988)423

Drug

Transmembrane potentials in bilayer lipid membrane (BLM) induced by calcium channel and β-adrenergic blockers 212(1986)13

Electrochemical behaviour of aminothiol radioprotectors 212(1986)427

Polarographic studies of drugs of triphenylethene derivatives. Part I 226(1987)129

Electrochemical synthesis and reactivity of 3,5-dicyano-1,2,4,6-tetramethylpyridinium 246 (1988)373

Drug activity

Charge transfer mechanism for benzodiazepine (BZ) action. Correlation of reduction potential of BZ iminium with structure and drug activity 212(1986)407

Drug analysis

Diphenhydramine-sensitive membrane electrodes based on poly(vinylchloride) matrices and their use in drug analysis 233(1987)29

Drug release

Catalytic electrosynthesis of conducting polymers 244(1988)115

Dry electron

Photocurrents due to the capture of dry and hydrated electrons by nucleic acid molecules 226(1987)171

Dye laser

Laser-induced temperature-jump coulostatics for the investigation of heterogeneous rate processes. Theory and application 248(1988)255

Dye-modified bilayer lipid membrane

Cyclic voltammetry of dye-modified BLMs 212 (1986)435

Dye-sensitized photocurrent

One dimensional Onsager model for dye sensitized charge injection into semiconductors 228(1987)69

Dysidea avara

Electrochemical reactivity of biologically active quinone/hydroquinone sesquiterpenoids on glassy carbon electrodes 231(1987)567

Dysprosium

Thin-layer spectroelectrochemical investigations on the electrode mechanism of murexide complex with dysprosium 221(1987)143

E

Earthworm electrode

Effect of Ca^{2+} on electrobioluminescence of *Lampito Mauritii* 211(1986)341

Secretory differences in electrobioluminescence of *Lampito mauritii* upon segmentary electron input 231(1987)105

ECE mechanism

Chronopotentiometry with programmed current at an electrode expanding with any power law. Theoretical study of an ECE mechanism 219 (1987)1

Chronopotentiometry at a dropping mercury electrode. Effects of electrode sphericity on the potential–time curves and the transition times of an ECE mechanism 219(1987)13

Edge effect

Visualization of the edge effect with electrogenerated chemiluminescence 221(1987) 251

EE mechanism

A Laplace space rate/mechanism analysis of the two-electron chronoamperometric oxidation of *o*-dianisidine in sulfuric acid medium 202(1986)37

Pulse polarography: theory for the current–potential curves of an EE mechanism 235(1987)71

Theory of the EE mechanism with adsorption of the intermediate at an electrode expanding with any power law or at a DME (expanding sphere electrode model) 247(1988)119

Electrical breakdown

Conduction onset criteria for transient aqueous pores and reversible electrical breakdown in bilayer membranes 211(1986)229

A quantitative theory of reversible electrical breakdown in bilayer membranes 211(1986)243

Volume and ionic composition changes in erythrocytes after electric breakdown. Simulation and experiment 212(1986)455

Electrical and mechanical breakdown of anodic films on tungsten in aqueous electrolytes 248 (1988)99

Electrical breakdown and pitting in anodic films on tungsten in halogen ion-containing solutions 248(1988)117

Electrical capacity

The electrical double layer of carbon and graphite electrodes. Part IV. Dependence of carbon electrode dimensions and electrical capacity on pH 227(1987)41

Electrical double layer

Photoemission approach to the investigation of the electric double layer 204(1986)281

Electrical double layers and voltage-gated ion fluxes 212(1986)559

Electric field

Controlled-potential electrolysis at a membrane-coated electrode. Part III. Effect of the electric field in the dielectric 211(1986)353

Absorption and conversion of electric field energy by membrane bound ATPases 211(1986)457

Non-linear ionic fluxes in an electrically exposed cell 212(1986)89

Directional control of yeast cell division by electric stimulus 212(1986)235

Electric-field-induced morphological alterations and fusion of hepatocytes 231(1987)9

Regulation of enzyme activity by direct electric fields in compartmental systems 231(1987)205

Dielectrophoresis of individual cells. Experimental methods and results 231(1987)549

Electric gene transfer

Mechanisms of membrane processes, electric gene transfer and cell fusion. Report on the workshop held at the "Zentrum für Interdisziplinäre Forschung" in Bielefeld on 3–4 April 1986 231 (1987)7

Electric relaxation

The charge separation process in non-homogeneous electrolyte solutions 241(1988)57

Electroabsorption

Electrolyte electroabsorption: a spectroscopic technique for thin film semiconducting electrodes 218(1987)347

Electroactive film

Microporous glass films as support media for electroactive films on electrodes 227(1987)287

Electroactive polymer

Electrochemical preparation of a ladder polymer containing phenazine rings 219(1987)117

Electroactive species

Concentration of a solution-soluble electroactive species at the surface of a spherical electrode following a potential step 218(1987)29

Irreversibility and reactant adsorption in differential pulse polarography 218(1987)77

On the influence of adsorption of electroactive species on the polarographic determination of stability constants 246(1988)271

Electroactivity

Electroactivity of strongly-adsorbed redox centers: reduction of iodine chemisorbed on platinum in aprotic solvent 221(1987)281

Electroadsorption

Different processes contributing to the development of preferred oriented platinum surfaces by fast periodic potential perturbation techniques 205(1986)279

Thin-layer voltammetry of palladium in acid electrolytes 207(1986)279

Electroadsorption of bacteria on porous carbon and graphite electrodes 231(1987)175

Electrocatalytic oxidation of formic acid on Pd + Pt alloys of different bulk composition in acidic medium 245(1988)145

Electroanalysis

A search for conditions permitting model behavior of the $Fe(CN)_6^{3-/4-}$ system 226(1987) 305

Electrobioluminescence

Effect of Ca^{2+} on electrobioluminescence of *Lampito Mauritii* 211(1986)341

Secretory differences in electrobioluminescence of *Lampito mauritii* upon segmentary electron input 231(1987)105

Electrocapillary curve

Adsorption of 2,3-dimethylpyridine at the mercury/electrolyte interface 209(1986)203

A new method for the study of potential-dependent interface characteristics for solids 237(1987)171

Electrocapillary measurement

A test of the maximum bubble pressure method for electrocapillary measurements 237(1987)27

Electrocatalysis

Electrocatalysis by ad-atoms. Part XVII. Electronegativity effect on oxygen donation by oxygen-adsorbing ad-atoms and steric hindrance by alkyl groups in S_{hole} control in aldehyde oxidation 201(1986)23

Electrocatalysis by amorphous metals of hydrogen and oxygen evolution in alkaline solution 201(1986)61

Underpotential deposition and electrocatalysis 201(1986)217

Electrocatalysis by ad-atoms. Part XIX. Geometrical requirement in the oxygen donation step in glyoxylic acid oxidation enhanced by ad-atoms 202(1986)137

Structural effects in electrocatalysis: oxidation of formic acid and hydrogen adsorption on platinum single-crystal stepped surfaces 204(1986)329

The ellipsometric characterization of Pt + Cr alloy surfaces in acid solutions 205(1986)163

Stability and electrocatalytic activity of the oxo-bridged dimer $[(bpy)_2(H_2O)RuORu(OH_2)(bpy)_2]^{4+}$ in basic solutions 205(1986)185

Electrocatalysis of cathodic molecular oxygen reduction with biopolymers–enzymes and their models 206(1986)217

Electrocatalysis of CO_2 reduction at surface modified metallic and semiconducting electrodes 209(1986)101

Electrocatalysis by ad-atoms. Part XX. Rate-determining step in methanol oxidation enhanced by oxygen-adsorbing ad-atoms 209(1986)151

Electrocatalysis of cathodic reactions on titanium dioxide surfaces derivatised with tungstosilicic acid ($SiW_{12}O_{40}^{4-}$) 209(1986)391

Surface lateral organic modifiers in platinum electrocatalysis 210(1986)315

Electrocatalysis of dioxygen reduction in aqueous acid and base by multimolecular layer films of electropolymerized cobalt tetra(*o*-aminophenyl)porphyrin 217(1987)271

Redox potential and electrocatalysis of O_2 reduction on transition metal chelates 221(1987) 95

Dependence of the kinetics of proton reduction at gold electrodes on the surface crystallographic orientation 223(1987)171

Influence of electrochemical activation of an Au electrode on its electrocatalytical activity in relation to the oxidation of methanol in basic medium 223(1987)277

State of surface oxide films at Pt anodes and "volcano" behaviour in electrocatalysis for anodic Cl_2 evolution 224(1987)163

Electrocatalysis of the nitration of naphthalene by N_2O_4 in aprotic media 225(1987)125

Electrocatalytic reduction of O_2 at electrodes modified by films of redox polymers with anthraquinone moieties 225(1987)177

Electrocatalysis by electrodeposited heteropolyanions and isopolyanions 227(1987) 265

Electrode surface modification through Nafion-attached transition-metal cluster chalcogenide particles 229(1987)223

Electrocatalysis by ad-atoms. Part XXI. Catalytic effects on the elementary steps in methanol oxidation by non-oxygen-adsorbing ad-atoms 229(1987)385

The cathodic reduction of oxygen at metal tetrasulfonato-phthalocyanines: influence of adsorption conditions on electrocatalysis 233 (1987)99

Electrochemical study on the poisoning intermediate formed from methanol dissociation at low index and stepped platinum surfaces 236 (1987)95

Electrocatalysis of methanol oxidation by adsorbed tin on platinum 238(1987)151

Reduction of carbon dioxide on partially-immersed Au plate electrode and Au–SPE electrode 238(1987)247

Application of a polymer solid electrolyte for the vapor-phase electrocatalysis of dioxygen reduction by some cobalt porphyrins 238(1987) 259

Infrared spectroscopic study of the methanol adsorbates at a platinum electrode. Part III. Structural effects and behaviour of a polycrystalline surface 238(1987)323

Preparation and electrocatalytic properties of conducting films of polypyrrole containing platinum microparticulates 240(1988)89

Electrocatalytic reactions in organized assemblies. Part I. Reduction of 4-bromobiphenyl in cationic and non-ionic micelles 240(1988)201

Electrocatalytic reactions in organized assemblies. Part III. Reduction of allyl halides by bipyridyl derivatives of cobalt in anionic and cationic micelles 240(1988)217

Easy preparation of electrodes modified by conjugated polypyridine films displaying coordinative properties and their effectiveness as mediators of electrocatalytic processes 242 (1988)131

Structural effects in electrocatalysis. Oxidation of D-glucose on Pt (100), (110) and (111) single crystal electrodes and the effect of upd adlayers of Pb, Tl and Bi 242(1988)221

Electrocatalytic effects of redox polymer films on the reduction of O_2 on silicon semiconductors 245(1988)191

Electrocatalysis of O_2 reduction to water in different acid media by iron naphthalocyanines 246(1988)119

Redox and electrocatalytic properties towards dioxygen reduction of ruthenium tetra(*ortho*-aminophenyl)porphyrin complexes with various axial ligands 246(1988)139

Electrocatalysis by ad-atoms. Part XXII. S_{hole} control by ad-atoms on HCOOH oxidation 249 (1988)253

Electrocatalysis by ad-atoms. Part XXIII. Design of platinum ad-electrodes for formic acid fuel cells with ad-atoms of the IVth and the Vth groups 250(1988)117

Electrocatalyst

Single crystals as model electrocatalysts. Oxygen evolution on RuO_2 (110) 210(1986)189

Electrochemical procedure for the development of large active surface area platinum electrodes with preferred crystallographic orientations 221 (1987)239

Electrocatalytic hydrogenation

The influence of orientation on the electrocatalytic hydrogenation of hydroquinone chemisorbed at smooth polycrystalline platinum electrodes 239(1988)375

Electrocatalytic oxidation

Electrocatalytic oxidation of cytochrome-*c* at a quaternized poly-4-vinylchloride/ferricyanide modified gold surface 215(1986)385

Electrocatalytic oxidation of ethylene glycol. Part III. In-situ infrared reflectance spectroscopic study of the strongly bound species resulting from its chemisorption at a platinum electrode in aqueous medium 216(1987)169

Electrocatalytic oxidation of NADH by ferrocene derivatives and the influence of cyclodextrin complexation 234(1987)163

On the electrocatalytic oxidation of methanol vapors at Au–Nafion electrodes 235(1987)393

The mechanism of electrocatalytic oxidation of formic acid on Pt (100) and Pt (111) in sulphuric acid solution: an EMIRS study 240(1988)147

Electrocatalytic oxidation of formic acid on Pd + Pt alloys of different bulk composition in acidic medium 245(1988)145

Electrocatalytic oxidation of glucose at platinum in alkaline medium: on the role of temperature 246(1988)349

Electrocatalytic process

The admittance of a simple electrocatalytic process coupled with an additional electrochemical adsorption reaction 240(1988)53

Electrocatalytic reactivity

Electrocatalytic hydrogenation and oxidation of model coal-derived compounds chemisorbed at smooth polycrystalline Pt: a survey 247(1988)241

Electrocatalytic reduction

Electrocatalytic reduction of carbon dioxide to methanol. Part III. Use of an electrochemical photocell 201(1986)359

Electrocatalytic reduction of carbon dioxide to methanol. Part IV. Assessment of the current–potential curves leading to reduction 206(1986)209

Electrochemical coating of a platinum electrode by a poly(pyrrole) film containing the *fac*-Re(2,2'-bipyridine)$(CO)_3Cl$ system. Application to electrocatalytic reduction of CO_2 207(1986)315

Electrocatalytic reduction of CO_2 to methanol. Part VIII. Photoassisted electrolysis and electrochemical photocell with n-TiO_2 anode 220(1987)333

Electrocatalytic reduction of nitrate and nitrite to hydroxylamine and ammonia using metal cyclams 224(1987)199

Selective electrocatalytic reduction of hexachloroacetone on a viologen polymer modified electrode in aqueous media 245(1988) 313

Electrocatalytic reduction of oxygen at a pyrolytic graphite electrode modified by adriamycin and its 7-deoxyaglycone 246(1988) 385

Electrochemical activation

Influence of electrochemical activation of an Au electrode on its electrocatalytical activity in relation to the oxidation of methanol in basic medium 223(1987)277

Electrochemical adsorption reaction

Electrochemical adsorption reactions (EAR). Part II. Relation between large signal response and small signal (impedance) data 210(1986)21

Electrochemical behaviour

Hydration–dehydration of the electroactive group on the electrochemical behaviour of pyridoxal-5′-phosphate 212(1986)325

Electrochemical cell

Digital simulation of the channel flow-through electrochemical cell. A theoretical study of the determination of solute adsorption on modified electrodes 222(1987)117

High-frequency impedance spectroscopy of fast electrode reactions 229(1987)407

An electrochemical cell for voltammetric studies using a dropping mercury electrode in solutions of high resistivity 249(1988)327

Electrochemical charging

Ion flux during electrochemical charging of Prussian Blue films 234(1987)213

Electrochemical conversion

Conversions of complex compounds and quinone on surface-modified electrodes 219(1987)153

Electrochemical data

An investigation of the titanium electrode in acid solutions and acid solutions containing uranium(VI) ions 225(1987)139

The oxidation of chloride ions and bromide ions on ruthenium dioxide electrodes 225(1987)159

Electrochemical deposition

Electrochemistry of sub-monolayer silver deposits on single crystal RuO_2 (110), (001) and (111) electrodes 236(1987)295

Electrochemical detection

Calculation of convective-diffusion current at multiple strip electrodes in a rectangular flow channel. Implications for electrochemical detection 205(1986)101

An electroanalytical approach to the determination of lipid peroxides 232(1987)127

Electrochemistry of platinum complexes. Part I. Polarographic reduction mechanism with reference to electrochemical detection 238(1987) 297

Electrochemical dispersion

Electrochemical dispersion of Pt microparticles on glassy carbon electrodes 223(1987)223

Electrochemical dissolution

An in situ study on the mechanism of the electrochemical dissolution of copper in oxygenated sulphuric acid. An application of the quartz microbalance 219(1987)311

Electrochemical energy

Charge motion inside the bacteriorhodopsin molecule 211(1986)437

Electrochemical faceting

Different processes contributing to the development of preferred oriented platinum surfaces by fast periodic potential perturbation techniques 205(1986)279

Electrochemical faceting of polycrystalline gold in 1 *M* H_2SO_4 215(1986)317

Electrochemical faceting and preferred crystallographic orientation of rhodium electrodes 221(1987)229

Electrochemical impedance

Calculation, simulation and interpretation of electrochemical impedances. Part I. Presentation of the CASIDIE computer program 205(1986)77

Electrochemical instrument

A flexible function generator for computer-based electrochemical instruments 224(1987)277

Electrochemical interface

Recent improvements in the study of the electrochemical interface by surface plasmon excitation 204(1986)229

Electrochemical label

Electrochemistry of quinizarine adsorbed on a glassy carbon electrode in aqueous solutions 239 (1988)209

Electrochemical model

Considerations on the kinetics of an electrochemical model of oxidative phosphorylation 212(1986)245

Electrochemical oxidation

Two-electron oxidation of *N,N,N′,N′*-tetramethyl naphthidine in acetonitrile. The reactivity of its dication to aromatic nucleophilic substitution by pyridine 201(1986)367

Spectroelectrochemistry of cobalt "capped" porphyrins 202(1986)111

Electrochemical generation of mono- and dinuclear mercuric cryptates 202(1986)191

Electrochemical oxidation of 6-thioguanine 207 (1986)101

Peroxidase-catalyzed and electrochemical oxidation of L-tryptophan 211(1986)257

Electrochemical oxidation of xanthosine 216 (1987)137

Electrochemical oxidation of the tris-1,10-phenanthroline iron(II) cation in the presence of sodium dodecylsulfate 219(1987)125

Electrochemical oxidation of HCOONa on Pt in acidic solutions 220(1987)125

Electrochemical synthesis and study of polydiphenylamine 220(1987)287

Electrochemical oxidation of ethyl 3-oxo-3-phenyl-2-phenylhydrazonopropionate 220(1987) 311

Electrochemical oxidation of 6-thiouric acid 221 (1987)155

The electrochemistry of ferrocene in non-aqueous solvents 221(1987)165

Electrochemical oxidation of 9-β-D-ribofuranosyluric acid in basic solution 223 (1987)119

Electrochemical oxidation of 6,8-dioxypurine 223(1987)143

Electrochemical oxidation of guanosine. Formation of some novel guanine oligonucleosides 224(1987)137

Electrochemical oxidation of *N*-substituted 1,4- and 1,2-dihydropyridine derivatives. Studies using the rotating ring–disk electrode and ESR 226(1987)103

Elementary steps of electrochemical oxidation of single-crystal planes of Au. Part II. A chemical and structural basis of oxidation of the (111) plane 228(1987)429

Electrochemical and xanthine oxidase-catalyzed oxidation of 6-thioxanthine 233(1987)49

The electrochemical oxidation of zinc studied by ellipsometry 234(1987)185

Electrochemical polymerization of β-substituted and β,β′-disubstituted selenophenes 238(1987) 225

Adsorption of CO on a Pt electrode in acidic solution. IR-active and -inactive CO's adsorbed in the double-layer region 240(1988)281

Mechanism of the electrochemical oxidation of 2-aminopyridine at a pyrolytic graphite electrode 242(1988)209

Isoporphyrin formation upon electrochemical oxidation of zinc tetrakis(4-sulfonatophenyl)porphine in aqueous solution 246(1988) 363

Composition and diffusion properties of γ-FeOOH deposited in sulphate solutions 247 (1988)185

Electrochemical oxidation of sulphacetamide 247(1988)229

Catalysis of the electrochemical oxidation of CH_3OH by molybdenum-modified platinum 248(1988)181

Electrochemical parameter

Determination of the individual electrochemical parameters from a composite single dc wave by the Gauss–Newton method 206(1986)81

Determination of the individual electrochemical parameters from a single composite dc wave by the Gauss–Newton method: dc wave composed of three waves 223(1987)79

Electrochemical photocell

Electrocatalytic reduction of carbon dioxide to methanol. Part III. Use of an electrochemical photocell 201(1986)359

Electrochemical polarization

Electrochemical polarization of activated carbon and graphite powder suspensions. Part II. Exchange of ions between electrolyte and pores 214(1986)295

Electrochemical polymerization

Electrochemical immobilisation of enzymes. Part I. Theory 224(1987)27

Electrochemical immobilisation of enzymes. Part II. Glucose oxidase immobilised in poly-*N*-methylpyrrole 224(1987)37

Redox and electrocatalytic properties of cobalt–bipyridyl–polypyrrole film electrodes 224(1987)95

Solvent effect on electrochemical polymerization of aromatic compounds 242(1988)203

Electrochemical potential

An investigation of $\Delta\tilde{\mu}_{H^+}$ activation of chloroplast ATPase 212(1986)111

Electrochemical preparation

A conducting polymer derived from *para*-aminodiphenylamine 221(1987)69

Electrochemical preparation of a polyparaphenylene film and a polyparaphenylene/polyacrylamine functional film 229(1987)215

Electrochemical pretreatment

Influence of polishing and of electrochemical pretreatment on the performance of glassy-carbon electrodes in electrochemical detection 201(1986)11

Surface-enhanced Raman scattering at gold electrodes: dependence on electrochemical pretreatment conditions and comparisons with silver 233(1987)211

Electrochemical production

The electrochemical production of propylene oxide 214(1986)283

Electrochemical proton discharge

Kinetic behaviour of electrochemical proton discharge in relation to the proton source and its environment 204(1986)111

Electrochemical pulse technique

Chemisorbed CO on a polycrystalline platinum electrode. The effect of conditioning of the surface and of partial pressure of CO 206(1986) 197

Electrochemical reactivity

The electrochemical reactivity of toluene at porous Pt electrodes 244(1988)273

Electrochemical reduction

On the catalytic effect of thiourea on the electrochemical reduction of cadmium(II) ions at the DME from aqueous 1 *M* KF solutions 201 (1986)33

Electron and hydrogen atom transfers in the electrochemical reduction of biphenyl halides in dimethylformamide and acetonitrile studied by means of Fourier transform faradaic admittance measurements (FT-FAM) 201(1986)315

1,1′-Trimethylenebisthymine as synthetic model of dinucleotide TpT. Electrochemical reduction 201(1986)329

On the electrochemical reduction of *N*-phenylmaleimide and related compounds 202 (1986)299

The electrochemical reduction of aqueous carbon dioxide to methanol at molybdenum electrodes with low overpotentials 205(1986)219

Mechanism of the electrochemical reduction of hydroxyiminoanthraquinones in DMF 207 (1986)151

Electrochemical reduction mechanism of 5(1H)-pyrromethenones in dimethylformamide on a mercury electrode 211(1986)125

Electrochemical reduction of ϵ-adenine, ϵ-adenosine, and ϵ-NAD^+ in aqueous media 212 (1986)287

Electrochemical reduction of 2,4-diamino-5-(3,4,5-trimethoxybenzyl)-6-chloropyrimidine 213(1986)111

Comments on the paper "The electrochemical reduction of some fused ring systems" by H.M. Fahmy, B. Nashed, F.A. Khalifa, A. Abdel Moneim and M. Abdel Azzem, and on the short communication "On the electrochemical reduction of *N*-phenylmaleimide and related compounds" by H. Lund 213(1986)159

A study on the mechanism of the electrochemical reduction of the cobalt–dimethylglyoxime system in NH_3/NH_4Cl 216(1987)181

The electrochemical reduction of diazodimedone. Kinetics and thermodynamics of the formation of the carbene anion radical 218(1987)227

Electrochemical formation of a magnesium vanadium bronze $Mg_xV_2O_5$ in sulfone-based electrolytes at 150 °C 218(1987)241

An electroanalytical investigation on the nickel-promoted electrochemical conversion of CO_2 to CO 219(1987)259

Surface-enhanced Raman scattering (SERS) on silver electrodes as a technical tool in the study of the electrochemical reduction of cyanopyridines and in quantitative analysis 220 (1987)339

The incorporation of electrolyte cations into polypyrrole and poly-3-methylthiophene during electrochemical reduction 223(1987)283

Electrochemical reduction of substituted nitrobenzenes in *N,N*-dimethylformamide containing proton donating agents. Effect of the double layer on the basicity of the nitro group 226(1987)61

Substituent effects on electrochemical reduction of viologen dimer and trimer with ethylene spacer 239(1988)397

The catalysis of the electrochemical reduction of cadmium ions by chloride ions. A mechanistic study in mixed 1 *M* KF + KCl aqueous solutions at the dropping mercury electrode 245(1987)167

Electrochemical reduction of iron(II) complexes with (3-(2-pyridyl)-5,6-diphenyl-1,2,4-triazine) 245(1988)201

Electrochemical reduction of isonicotinic amide in a strong acid medium 250(1988)399

Electrochemical regulation

Electrochemical regulation of immobilized alkaline phosphatase activity 212(1986)205

Electrochemical screening

Electrochemical screening for electron acceptors: aromatic esters 207(1986)161

Electrochemical stripping

Electrodeposition of zinc + nickel alloy phases and electrochemical stripping studies of the anomalous codeposition of zinc 221(1987)211

Electrochemical synthesis

Electrochemical synthesis of phenylselenobenzonitriles and phenyltellurobenzonitriles by the $S_{RN}1$ mechanism using a redox catalyst 238(1987)239

Electrochemical synthesis and properties of polycarbazole films in protic acid media 246 (1988)73

Electrochemical synthesis and reactivity of 3,5-dicyano-1,2,4,6-tetramethylpyridinium 246 (1988)373

Electrochemical technique

Electrode reactions of nickel(II)–, copper(II)– and zinc(II)–8-quinolinethiolato complexes in *N,N*-dimethylformamide 205(1986)209

Electrochemical treatment

Activation of carbon fiber microelectrodes by alternating current electrochemical treatment 234(1987)119

Electrochemiluminescence

Micellar complexes of energy transfer 211(1986) 95

Investigation of two radical intermediates in the anodic oxidation of 1,4-dihydropyridines by electrochemiluminescence 215(1986)179

Electrogenerated chemiluminescence. Part XLVIII. Electrochemistry and electrogenerated chemiluminescence of bis(2,4,6-trichlorophenyl) oxalate–luminescer systems 238(1987)277

Anomalous transient behavior in the electrogenerated chemiluminescence of 9,10-diphenylanthracene 242(1988)107

Cyclohexanone as an effective hydride interceptor at platinum electrodes in non-aqueous media. Characterization via effects on the electrogenerated chemiluminescence of 9,10-diphenylanthracene 242(1988)123

Electrogenerated chemiluminescence. Part 51. The tris(2,2′-bipyrazine)osmium(II) system 244 (1988)319

A study of the mechanisms of O_2 reduction at n- and p-InP in acid aqueous electrolyte 247(1988) 265

Electrochemisorption

Electrochemisorption of hexahydroxyplatinate(IV) on thin titania films 228(1987)471

Many-body effects in electrochemisorption. Part I. Green function–superoperator formalism 229 (1987)51

Many-body effects in electrochemisorption. Part II. Operator averages and MF–HF limits 229 (1987)67

Many-body effects in electrochemisorption. Part III. Beyond mean field and Hartree–Fock 230 (1987)1

Many-body effects in electrochemisorption. Part IV. Multi-boson formalism 230(1987)23

Electrochemistry

A novel mediator for the investigation of the electrochemistry of metalloproteins 212(1986)99

Electrochemistry of cadmium ion at the water/nitrobenzene interface 214(1986)465

An electrochemical investigation of the redox properties of lumiflavin in acidic media 217 (1987)65

Direct electrochemistry of bacterial cytochrome c_{551} at surface-modified gold electrodes 217 (1987)129

Surface substitution reactions at modified gold electrodes and their effect on the electrochemistry of horse heart cytochrome *c* 217(1987)141

Electrochromism

Adsorption of *p*-nitroaniline on platinum studied by modulated reflectance spectroscopy 201 (1986)163

ECD materials for the three primary colors developed by polyanilines 209(1986)227

Researches on chemically modified electrodes. Part XV. Preparation and electrochromism of the vanadium hexacyanoferrate film modified electrode 210(1986)31

Structure changes of viologen + β-cyclodextrin inclusion complex corresponding to the redox state of viologen 210(1986)265

Ion-pair effects on the electroreduction and electrochromic properties of *ortho*-chloranil in dipolar aprotic solvents 216(1987)203

Researches on chemically modified electrodes. Part XVI. Electron diffusion coefficient in vanadium hexacyanoferrate film 217(1987)49

Electrochemical process in electrochromic films of lutetium diphthalocyanine 236(1987)163

Electrochromism of octaalkoxymethyl-substituted lutetium diphthalocyanine 237(1987) 61

Electrochromism of the *o*-CA/*o*-$CA^{\cdot-}$ system in display cells 240(1988)321

Electrochromic properties of vacuum evaporated organic thin films. Part I. Electrochromic thin films of the three primary colors 247(1988)193

The rare earth substitution effect on the electrochemistry of diphthalocyanine films in contact with an acidic aqueous medium 249 (1988)181

Electrocrystallization

Shape and propagation rate of monatomic layers upon electrocrystallization of cadmium onto a screw-dislocation-free (0001) crystal face 208 (1986)153

Phase transitions in mercury–quinoline derivative systems. Anodic electrocrystallization processes in aqueous ferron solutions 215(1986)345

Piezoelectric nucleation mechanism in electrocrystallisation 217(1987)209

The meaning of exchange current densities in electrocrystallization 229(1987)423

Two-dimensional electrocrystallisation of $PbCO_3$ and $Pb_3(CO_3)_2(OH)_2$ on lead amalgam electrodes in sodium carbonate and bicarbonate solutions 233(1987)237

The theory of chronoamperometry for the investigation of electrocrystallization. Mathematical description and analysis in the case of diffusion-controlled growth 236(1987)1

Electrode adsorption

Determination of stability constants of some cadmium complexes by polarographic techniques in the presence of electrode adsorption 213 (1986)235

Electrode film

Electrode films of porous agarose impregnated with Nafion. Structural heterogeneity and its effects on electron transport 207(1986)73

Electrode geometry

Reversible square-wave voltammograms. Independence of electrode geometry 207(1986)25

Electrode impedance

The mechanism of the deposition of manganese dioxide. Part II. Electrode impedance studies 201(1986)113

Electrode interface

Standard states and standard adsorption Gibbs energy of substances at electrode interfaces 216 (1987)21

Electrode kinetics

Kinetics and mechanism of the $V(III) + e^- \rightleftarrows V(II)$ reaction at a mercury electrode in water + dimethylformamide mixtures 201(1986)283

Electrode kinetic studies of the $Zn^{2+}/Zn(Hg)$ and $Li^{+}/Li(Hg)$ couples in dimethylsulphoxide + propylene carbonate solvent systems 207 (1986)177

Temperature dependence of the symmetry factor in electrode kinetics 214(1986)655

The behavior of microdisk and microring electrodes 222(1987)107

Electrode processes of the V(III)/V(II) and Eu(III)/Eu(II) systems in mixed water + acetone solvents 230(1987)155

Electrode mechanism

Thin-layer spectroelectrochemical investigations on the electrode mechanism of murexide complex with dysprosium 221(1987)143

Electrodeposition

Potentiometric investigation of the kinetics of the polyaniline–oxygen reaction 202(1986)217

CdTe electrodeposition. Some new data from ac impedance 202(1986)323

Different processes contributing to the development of preferred oriented platinum surfaces by fast periodic potential perturbation techniques 205(1986)279

The influence of water on the electrodeposition of polypyrrole in acetonitrile 206(1986)139

A study of the conditions for the electrodeposition of polythiophen in acetonitrile 206(1986)147

Molten alkali thiocyanates as solvents for transition metal electrodeposition 206(1986)253

Electrodeposition of Pt ultramicroparticles in Nafion films on glassy carbon electrodes 208 (1986)373

Electrodeposition of Pb onto Pt (111) surfaces containing iodine adlattices. Studies by low-energy electron diffraction and Auger spectroscopy 213(1986)293

Underpotential deposition of silver on polycrystalline platinum electrodes. Controlling phenomena derived from potentiostatic transients 213(1986)301

Cathodic generation of $CdSe_xTe_{1-x}$ at Te film electrodes 215(1986)249

Photocapacitance spectroscopy of thin film cadmium selenide electrodes 216(1987)41

Nucleation rings around a growing crystal 220 (1987)169

Electrodeposition of zinc + nickel alloy phases and electrochemical stripping studies of the anomalous codeposition of zinc 221(1987)211

Electrochemical dispersion of Pt microparticles on glassy carbon electrodes 223(1987)223

Anodic oxidation of heterogeneous germanium amalgam 226(1987)331

The mechanism of electrodeposition of composite polymers including polypyrrole 227(1987)229

Competition between the rearrangement of electrodeposited overlayers of copper on platinum and the hydrogen electrode reactions 229(1987)327

Ion flux during electrochemical charging of Prussian Blue films 234(1987)213

Electrodeposition of polythiophene, polypyrrole and polyaniline by the cyclic potential sweep method 235(1987)259

Interfacial energetics of electrodeposited cadmium selenide in acetonitrile 239(1988)307

Electrochemical investigation of an electrodeposited rhodium electrode in acid solutions 242(1988)97

Hydrodynamic effects of surfactants on the macromorphology of electrodeposited zinc and flow visualization. The flow-field throw 243 (1988)21

Voltammetric response for the diffusion-controlled electrodeposition onto growing hemispherical nuclei 243(1988)57

A spectroelectrochemical study of the electrodeposition of polythiophene films 243 (1988)403

Electrodeposition of lead on copper in acidic ammonium acetate solutions 243(1988)435

Surface modifications with heteropoly and isopoly oxometalates. Part III. Electrode modification procedures. The necessity of proton interference during the electrodeposition of the h.e.r. catalysts 247(1988)157

Electrodeposition of aluminium in aluminium chloride/1-methyl-3-ethylimidazolium chloride 248(1988)431

Hydrodynamic effects on the macromorphology of electrodeposited zinc and flow visualization. A flat plate electrode in a channel flow cell 249 (1988)35

Hydrodynamic effects on the macromorphology of electrodeposited zinc and flow visualization. The rotating disk electrode 249(1988)63

Electrodeposition of metal–trithioanthrone films 249(1988)281

Electrode potential

Adlattice structure and hydrophobicity of Pt (111) in aqueous potassium iodide solutions. Influence of pH and electrode potential 222 (1987)305

Structure and composition of the Ag (111) surface as a function of electrode potential in aqueous halide solutions 229(1987)1

Adsorption of ferricyanide at Pt (111) as a function of electrode potential studied by Auger spectroscopy 234(1987)229

Electrode reaction

Thermokinetic instability of electrode processes. Part I. Theoretical analysis 207(1986)1

Analysis of the interfacial admittance in the case of a two-step two-electron electrode reaction with a diffusing intermediate, with application to the reduction of pyrazine 222(1987)45

Electrode processes of the Eu(III)/Eu(II) system in water + hexamethylphosphortriamide mixtures 234(1987)263

Electrode / solution interface

High-temperature "in-situ" surface Raman spectro-electrochemistry in aqueous solutions 208(1986)175

Investigation of magnetic effects on mass transport at the electrode/electrolyte interface by impedance techniques 217(1987)443

The analysis of vibrational spectra of species adsorbed at the electrode–solution interface. A theoretical model for the effects of potential on the observed spectra 225(1987)267

Comparison of the ionic adsorption theories for the electrode/solution interface by computer simulation 234(1987)31

Electrodesorption

Different processes contributing to the development of preferred oriented platinum surfaces by fast periodic potential perturbation techniques 205(1986)279

Electrode sphericity

Chronopotentiometry at a dropping mercury electrode. Effects of electrode sphericity on the potential–time curves and the transition times of an ECE mechanism 219(1987)13

Chronopotentiometry at a DME. Effects of electrode sphericity on the chronopotentiometric response of a catalytic mechanism 245(1988)61

Electrode surface

Theory of electrode reactions of redox couples confined to electrode surfaces at monolayer levels. Part I. Expression of the current–potential relationship for simple redox reactions 217 (1987)1

Theory of electrode reactions of redox couples confined to electrode surfaces at monolayer levels. Part II. Cyclic voltammetry and ac impedance measurements 217(1987)15

Kinetics of adsorption of electroinactive species at electrode surfaces. Alternating voltage excitation regime 222(1987)281

Activation of electrode surfaces by isopolytungstates 223(1987)287

Activation of electrode surfaces. Semiquantitative characterization of electrode surfaces modified with heteropolyanions 230(1987)85

Electrodimerization

A critical study of the use of logarithmic analysis as a criterion for elucidation of the reaction mechanism of electrodimerization processes in dc polarography 213(1986)23

Electrodimerization of crotonic aldehyde in aqueous media on a mercury electrode 239 (1988)239

Electrodispersion

The behaviour of electrodispersed platinum electrodes for the voltammetric electrooxidation of reduced carbon dioxide 224(1987)189

Scanning tunneling microscopy (STM) and scanning electron microscopy (SEM) of electrodispersed gold electrodes 240(1988)77

Electrodissolution

Different processes contributing to the development of preferred oriented platinum surfaces by fast periodic potential perturbation techniques 205(1986)279

Thin-layer voltammetry of palladium in acid electrolytes 207(1986)279

Electroformation

The electroformation of thick hydrous nickel hydroxide films through the application of periodic potential signals 225(1987)227

The electrochemical behaviour of Zircaloy-4 electrodes in acid iodide solution 240(1988)299

Electrochemical behaviour of tungsten in alkaline media. Part I. NaOH solutions 243(1988)379

Competitive electroformation of silver and oxygen overlayers on polycrystalline rhodium in acid 246(1988)441

Electrofusion

Electrofusion of rat and mouse blastomeres 211 (1986)513

Electrogenerated intermediate

Nanosecond time resolved cyclic voltammetry. Direct observation of electrogenerated intermediates with bimolecular diffusion controlled decay using scan rates in the megavolt per second range 218(1987)361

Electrogeneration

Dimerization of electrogenerated Mo(V) in sulphuric acid solutions 217(1987)305

The interaction of nesosteine and *trans*-sobrerol with electrogenerated superoxide ion in anhydrous and wet acetonitrile 231(1987)339

Tetraalkylammonium–lead: electrogeneration and stoichiometry 247(1988)345

Electrogravimetry

Cyclic voltammetry and quartz microbalance electrogravimetry of IgG and anti-IgG reactions on silver 223(1987)67

Electrohydrodimerization

Electrohydrodimerization of 2-cyclopenten-1-one in basic aqueous media on a mercury electrode 227(1987)55

Electrohydrodimerization of 4,4-dimethyl-2-cyclohexen-1-one in dimethylformamide on a mercury electrode 227(1987)67

Electrohydrodynamic impedance

Transient charge transport through modified electrodes by EHD impedance 244(1988)325

Electroinactive species

Kinetics of adsorption of electroinactive species at electrode surfaces. Alternating voltage excitation regime 222(1987)281

Long optical path length thin-layer spectroelectrochemistry. Quantitation and potential dependence of electroinactive species adsorbed on platinum 222(1987)321

Electroinduced chemical transformation

Bifunctionalized polypyrrole modified electrodes containing reversible electron donor and acceptor moieties. Examples of electroinduced chemical reactions occurring inside polymer films 244 (1988)163

Electrokinetic detector

Influence of the experimental conditions on the performance of the electrokinetic detector 226 (1987)227

Electrokinetics

Electrokinetics of the reduction of chromium(VI) ions entrapped in chromium-modified passive iron electrodes 241(1988)265

Electrolysis

Kinetics of salt extraction into the high-permittivity oil phase. Rate measurement by electrolysis at the interface of two immiscible electrolyte solutions 213(1986)323

An electrochemical investigation of the redox properties of lumiflavin in acidic media 217 (1987)65

Study of the reactions of 9-nitroanthracene anion radicals and dianions in dimethylformamide by the controlled potential constant-voltage electrolysis method 224(1987)273

Kinetics of salt extraction into the high-permittivity oil phase. Part II. Extraction rates of simple salts determined with the data of electrolysis at the interface of two immiscible electrolyte solutions 229(1987)265

Oscillations during electrolysis of alkaline iodide + iodate solutions 241(1988)349

The bubble electrode — a new electrode for the combination of voltammetry, electrolysis and electron spin resonance spectrometry 245(1988) 105

Cathodic reduction of diphenyl selenide in acetonitrile 248(1988)381

Electrolyte

Conductance of 1–1 electrolytes in methanol solutions from −45 to +25 °C 214(1986)485

Theory of microelectrode voltammetry with little electrolyte 250(1988)1

Electrolyte cation

The incorporation of electrolyte cations into polypyrrole and poly-3-methylthiophene during electrochemical reduction 223(1987)283

Electrolyte dropping electrode

The transfer of anions at the aqueous/organic solutions interface studied by current-scan polarography with the electrolyte dropping electrode 210(1986)147

The role of non-ionic polyoxyethylene ether surfactants on ion transfer across aqueous/organic solution interfaces studied by polarography with the electrolyte dropping electrode 227(1987)171

Electrolyte effect

Electrolyte effect on the electrochemical properties of poly(3-methylthiophene) thin films 218(1987)107

Electrolyte electroreflectance

Electrolyte electroreflectance. Easy and reliable flat-band potential measurements 244(1988)69

Electrolyte interface

Salting out of hydrophobic ions at immiscible electrolyte interfaces 217(1987)261

Electrolytic deposition

Effect of the nature of platinum group metals on the formation and properties of adatom silver coatings 224(1987)225

Chronopotentiometric study of titanium in molten NaCl + KCl + K_2TiF_6 239(1988)203

Electrolytic environment

Scanning tunneling microscopy at potential controlled electrode surfaces in electrolytic environment 243(1988)225

Electromagnetic field

Some biological effects of electromagnetic fields 211(1986)39

The sequence and energetics of cell membrane transductive coupling to intracellular enzyme systems 211(1986)447

Interactions between electromagnetic fields and human lymphocytes. Experimental results and theoretical considerations 212(1986)561

Digression on biochemical membrane reactivity in weak electromagnetic fields 212(1986)565

Electromagnetic fields and biomembranes. Report on the First International School held at Pleven, 6–12 October 1986 231(1987)323

Electromagnetic response

On the role of local modes in the optics of the metal/electrolyte interface 228(1987)179

Electromagnetic smog

Electromagnetic smog — a damage and stress factor? 231(1987)441

Electrometallurgy

Electrodeposition of lead on copper in acidic ammonium acetate solutions 243(1988)435

Electromodification

Electromodification of carbon-fibre electrodes by 2-nitroso-1-naphthol 207(1986)203

Electron acceptor

Electrochemical screening for electron acceptors: aromatic esters 207(1986)161

Bifunctionalized polypyrrole modified electrodes containing reversible electron donor and acceptor moieties. Examples of electroinduced chemical reactions occurring inside polymer films 244 (1988)163

Electron density

Electron density at the metal–liquid interface 245(1988)307

Electron diffraction

The structure of H_2SO_4 monolayers on Au (111) 229(1987)99

Electron diffusion coefficient

Researches on chemically modified electrodes. Part XVI. Electron diffusion coefficient in vanadium hexacyanoferrate film 217(1987)49

Electron distribution

Ellipsometric study of the Ag (single crystal)/NaF interface with a view to obtaining the electron distribution profile 229(1987)19

Electron donor

Bifunctionalized polypyrrole modified electrodes containing reversible electron donor and acceptor moieties. Examples of electroinduced chemical reactions occurring inside polymer films 244 (1988)163

Electron emission

Photocurrent kinetics during electron emission from a metal into an electrolyte solution. Part IX. Electrode reactions of the intermediates generated in the bromate ion reduction on mercury 241(1988)247

Electron energy loss spectroscopy

Electrochemical reactivity of 2,2′,5,5′-tetrahydroxybiphenyl and related compounds adsorbed at Pt (111) surfaces: studies by EELS, LEED, Auger spectroscopy and cyclic voltammetry 245(1988)253

Electron exchange

Electrochemical reactions with protonations at equilibrium. Part XIII. Experimental study of the homogeneous electron exchange in quinone/dihydroquinone systems 208(1986)357

Electron exchange between mercury and denatured DNA strands 214(1986)373

ESR-spectroscopic investigation of the parallel electron and proton exchange between quinones and their radicals. Part I. Measurements at 298 K 229(1987)297

Solvent effect on the rate of homogeneous and electrochemical electron exchange 247(1988)85

Electron hopping

Electron hopping between fixed sites. Equivalent diffusion and migration laws 201(1986)211

Electron hopping between fixed sites. "Diffusion" and "migration" in counter-ion conservative redox membranes at steady state 242(1988)1

Electronic counting

Nucleation on active sites. Part IV. Invention of an electronic method of counting the number of crystals as a function of time; and the discovery of nucleation rate dispersion 239(1988)17

Electronic current

Electronic current and breakdown characteristics of tantalum oxide films 239(1988)125

Electronic equipment

Improved electronic equipment for square-wave amperometry 244(1988)91

Electronic non-equilibrium

Space charge capacity on semiconductor electrodes at electronic non-equilibrium 221 (1987)23

Electronic non-equilibrium charge transfer mechanisms in alternating photocurrents on semiconductor electrodes 221(1987)33

Electron microprobe analysis

Activation of electrode surfaces. Semiquantitative characterization of electrode surfaces modified with heteropolyanions 230(1987)85

Electron paramagnetic resonance spectroscopy

Electrochemical and spectroscopic properties of dicobalt cofacial porphyrins in non-aqueous media. Influence of the interporphyrin distance on the redox, spectrophotometric and EPR properties of the cobalt centers 234(1987)277

Electrochemical in situ EPR evidence of two polaron–bipolaron states in polyaniline 236 (1987)199

Simultaneous EPR electrochemical measurements on polypyrrole in ambient temperature ionic liquids 241(1988)231

Electron spin resonance spectroscopy

Electrochemical oxidation of *N*-substituted 1,4- and 1,2-dihydropyridine derivatives. Studies using the rotating ring–disk electrode and ESR 226(1987)103

ESR-spectroscopic investigation of the parallel electron and proton exchange between quinones and their radicals. Part I. Measurements at 298 K 229(1987)297

A spin probe study of the water associated with a steady-state level of phosphoenzyme of the Ca-ATPase 231(1987)457

Tissue oxidation after endotoxin 232(1987)301

The bubble electrode — a new electrode for the combination of voltammetry, electrolysis and electron spin resonance spectrometry 245(1988) 105

Electron transfer

Electron and hydrogen atom transfers in the electrochemical reduction of biphenyl halides in dimethylformamide and acetonitrile studied by means of Fourier transform faradaic admittance measurements (FT-FAM) 201(1986)315

Mechanism of electron transfer through monomolecular films of neutral organic species adsorbed at an electrode surface 202(1986)169

A theory of adiabatic electron-transfer reactions 204(1986)31

Electronic and solvent electron-transfer rate parameters from charge-transfer spectroscopy of betaine-1 and the $[Fe(CN)_6]^{4-}$ · dimethyl viologen ion pair 204(1986)45

Solvent dynamics and vibrational effects in electron transfer reactions 204(1986)59

A quantum mechanical theory of the proton and electron transfer in weakly polar solvents 204 (1986)97

Electron-transfer reactions on pure and modified oxide films 204(1986)153

Single electron transfer rate measurements. Interpretation when a radical–ion bond cleavage reaction occurs within the encounter pair 205 (1986)35

Homogeneous redox catalysis of electrochemical reactions. Electron transfers followed by a very fast chemical step 205(1986)43

Electrochemistry at low temperatures down to 80 K. Further evidence for nuclear tunnelling in electron transfer reactions 205(1986)343

Electrochemical kinetics at microelectrodes. Part I. Quasi-reversible electron transfer at cylinders 206(1986)23

Electrochemical behavior of methyl viologen in zeolite particle films 208(1986)95

Dependence of the true rate constant of homogeneous electron transfer on solvent relaxation time and viscosity 209(1986)223

On the kinetics of electron transfer reactions at illuminated InP electrodes 214(1986)685

Kinetic studies using a rotating cylinder electrode. Part I. Electron transfer rates in ferrous/ferric sulfate on platinum 215(1986)151

Effect of overlying layers on the kinetics of multilayer adsorption involving electron transfer 218(1987)331

Kinetic analysis of a slow electron transfer coupled with a father–son reaction 220(1987)201

Determination of unimolecular electron transfer rate constants for strongly adsorbed cytochrome *c* on tin oxide electrodes 221(1987)265

Heterogeneous electron transfer kinetics for a variety of organic electrode reactions at the mercury–acetonitrile interface using either tetraethylammonium perchlorate or tetraheptylammonium perchlorate electrolyte 222(1987)129

Structural consequences of electron-transfer reactions. Part XIV. Fast charge-transfer reactions of binuclear complexes undergoing large changes in metal–metal bond lengths 222 (1987)151

Kinetics of mediated oxidation at electrodes modified by poly(styrenesulfonate) containing tris(2,2′-bipyridine)osmium(III/II) complexes as electron-transfer centers 222(1987)201

The mechanism of the electron-transfer reactions of cytochrome c_3 from *Desulfovibrio desulfuricans* Norway at a mercury electrode 223(1987)201

Dynamics of adiabatic electron transfer reactions at metal electrodes 230(1987)43

Determination of electrochemical kinetic parameters using the Bond–Henderson–Oldham "global analysis" 230(1987)273

Solvent effects on heterogeneous electron transfer rates for organic redox couples: tert-nitrobutane reduction at mercury 233(1987)161

Electroanalytical investigations. Part VII. The simulation of fast chemical equilibrium reactions in cyclic voltammetric reaction–diffusion models with a combination of the heterogeneous equivalent technique and orthogonal collocation 235(1987)57

Investigation of electron transfer processes at open circuit polyvinylferrocene films using rotating ring–disk electrodes 236(1987)139

Effect of hydrophobic layers on the electrochemical electron transfer reaction of some mediators in microbial fuel cells 236(1987)305

A study of the electron transfer and oxygen binding reactions of myoglobin 237(1987)81

Preparation and electrocatalytic properties of conducting films of polypyrrole containing platinum microparticulates 240(1988)89

Electron transfer reactions and associated conformational changes. Electrochemical reduction of *trans*-1,2-diiodocyclohexane 240 (1988)227

A unified model of the adiabatic reactions of electron transfer at metal electrodes 241(1988)45

Involvement of coordination chemistry during electron transfer in the stabilization of the pyrite (FeS_2) photoanode 242(1988)255

Competitive homogeneous chemical reactions occurring between two electron transfers. Application to *p*-nitrophenol reduction 243 (1988)293

Electron transfer reactions at the interface between two immiscible electrolyte solutions 244(1988)15

Electron transfer between immiscible solutions. The hexacyanoferrate–lutetium biphthalocyanine system 244(1988)27

IR reflectance studies of electron transfer promoters for cytochrome *c* on a gold electrode 245(1988)275

Hydrodynamic voltammetry at an interdigitated electrode array in a flow channel. Part II. Chemical reaction succeeding electron transfer 247(1988)1

The role of phase transfer catalysts in two phase redox reactions 247(1988)203

Electrode processes in mixed solvents. Correlations between electrochemical rate constants and Gibbs energy of transfer 248 (1988)35

Studies of surface-modified glassy carbon electrodes obtained by electrochemical treatment. Its effect on $Ru(bpy)_3^{2+}$ adsorption and the electron-transfer rates of the Fe^{2+}/Fe^{3+} couple 248(1988)321

Electron transfer reactions to soluble redox couples at $Ba_2YCu_3O_7$ and CuO electrodes 249 (1988)205

Correlation of heterogeneous electron transfer rates with structural change in cobalt tetraaza macrocyclic complexes 250(1988)107

Electroanalytical simulations. Part IX. The simulation of a second-order chemical reaction preceding a reversible electron transfer under cyclic voltammetric conditions using orthogonal collocation 250(1988)237

Electron transfer coefficient

Photoemission approach to the investigation of the electric double layer 204(1986)281

Electron transport

Electrode films of porous agarose impregnated with Nafion. Structural heterogeneity and its effects on electron transport 207(1986)73

Electron transport dynamics in thin polymer films containing tris(2,2′-bipyridine)osmium(III/II) complexes 222(1987) 223

Electron transport in biological processes. Deoxyribonucleic acid degradation and its relationship with the electrochemical behaviour of hydroxyquinone derivatives 231(1987)523

Electro-organic reaction

Indirect electroorganic reactions mediated by multivalent metal ion–macrocyclic polyamine complexes 243(1988)393

Electro-organic reactions. Part 34. Kinetic basicities of some electrogenerated organic dianions and the competition between protonation and reproportionation 250(1988)373

Electro-oxidation

Electrooxidation of formaldehyde on Cu + Ni. alloy electrodes in alkaline solutions 201(1986)47

Infrared spectra of carbon monoxide adsorbed on a smooth gold electrode. Part I. EMIRS spectra in acid and alkaline solutions 201(1986) 175

Investigations on the electrooxidation of PF_3 adsorbed on Pd and Au + Pd alloys 201(1986)397

Catalytic effects of Hg and Tl submonolayers on the electrooxidation of formic acid on Pt 205 (1986)135

Study of the electrooxidation of n-propanol on an Au electrode in basic medium 206(1986)179

A mechanistic study of the electro-oxidation of hydrazine on phthalocyanines of VO, Cr, Mn, Ni, Cu and Zn attached to graphite electrodes 210(1986)95

Current peak multiplicity related to the $Ni/Ni(OH)_2$ electrode 210(1986)287

Polarographic reduction of aldehydes and ketones. Part XXVI. Electroreduction and electrooxidation of pyridinecarboxaldehydes in alkaline solutions 213(1986)277

Initial stages of electrooxidation of Pd (100) surfaces in sulfuric acid solution: an XPS study 217(1987)435

The behaviour of electrodispersed platinum electrodes for the voltammetric electrooxidation of reduced carbon dioxide 224(1987)189

Electrochemical and photocatalytic properties of water-soluble tin(IV) *meso*-tetraanilinporphyrin 226(1987)157

Preparation of highly dispersed Pt + Ru alloy clusters and the activity for the electrooxidation of methanol 229(1987)395

Structurally heterogeneous electrode films of acrylamide/vinylpyridine gels. Dynamics of ferricyanide mediated electrooxidation of ascorbic acid and their dependence on the electrode film structure and composition 236 (1987)113

Methanol oxidation on unsupported and carbon supported Pt + Ru anodes 240(1988)133

Reactant structural effects on the formation and electro-oxidation of adsorbed carbon monoxide from small organic molecules at platinum as studied by time-resolved FTIR spectroscopy 240(1988)341

Mechanisms of formic acid, methanol, and carbon monoxide electrooxidation at platinum as examined by single potential alteration infrared spectroscopy 241(1988)143

Electrooxidative formation and characteristics of Cr(III)–thio complexes at mercury electrodes 247(1988)215

Study of the electrooxidation of 1,2-propanediol on an Au electrode in basic medium 248(1988)193

Electro-oxidation of thiosulphate ion on gold. Study by means of cyclic voltammetry and Auger electron spectroscopy 250(1988)443

Electrophoretic mobility

Influence of saponin on the electric parameters and the electrophoretic mobility of erythrocytes 231(1987)35

Electrophoric group behaviour

Electrochemistry of some *N*-substituted phospha-λ^5-azenes in acetonitrile. Mechanistic aspects, electrophoric group behavior, and substituent effects 236(1987)219

Electrophysiology

Temperature effect on ion transport through the isolated human amnion. Part I. Electrophysiological studies 211(1986)383

Enterocyte development studied by electrophysiological methods 212(1986)509

Electropolishing

Photoeffect on a Cu anode during electropolishing 210(1986)229

Open-circuit potential decay investigation of the surface layer of an electropolished Cu anode 210(1986)237

Influence of Cl^- ions on the photoelectrochemical behaviour of the Cu/H_3PO_4 system 210(1986)247

Electropolymerization

Electropolymerisation and redox properties of bipyridyl–polypyrrole and Cu(II) bipyridyl–polypyrrole film electrodes 205(1986) 309

Electrode kinetics of metal complexes confined in electropolymerized poly(*N*,*N*-dialkyl substituted aniline) films on graphite surfaces 215(1986)191

Growth mechanism in the electropolymerization of aniline and *p*-aminodiphenylamine 215(1986) 401

Electrode kinetics of electroactive electropolymerized polymers deposited on graphite electrode surfaces 217(1987)239

Behaviour of some poly(pyrrole–anthraquinone) films in DMSO electrolytes 219(1987)165

Charge-controllable polypyrrole/polyelectrolyte composite membranes. Part II. Effect of incorporated anion size on the electrochemical oxidation–reduction process 224(1987)123

Electropolymerization of aniline intercalated in montmorillonite 233(1987)291

Spectroelectrochemical evidence for an intermediate in the electropolymerization of aniline 236(1987)189

Electrochemical study of poly(PHAS) in acetonitrile and water + acetonitrile electrolytes 238(1987)183

Electrochemical behavior of 5-amino-1,10-phenanthroline and oxidative electropolymerization of tris[5-amino-1,10-phenanthroline]iron(II) 239(1988)175

Cyclic potential sweep electropolymerization of aniline. The role of anions in the polymerization mechanism 239(1988)387

Interpretation of polyazulene electropolymerization considering faradaic current efficiency and capacitive current effects during the growth and redox switching steps 241(1988)211

Polypyrrole–clay-modified electrodes 243(1988) 367

Electrochemical and electropolymerization reactions of undiluted anilines and pyrrole 245 (1988)321

Electropolymerized multilayer and copolymeric structures based on substituted pyrroles 246 (1988)321

Cathodic electropolymerization of polythiophene on platinum and various semiconducting electrodes 246(1988)467

Electroporation

Electroporative gene transfer (electrotransfection): a method for strain improvement of animal cells 231(1987)253

Electro-reduction

Polarographic reduction of aldehydes and ketones. Part XXIV. Electroreduction of pyridinecarboxaldehydes in acidic solutions 213 (1986)245

Polarographic reduction of aldehydes and ketones. Part XXV. Electroreduction of pyridinecarboxaldehydes in aqueous buffered solutions 213(1986)255

Polarographic reduction of aldehydes and ketones. Part XXVI. Electroreduction and electrooxidation of pyridinecarboxaldehydes in alkaline solutions 213(1986)277

The kinetics of electroreduction of lithium ions in tetrahydrofuran at mercury and mercury amalgam electrodes 215(1986)237

Influence of temperature on the kinetics of Zn(II) electroreduction from water + dimethylsulfoxide mixtures 215(1986)287

Ion-pair effects on the electroreduction and electrochromic properties of *ortho*-chloranil in dipolar aprotic solvents 216(1987)203

On the electroreduction mechanism of halobenzenes. Part I. A quantum chemical approach 219(1987)197

Solvent and ion pairing effects on the reaction entropy for the electroreduction of aromatic molecules 219(1987)209

The electroreduction of 2- and 3-cyanopyridinium ions 220(1987)139

Electroreduction of primary alkyl iodides in acetonitrile 226(1987)27

Paths of the electroreduction of 2,2′-bipyridyl 226(1987)117

Electrochemical and photocatalytic properties of water-soluble tin(IV) *meso*-tetraanilinporphyrin 226(1987)157

The electroreduction of oxygen on pyrolytic graphite 233(1987)147

Electrochemistry of bipyridyl derivatives of cobalt in solutions of anionic and cationic micelles 233(1987)173

Electrochemical behaviour of copper oxide in molten dimethyl sulfone at 150 °C 233(1987)189

The electroreduction of dioxygen on thin films of gold in alkaline solution 234(1987)193

Electrochemical reduction of Fast Sulphone Black-F, a bisazo dye 235(1987)225

Electroreduction of carbon dioxide to carbon monoxide in molten LiCl + KCl, LiF + KF + NaF, Li_2CO_3 + Na_2CO_3 + K_2CO_3 and $AlCl_3$ + NaCl 235(1987)369

The active surface area increase of rhodium electrodes through electroreduction of oxide layers produced by fast periodic potentials 237 (1987)237

Study of the electroreduction of dioxygen on thin films of platinum phthalocyanine in alkaline solutions. Part I. Electrochemical investigations 239(1988)273

Scanning tunneling microscopy (STM) and scanning electron microscopy (SEM) of electrodispersed gold electrodes 240(1988)77

Electron transfer reactions and associated conformational changes. Electrochemical reduction of *trans*-1,2-diiodocyclohexane 240 (1988)227

Electrochemical reduction of 4,4-dimethyl-1-phenyl-1-penten-3-one 241(1988)297

Electrochemical behaviour of pyrazine derivatives: reduction of 2-hydroxy-3-phenyl-6-methylpyrazine 243(1988)133

The role of intramolecular association in the electrochemical reduction of viologen dimers and trimers 243(1988)143

The electro-reduction of the anaesthetic gas isoflurane 244(1988)203

Effect of poly(α-D-glutamic acid) on the polarographic reduction of 3,6-diaminoacridines 244(1988)235

Influence of water on the electroreduction of 2-nitrophenylhydrazones in acetonitrile 246 (1988)399

Electrode processes in mixed solvents. Correlations between electrochemical rate constants and Gibbs energy of transfer 248 (1988)35

Chronocoulometric study of electrode kinetics in the case of an adsorbed redox couple. Progesterone electroreduction on mercury from aqueous solutions 248(1988)55

Electrochemistry of the nickel–cyanide system at mercury electrodes. Part III. The role of intermediate products in the mechanism of $Ni(CN)_4^{2-}$ electroreduction at mercury electrodes 248(1988)139

The effect of carbon dioxide on the electroreduction of 1,4-benzoquinone 248(1988) 159

Electroreduction of Ni^{2+} and Fe^{2+} in a fused electrolyte. Formation of a two-component alloy and the role of the underpotential deposition 248(1988)369

The electroreduction of oxygen on thin films of platinum phthalocyanine in alkaline solutions. Part II. Spectroelectrochemical data and mechanism 249(1988)167

Electrode kinetics of the Cu(II)/Cu(I) system at platinum in water + dimethylsulphoxide (DMSO) mixtures 250(1988)61

Electroreflectance spectroscopy

Metalloporphyrin–polypyrrole film electrode: characterization and catalytic application 207 (1986)87

Electroreflectance spectroscopy of gold single crystals. Influence of the solvent 207(1986)235

Electrolyte electroabsorption: a spectroscopic technique for thin film semiconducting electrodes 218(1987)347

Spectroscopic studies of water adsorption on iron group metals 228(1987)301

Interfacial relaxation via s-polarized electroreflectance 235(1987)11

Electrosorption

Electromodification of carbon-fibre electrodes by 2-nitroso-1-naphthol 207(1986)203

Electrosorption of organics on three dimensional carbon fiber electrodes 214(1986)303

Kinetics and mechanism of H and OH electrosorption on faceted (100) Pt electrodes in acid solutions 227(1987)183

"In situ" analysis by infrared reflectance spectroscopy of the adsorbed species resulting from the electrosorption of ethanol on platinum in acid medium 229(1987)353

New results for the electrosorption of methanol on polycrystalline platinum in acid medium obtained by programmed potential voltammetry 234(1987)315

Underpotential metal deposition on gold, monitored in situ with a quartz microbalance 239(1988)321

Electrosorption of hydrogen and sulphuric acid anions on single-crystal platinum stepped surfaces. Part I. The [110] zone 241(1988)309

A study of the electrosorption of bromide and iodide ions on gold using the quartz crystal microbalance 243(1988)343

Electrosorption valency

The surface dipole moment of species adsorbed from a solution 249(1988)25

Electrostatic interaction

On the coverage dependence of the partial charge transfer coefficient 202(1986)1

The influence of electrostatic interactions on the binding of bivalent cations to polynucleotides 214(1986)343

Electrosynthesis

Mechanistic studies on the electrosynthesis of sulfones 214(1986)221

Recent thermodynamic data for some reactions of peroxomonosulphate ion 214(1986)481

Current doubling during propane oxidation on the n-TiO_2 anode in trifluoromethanesulfonic acid monohydrate 220(1987)173

Catalytic electrosynthesis of conducting polymers 244(1988)115

Ultramicroelectrodes for the study of the mechanism of electrosynthetic reactions. The hydrodimerisation of acrylonitrile 248(1988)229

Electrowinning

Application of a backward feed and exhaust (BFE) type methanol anode to zinc electrowinning 205(1986)125

Elementary act theory

On the study of thermal and optical processes in condensed media 204(1986)141

Ellipsometry

The determination, by ellipsometry, of the mode of adsorption on gold of some promoters of redox-protein direct electrochemistry 202(1986) 303

The ellipsometric characterization of Pt + Cr alloy surfaces in acid solutions 205(1986)163

Ellipsometric study of the Ag (single crystal)/NaF interface with a view to obtaining the electron distribution profile 229(1987)19

A study of the electrochemical growth and optical properties of polymeric thionine films on platinum using ellipsometry 233(1987)125

The electrochemical oxidation of zinc studied by ellipsometry 234(1987)185

Comparison of visible transmission spectroscopic and ellipsometric data obtained during the deposition of thin films on electrodes 244(1988) 353

Emersion

A UPS, XPS and work function study of emersed silver, platinum and gold electrodes 215(1986)331

Emulsified medium

Voltammetric determination of indole in micellar and emulsified media 234(1987)175

Encounter pair

Single electron transfer rate measurements. Interpretation when a radical–ion bond cleavage reaction occurs within the encounter pair 205 (1986)35

Endotoxin

Role of lipid peroxidation and free radical scavengers on endotoxin shock 232(1987)295

Tissue oxidation after endotoxin 232(1987)301

Energy transduction

The significance of interfacial charge and proton displacements for the mechanism of energy transduction in biomembranes 212(1986)273

Enhanced current

Metallocyanide modified nickel electrode surfaces. Enhanced currents from solution species 210(1986)323

Enterocyte

Enterocyte development studied by electrophysiological methods 212(1986)509

Enthalpy

Conditions enabling determination of entropy and enthalpy of activation of electrode reactions at zero metal–solution potential difference 210 (1986)167

Entropic and enthalpic components of the symmetry factor for electrochemical proton transfer from various proton donors over a wide temperature range 214(1986)633

pH and chain length dependence of phosphatidic acid phase transition parameters 231(1987)509

Entropy

Conditions enabling determination of entropy and enthalpy of activation of electrode reactions at zero metal–solution potential difference 210 (1986)167

Entropic and enthalpic components of the symmetry factor for electrochemical proton transfer from various proton donors over a wide temperature range 214(1986)633

Solvent and ion pairing effects on the reaction entropy for the electroreduction of aromatic molecules 219(1987)209

Solvent structure at the mercury/solution interface in dimethylsulphoxide 226(1987)283

Reaction entropies in quinone reduction in *N,N*-dimethylformamide and propionitrile 242 (1988)323

The temperature dependence of the double layer parameters of the (111) face of silver 244(1988) 133

Effect of molecular interactions at the interface. Part II. The metal/non-aqueous electrolyte interface 247(1988)57

Some general statistical-mechanical considerations on the entropy of a solvent monolayer or multilayer against a charged wall 250(1988)23

Environmental sample

Square wave voltammetry — a rapid and reliable determination method of Zn, Cd, Pb, Cu, Ni and Co in biological and environmental samples 214 (1986)51

Enzyme

Studies on the binding of dicyclohexylcarbodiimide to the mitochondrial bc_1 complex 212(1986)301

Enzyme activity

Regulation of enzyme activity by direct electric fields in compartmental systems 231(1987)205

Enzyme electrode

Amperometric enzyme electrodes. Part III. A conducting salt electrode for the oxidation of four different flavoenzymes 218(1987)119

Amperometric enzyme electrodes. Part IV. An enzyme electrode for ethanol 218(1987)127

Automatic on-line measurement of substrates in fermentation liquids with enzyme electrodes 231 (1987)399

Enzyme immobilization

Polyvinylalcohol–collagen membranes for enzyme immobilization 212(1986)149

Enzyme sensor

Enzyme sensor system for potentiometric urea determination in serum and milk 209(1986)69

Enzymic hydrolysis

Amperometric determination of total amylase 246(1988)307

Epidermal keratinocyte

Effects of organic peroxides on human epidermal keratinocytes 232(1987)263

Episulphide

Electrochemical ring-opening polymerization of episulfides. Obtaining crystalline doped polyethylene and polypropylene sulfide films by anodic polarization 207(1986)117

Epithelial cell

Microelectrode studies in cultured epithelial cells 231(1987)141

Epoxidation

An analysis of electrochemical reactions followed by series or complex chemical reactions 243 (1988)1

Epoxidation of *cis*-cyclooctene by molecular oxygen electrocatalysed by polypyrrole–manganese porphyrin film modified electrodes 250(1988)191

Epoxy resin

Studies of the process of catalytic hydrogen evolution on the epoxy-resin-impregnated graphite-based mercury film electrode 213(1986) 127

Equilibrium constant

First- and second-order chemical–electrochemical mechanisms. Extraction of standard potential, equilibrium and rate constants from linear sweep voltammetric curves 208(1986)197

Surface free energy as the potential in oligomeric equilibria: prediction of hemoglobin disaggregation constant 231(1987)349

One-electron and two-electron reductions of 1-methyl-4-phenyl pyridinium (MPP^+) 242(1988) 171

Analysis of the cyclic voltammograms associated with deposition or precipitation of the electrochemical product 245(1988)51

Effect of molecular interactions at the interface. Part II. The metal/non-aqueous electrolyte interface 247(1988)57

Electrooxidative formation and characteristics of Cr(III)–thio complexes at mercury electrodes 247(1988)215

Equilibrium potential

Correlations between the equilibrium potential and the potential of zero charge of metals in different modifications 204(1986)343

H^+–K^+ exchange and $\Delta\bar{\mu}_{H^+}$ in *Lactobacillus salivarius* 231(1987)503

The electrochemistry of molten $K_2S_2O_7$ + K_2SO_4 + V_2O_5 electrolytes 238(1987)163

Kinetic analysis of the picrate ion transfer across the interface between two immiscible electrolyte solutions from impedance measurements at the equilibrium potential 242(1988)291

Equilibrium state

Spectroelectrochemical study of polyaniline versus potential in the equilibrium state 220 (1987)67

Equivalent circuit

Diffusion-migration impedances for finite, one-dimensional transport in thin layer and membrane cells. An analysis of derived electrical quantities and equivalent circuits 210(1986)1

Error

Errors arising from carrying out integration, and other operations of calculus, on digitally acquired data 208(1986)1

Erwinia dissolvens

Mediating effect of ferric chelate compounds in microbial fuel cells with *Lactobacillus plantarum*, *Streptococcus lactis*, and *Erwinia dissolvens* 231 (1987)217

Erythrocyte

Modification of human erythrocyte membrane potentials by the action of the polyoxyethylene detergent Triton X-100 211(1986)7

The kinetics of anion equilibration of human erythrocytes in phosphate-containing media of low chloride concentration 211(1986)67

Volume and ionic composition changes in erythrocytes after electric breakdown. Simulation and experiment 212(1986)455

Influence of saponin on the electric parameters and the electrophoretic mobility of erythrocytes 231(1987)35

Influence of the antitumour antibiotics daunomycin and violamycin B I on membranes of human erythrocytes. Passive electrical investigations 231(1987)81

Application of the general model of osmotic and ionic equilibria of a cell to human erythrocytes suspended in isotonic unbuffered NaCl + KCl + sucrose media in the presence of cationic ionophore 231(1987)223

Can the membrane potential of human erythrocytes suspended in isotonic unbuffered NaCl + KCl + sucrose media in the presence of cationic ionophore Triton X-100 be considered as the equilibrium membrane potential? 231 (1987)231

Novel tools for determining mechanically induced modifications of membrane structure: electrochemical and fluorescence methods 231 (1987)303

Escherichia coli

An electrochemical study of energy-dependent potassium accumulation in *E. coli*. Part XI. The Trk system in anaerobically and aerobically grown cells 211(1986)417

Etching

Surface states on cadmium sulfide and the influence of etching 205(1986)291

Hypochlorite reduction at GaAs: a multifaceted reaction 224(1987)211

Ethanol

Amperometric enzyme electrodes. Part IV. An enzyme electrode for ethanol 218(1987)127

Formation of ethyl alcohol in the photocatalytic reduction of carbon dioxide by SiC and ZnSe/metal powders 225(1987)287

"In situ" analysis by infrared reflectance spectroscopy of the adsorbed species resulting from the electrosorption of ethanol on platinum in acid medium 229(1987)353

Lipid peroxidation and brain mitochondrial damage induced by ethanol 232(1987)211

On the adsorption and oxidation of ethanol on platinum as studied with in-situ IR spectroscopy 246(1988)449

Ethanol dehydrogenase

Amperometric enzyme electrodes. Part IV. An enzyme electrode for ethanol 218(1987)127

Ethanol ingestion

Bioelectrochemical approach to the role of glutathione in strong ethanol ingestion 212 (1986)333

Ether

Adsorption of aliphatic monoethers of ethylene glycol (alkoxyethanol) at the free water surface and at the Hg/solution interface 204(1986)299

Ethidium

Interaction of calmodulin antagonists with yeast. Comparison with the effect of miconazole, dio-9 and ethidium on Sr^{2+} uptake, K^+ efflux and plasmamembrane ATPase activity 212(1986)519

Ethylbenzene

Double-layer studies in a non-polar solvent consisting of Al_2Br_6 and KBr in ethylbenzene 229(1987)165

Ethylene

Spectroscopic investigation of electrochemically active compounds. SERS of nitrobenzene, sulfide, ethylene and hydroquinone on Au 239(1988)361

Ethylene glycol

Adsorption of aliphatic monoethers of ethylene glycol (alkoxyethanol) at the free water surface and at the Hg/solution interface 204(1986)299

Electrocatalytic oxidation of ethylene glycol. Part III. In-situ infrared reflectance spectroscopic study of the strongly bound species resulting from its chemisorption at a platinum electrode in aqueous medium 216(1987)169

Ethylene spacer

Substituent effects on electrochemical reduction of viologen dimer and trimer with ethylene spacer 239(1988)397

Ethylmaleimide

Modulation of the electrochemical membrane potential in mitochondria by sulfhydryl reagents 231(1987)261

Europium complex

Electrochemical behavior of the Eu(III/II)–EDTA system on a mercury electrode in water + dimethylsulphoxide (DMSO), water + acetonitrile (AN) and water + hexamethylphosphortriamide (HMPT) mixtures 226(1987)315

Europium couple

Electrode processes of the V(III)/V(II) and Eu(III)/Eu(II) systems in mixed water + acetone solvents 230(1987)155

Europium ion

Electrode processes of the Eu(III)/Eu(II) system in water + hexamethylphosphortriamide mixtures 234(1987)263

Eutectic

Gas electrode reactions in molten carbonate media. Part I. Exchange current density of oxygen reduction in (Li + K)CO_3 eutectic at 650 °C 206 (1986)229

Gas electrode reactions in molten carbonate media. Part II. Oxygen reduction kinetics on conductive oxide electrodes in (Li + K)CO_3 eutectic at 650 °C 206(1986)241

Molten alkali thiocyanates as solvents for transition metal electrodeposition 206(1986)253

Gas electrode reactions in molten carbonate media. Part III. Temperature dependence of oxygen reduction kinetics in (Li + K)CO_3 eutectic 209(1986)125

Electrolytic coating of titanium onto iron and nickel electrodes in the molten LiF + NaF + KF eutectic 230(1987)125

Chemical and electrochemical behaviour in molten alkali hydroxides. Part II. Electrochemistry of chalcogenide ions in the molten NaOH + KOH (49 mol%) eutectic mixture 250(1988)327

Exchange current

Gas electrode reactions in molten carbonate media. Part I. Exchange current density of oxygen reduction in (Li + K)CO_3 eutectic at 650 °C 206 (1986)229

The meaning of exchange current densities in electrocrystallization 229(1987)423

The significance of exchange currents for the PVC/water interface 245(1988)113

Exchange diffusion

Exchange diffusion in one dimension. Liquid electrolytes and mixed conductor membranes 243(1988)279

Exotoxicology

Voltammetric determination of Cu, Cd, Hg, Pb and Zn in cereals 226(1987)263

Expanding electrode

Reduction of complexes in unbuffered solutions. A unified treatment of the reduction of complexes at a stationary planar electrode or at an expanding mercury electrode 208(1986)57

Theoretical study of the chronopotentiometric response with programmed current of electrode processes with regeneration mechanisms 241 (1988)33

Potentiostatic response when reactant and product are adsorbed at an electrode expanding with any power law or at a DME (expanding sphere electrode model) 247(1988)99

Theory of the EE mechanism with adsorption of the intermediate at an electrode expanding with any power law or at a DME (expanding sphere electrode model) 247(1988)119

Experimental shock

Role of lipid peroxidation and free radical scavengers on endotoxin shock 232(1987)295

Exponential law

Two-dimensional nucleation according to an exponential law with diffusion-controlled growth in the adsorption of camphor-10-sulfonate at the mercury/electrolyte interface 250(1988)159

Exponential relaxation technique

Measurement of corrosion rates by the large-amplitude exponential relaxation technique 215 (1986)393

Extended X-ray absorption fine structure spectroelectrochemistry

Surface EXAFS of an electrochemical interface. Iodine on platinum (111) 210(1986)311

In situ observation of copper redox in a polymer modified electrode using EXAFS spectroelectrochemistry 240(1988)361

In-situ surface EXAFS at chemically modified electrodes 248(1988)77

Extraction

Electrochemical preparation of a polyparaphenylene film and a polyparaphenylene/polyacrylamine functional film 229(1987)215

Kinetics of salt extraction into the high-permittivity oil phase. Part II. Extraction rates of simple salts determined with the data of electrolysis at the interface of two immiscible electrolyte solutions 229(1987)265

F

Fabrication

Application of transient electrochemical techniques to inlaid ultra-microelectrodes. Assessment of fabrication quality 218(1987)187

Faceting

Modifications of palladium electrode surfaces produced by periodic potential treatments 246 (1988)165

Faradaic admittance

The coupling of the double-layer admittance and the faradaic admittance of a stepwise electrode reaction complicated by adsorption of the reactants with experimental verification on the reduction of pyrazine 202(1986)271

Faradaic current

A systematic approach to faradaic current, charging current and phase angle measurement by digital alternating current polarography 222 (1987)35

The influence of a faradaic process on the double-layer capacity 229(1987)181

Interpretation of polyazulene electropolymerization considering faradaic current efficiency and capacitive current effects during the growth and redox switching steps 241(1988)211

Faradaic impedance

Kinetic analysis of the picrate ion transfer across the interface between two immiscible electrolyte solutions from impedance measurements at the equilibrium potential 242(1988)291

Faradaic impedance methods as applied to the study of the potentiodynamic passivation of zinc in alkaline media 247(1988)323

Fast electrode reaction

High-frequency impedance spectroscopy of fast electrode reactions 229(1987)407

Fast periodic potential

The active surface area increase of rhodium electrodes through electroreduction of oxide layers produced by fast periodic potentials 237 (1987)237

Fast Sulphone Black-F

Electrochemical reduction of Fast Sulphone Black-F, a bisazo dye 235(1987)225

Father–son reaction

Kinetic analysis of a slow electron transfer coupled with a father–son reaction 220(1987)201

Fatty acid

Pentane measurement in man as an index of lipoperoxidation 232(1987)117

Fatty acid peroxyl radical

Fatty acid peroxyl radicals: their generation and reactivities 232(1987)37

Fermentation

Automatic on-line measurement of substrates in fermentation liquids with enzyme electrodes 231 (1987)399

Fermi energy

On the accessibility of the bandgap on semiconductor interfaces by non-equilibrium Fermi energies of electrons and holes 239(1988)9

Ferricenium ion

Transfer of ferricenium cation across water/organic solvent interfaces 216(1987)303

Ferricytochrome *c*

Reactions of tetrahydropterins with oxygen and with other one-electron acceptors 232(1987)79

Ferrocene

Application of carbon-fiber microelectrodes to the study of non-conductive inverse microemulsions. Interpretation of the diffusion coefficients 210(1986)205

Application of transient electrochemical techniques to inlaid ultra-microelectrodes. Assessment of fabrication quality 218(1987)187

Voltammetric measurements with microelectrodes in low-conductivity systems 220 (1987)31

The electrochemistry of ferrocene in non-aqueous solvents 221(1987)165

Electrochemistry of ferrocene in acetonitrile. Evidence for irreversible kinetic behavior due to passive film formation 237(1987)269

Electrochemistry in near-critical and supercritical fluids. Part VI. The electrochemistry of ferrocene and phenazine in acetonitrile between 25 and 300 °C 243(1988)117

Theory of microelectrode voltammetry with little electrolyte 250(1988)1

Ferrocene derivative

Electrocatalytic oxidation of NADH by ferrocene derivatives and the influence of cyclodextrin complexation 234(1987)163

Ferrocene electrode

Solvent effects on the electrode kinetics of simple redox couples. Investigations on the electrochemical behaviour of the V(III)/V(II) system in water + acetonitrile mixtures 237 (1987)209

Ferroin

The Belousov–Zhabotinsky system catalyzed by ferroin. Experimental behaviour and theoretical pattern 211(1986)485

Ferron

Phase transitions in mercury–quinoline derivative systems. Anodic electrocrystallization processes in aqueous ferron solutions 215(1986)345

On the formation of two-dimensional condensed films at the interface mercury/ferron aqueous buffered solutions 224(1987)237

Fetal salt concentration

The human amniotic membrane: One membrane or several membranes? 211(1986)427

Fibrinogen

Human fibrinogen adsorption onto surface-energy-controlled substrata 212(1986)27

Field strength

Electronic current and breakdown characteristics of tantalum oxide films 239(1988)125

Film electrode

Redox reactions at film-covered electrodes. A new approach to a study of fluorine anodes 206(1986)313

Electrode kinetics of electroactive electropolymerized polymers deposited on graphite electrode surfaces 217(1987)239

Redox and electrocatalytic properties of cobalt–bipyridyl–polypyrrole film electrodes 224(1987)95

Synthesis and properties of film electrodes from *N*-substituted carbazoles in acid medium 246 (1988)87

Research on chemically modified electrodes. Catalytic reduction of dioxygen at a cobalt phthalocyanine-doped polyaniline film electrode 246(1988)101

Film formation

On diffusion-controlled film formation and dissolution 205(1986)303

Adsorption and film formation of uracil derivatives at the mercury/electrolyte interface in the presence of different supporting electrolytes 213(1986)339

An in-situ infra-red study of poly thiophene growth 242(1988)47

Film growth

In-situ investigation of the film growth mechanism using multiple internal reflection Fourier transform infrared spectroscopy (MIRFTIRS). Part I. Behaviour of iron and platinum electrodes in alkaline methanolic solutions 201(1986)413

In-situ investigation of the film growth mechanism using multiple internal reflection Fourier transform infrared spectroscopy (MIRFTIRS). Part II. Behaviour of iron and platinum electrodes in the presence of hexamethylenediamine in alkaline methanolic solutions 210(1986)295

Film thickness

Amorphous semiconductor–electrolyte junction. Influence of the wavelength and oxide thickness on the photocharacteristics of a-Nb_2O_5 anodic films 228(1987)119

Finite element

A global finite element Galerkin/B-spline (GBS) numerical model of electrochemical kinetics, transport, and mechanism for multi-geometry working electrodes. Part I. Modeled Nernstian voltammetry 220(1987)1

First-order process

Derivation and experimental verification of approximate explicit equations in differential pulse polarography. Part III. Diagnostic criteria for characterization of first-order processes 241 (1988)291

Flame treatment

A modification of the last step of surface preparation for gold and silver single crystal faces 220(1987)155

Flatband potential

A potential- and charge-consistent model for the adsorption dependence of the semiconductor flatband potential 210(1986)197

On surface conductance measurements at the GaAs/electrolyte interface 228(1987)89

Flatband potential shift of n-type GaAs in CH_3CN containing different redox reagents 237 (1987)289

Electrolyte electroreflectance. Easy and reliable flat-band potential measurements 244(1988)69

On the evaluation of the flatband potential from photocurrent measurements 244(1988)307

Flat plate electrode

Hydrodynamic effects on the macromorphology of electrodeposited zinc and flow visualization. A flat plate electrode in a channel flow cell 249 (1988)35

Flavin

Attachment of riboflavin derivatives to electrode surfaces 244(1988)287

Flavodoxin

Electrochemical behavior of cytochrome c_3 from *Desulfovibrio vulgaris* Hildenborough. Promoter activity at the pyrolytic graphite electrode 249 (1988)241

Flavoenzyme

Amperometric enzyme electrodes. Part III. A conducting salt electrode for the oxidation of four different flavoenzymes 218(1987)119

Flow cell

Identification of the adsorbate during methanol oxidation 229(1987)367

Flow channel

Hydrodynamic voltammetry at an interdigitated electrode array in a flow channel. Part II. Chemical reaction succeeding electron transfer 247(1988)1

Flow electrolysis

Flow phenomena in FIA and flow electrolysis 239(1988)1

Flower petal electrode

Biosensors using flower petal structures 222 (1987)343

Flow-field throw

Hydrodynamic effects of surfactants on the macromorphology of electrodeposited zinc and flow visualization. The flow-field throw 243 (1988)21

Flow injection analysis

Voltammetric determination of cyadox using adsorptive accumulation in a flow-through system 214(1986)115

Flow phenomena in FIA and flow electrolysis 239(1988)1

Flow injection coulometry

Investigations on the oxidation of the carbamate pesticide Aminocarb 239(1988)187

Flow system

Charge transfer across a polymer gel/liquid interface. A voltammetric detector for a flow system 217(1987)213

Flow-through detector

Amperometric detection of nitrates using a flow-through membrane detector 214(1986)125

Electroadsorption of bacteria on porous carbon and graphite electrodes 231(1987)175

Flow-through electrode

Electrosorption of organics on three dimensional carbon fiber electrodes 214(1986)303

Flow visualization

Hydrodynamic effects of surfactants on the macromorphology of electrodeposited zinc and flow visualization. The flow-field throw 243 (1988)21

Hydrodynamic effects on the macromorphology of electrodeposited zinc and flow visualization. A flat plate electrode in a channel flow cell 249 (1988)35

Hydrodynamic effects on the macromorphology of electrodeposited zinc and flow visualization. The rotating disk electrode 249(1988)63

Fluctuation

Fluctuation phenomena in electrochemistry. Part I. The formalism 208(1986)13

Fluctuation phenomena in electrochemistry. Part II. Modelling the noise sources 208(1986)29

Fluorenylidene dianion

Electro-organic reactions. Part 34. Kinetic basicities of some electrogenerated organic dianions and the competition between protonation and reproportionation 250(1988)373

Fluorescein

Linear sweep voltammetry at channel electrodes 206(1986)57

Fluorescence

Electrochemistry and photoelectrochemistry of chlorophyll on a metallic electrode. Part I. Properties of chlorophyll adsorption films on metals 227(1987)99

Effect of dinitrophenol on membrane potential, membrane resistance and chlorophyll fluorescence of *Chara corallina* internodal cells at various pH values 231(1987)165

Microelectrophoresis and fluorescence studies of the glycoprotein sheath covering the outer membrane surface in murine neuroblastoma cells 231(1987)429

Fluorescent probe

Use of 9-aminoacridine in the evaluation of liposome surface charge density: role of the adsorption on lipidic sites 231(1987)277

Novel tools for determining mechanically induced modifications of membrane structure: electrochemical and fluorescence methods 231 (1987)303

Fluoride-selective electrode

Potentiometric titration of aluminium with fluoride in organic solvent + water mixtures by use of a fluoride-selective electrode 248(1988)87

Fluoride ion

Chemical analysis of the ionic content of hydrous iridium oxide films 240(1988)171

Potentiometric titration of aluminium with fluoride in organic solvent + water mixtures by use of a fluoride-selective electrode 248(1988)87

Fluorine electrode

Redox reactions at film-covered electrodes. A new approach to a study of fluorine anodes 206(1986)313

Fluorosurfactant

Mechanistic aspects of reaction selectivities on surfactant-modified Pd and Pt electrodes and catalysts 235(1987)131

Folic acid

Adsorptive stripping voltammetric behaviour of folic acid 225(1987)241

Forest damage

Electromagnetic smog — a damage and stress factor? 231(1987)441

Formaldehyde

Electrooxidation of formaldehyde on Cu + Ni alloy electrodes in alkaline solutions 201(1986)47

Differential pulse-polarographic determination of formaldehyde in lung surfactant 211(1986)89

An investigation of the oxidation of formaldehyde on noble metal electrodes in alkaline solutions by electrochemically modulated infrared spectroscopy (EMIRS) 240(1988)161

Formalism

A formalism for performing chronocoulometry at a stationary planar or spherical electrode. Part I. Theoretical treatment with Langmuirian adsorption 224(1987)1

Formic acid

In situ infrared reflectance spectroscopic study of the adsorption of formic acid at a rhodium electrode 204(1986)315

Structural effects in electrocatalysis: oxidation of formic acid and hydrogen adsorption on platinum single-crystal stepped surfaces 204(1986)329

Catalytic effects of Hg and Tl submonolayers on the electrooxidation of formic acid on Pt 205 (1986)135

Surface properties of polycrystalline platinum and their influence on formic acid oxidation 205(1986)151

Electrocatalytic reduction of carbon dioxide to methanol. Part IV. Assessment of the current–potential curves leading to reduction 206(1986)209

Infrared spectroscopic study of methanol and formic acid adsorbates on a platinum electrode. Part I. Comparison of the infrared absorption intensities of linear CO(a) derived from CO, CH_3OH and HCOOH 213(1986)149

Adsorption and reduction of formic acid on p-type silicon electrodes 215(1986)307

Infrared spectroscopic study of methanol and formic acid adsorbates on a platinum electrode. Part II. Role of the linear CO(a) derived from methanol and formic acid in the electrocatalytic oxidation of CH_3OH and HCOOH 218(1987)155

The influence of Cu adatoms on a Pt electrode on the oxidation of formic acid 218(1987)327

Electrocatalysis by ad-atoms. Part XXI. Catalytic effects on the elementary steps in methanol oxidation by non-oxygen-adsorbing ad-atoms 229(1987)385

The mechanism of electrocatalytic oxidation of formic acid on Pt (100) and Pt (111) in sulphuric acid solution: an EMIRS study 240(1988)147

Mechanisms of formic acid, methanol, and carbon monoxide electrooxidation at platinum as examined by single potential alteration infrared spectroscopy 241(1988)143

Electrocatalytic oxidation of formic acid on Pd + Pt alloys of different bulk composition in acidic medium 245(1988)145

Electrocatalysis by ad-atoms. Part XXII. S_{hole} control by ad-atoms on HCOOH oxidation 249 (1988)253

Effect of Pb adatoms on the chemisorption of formic acid at a smooth polycrystalline rhodium electrode in acid medium. A quantitative EMIRS investigation 249(1988)265

Electrocatalysis by ad-atoms. Part XXIII. Design of platinum ad-electrodes for formic acid fuel cells with ad-atoms of the IVth and the Vth groups 250(1988)117

Four-electron mechanism

The electrochemical mechanism of photosystem II functioning in chloroplasts 205(1986)245

Fourier transform

In-situ infra-red studies in electrochemistry 242 (1988)23

Fourier transform faradaic admittance measurement

Electron and hydrogen atom transfers in the electrochemical reduction of biphenyl halides in dimethylformamide and acetonitrile studied by means of Fourier transform faradaic admittance measurements (FT-FAM) 201(1986)315

Solution resistance determinatio s for FT Faradaic Admittance measurements 213(1986) 313

Fowler–Guggenheim–Frumkin adsorption isotherm

Electrochemical adsorption reactions (EAR). Part II. Relation between large signal response and small signal (impedance) data 210(1986)21

Free convection

Geometric influences on the spontaneous passivation of copper in alkaline hexacyanoferrate(III) solutions under conditions of free convection 213(1986)75

Free-diffusion junction

Experimental studies of the liquid junction potential between electrolyte solutions in different solvents. Part VI. Stability of the liquid junction potential 225(1987)255

Free radical

Photo and radiation-induced formation of thymidine hydroperoxides 232(1987)155

Redox catalysis allied with spin trapping. An efficient way for characterization of free radicals formed at very negative potentials 246(1988)457

Free radical scavenger

Role of lipid peroxidation and free radical scavengers on endotoxin shock 232(1987)295

Free water surface

Adsorption of aliphatic monoethers of ethylene glycol (alkoxyethanol) at the free water surface and at the Hg/solution interface 204(1986)299

Frequency analysis

Frequency analysis of electrochemical step responses. Complex and operational impedances 205(1986)59

Frequency domain

The interfacial bioelectrochemistry of lipid bilayer membranes: Laplace plane analysis 212 (1986)361

Frequency lag

Transient mass transfer at partially blocked electrodes: a way to characterize topography 238(1987)67

Frequency response

Frequency response analysis of photocurrent doubling. The reduction of oxygen at p-GaAs 209(1986)307

Freshwater plant

Membrane impedance of internodal cells of *Chara corallina* obtained by analysis of low level transients 231(1987)131

Frumkin isotherm

Specific adsorption of ascorbate ions on a mercury electrode in the presence of potassium perchlorate 206(1986)285

The effect of pH on the adsorption and the association of cytidine, cytidine-5′-monophosphate and cytidine-5′-diphosphate at the charged interface 212(1986)485

Standard states and the Frumkin adsorption isotherm for substances at electrode interphases 244(1988)53

Fuel cell

New oxygen cathodes for fuel cells with organic fuels 210(1986)277

Effects of KOH solution on the surface properties of Teflon 213(1986)43

On the effect of the Fe^{2+}/Fe^{3+} redox couple on oxidation of carbon in hot H_3PO_4 213(1986)161

Spectro-electrochemistry of cobalt and iron tetrasulphonated phthalocyanines 213(1986)217

Electrochemical and surface science investigations of PtCr alloy electrodes 220(1987) 269

Preparation and characterization of carbon-based fuel-cell electrodes with platinum-group bimetallic catalysts 223(1987)91

Mediating effect of ferric chelate compounds in microbial fuel cells with *Lactobacillus plantarum*, *Streptococcus lactis*, and *Erwinia dissolvens* 231 (1987)217

The electrochemical reduction of oxygen on passive iron in alkaline solutions 243(1988)171

Fulvic acid

Adsorption of fulvic-like organic ligands and their Cd and Pb complexes at a mercury electrode 223(1987)235

Functionalization

Surface functionalization of electrodes with oxometalates entrapped in polymeric matrices. Evidence for a microenvironment effect 240 (1988)325

Function generator

A flexible function generator for computer-based electrochemical instruments 224(1987)277

Fused electrolyte

Application of cyclic voltammetry to the study of diffusion and metalliding processes 244(1988) 61

Electroreduction of Ni^{2+} and Fe^{2+} in a fused electrolyte. Formation of a two-component alloy and the role of the underpotential deposition 248(1988)369

Fused ring system

Comments on the paper "The electrochemical reduction of some fused ring systems" by H.M. Fahmy, B. Nashed, F.A. Khalifa, A. Abdel Moneim and M. Abdel Azzem, and on the short communication "On the electrochemical reduction of *N*-phenylmaleimide and related compounds" by H. Lund 213(1986)159

G

Galerkin/B-spline

A global finite element Galerkin/B-spline (GBS) numerical model of electrochemical kinetics, transport, and mechanism for multi-geometry working electrodes. Part I. Modeled Nernstian voltammetry 220(1987)1

Gallium

Application of a modified version of the streaming method for the determination of the pzc of liquid gallium 215(1986)83

Gallium arsenide electrode

Photoelectrochemical and chemical corrosion inhibition of n-type GaAs in highly concentrated iodide solutions 209(1986)219

Frequency response analysis of photocurrent doubling. The reduction of oxygen at p-GaAs 209(1986)307

Experimental study of illumination effects on the cathodic current–voltage curve on n-GaAs 223 (1987)215

Hypochlorite reduction at GaAs: a multifaceted reaction 224(1987)211

On the role of chemical steps in the anodic dissolution of illuminated n-type GaAs electrodes 228(1987)77

On surface conductance measurements at the GaAs/electrolyte interface 228(1987)89

Flatband potential shift of n-type GaAs in CH_3CN containing different redox reagents 237 (1987)289

The electrochemistry of alkaline $K_3Cr(CN)_6$ solutions at p-GaAs 243(1988)161

Note on a theory of three-dimensional electrochemical nucleation with diffusion-controlled growth 247(1988)135

Gallium phosphide

In situ modification of the energetic structure of the n-GaP/NH_3 junction in the presence of solvated electrons 246(1988)29

Gallium phosphide electrode

A comparison of anodic charge-transfer kinetics between dark p-type and illuminated n-type GaP/$Fe(CN)_6^{4-}$ interfaces 221(1987)187

Galvani

Giornate della Elettrochimica Italiana 1986 (Bicentennial of Luigi Galvani's most famous experiments) 217(1987)221

Galvanic cell

The solvation potential at the interface between water and methanol + water mixtures 215(1986) 63

Galvanopotentiometry

Compensation for ohmic drop in the measurement of the potential difference at a liquid/liquid interface by the step current method 243(1988)81

Galvanostatic double-pulse method

The galvanostatic double-pulse method in the study of the kinetics of stepwise electrode processes involving the adsorption of intermediates 224(1987)67

Galvanostatic electrolysis

The evaluation of electrochemical reaction rate data using first order analytical models 248 (1988)1

Galvanostatic growth

Electrical and mechanical breakdown of anodic films on tungsten in aqueous electrolytes 248 (1988)99

Galvanostatic pulse

The double layer at the interface between two immiscible electrolyte solutions. Part III. Capacitance of the water/1,2-dichloroethane interface 225(1987)65

Gamma irradiation

Gamma-irradiated polymer-modified mercury film electrodes 222(1987)243

Gas-diffusion electrode

A novel application of gas-diffusion electrodes as electrochemical gas sensors 248(1988)69

Gas chromatography

Ultramicroelectrode sensors and detectors. Considerations of the stability, sensitivity, reproducibility, and mechanism of ion transport in gas phase chromatography and in high performance liquid phase chromatography 244 (1988)81

Gas electrode

Gas electrode reactions in molten carbonate media. Part I. Exchange current density of oxygen reduction in (Li + K)CO_3 eutectic at 650 °C 206 (1986)229

Gas electrode reactions in molten carbonate media. Part II. Oxygen reduction kinetics on conductive oxide electrodes in (Li + K)CO_3 eutectic at 650 °C 206(1986)241

Gas electrode reactions in molten carbonate media. Part III. Temperature dependence of oxygen reduction kinetics in (Li + K)CO_3 eutectic 209(1986)125

Gas sensor

A novel application of gas-diffusion electrodes as electrochemical gas sensors 248(1988)69

Gated ion channel

Molecular mechanisms of gated ion channels 212(1986)341

Gauss–Newton method

Determination of the individual electrochemical parameters from a composite single dc wave by the Gauss–Newton method 206(1986)81

Determination of the individual electrochemical parameters from a single composite dc wave by the Gauss–Newton method: dc wave composed of three waves 223(1987)79

Generation current

Electrochemical generation and recapture currents are linked by Hilbert transformation 218(1987)15

Gene transfer

Electroporative gene transfer (electrotransfection): a method for strain improvement of animal cells 231(1987)253

Germanium amalgam

Anodic oxidation of heterogeneous germanium amalgam 226(1987)331

Gibbs energy

Standard states and standard adsorption Gibbs energy of substances at electrode interfaces 216 (1987)21

The standard Gibbs energy of ion resolvation and non-linear dielectric effects 235(1987)23

Ion transfer across the immiscible water–*o*-nitrotoluene interface 237(1987)113

...vent interactions in acetylacetone. Part III. Gibbs energies of transfer of the chloride ion and its complex formation constants with other solvents 246(1988)207

Electrode processes in mixed solvents. Correlations between electrochemical rate constants and Gibbs energy of transfer 248 (1988)35

Glass electrode

Determination of activity coefficients in aqueous solutions of trichloroacetic acid from emf measurements at 25 °C 230(1987)77

Glassy carbon electrode

Influence of polishing and of electrochemical pretreatment on the performance of glassy-carbon electrodes in electrochemical detection 201(1986)11

A Laplace space rate/mechanism analysis of the two-electron chronoamperometric oxidation of *o*-dianisidine in sulfuric acid medium 202(1986)37

Potentiometric investigation of the kinetics of the polyaniline–oxygen reaction 202(1986)217

Stability and electrocatalytic activity of the oxo-bridged dimer $[(bpy)_2(H_2O)RuORu(OH_2)(bpy)_2]^{4+}$ in basic solutions 205(1986)185

Electrode reactions of nickel(II)–, copper(II)– and zinc(II)–8-quinolinethiolato complexes in *N*,*N*-dimethylformamide 205(1986)209

Electrochemical screening for electron acceptors: aromatic esters 207(1986)161

Electrodeposition of Pt ultramicroparticles in Nafion films on glassy carbon electrodes 208 (1986)373

On the kinetics of the cathodic deposition of aluminium on glassy carbon and tungsten electrodes from $AlCl_3 + NaCl + KCl$ melts 210 (1986)127

A phosphate-sensitive electrode based on $BiPO_4$-modified glassy carbon 214(1986)135

Electrocatalysis of dioxygen reduction in aqueous acid and base by multimolecular layer films of electropolymerized cobalt tetra(*o*-aminophenyl)porphyrin 217(1987)271

Relationship of two electroactive forms of horse heart cytochrome *c* at gold and glassy carbon electrodes in water and methanol 218(1987)251

Oxygen reduction on glassy carbon in 0.1 *M* HCl: RDE and XPS study 220(1987)161

A polynuclear mixed-valent ruthenium oxide/cyanoruthenate composite that yields thin coatings on a glassy carbon electrode with high catalytic activity toward methanol oxidation 220 (1987)295

Electrochemical dispersion of Pt microparticles on glassy carbon electrodes 223(1987)223

Electrochemical reactivity of biologically active quinone/hydroquinone sesquiterpenoids on glassy carbon electrodes 231(1987)567

Characteristics of a glassy carbon electrode modified in a mixture of osmium tetroxide and hexacyanoruthenate 233(1987)87

Electrochemistry of bipyridyl derivatives of cobalt in solutions of anionic and cationic micelles 233(1987)173

Adsorption and reduction of iron and cobalt phthalocyanines in DMSO at glassy carbon and pyrolytic graphite electrodes 234(1987)297

Clay modified electrodes. Part VIII. Electrochemical behavior at montmorillonite and polypyrrole–montmorillonite films on platinum and glassy carbon electrodes 234(1987)347

Electrochemical reduction of bromonitriles: Mechanism and polarographic maxima 235 (1987)209

Attempts to accelerate the rates of oxidation of ruthenium and osmium tetramethylcyclam complexes at graphite and glassy carbon electrodes and within Nafion coatings 237(1987) 69

Electrochemical study of poly(PHAS) in acetonitrile and water + acetonitrile electrolytes 238(1987)183

Electrochemistry of organic acceptor compounds: aromatic anhydrides 238(1987)215

A method of obtaining a small number of nucleation sites and growing large crystal grains 239(1988)107

Electrochemistry of quinizarine adsorbed on a glassy carbon electrode in aqueous solutions 239 (1988)209

Quantitative analytical assay of small amounts of technetium by stripping chronopotentiometry at a glassy carbon electrode 241(1988)125

Electrodes coated with polystyrene films containing surface-active agents. Attachment of screening capabilities for electrode reactions of electroactive ionic species 242(1988)143

Surface modifications with heteropoly and isopoly oxometalates. Part II. Electrocatalytic behaviour of glassy carbon surfaces modified with 17-tungsto, 1-molybdo-diphosphate 243 (1988)105

Synthesis and properties of film electrodes from *N*-substituted carbazoles in acid medium 246 (1988)87

A voltammetric study of asymmetric viologens in an organic solvent, an aqueous solution and in vesicle systems 246(1988)337

A pyrolytic carbon film electrode for voltammetry. Part V. Characterization and comparison with the glassy carbon electrode by electrochemical pretreatment in basic solution 248(1988)283

Studies of surface-modified glassy carbon electrodes obtained by electrochemical treatment. Its effect on $Ru(bpy)_3^{2+}$ adsorption and the electron-transfer rates of the Fe^{3+}/Fe^{3+} couple 248(1988)321

The effect of pulsed laser irradiation on the properties of glassy carbon electrodes 250(1988) 173

Global analysis

Global analysis of kinetic current in dc polarography. Application to pyridine-4-aldehyde reduction 243(1988)309

Glucose

The electrochemistry of hexacyanoruthenate at carbon electrodes and the use of ruthenium compounds as mediators in the glucose/glucose oxidase system 206(1986)327

The influence of glucose and electrolyte composition on the voltammetric response and open-circuit potential decay of bright polycrystalline gold electrodes 212(1986)213

Cyclic voltammetric study of glucose oxidation on an oxide-covered platinum electrode in the presence of an underpotential-deposited thallium layer 231(1987)59

Structural effects in electrocatalysis. Oxidation of D-glucose on Pt (100), (110) and (111) single crystal electrodes and the effect of upd adlayers of Pb, Tl and Bi 242(1988)221

Electrocatalytic oxidation of glucose at platinum in alkaline medium: on the role of temperature 246(1988)349

Glucose electrode

Automatic on-line measurement of substrates in fermentation liquids with enzyme electrodes 231 (1987)399

Glucose oxidase

The electrochemistry of hexacyanoruthenate at carbon electrodes and the use of ruthenium compounds as mediators in the glucose/glucose oxidase system 206(1986)327

Electrochemical immobilisation of enzymes. Part II. Glucose oxidase immobilised in poly-*N*-methylpyrrole 224(1987)37

Glucose oxidation

A cyclic-voltammetric study of glucose oxidation on a gold electrode 211(1986)157

Catalytic influence of underpotential-deposited submonolayers of heavy metals on D-glucose oxidation on various noble metal electrodes in alkaline media 237(1987)93

Glutamate dehydrogenase

Electrode process of glutamate dehydrogenase in differential pulse polarography 211(1986)329

Glutamic acid

Polarographic study of poly(α-D-glutamic acid) in acid solutions 212(1986)193

Glutathione

Bioelectrochemical approach to the role of glutathione in strong ethanol ingestion 212 (1986)333

The effects of physical exercise on the antioxidative capacity of the liver 232(1987)231

Mediators for the oxidation of glutathione and other biological thiols 245(1988)131

Glutathione disulphide

The effects of physical exercise on the antioxidative capacity of the liver 232(1987)231

Glutathione peroxidase

Induction of selenium-glutathione peroxidase by stimulation of metabolic hydrogen peroxide production *in vivo* 232(1987)247

Glyceraldehyde

Monosaccharide autoxidation: a potential source of oxidative stress in diabetes? Model reactions with nucleotides and protein 232(1987)283

Glycoprotein sheath

Microelectrophoresis and fluorescence studies of the glycoprotein sheath covering the outer membrane surface in murine neuroblastoma cells 231(1987)429

Glycoside elimination

Electrochemical study of the mechanism and kinetics of reductive glycoside elimination of adriamycin adsorbed on a mercury electrode surface 225(1987)187

Glycylglycine

Adsorption and anodic oxidation of glycylglycine and some amino acids on a gold electrode 202(1986)147

Glyoxylic acid oxidation

Electrocatalysis by ad-atoms. Part XIX. Geometrical requirement in the oxygen donation step in glyoxylic acid oxidation enhanced by ad-atoms 202(1986)137

Gold

A modification of the last step of surface preparation for gold and silver single crystal faces 220(1987)155

The temperature dependence of the double-layer properties of gold faces in perchloric acid solutions. Part I. The (210) gold face 229(1987) 107

Study of gold low index faces in KPF_6 solutions. Part I. Experimental behaviour and determination of the points of zero charge 234 (1987)93

Study of gold low-index faces in KPF_6 solutions. Part II. Analysis of the experimental results 236 (1987)267

The temperature dependence of the double-layer properties of gold faces in perchloric acid solutions. Part II. The (110) gold face 236(1987) 283

Gold amalgam electrode

Kinetics of the outer-sphere electrochemical reduction of chlorophyll adsorbed on a metal electrode. Reorganization of the solvent 204 (1986)69

Gold contact

The role of oxygen ion diffusion in the electrode reactions of β'' alumina 244(1988)123

Gold / dimethylsulphoxide interface

The influence of the crystallographic orientation on the double layer parameters of the Au/dimethylsulphoxide interface 241(1988)373

Gold electrode

Infrared spectra of carbon monoxide adsorbed on a smooth gold electrode. Part I. EMIRS spectra in acid and alkaline solutions 201(1986) 175

On the adsorption of aliphatic alcohols on gold. Part II 201(1986)387

Adsorption and anodic oxidation of glycylglycine and some amino acids on a gold electrode 202(1986)147

The determination, by ellipsometry, of the mode of adsorption on gold of some promoters of redox-protein direct electrochemistry 202(1986) 303

Surface-enhanced Raman scattering of nicotinamide adenine dinucleotide (NAD^+) adsorbed on silver and gold electrodes 202 (1986)315

Study of the electrooxidation of n-propanol on an Au electrode in basic medium 206(1986)179

Gas electrode reactions in molten carbonate media. Part I. Exchange current density of oxygen reduction in (Li + K)CO_3 eutectic at 650 °C 206 (1986)229

Electrochemical behavior of horse heart cytochrome *c* in acid solutions using a 6-mercaptopurine-modified gold electrode 206 (1986)341

Adsorption of pyridine at the polycrystalline gold–solution interface 207(1986)213

Electroreflectance spectroscopy of gold single crystals. Influence of the solvent 207(1986)235

Infrared spectra of carbon monoxide adsorbed on a smooth gold electrode. Part II. EMIRS and polarization-modulated IRRAS study of the adsorbed CO layer in acidic and alkaline solutions 207(1986)293

Intra-molecular hydrogen bonding in surface-modified gold electrodes and the effect of specific anions on the electrochemistry of cytochrome *c* 208(1986)395

Metal substrate effects upon the kinetics of simple electrochemical reactions. The reduction of cobalt(III) ammines at single-crystal gold faces 209(1986)109

Surface structural changes during oxidation of gold electrodes in aqueous media as detected using surface-enhanced Raman spectroscopy 209(1986)377

Possible importance of adions in both the binding of Lewis bases and the electrocatalytic oxidation of dissolved organics at gold electrodes in aqueous media 210(1986)69

Note on the behaviour of the (111) gold face in electrolytic solutions 210(1986)303

A cyclic-voltammetric study of glucose oxidation on a gold electrode 211(1986)157

The influence of glucose and electrolyte composition on the voltammetric response and open-circuit potential decay of bright polycrystalline gold electrodes 212(1986)213

Determination of mercury in sea water by stripping voltammetry 214(1986)31

Electrochemical faceting of polycrystalline gold in 1 *M* H_2SO_4 215(1986)317

A UPS, XPS and work function study of emersed silver, platinum and gold electrodes 215(1986)331

An investigation of the sulphur(−II)/sulphur(0) system on gold electrodes 216(1987)213

Direct electrochemistry of bacterial cytochrome c_{551} at surface-modified gold electrodes 217 (1987)129

Surface substitution reactions at modified gold electrodes and their effect on the electrochemistry of horse heart cytochrome *c* 217(1987)141

Extending the metal interface generality of surface-enhanced Raman spectroscopy: underpotential deposited layers of mercury, thallium, and lead on gold electrodes 217(1987) 367

Relationship of two electroactive forms of horse heart cytochrome *c* at gold and glassy carbon electrodes in water and methanol 218(1987)251

Supramolecular phenomena in organic redox films at electrodes. Part II. The methylene blue/leucomethylene blue redox couple at the gold electrode 219(1987)183

Organized self-assembling monolayers on electrodes. Part I. Octadecyl derivatives on gold 219(1987)365

Nucleation and growth of polythiophene films on gold electrodes 220(1987)351

Two distinct surface conditions of a gold electrode from the viewpoint of the reduction of nitrobenzene in aqueous alkaline solution 221 (1987)245

Dependence of the kinetics of proton reduction at gold electrodes on the surface crystallographic orientation 223(1987)171

Influence of electrochemical activation of an Au electrode on its electrocatalytical activity in relation to the oxidation of methanol in basic medium 223(1987)277

Redox and electrocatalytic properties of cobalt–bipyridyl–polypyrrole film electrodes 224(1987)95

Raman spectroscopic investigation of aniline: adsorption and polymerisation 224(1987)253

Electrochemical study of the polycrystalline gold electrode in dimethylsulphoxide 226(1987)295

Photoelectron emission from poly- and single-crystalline platinum and gold electrodes using pulsed ultraviolet laser irradiation 228(1987)283

Charge transfer reaction inverse photoemission spectroscopy (CTRIPS). Part II. Electrode specificity 228(1987)293

Elementary steps of electrochemical oxidation of single-crystal planes of Au. Part II. A chemical and structural basis of oxidation of the (111) plane 228(1987)429

The structure of H_2SO_4 monolayers on Au (111) 229(1987)99

The double layer of single crystal gold electrodes in liquid and solid $HClO_4 \cdot 5.5\ H_2O$ 230(1987)281

A spectroelectrochemical study of carboxymethylated cytochrome-*c* 231(1987)27

Electrochemical and chemical reductions of oxygen dissolved in aqueous solutions 232(1987) 13

Organic monolayer formation at a sulphur modified gold electrode. The methylene blue/leucomethylene blue redox couple 233 (1987)199

Surface-enhanced Raman scattering at gold electrodes: dependence on electrochemical pretreatment conditions and comparisons with silver 233(1987)211

Determination of the surface area of gold electrodes by iodine chemisorption 233(1987)283

Redox mediation involving oxide films as examined by surface-enhanced Raman spectroscopy: peroxodisulfate reduction at oxide-modified gold electrodes 234(1987)237

"In situ" spectroelectrochemical studies of *N,N'*-dibenzyl and *N,N'*-diheptyl viologen radicals adsorbed on metallic (Pt, Au) electrodes 234(1987)329

Direct electrochemistry of native and 4-chloro-3,5-dinitrophenyl (CDNP)-substituted cytochrome *c* at surface-modified gold and pyrolytic graphite electrodes 235(1987)153

On the electrocatalytic oxidation of methanol vapors at Au–Nafion electrodes 235(1987)393

Oxygen photoelectroreduction on hydrogen phthalocyanine films in alkaline solutions 237 (1987)39

Reduction of carbon dioxide on partially-immersed Au plate electrode and Au–SPE electrode 238(1987)247

Adsorption of pyridine at the Au (100)–solution interface 238(1987)333

Underpotential metal deposition on gold, monitored in situ with a quartz microbalance 239(1988)321

Spectroscopic investigation of electrochemically active compounds. SERS of nitrobenzene, sulfide, ethylene and hydroquinone on Au 239(1988)361

Scanning tunneling microscopy (STM) and scanning electron microscopy (SEM) of electrodispersed gold electrodes 240(1988)77

Oxygen reduction on the Au (311) electrode surface in alkaline electrolyte 240(1988)239

Adsorption of dicarboxylic ions on the (210) gold face from solutions at constant cationic strength 240(1988)291

Reversible redox, hydrodesulfurization and anodic oxidation of chemisorbed thiophenols. A comparison at platinum and gold electrodes 241 (1988)199

A study of the electrosorption of bromide and iodide ions on gold using the quartz crystal microbalance 243(1988)343

An in situ surface Fourier transform infrared study of complexes of lithium, magnesium, potassium and lanthanum ferrocyanide at platinum and gold electrodes 244(1988)301

Partial charge transfer in the underpotential deposition of metals. Part II. Mercury deposition on polycrystalline gold electrodes 245(1988)21

IR reflectance studies of electron transfer promoters for cytochrome *c* on a gold electrode 245(1988)275

Electrochemical synthesis and properties of polycarbazole films in protic acid media 246 (1988)73

Synthesis and properties of film electrodes from *N*-substituted carbazoles in acid medium 246 (1988)87

Incorporation of *N*-octadecyl-4-pyridinium-4′-pyridyl bromide or *N*-octadecyl-4,4′-bipyridinium dibromide into self-assembled hexadecylmercaptan monolayers on gold electrodes 246(1988)217

In-situ X-ray diffraction investigations of the UPD of Tl and Pb on Ag and Au electrodes 247(1988)297

Study of the electrooxidation of 1,2-propanediol on an Au electrode in basic medium 248(1988)193

Adsorption of dicarboxylic ions on the (311) face of gold from solutions at constant cationic strength 248(1988)209

Adsorption of dimethylsulphoxide on the polycrystalline gold electrode from aqueous solutions 248(1988)399

An in-situ scanning tunneling microscopy study of Au (111) with atomic scale resolution 248 (1988)451

Surface electrochemistry of the anodic N_2 generation reaction at Pt and Au, and the discovery of cathodic N_2 evolution 249(1988)217

Oxide formation on gold single crystal stepped surfaces 249(1988)291

Self-assembled surfactant monolayers on electrode surfaces. The formation of surfactant viologen monolayers on gold and platinum 249 (1988)333

The adsorption of aniline on gold: a SERS study 250(1988)143

The interaction of CO_2 with gold electrodes in acid electrolyte followed through voltammetry 250(1988)183

Electrochemical behavior of cytochrome *c* at a gold electrode modified by various (Cu, Sn, As, Sb, Bi, S and Se) ad-atoms 250(1988)201

Determination of experimental parameters in the Fe(III)/Fe(II) system in 1 *M* H_2SO_4, with a polycrystalline gold electrode, taking advantage of its non-linear behaviour 250(1988)321

Electro-oxidation of thiosulphate ion on gold. Study by means of cyclic voltammetry and Auger electron spectroscopy 250(1988)443

Gold film

The electroreduction of dioxygen on thin films of gold in alkaline solution 234(1987)193

Electrochemical and spectroscopic characterization of a gold plated reticulated vitreous carbon thin-layer electrode 248(1988)341

Gouy–Chapman–Stern–Grahame model

Application of the Gouy–Chapman–Stern–Grahame model of the electrical double layer to the determination of single ion activities of KF aqueous solutions 226(1987)341

Grahame–Parsons model

Criteria of choice of adsorption parameters in the Grahame–Parsons model. Cesium adsorption on bismuth 209(1986)233

Granular metal growth

A method of obtaining a small number of nucleation sites and growing large crystal grains 239(1988)107

Graphite

Studies of the process of catalytic hydrogen evolution on the epoxy-resin-impregnated graphite-based mercury film electrode 213(1986) 127

Electrode kinetics of metal complexes confined in electropolymerized poly(*N*,*N*-dialkyl substituted aniline) films on graphite surfaces 215(1986)191

Electrochemical studies of magnesium ions in magnesium chloride containing chloride melt at 710 ± 10 °C 249(1988)191

Graphite electrode

The electrical double layer of carbon and graphite electrodes. Part III. Charge and dimensional changes at wide potential range 206(1986)101

A mechanistic study of the electro-oxidation of hydrazine on phthalocyanines of VO, Cr, Mn, Ni, Cu and Zn attached to graphite electrodes 210(1986)95

Electrochemical regulation of immobilized alkaline phosphatase activity 212(1986)205

Electrode kinetics of electroactive electropolymerized polymers deposited on graphite electrode surfaces 217(1987)239

Metal ions and complexes as modulators of protein–interfacial electron transport at graphite electrodes 217(1987)331

The cathodic decomposition of propylene carbonate in lithium batteries 219(1987)273

Redox behaviour of the dicobalt cofacial porphyrin Co_2FTF4 and related complexes adsorbed on graphite electrodes 220(1987)247

Electrochemical oxidation of 6,8-dioxypurine 223(1987)143

The electrical double layer of carbon and graphite electrodes. Part IV. Dependence of carbon electrode dimensions and electrical capacity on pH 227(1987)41

Attempts to accelerate the rates of oxidation of ruthenium and osmium tetramethylcyclam complexes at graphite and glassy carbon electrodes and within Nafion coatings 237(1987) 69

Electroreduction of O_2 catalyzed by vitamin B_{12} adsorbed on a graphite electrode 237(1987)145

An in-situ FTIR study of the electroreduction of CO_2 by CoPc-coated edge graphite electrodes 241(1988)361

Graphite paste electrode

The adsorption of RNAse *A*, BSA and cytochrome *c* at the graphite powder|liquid interface using in parallel the adsorption isotherm plot and linear sweep voltammetry on graphite paste electrode 211(1986)103

Characterization and rapid evaluation of electrochemically oxidizable components in normal and pathological urine 232(1987)137

Graphite powder suspension

Electrochemical polarization of activated carbon and graphite powder suspensions. Part II. Exchange of ions between electrolyte and pores 214(1986)295

Green function

Many-body effects in electrochemisorption. Part I. Green function–superoperator formalism 229 (1987)51

Green plant

In vitro photoelectrochemical model of the *Z* scheme in green plant photosynthesis 231(1987) 325

Group five element

Electrocatalysis by ad-atoms. Part XXIII. Design of platinum ad-electrodes for formic acid fuel cells with ad-atoms of the IVth and the Vth groups 250(1988)117

Group four element

Electrocatalysis by ad-atoms. Part XXIII. Design of platinum ad-electrodes for formic acid fuel cells with ad-atoms of the IVth and the Vth groups 250(1988)117

Group two ion

An electrochemical investigation of the interaction between the superoxide ion and cations of group 2a in aqueous solutions 246 (1988)155

Growth mechanism

Considerations of the spatial pattern of the 2D growth centres formed via time-dependent nucleation and growth mechanisms 209(1986)35

Statistical fluctuations in two-dimensional nucleation and growth processes 213(1986)17

Growth mechanism in the electropolymerization of aniline and *p*-aminodiphenylamine 215(1986) 401

Nucleation and growth of polythiophene films on gold electrodes 220(1987)351

AES depth profiling of electrochemically grown γ-FeOOH 246(1988)53

Guanine oligonucleoside

Electrochemical oxidation of guanosine. Formation of some novel guanine oligonucleosides 224(1987)137

Guanosine

The interfacial behaviour of guanosine mono-, di- and triphosphate in solutions of varying pH at charged interfaces 212(1986)497

Electrochemical oxidation of guanosine. Formation of some novel guanine oligonucleosides 224(1987)137

Guthion

Electroanalytical study of the pesticide Guthion 244(1988)221

H

Haar transform

Application of the fast Walsh–Hadamard transform and the fast Haar transform for electrochemical impedance measurements based on a periodic square-wave perturbation signal derived from Walsh functions 222(1987)367

Haeme model complex

Electrochemical behaviour of a heme model complex in aqueous solution 235(1987)179

Haemoglobin

A potentiometric study on the redox properties of hemoglobin from *Camelus dromedarius* 211 (1986)521

Brdička-type catalytic currents of hemoglobins. Part III. pH dependence of the catalytic current — an indication of quaternary structure changes? 231(1987)71

Surface free energy as the potential in oligomeric equilibria: prediction of hemoglobin disaggregation constant 231(1987)349

Lipid hydroperoxides in sickle cell membranes 232(1987)257

Half-wave potential

Linear sweep voltammetry at channel electrodes 206(1986)57

On the electroreduction mechanism of halobenzenes. Part I. A quantum chemical approach 219(1987)197

Linear relationships between ligand composition and reversible half-wave potentials of ruthenium(III) and ruthenium(II) complexes with two kinds of β-diketones 246(1988)225

Halide ion

Structure and composition of the Ag (111) surface as a function of electrode potential in aqueous halide solutions 229(1987)1

Halobacterium

Charge motion inside the bacteriorhodopsin molecule 211(1986)437

Halobenzene derivative

On the electroreduction mechanism of halobenzenes. Part I. A quantum chemical approach 219(1987)197

Halogen

Sorption from the gaseous phase in stripping voltammetry of halogens 224(1987)303

Halogen ion

Electrical breakdown and pitting in anodic films on tungsten in halogen ion-containing solutions 248(1988)117

Hamiltonian

Dynamics of adiabatic electron transfer reactions at metal electrodes 230(1987)43

Hanging mercury drop electrode

The growth of compact layers at the electrode interface. Part I. Complexes of cobalt, nickel and iron with 2,2′-bipyridine and 2,2′,2″-terpyridine in aqueous sodium perchlorate 206(1986)269

Stripping voltammetry with adsorptive accumulation for trace measurements of titanium 208(1986)383

Adsorption of Tl(I) on mercury in azide media 209(1986)361

Trace measurements of tetracyclines using adsorptive stripping voltammetry 211(1986)147

A study on the mechanism of the electrochemical reduction of the cobalt–dimethylglyoxime system in NH_3/NH_4Cl 216(1987)181

Determination of Captopril using adsorptive cathodic differential pulse stripping voltammetry with the HMDE 230(1987)99

Voltammetric maxima of the third kind from reactant adsorption at the HMDE 235(1987)343

Cathodic stripping voltammetry of 2-thioorotic acid at the hanging mercury drop electrode 237 (1987)105

Direct and alternating current voltammetry at an HMDE in solutions containing activated charcoal suspension 239(1988)91

Chemical and electrochemical equilibria and kinetics in aqueous Cr(III)/Cr(II) chloride solutions 244(1988)179

Square-wave voltammetry of an adsorbed reactant 248(1988)239

Hartree–Fock approach

Quantum chemical calculations on the electrical double layer at the metal/vacuum interface. Part I. Hartree–Fock cluster descriptions 208(1986) 243

Quantum chemical calculations on the electrical double layer at the metal/vacuum interface. Part II. Properties of single crystal surfaces 208 (1986)257

Many-body effects in electrochemisorption. Part III. Beyond mean field and Hartree–Fock 230 (1987)1

H/D isotope effect

H/D isotope effect on outer sphere electron exchange 204(1986)21

Heavy charged particle

Quantum transition state theory: transport of a heavy charged particle 204(1986)85

Heavy metal

Catalytic influence of underpotential-deposited submonolayers of heavy metals on D-glucose oxidation on various noble metal electrodes in alkaline media 237(1987)93

Underpotential metal deposition on gold, monitored in situ with a quartz microbalance 239(1988)321

Structural effects in electrocatalysis. Oxidation of D-glucose on Pt (100), (110) and (111) single crystal electrodes and the effect of upd adlayers of Pb, Tl and Bi 242(1988)221

Amalgam voltammetric approach to heavy metal speciation in natural waters. Part I. Theoretical aspects and methodology 246(1988)15

Heavy metal ion

An iridium based mercury film electrode. Part II. Comparison of mercury-film electrode behaviors: theory versus reality 239(1988)113

Helmholtz formula

The model of two parallel condensers and the application of the Helmholtz formula to adsorption of polar surfactants from aqueous solutions 201(1986)247

Helmholtz potential

Orbital-energy-resolved partial charge transfer in chemisorption and electrochemical processes on semiconductors 250(1988)37

Hemicylinder electrode

Electrochemical kinetics at microelectrodes. Part III. Equivalency between band and hemicylinder electrodes 225(1987)33

Hemispherical electrode

Theory of stationary current–potential curves at microdisk electrodes for quasi-reversible and totally irreversible electrode reactions 235(1987) 87

Hemispherical nucleus

Voltammetric response for the diffusion-controlled electrodeposition onto growing hemispherical nuclei 243(1988)57

Hepatocyte

Electric-field-induced morphological alterations and fusion of hepatocytes 231(1987)9

Heteroassociation

Effect of C(5) methylation on self- and heteroassociation of cytidine in aqueous solution 212(1986)449

Heterocyclic compound

The electrosorption valency of organic electrosorbates. Part II. Aromatic and heterocyclic compounds 229(1987)141

Heterogeneous equivalent approach

Electroanalytical investigations. Part VII. The simulation of fast chemical equilibrium reactions in cyclic voltammetric reaction–diffusion models with a combination of the heterogeneous equivalent technique and orthogonal collocation 235(1987)57

Heteropolyacid

New aspects of the electrochemistry of heteropolyacids. Part II. Coupled electron and proton transfers in the reduction of silicotungstic species 217(1987)287

New aspects of the electrochemistry of heteropolyacids. Part IV. Acidity dependent cyclic voltammetric behaviour of phosphotungstic and silicotungstic heteropolyanions in water and *N,N*-dimethylformamide 227(1987)77

New aspects of the electrochemistry of heteropolyacids. Part III. Further proof of minimal solvation and ion pairing of silicotungstic and phosphotungstic species in acidic concentrated aqueous solutions of alkali-metal salts 230(1987)267

Heteropolyanion

New aspects of the electrochemistry of heteropolyacids. Reduction currents as a probe of solvent–electrolyte interactions 208(1986)343

Activation of electrode surfaces by isopolytungstates 223(1987)287

Electrocatalysis by electrodeposited heteropolyanions and isopolyanions 227(1987) 265

Activation of electrode surfaces. Semiquantitative characterization of electrode surfaces modified with heteropolyanions 230(1987)85

Heteropoly oxometalate

Surface modifications with heteropoly and isopoly oxometalates. Part I. Qualitative aspects of the activation of electrode surfaces towards the hydrogen evolution reaction 243(1988)87

Surface modifications with heteropoly and isopoly oxometalates. Part II. Electrocatalytic behaviour of glassy carbon surfaces modified with 17-tungsto, 1-molybdo-diphosphate 243 (1988)105

Surface modifications with heteropoly and isopoly oxometalates. Part III. Electrode modification procedures. The necessity of proton interference during the electrodeposition of the h.e.r. catalysts 247(1988)157

Hexachloroacetone

Selective electrocatalytic reduction of hexachloroacetone on a viologen polymer modified electrode in aqueous media 245(1988) 313

Hexachloroiridate ion

Hexachloroiridate(III/IV) on polymer-coated electrodes. Investigation of the membrane permeability and the charge-transport mechanism 229(1987)239

Chronocoulometric and rotating disc electrode determination of the charge propagation current through poly-4-vinylpyridine films containing hexachloroiridate anions 250(1988)341

Hexachloroplatinate ion

The problem of light-induced oxygen production at catalyst-loaded CdS suspensions 228(1987)45

Hexacyanochromate ion

The electrochemistry of alkaline $K_3Cr(CN)_6$ solutions at p-GaAs 243(1988)161

Hexacyanoferrate ion

Electronic and solvent electron-transfer rate parameters from charge-transfer spectroscopy of betaine-1 and the $[Fe(CN)_6]^{4-}$ · dimethyl viologen ion pair 204(1986)45

The role of ionic transference in polymer-modified electrodes 206(1986)93

Geometric influences on the spontaneous passivation of copper in alkaline hexacyanoferrate(III) solutions under conditions of free convection 213(1986)75

Electrocatalytic oxidation of cytochrome-c at a quaternized poly-4-vinylchloride/ferricyanide modified gold surface 215(1986)385

Membrane transport associated with double-layer charging of polymer modified electrodes 216 (1987)241

Polymer-modified electrodes. Part V. The use of hydrodynamically modulated rotating-disk electrodes in the study of the mediated oxidation of $[Fe(CN)_6]^{4-}$ at ruthenium-containing polymer-modified electrodes 218(1987)341

A comparison of anodic charge-transfer kinetics between dark p-type and illuminated n-type GaP/$Fe(CN)_6^{4-}$ interfaces 221(1987)187

A search for conditions permitting model behavior of the $Fe(CN)_6^{3-/4-}$ system 226(1987) 305

A study of the passive film on iron by intensity modulated photocurrent spectroscopy 228(1987) 351

Adsorption of ferricyanide at Pt (111) as a function of electrode potential studied by Auger spectroscopy 234(1987)229

Ac-impedance studies of carbon electrodes coated with poly-4-vinylpyridine films containing the $Fe(CN)_6^{3-/4-}$ redox couple 235(1987)169

Structurally heterogeneous electrode films of acrylamide/vinylpyridine gels. Dynamics of ferricyanide mediated electrooxidation of ascorbic acid and their dependence on the electrode film structure and composition 236 (1987)113

Electron transfer between immiscible solutions. The hexacyanoferrate–lutetium biphthalocyanine system 244(1988)27

An in situ surface Fourier transform infrared study of complexes of lithium, magnesium, potassium and lanthanum ferrocyanide at platinum and gold electrodes 244(1988)301

Electrochemical and FTIR spectroscopic characterization of ferrocyanide-modified TiO_2 electrodes designed for efficient photosensitization 246(1988)411

Electrochemically controlled binding and release of salicylate, $TCNQ^{-}$ and ferrocyanide from films of oligomeric 3-methoxythiophene 247 (1988)173

The role of phase transfer catalysts in two phase redox reactions 247(1988)203

Laser-induced temperature-jump coulostatics for the investigation of heterogeneous rate processes. Theory and application 248(1988)255

Electrochemical and spectroscopic characterization of a gold plated reticulated vitreous carbon thin-layer electrode 248(1988)341

Chemical modification of GaPc–Cl thin film photoelectrodes 248(1988)349

Effects of the solution pH on the electrochemical behaviour of $Ru(bpy)_3^{2+}$ and $Fe(CN)_6^{3-}$ ions at a clay-modified electrode 249(1988)133

The effect of pulsed laser irradiation on the properties of glassy carbon electrodes 250(1988) 173

Hexacyanoruthenate ion

Characteristics of a glassy carbon electrode modified in a mixture of osmium tetroxide and hexacyanoruthenate 233(1987)87

Hexadecylmercaptan

Incorporation of *N*-octadecyl-4-pyridinium-4′-pyridyl bromide or *N*-octadecyl-4,4′-bipyridinium dibromide into self-assembled hexadecylmercaptan monolayers on gold electrodes 246(1988)217

Hexafluoroacetone

Determination of trace water in propylene carbonate using hexafluoroacetone 234(1987)107

Hexafluorophosphate

Adsorption on well-defined solid surfaces. Chloride adsorption on a (110) face of silver 204(1986)291

Hexahydroxyplatinate ion

Electrochemisorption of hexahydroxyplatinate(IV) on thin titania films 228(1987)471

Hexamethyldisilazane

Surface methoxylation as the key factor for the good performance of n-Si_2/methanol photoelectrochemical cells 233(1987)37

Hexamethylenediamine

In-situ investigation of the film growth mechanism using multiple internal reflection Fourier transform infrared spectroscopy (MIRFTIRS). Part II. Behaviour of iron and platinum electrodes in the presence of hexamethylenediamine in alkaline methanolic solutions 210(1986)295

Hexamethylphosphoramide

Rate constants of the electrode reactions of some quinones in hexamethylphosphoramide solutions at mercury electrodes 201(1986)205

Hexamethylphosphortriamide

Electrochemical behavior of the Eu(III/II)–EDTA system on a mercury electrode in water + dimethylsulphoxide (DMSO), water + acetonitrile (AN) and water + hexamethylphosphortriamide (HMPT) mixtures 226(1987)315

Hexylamine

Electrochemical behaviour of pyridoxal-5′-phosphate Schiff base with *n*-hexylamine 212 (1986)317

High performance liquid chromatography

An electroanalytical approach to the determination of lipid peroxides 232(1987)127

Ultramicroelectrode sensors and detectors. Considerations of the stability, sensitivity, reproducibility, and mechanism of ion transport in gas phase chromatography and in high performance liquid phase chromatography 244 (1988)81

Hilbert transformation

Electrochemical generation and recapture currents are linked by Hilbert transformation 218(1987)15

Hole injection step

A study of the mechanisms of O_2 reduction at n- and p-InP in acid aqueous electrolyte 247(1988) 265

Hollow surface

Voltammetry at geometrically uneven electrodes. Part I. Chronoamperometry at model electrodes with rectangular hollow or protrusive surfaces 246(1988)1

Homogeneous redox catalysis

Homogeneous redox catalysis of electrochemical reactions. Electron transfers followed by a very fast chemical step 205(1986)43

Hopscotch algorithm

Hopscotch-finite-difference simulation of the rotating ring–disc electrode 215(1986)11

Electrochemical kinetics at microelectrodes. Part II. Cyclic voltammetry at band electrodes 215 (1986)49

Propagational inadequacy of the Hopscotch finite difference algorithm: the enhancement of performance when used with an exponentially expanding grid for simulation of electrochemical diffusion problems 222(1987)101

Human serum albumin

Polarographic analysis of human serum albumin–benzodiazepine interactions 231(1987) 535

The application of adsorptive stripping voltammetry for a study of the reaction of human serum albumin with anti-human serum albumin 235(1987)317

Humid atmosphere

Calibration of the Kelvin vibrator for measurements of electronic work functions in a humid atmosphere 243(1988)337

Hybridization

The photovoltaic effect of an insulating polymer-hybridized p-Si solar cell 241(1988)379

Hydrated electron

Photocurrents due to the capture of dry and hydrated electrons by nucleic acid molecules 226(1987)171

Hydrated surface

A model for anodic hydrous oxide growth at iridium 220(1987)83

Hydration

On the non-local electrostatic theory of hydration force 204(1986)79

Hydration–dehydration of the electroactive group on the electrochemical behaviour of pyridoxal-5′-phosphate 212(1986)325

Hydration–dehydration equilibrium

Polarographic reduction of aldehydes and ketones. Part XXX. Effects of acid–base, hydration–dehydration and keto–enol equilibria on reduction of α-ketoglutaric and oxalacetic acid and their esters 226(1987)69

Hydrazine

A mechanistic study of the electro-oxidation of hydrazine on phthalocyanines of VO, Cr, Mn, Ni, Cu and Zn attached to graphite electrodes 210(1986)95

Hydrazone

Electrochemical oxidation of ethyl 3-oxo-3-phenyl-2-phenylhydrazonopropionate 220(1987) 311

Hydride interceptor

Cyclohexanone as an effective hydride interceptor at platinum electrodes in non-aqueous media. Characterization via effects on the electrogenerated chemiluminescence of 9,10-diphenylanthracene 242(1988)123

Hydrodesulphurization

Reversible redox, hydrodesulfurization and anodic oxidation of chemisorbed thiophenols. A comparison at platinum and gold electrodes 241 (1988)199

Hydrodimerization

Ultramicroelectrodes for the study of the mechanism of electrosynthetic reactions. The hydrodimerisation of acrylonitrile 248(1988)229

Hydrodynamic analysis

On the drop time of a dropping electrode and on the bubble time of a bubble electrode 235(1987) 107

Hydrodynamic effect

Hydrodynamic effects of surfactants on the macromorphology of electrodeposited zinc and flow visualization. The flow-field throw 243 (1988)21

Hydrodynamic electrode

Channel and tubular electrodes 205(1986)1

Hydrodynamic voltammetry

Theory of stationary current–voltage curves of redox-electrode reactions in hydrodynamic voltammetry. Part XI. Wall–jet electrodes 206 (1986)37

Hydrodynamic voltammetry at channel electrodes. Part VIII. Theory of reversible voltammograms for chronoamperometry and linear sweep voltammetry 209(1986)247

Hydrodynamic voltammetry at channel electrodes. Part IX. Edge effects at rectangular channel flow microelectrodes 217(1987)33

Hydrodynamic voltammetry at an interdigitated electrode array in a flow channel. Part II. Chemical reaction succeeding electron transfer 247(1988)1

Hydrogen

Photointercalation of hydrogen in p-type tungsten diselenide 209(1986)395

Direct proof of the hydrogen in the methanol adsorbate at platinum — an ECTDMS study 229(1987)377

The relationship between the underpotential deposition of zinc and the penetration of hydrogen in ARMCO–iron substrates 248(1988) 421

Hydrogen adsorption

Structural effects in electrocatalysis: oxidation of formic acid and hydrogen adsorption on platinum single-crystal stepped surfaces 204(1986)329

Mixed pseudo-potential approach to the on-top chemisorption of atomic hydrogen on the (100) silver surface 216(1987)29

A coupled voltammetric and radiometric (voltradiometric) study of the simultaneous adsorption of hydrogen and anions at platinized platinum electrodes 218(1987)337

Quantitative analysis of the distribution of the hydrogen adsorption states at platinum surfaces. Part I. Application to Pt (100) in sulphuric acid medium 225(1987)205

Quantitative analysis of the distribution of the hydrogen adsorption states at platinum surfaces. Part II. Application to Pt (110), stepped and polyoriented platinum surfaces in sulphuric acid medium 233(1987)251

Electrochemistry of sub-monolayer silver deposits on single crystal RuO_2 (110), (001) and (111) electrodes 236(1987)295

Ab initio cluster model approach to the chemisorption of hydrogen on mercury 241 (1988)105

In situ X-ray diffraction measurements of the surface structure of Pt in the presence of "weakly" adsorbed H 247(1988)311

Hydrogenation

Electrocatalytic hydrogenation and oxidation of model coal-derived compounds chemisorbed at smooth polycrystalline Pt: a survey 247(1988)241

Hydrogenative / cathodic stripping

Hydrogenative/cathodic stripping of iodine chemisorbed on smooth polycrystalline platinum electrodes 219(1987)327

Hydrogen atom abstraction

Electron and hydrogen atom transfers in the electrochemical reduction of biphenyl halides in dimethylformamide and acetonitrile studied by means of Fourier transform faradaic admittance measurements (FT-FAM) 201(1986)315

Hydrogen bond

Intra-molecular hydrogen bonding in surface-modified gold electrodes and the effect of specific anions on the electrochemistry of cytochrome *c* 208(1986)395

Electrochemistry of quinizarine adsorbed on a glassy carbon electrode in aqueous solutions 239 (1988)209

Hydrogen catalysis

Ultrasensitive voltammetric measurements based on coupling hydrogen catalytic systems with controlled interfacial accumulation of the catalyst 237(1987)281

Hydrogen electrode

Extraordinary temperature effect on the hydrogen electrode potential in concentrated perfluoroalkanesulfonic acids 219(1987)347

Competition between the rearrangement of electrodeposited overlayers of copper on platinum and the hydrogen electrode reactions 229(1987)327

Simulation of cyclic voltammetry for the linked mechanism of the hydrogen electrode reaction in molten carbonates 249(1988)155

Hydrogen electrosorption

Hydrogen electrosorption on single-crystal platinum stepped surfaces and the effects of oxide formation 205(1986)335

The effects of anions on hydrogen electrosorption on platinum single-crystal electrodes 214(1986) 555

Hydrogen evolution

Electrocatalysis by amorphous metals of hydrogen and oxygen evolution in alkaline solution 201(1986)61

Studies of the process of catalytic hydrogen evolution on the epoxy-resin-impregnated graphite-based mercury film electrode 213(1986) 127

Where is the actual site for hydrogen evolution? Isotopic analysis for NiO-deposited $SrTiO_3$ photocatalyst 213(1986)319

Determination of the kinetics of hydrogen evolution by analysis of the potential–current and potential–coverage curves 214(1986)615

The effect of adsorbed carbon monoxide on hydrogen adsorption and hydrogen evolution on platinum 215(1986)357

Kinetic theory of the open-circuit potential decay method for evaluation of behaviour of adsorbed intermediates. Analysis for the case of the H_2 evolution reaction 221(1987)1

The effect of cobalt ions on the catalytic hydrogen evolution at a mercury electrode 226(1987)51

The influence of surface crystallography on the rate of hydrogen evolution at Pt electrodes 226 (1987)351

Hydrogen photoevolution at p-type silicon electrodes coated with discontinuous metal layers 228(1987)97

Surface modifications with heteropoly and isopoly oxometalates. Part I. Qualitative aspects of the activation of electrode surfaces towards the hydrogen evolution reaction 243(1988)87

Spectroscopic identification of the adsorbed intermediate in hydrogen evolution on platinum 243(1988)445

Voltammetric characteristics of the RuO_2 film electrode in relation to the catalytic properties of RuO_2 for the photochemical production of hydrogen 247(1988)253

Dc polarographic study of catalytic hydrogen evolution in the Pt(IV)–As(III) system 247 (1988)329

Elimination of the influence of interfering ions in the voltammetry of catalytic hydrogen evolution in the presence of platinum salts 250 (1988)411

Hydrogen ion

Ion carrier properties of nigericin studied by voltammetry at the interface of two immiscible electrolyte solutions 204(1986)267

Photoemission at a mercury electrode with the hydrogen ion as scavenger 208(1986)219

The hydrogen region of the cyclic voltammetry of Pd: the effect of pH and anion 209(1986)371

The effect of pH on the adsorption and the association of cytidine, cytidine-5′-monophosphate and cytidine-5′-diphosphate at the charged interface 212(1986)485

The interfacial behaviour of guanosine mono-, di- and triphosphate in solutions of varying pH at charged interfaces 212(1986)497

Effect of pH on the efficiency of the oxygen-evolving reaction in inside-out vesicles of thylakoids 212(1986)549

Voltammetric studies on the adsorption and association of cytidine dinucleotides in solutions of varying pH at charged interfaces 214(1986)391

Response to pH of an electrode made up of a monocrystal of α-$Zr(HPO_4)_2 \cdot H_2O$ 216(1987) 283

Characterization of single-crystal electrode surfaces as a function of potential and pH by Auger spectroscopy and LEED. Pt (111) in aqueous $CaCl_2$ and HCl solutions 217(1987)101

An electrochemical and SERS investigation of the influence of pH on the effectiveness of some corrosion inhibitors of copper 217(1987)187

Spectroelectrochemical study of polyaniline: the construction of a pH–potential phase diagram 219(1987)335

Electrochemical oxidation of HCOONa on Pt in acidic solutions 220(1987)125

Adlattice structure and hydrophobicity of Pt (111) in aqueous potassium iodide solutions. Influence of pH and electrode potential 222 (1987)305

The electrical double layer of carbon and graphite electrodes. Part IV. Dependence of carbon electrode dimensions and electrical capacity on pH 227(1987)41

Mechanism of chlorine evolution on oxide anodes. Study of pH effects 228(1987)393

Determination of activity coefficients in aqueous solutions of trichloroacetic acid from emf measurements at 25 °C 230(1987)77

Brdička-type catalytic currents of hemoglobins. Part III. pH dependence of the catalytic current — an indication of quaternary structure changes? 231(1987)71

Energy-dependent K^+ uptake and H^+–K^+ exchange in *Salmonella typhimurium* 231(1987) 183

Transient peak membrane potential in a liquid membrane system generated by pH jump: non-linear response to perturbation 231(1987)193

Is DNA transport driven by the proton electrochemical potential difference in the naturally transformable bacteria, *Streptococcus pneumoniae*? 231(1987)269

H^+–K^+ exchange and $\Delta\bar{\mu}_{H^+}$ in *Lactobacillus salivarius* 231(1987)503

pH and chain length dependence of phosphatidic acid phase transition parameters 231(1987)509

Photosynthetic production of H_2O_2 from water at n-TiO_2 electrodes in a photoelectrochemical cell: influence of electrolyte pH and Pt electrodeposition 237(1987)225

The effects of temperature and electrolyte at acidic and alkaline pH on the electron transfer reactions of cytochrome *c* at In_2O_3 electrodes 239(1988)291

On the pH dependence of the reductive desorption of iodine at polycrystalline and single-crystal platinum electrodes in aqueous solvents 240(1988)309

Electrosorption of hydrogen and sulphuric acid anions on single-crystal platinum stepped surfaces. Part I. The [110] zone 241(1988)309

Effects of solution pH on the voltammetric behaviour of ferrous/ferric ions at zeolite-modified electrodes 246(1988)63

Effects of the solution pH on the electrochemical behaviour of $Ru(bpy)_3^{2+}$ and $Fe(CN)_6^{3-}$ ions at a clay-modified electrode 249(1988)133

Hydrogen overvoltage

Effect of methylviologen on the hydrogen evolution at mercury electrodes in aqueous buffer solutions 230(1987)177

Hydrogen oxidation

Effect of the oxygen layer at solid Ru electrodes on hydrogen oxidation in acid solution 214 (1986)547

Preparation and characterization of carbon-based fuel-cell electrodes with platinum-group bimetallic catalysts 223(1987)91

Hydrogen peroxide

A method for estimation of hydrogen peroxide based on mediated electron transfer reactions of peroxidases at electrodes 201(1986)1

Formation of H_2O_2 at the illuminated TiO_2 film electrode prepared by the sol–gel method and its chemical states 209(1986)399

Dealing with unequal diffusivities among reactants in kinetic studies at rotating disk and ring–disk electrodes. The reduction of H_2O_2 as catalyzed by Co^{II}(cyclam) and Fe(II) 216(1987) 249

Electrochemical immobilisation of enzymes. Part II. Glucose oxidase immobilised in poly-*N*-methylpyrrole 224(1987)37

Thermodynamics of reactions involving oxyradicals and hydrogen peroxide 232(1987)3

The role of peroxides in mitochondrial reduction of dioxygen to water 232(1987)51

Light-driven hydrogen peroxide production as a way to solar energy conversion 232(1987)71

Iron-induced Ca^{2+} release from rat liver mitochondria *via* H_2O_2 metabolism 232(1987) 203

Induction of selenium-glutathione peroxidase by stimulation of metabolic hydrogen peroxide production *in vivo* 232(1987)247

The electroreduction of oxygen on pyrolytic graphite 233(1987)147

Photosynthetic production of H_2O_2 from water at n-TiO_2 electrodes in a photoelectrochemical cell: influence of electrolyte pH and Pt electrodeposition 237(1987)225

Voltammetry at microcylinder electrodes. Part VI. Second-order catalytic reaction of Fe(edta) with H_2O_2 245(1988)39

Hydrogen phthalocyanine film

Oxygen photoelectroreduction on hydrogen phthalocyanine films in alkaline solutions 237 (1987)39

Hydrogen scale

The real standard potential on the aqueous hydrogen scale of the silver/silver chloride electrode in methanol: the surface potential of methanol 243(1988)353

Hydrogen sulphate ion

Selectivity coefficient of hydrogen sulphate anion for liquid ion-exchange membrane electrodes based on nitrobenzene 233(1987)267

Hydrogen sulphide

Radiotracer study of the adsorption of H_2S at a platinized platinum electrode 206(1986)297

Hydrogen telluride

Voltammetric studies of tellurium film and hydrogen telluride formation in acidic tellurite solution 215(1986)261

Hydrophilic domain

Hydrophilic and hydrophobic domains in the flat protein conformomer as a cause of double step polarographic waves 248(1988)387

Hydrophobic domain

Hydrophilic and hydrophobic domains in the flat protein conformomer as a cause of double step polarographic waves 248(1988)387

Hydrophobicity

Adlattice structure and hydrophobicity of Pt (111) in aqueous potassium iodide solutions. Influence of pH and electrode potential 222 (1987)305

Hydrophobic layer

Effect of hydrophobic layers on the electrochemical electron transfer reaction of some mediators in microbial fuel cells 236(1987)305

Hydroquinone

Electrochemical reactions with protonations at equilibrium. Part XIII. Experimental study of the homogeneous electron exchange in quinone/dihydroquinone systems 208(1986)357

Kinetics of hydroquinone chemisorption at polycrystalline platinum electrodes. The effect of surface roughness 217(1987)121

Catalysis of quinone–hydroquinone redox reactions at polypyrrole benzenesulphonate-coated platinum electrodes 220(1987)55

Electrochemical reactivity of biologically active quinone/hydroquinone sesquiterpenoids on glassy carbon electrodes 231(1987)567

Electrochemical and chemical reductions of oxygen dissolved in aqueous solutions 232(1987) 13

Spectroscopic investigation of electrochemically active compounds. SERS of nitrobenzene, sulfide, ethylene and hydroquinone on Au 239(1988)361

The influence of orientation on the electrocatalytic hydrogenation of hydroquinone chemisorbed at smooth polycrystalline platinum electrodes 239(1988)375

Hydrous film

The electroformation of thick hydrous nickel hydroxide films through the application of periodic potential signals 225(1987)227

Hydroxybenzoic acid

Temperature dependence of the ionisation constants and evaluation of the related thermodynamic parameters for salicyclic acid and meta-hydroxybenzoic acid 214(1986)473

Hydroxyiminoanthraquinone

Mechanism of the electrochemical reduction of hydroxyiminoanthraquinones in DMF 207 (1986)151

Hydroxylamine

Photoassisted and electrochemical reduction of nitric acid to hydroxylamine and ammonia 209 (1986)405

Electrocatalytic reduction of nitrate and nitrite to hydroxylamine and ammonia using metal cyclams 224(1987)199

Hydroxymethotrexate

Electrochemistry of methotrexate and its metabolites. Part II. Reduction of 7-hydroxymethotrexate 220(1987)323

Hydroxyphenylmethylpyrazine

Electrochemical behaviour of pyrazine derivatives: reduction of 2-hydroxy-3-phenyl-6-methylpyrazine 243(1988)133

Hydroxypyrimidine

Protonation of radical anions by the parent compound. Effect of structure in the hydroxypyrimidines 212(1986)371

Hydroxyquinoline

Determination of copper, cadmium and lead in seawater by cathodic stripping voltammetry of complexes with 8-hydroxyquinoline 215(1986)111

Hydroxyquinone derivative

Electron transport in biological processes. Deoxyribonucleic acid degradation and its relationship with the electrochemical behaviour of hydroxyquinone derivatives 231(1987)523

Hypochlorite reduction

Hypochlorite reduction at GaAs: a multifaceted reaction 224(1987)211

Hypotensive drug

Determination of Captopril using adsorptive cathodic differential pulse stripping voltammetry with the HMDE 230(1987)99

Hypoxanthine

Electrochemical oxidation of 6,8-dioxypurine 223(1987)143

I

Illuminated electrode

On the kinetics of electron transfer reactions at illuminated InP electrodes 214(1986)685

Illuminated interface

Recombination and charge transfer at the illuminated n-CdTe/electrolyte interface. Simplified kinetic model 220(1987)179

Illumination

Experimental study of illumination effects on the cathodic current–voltage curve on n-GaAs 223 (1987)215

The problem of light-induced oxygen production at catalyst-loaded CdS suspensions 228(1987)45

On the role of chemical steps in the anodic dissolution of illuminated n-type GaAs electrodes 228(1987)77

Electrochemical stabilization of illuminated single crystal WSe_2 anodes 242(1988)191

Imaging plane

Determination of the potential due to a surface distribution of dipole systems with several imaging planes. Application to organic adsorption 239(1988)447

Imidazolinylpyridylmethyl sulphide

Voltammetric maxima of the third kind from reactant adsorption at the HMDE 235(1987)343

Iminium species

Charge transfer mechanism for benzodiazepine (BZ) action. Correlation of reduction potential of BZ iminium with structure and drug activity 212(1986)407

Immittance data

On the reconstruction of large signal responses from immittance data 223(1987)263

Immobilization

Electrocatalysis of cathodic molecular oxygen reduction with biopolymers–enzymes and their models 206(1986)217

Microporous aluminum oxide films at electrodes. Part II. Studies of electron transport in the Al_2O_3 matrix derivatized by adsorption of poly(4-vinylpyridine) 207(1986)49

Amperometric immunoassays 231(1987)89

Attachment of riboflavin derivatives to electrode surfaces 244(1988)287

Immobilized bacterium

Kinetic model of amperometric selective electrodes with immobilized bacteria 212(1986)5

Immobilized enzyme

Electrochemical regulation of immobilized alkaline phosphatase activity 212(1986)205

Electrochemical immobilisation of enzymes. Part I. Theory 224(1987)27

Electrochemical immobilisation of enzymes. Part II. Glucose oxidase immobilised in poly-*N*-methylpyrrole 224(1987)37

Immunoassay

Amperometric immunoassays 231(1987)89

The application of adsorptive stripping voltammetry for a study of the reaction of human serum albumin with anti-human serum albumin 235(1987)317

The development of redox-modified electrodes as charge-accumulating devices for use in higher sensitivity detection systems 250(1988)417

Immunoglobulin G

Cyclic voltammetry and quartz microbalance electrogravimetry of IgG and anti-IgG reactions on silver 223(1987)67

Impedance

Impedance characteristics of a modified electrode 202(1986)69

Structural simulation of electrochemical impedances 209(1986)11

The impedance of the Li^+/Li electrode in $SOCl_2$ 209(1986)351

Electrochemical adsorption reactions (EAR). Part II. Relation between large signal response and small signal (impedance) data 210(1986)21

Investigation of magnetic effects on mass transport at the electrode/electrolyte interface by impedance techniques 217(1987)443

Diffusion–migration impedances for finite, one-dimensional transport in thin-layer and membrane cells. Part II. Mixed conduction cases: $Os(III)/Os(II)ClO_4$ polymer membranes including steady-state $I-V$ responses 219(1987) 23

A simulation analysis of errors in the measurement of standard electrochemical rate constants from phase-selective impedance data 222(1987)21

Analysis of the interfacial admittance in the case of a two-step two-electron electrode reaction with a diffusing intermediate, with application to the reduction of pyrazine 222(1987)45

Application of the 'ast Walsh–Hadamard transform and the fast Haar transform for electrochemical impedance measurements based on a periodic square-wave perturbation signal derived from Walsh functions 222(1987)367

Impedance studies of the cell Ag/Ag beta″ alumina/Ag 228(1987)417

Influence of saponin on the electric parameters and the electrophoretic mobility of erythrocytes 231(1987)35

Membrane impedance of internodal cells of *Chara corallina* obtained by analysis of low level transients 231(1987)131

Electromagnetic smog — a damage and stress factor? 231(1987)441

Ac-impedance studies of carbon electrodes coated with poly-4-vinylpyridine films containing the $Fe(CN)_6^{3-/4-}$ redox couple 235(1987)169

The electrochemistry of alkaline $K_3Cr(CN)_6$ solutions at p-GaAs 243(1988)161

Electrolyte electroreflectance. Easy and reliable flat-band potential measurements 244(1988)69

Conductivity and capacity of polythiophene films: impedance study 244(1988)311

Adsorption of dimethylsulphoxide on the polycrystalline gold electrode from aqueous solutions 248(1988)399

Impedance spectroscopy

Impedance spectroscopy and its use in analyzing the steady-state ac response of solid and liquid electrolytes 223(1987)25

High-frequency impedance spectroscopy of fast electrode reactions 229(1987)407

Inclusion complex

Structure changes of viologen + β-cyclodextrin inclusion complex corresponding to the redox state of viologen 210(1986)265

Inclusion complexes of isomeric chloronitrobenzenes with α- and β-cyclodextrins studied by polarography. Analysis of the possibilities of the method 226(1987)137

Indifferent electrolyte

The oxide/solution interface: specific effects of "indifferent" electrolytes 239(1988)419

Indium amalgam electrode

The kinetics of electroreduction of lithium ions in tetrahydrofuran at mercury and mercury amalgam electrodes 215(1986)237

Indium ion

Adsorption of 2-mercaptoethanol and In(III)–2-mercaptoethanol on mercury electrodes in $HClO_4 + NaClO_4$ medium 238(1987)367

Indium oxide electrode

The effects of temperature and electrolyte at acidic and alkaline pH on the electron transfer reactions of cytochrome *c* at In_2O_3 electrodes 239(1988)291

Indium phosphide

An electrochemical and spectroelectrochemical analysis of the oxide/p-indium phosphide semiconductor surface using Fourier transform infrared and Raman scattering spectroscopies 233(1987)1

Indium phosphide electrode

On the kinetics of electron transfer reactions at illuminated InP electrodes 214(1986)685

A study of the mechanisms of O_2 reduction at n- and p-InP in acid aqueous electrolyte 247(1988) 265

Effects of electrolytes on the photoelectrochemical reduction of carbon dioxide at illuminated p-type cadmium telluride and p-type indium phosphide electrodes in aqueous solutions 249(1988)143

Indium selenide

Stabilization of the polycarbazole protected n-InSe photoanode for photoelectrochemical solar cells 248(1988)233

Indium–tin oxide coated glass

Electrodeposition of metal–trithioanthrone films 249(1988)281

Indole oxidation

Voltammetric determination of indole in micellar and emulsified media 234(1987)175

Induction time

A computer simulation of nucleation 241(1988)79

Industrial membrane

From biological membrane processes to industrial membrane technologies 231(1987)121

Infrared spectroscopy

Infrared spectra of carbon monoxide adsorbed on a smooth gold electrode. Part I. EMIRS spectra in acid and alkaline solutions 201(1986) 175

In-situ investigation of the film growth mechanism using multiple internal reflection Fourier transform infrared spectroscopy (MIRFTIRS). Part I. Behaviour of iron and platinum electrodes in alkaline methanolic solutions 201(1986)413

In situ infrared reflectance spectroscopic study of the adsorption of formic acid at a rhodium electrode 204(1986)315

Infrared spectra of carbon monoxide adsorbed on a smooth gold electrode. Part II. EMIRS and polarization-modulated IRRAS study of the adsorbed CO layer in acidic and alkaline solutions 207(1986)293

The infrared spectra of surface metal atom vibrations. SNIFTIRS studies in the far infrared region using time resolved FTIR techniques 209 (1986)387

In-situ investigation of the film growth mechanism using multiple internal reflection Fourier transform infrared spectroscopy (MIRFTIRS). Part II. Behaviour of iron and platinum electrodes in the presence of hexamethylenediamine in alkaline methanolic solutions 210(1986)295

Infrared spectroscopic study of methanol and formic acid adsorbates on a platinum electrode. Part I. Comparison of the infrared absorption intensities of linear CO(a) derived from CO, CH_3OH and HCOOH 213(1986)149

Polarization modulation infrared spectroscopic measurements of thiocyanate and cyanide at the silver electrode/aqueous electrolyte interface by means of Kretschmann's ATR prism configuration 215(1986)93

Electrocatalytic oxidation of ethylene glycol. Part III. In-situ infrared reflectance spectroscopic study of the strongly bound species resulting from its chemisorption at a platinum electrode in aqueous medium 216(1987)169

Prospects for transient IR reflection–absorption spectroscopy of adsorbed species on electrode surfaces. Cell design for a laser source 216(1987) 293

Infrared spectroscopic study of methanol and formic acid adsorbates on a platinum electrode. Part II. Role of the linear CO(a) derived from methanol and formic acid in the electrocatalytic oxidation of CH_3OH and HCOOH 218(1987)155

Infrared spectroscopic study of the methanol adsorbates at a platinum electrode. Part I. Influence of the bulk concentration of methanol upon the nature of the adsorbates 225(1987)215

"In situ" analysis by infrared reflectance spectroscopy of the adsorbed species resulting from the electrosorption of ethanol on platinum in acid medium 229(1987)353

An electrochemical and spectroelectrochemical analysis of the oxide/p-indium phosphide semiconductor surface using Fourier transform infrared and Raman scattering spectroscopies 233(1987)1

An infrared spectroelectrochemical investigation of the ion pairing reactions of the anions and dianions of TCNE and TCNQ 233(1987)223

Effect of surface crystallographic orientation upon specific adsorption of azide at silver electrodes as examined by potential-difference infrared spectroscopy 235(1987)327

An in situ infrared study of the oxidation of sulfur dioxide on platinum electrodes 235(1987) 361

Infrared spectroscopic study of the methanol adsorbates at a platinum electrode. Part II. The Pt (100) surface in an acid medium 237(1987)119

Infrared spectroscopic study of the methanol adsorbates at a platinum electrode. Part III. Structural effects and behaviour of a polycrystalline surface 238(1987)323

The interpretation of solution electrolyte vibrational bands in potential-difference infrared spectroscopy 239(1988)55

Vibrational spectroscopy on platinum single-crystal electrodes. Part I. In-situ infrared spectroscopic studies of the adsorption and oxidation of CO on Pt (111) in sulphuric acid 239(1988)347

The mechanism of electrocatalytic oxidation of formic acid on Pt (100) and Pt (111) in sulphuric acid solution: an EMIRS study 240(1988)147

An investigation of the oxidation of formaldehyde on noble metal electrodes in alkaline solutions by electrochemically modulated infrared spectroscopy (EMIRS) 240(1988)161

Adsorption of CO on a Pt electrode in acidic solution. IR-active and -inactive CO's adsorbed in the double-layer region 240(1988)281

Reactant structural effects on the formation and electro-oxidation of adsorbed carbon monoxide from small organic molecules at platinum as studied by time-resolved FTIR spectroscopy 240(1988)341

Mechanisms of formic acid, methanol, and carbon monoxide electrooxidation at platinum as examined by single potential alteration infrared spectroscopy 241(1988)143

An in-situ FTIR study of the electroreduction of CO_2 by CoPc-coated edge graphite electrodes 241(1988)361

In-situ infra-red studies in electrochemistry 242 (1988)23

An in-situ infra-red study of poly thiophene growth 242(1988)47

Evidence for COH as an adsorbed intermediate in the anodic oxidation of methanol by ECDTMS and SNIFTIRS 242(1988)327

A study of HSO_4^- and SO_4^{2-} co-adsorption on a platinum electrode in sulfuric acid by in-situ FT-IR reflection absorption spectroscopy 243 (1988)203

Spectroscopic identification of the adsorbed intermediate in hydrogen evolution on platinum 243(1988)445

An in situ surface Fourier transform infrared study of complexes of lithium, magnesium, potassium and lanthanum ferrocyanide at platinum and gold electrodes 244(1988)301

Infrared spectra of CO adsorbed on palladium and platinum electrodes co-existing with another adsorbed species in acidic solution 245(1988)245

IR reflectance studies of electron transfer promoters for cytochrome *c* on a gold electrode 245(1988)275

Electrochemical and FTIR spectroscopic characterization of ferrocyanide-modified TiO_2 electrodes designed for efficient photosensitization 246(1988)411

On the adsorption and oxidation of ethanol on platinum as studied with in-situ IR spectroscopy 246(1988)449

An in-situ surface Fourier transform infrared study of the adsorption of isoquinoline at a stationary mercury electrode 247(1988)277

Effect of Pb adatoms on the chemisorption of formic acid at a smooth polycrystalline rhodium electrode in acid medium. A quantitative EMIRS investigation 249(1988)265

In-situ IR study of adsorption and oxidation of methanol on platinum and platinised glassy carbon electrodes in sulphuric acid solution 250 (1988)127

New in-situ IR results on adsorption and oxidation of methanol on platinum in acidic solution 250(1988)451

Inhibition

Selective inhibition by tetraphenylphosphonium chloride 205(1986)299

Inhibitor

Photoelectrochemical study of the effect of inhibitor on the passivation of copper in sodium hydroxide aqueous electrolyte 244(1988)333

Inhomogeneous electrolyte

Solvent effects in a non-primitive electrolyte model 247(1988)73

Inlaid disc electrode

Theory of electrochemical processes at an inlaid disc microelectrode under steady-state conditions 245(1988)71

A comparison of the chronoamperometric response at inlaid and recessed disc microelectrodes 249(1988)1

Inner layer

Silver–water interactions. Part I. Model of the inner layer at the metal/water interface 230 (1987)189

Inner-sphere electrode reaction

Condensed thymine films at the mercury/water interface. Part II. Effects on electrode kinetics 201(1986)145

In situ

In situ infrared reflectance spectroscopic study of the adsorption of formic acid at a rhodium electrode 204(1986)315

The in-situ preparation of well-defined, single crystal electrodes 230(1987)221

Vibrational spectroscopy on platinum single-crystal electrodes. Part I. In-situ infrared spectroscopic studies of the adsorption and oxidation of CO on Pt (111) in sulphuric acid 239(1988)347

An investigation of the oxidation of formaldehyde on noble metal electrodes in alkaline solutions by electrochemically modulated infrared spectroscopy (EMIRS) 240(1988)161

In situ observation of copper redox in a polymer modified electrode using EXAFS spectroelectrochemistry 240(1988)361

In-situ infra-red studies in electrochemistry 242 (1988)23

An in-situ infra-red study of poly thiophene growth 242(1988)47

Spectroscopic identification of the adsorbed intermediate in hydrogen evolution on platinum 243(1988)445

Effect of brightener on copper plating. In situ investigation by the PAS technique 243(1988)475

In situ modification of the energetic structure of the n-GaP/NH_3 junction in the presence of solvated electrons 246(1988)29

An in-situ surface Fourier transform infrared study of the adsorption of isoquinoline at a stationary mercury electrode 247(1988)277

In-situ surface EXAFS at chemically modified electrodes 248(1988)77

An in-situ scanning tunneling microscopy study of Au (111) with atomic scale resolution 248 (1988)451

In-situ IR study of adsorption and oxidation of methanol on platinum and platinised glassy carbon electrodes in sulphuric acid solution 250 (1988)127

New in-situ IR results on adsorption and oxidation of methanol on platinum in acidic solution 250(1988)451

Integral equation method

Diffusion current at a band electrode by an integral equation method 215(1986)29

Integration

Errors arising from carrying out integration, and other operations of calculus, on digitally acquired data 208(1986)1

Intensity modulated photocurrent spectroscopy

A study of the passive film on iron by intensity modulated photocurrent spectroscopy 228(1987) 351

Intercellular communication

Molecular mechanisms of gated ion channels 212(1986)341

Interdigitated electrode array

Hydrodynamic voltammetry at an interdigitated electrode array in a flow channel. Part II. Chemical reaction succeeding electron transfer 247(1988)1

Interface of two immiscible electrolyte solutions

Double layer structure at the interface between two immiscible electrolyte solutions 206(1986)69

Potassium ion transport processes across the interface of an immiscible liquid pair in the presence of crown ethers 210(1986)137

Kinetics of salt extraction into the high-permittivity oil phase. Rate measurement by electrolysis at the interface of two immiscible electrolyte solutions 213(1986)323

Voltammetric study of ion transfer across the water/*o*-nitrophenyloctyl ether interface. Part I. Reversible process 226(1987)21

Electron transfer reactions at the interface between two immiscible electrolyte solutions 244(1988)15

Electron transfer between immiscible solutions. The hexacyanoferrate–lutetium biphthalocyanine system 244(1988)27

Interfacial accumulation

Voltammetric measurement of *cis*-dichlorodiammineplatinum(II) following interfacial accumulation at mercury electrodes 212(1986)395

Ultrasensitive voltammetric measurements based on coupling hydrogen catalytic systems with controlled interfacial accumulation of the catalyst 237(1987)281

Interfacial behaviour

The interfacial behaviour of guanosine mono-, di- and triphosphate in solutions of varying pH at charged interfaces 212(1986)497

Interfacial capacitance

Potential relaxation and interfacial capacitance behaviour of the Kolbe coupling reaction at Pt 242(1988)317

Interfacial capacity

Double-layer structure at the mercury/solution interface with tetrahydrofuran and 2-methyltetrahydrofuran as solvents 222(1987)293

Interfacial charge

The significance of interfacial charge and proton displacements for the mechanism of energy transduction in biomembranes 212(1986)273

Interfacial condensation

Direct evidence for interfacial condensation in the adsorption of tetrabutylammonium ions 206 (1986)307

Interfacial potential

The surface dipole moment of species adsorbed from a solution 249(1988)25

Interfacial relaxation

Interfacial relaxation via s-polarized electroreflectance 235(1987)11

On the non-linear response to charging of a relaxing capacitor 237(1987)1

Interfacial tension

Condensed thymine films at the mercury/water interface. Part III. Thermodynamic analysis 218 (1987)273

Interfering ion

Elimination of the influence of interfering ions in the voltammetry of catalytic hydrogen evolution in the presence of platinum salts 250 (1988)411

Intermediate

The galvanostatic double-pulse method in the study of the kinetics of stepwise electrode processes involving the adsorption of intermediates 224(1987)67

Intermetallic compound

Intermetallic compound phase formation in Pd + Cu alloy powders 239(1988)409

Interphase

Standard states and the Frumkin adsorption isotherm for substances at electrode interphases 244(1988)53

Interporphyrin distance

Electrochemical and spectroscopic properties of dicobalt cofacial porphyrins in non-aqueous media. Influence of the interporphyrin distance on the redox, spectrophotometric and EPR properties of the cobalt centers 234(1987)277

Intracellular enzyme

The sequence and energetics of cell membrane transductive coupling to intracellular enzyme systems 211(1986)447

Intramolecular association

The role of intramolecular association in the electrochemical reduction of viologen dimers and trimers 243(1988)143

Intrinsic probe

Investigation of electrochemical double-layer effects on chromatophore membranes of photosynthetic bacteria 214(1986)407

In vitro

Can the membrane potential of human erythrocytes suspended in isotonic unbuffered NaCl + KCl + sucrose media in the presence of cationic ionophore Triton X-100 be considered as the equilibrium membrane potential? 231 (1987)231

In vitro photoelectrochemical model of the *Z* scheme in green plant photosynthesis 231(1987) 325

In vivo

In vivo measurements of the translocation of electrochemically active substances across a biomembrane 231(1987)519

Iodate ion

Oscillations during electrolysis of alkaline iodide + iodate solutions 241(1988)349

Iodide ion

Photoelectrochemical and chemical corrosion inhibition of n-type GaAs in highly concentrated iodide solutions 209(1986)219

Rotating-disc electrode studies of the anodic oxidation of iodide in concentrated iodine + iodide solutions 239(1988)149

The electrochemical behaviour of Zircaloy-4 electrodes in acid iodide solution 240(1988)299

Oscillations during electrolysis of alkaline iodide + iodate solutions 241(1988)349

A study of the electrosorption of bromide and iodide ions on gold using the quartz crystal microbalance 243(1988)343

Iodine

Surface EXAFS of an electrochemical interface. Iodine on platinum (111) 210(1986)311

Voltammetric studies of electron-conducting modified bilayer lipid membranes 212(1986)185

The in-situ preparation of well-defined, single crystal electrodes 230(1987)221

Rotating-disc electrode studies of the anodic oxidation of iodide in concentrated iodine + iodide solutions 239(1988)149

Iodine adlattice

Electrodeposition of Pb onto Pt (111) surfaces containing iodine adlattices. Studies by low-energy electron diffraction and Auger spectroscopy 213(1986)293

Iodine chemisorption

Hydrogenative/cathodic stripping of iodine chemisorbed on smooth polycrystalline platinum electrodes 219(1987)327

Electroactivity of strongly-adsorbed redox centers: reduction of iodine chemisorbed on platinum in aprotic solvent 221(1987)281

Determination of the surface area of gold electrodes by iodine chemisorption 233(1987)283

Iodine desorption

On the pH dependence of the reductive desorption of iodine at polycrystalline and single-crystal platinum electrodes in aqueous solvents 240(1988)309

Iodine laser

The effect of pulsed laser irradiation on the properties of glassy carbon electrodes 250(1988) 173

Ion carrier

Transient peak membrane potential in a liquid membrane system generated by pH jump: non-linear response to perturbation 231(1987)193

Ion exchange

Electrochemical behavior of methyl viologen in zeolite particle films 208(1986)95

Electrochemical behaviour of cellulosic cation membranes. Bi-ionic potentials in alkali systems 211(1986)113

Apparent ion-exchange current densities at valinomycin-based potassium ion-selective PVC membranes obtained with an ac-impedance method 229(1987)249

Studies on the membrane potentials of a new microporous membrane in the presence of alkali chlorides with and without control of pores using precipitates of potassium salts 242(1988)155

Ion-exchange current

The determination and characterisation of apparent ion-exchange currents at PVC/water interfaces 245(1988)117

Ion-exchange membrane electrode

Activity coefficients of potassium salts in concentrated bovine serum albumin solutions 231(1987)489

Ion-exchange polymer

Poly-(3-methylpyrrole-4-carboxylic acid): an electronically conducting ion-exchange polymer 225(1987)273

Ion flux

Non-linear ionic fluxes in an electrically exposed cell 212(1986)89

Role of peroxides in the cerebral transmembrane ion fluxes and their relevance to ischemic brain edema 232(1987)307

Ion flux during electrochemical charging of Prussian Blue films 234(1987)213

Ionic conductance

On the volume concept for the Walden product 248(1988)15

Ionic content

Chemical analysis of the ionic content of hydrous iridium oxide films 240(1988)171

Ionic dissociation

An electrochemical study of the molecular and ionic dissociation of NO_2Cl in aprotic media 209(1986)323

Ionic equilibrium

Application of the general model of osmotic and ionic equilibria of a cell to human erythrocytes suspended in isotonic unbuffered NaCl + KCl + sucrose media in the presence of cationic ionophore 231(1987)223

Ionic orbital

Dynamics of adiabatic electron transfer reactions at metal electrodes 230(1987)43

Ionic strength

Ionic adsorption from mixed electrolyte solutions at constant cationic strength 213(1986)327

Electrochemical kinetics at microelectrodes. Part IV. Electrochemistry in media of low ionic strength 225(1987)49

Comparison of the ionic adsorption theories for the electrode/solution interface by computer simulation 234(1987)31

Anodic stripping voltammetry at ultramicroelectrodes for metal speciation studies in aqueous solutions of low ionic strength 246 (1988)297

Ionisation constant

Temperature dependence of the ionisation constants and evaluation of the related thermodynamic parameters for salicyclic acid and meta-hydroxybenzoic acid 214(1986)473

Ion migration

The interpretation of solution electrolyte vibrational bands in potential-difference infrared spectroscopy 239(1988)55

Ion neutralization

Methodology for ion neutralization at solid/electrolyte interfaces 204(1986)173

Ionophore

Exchange of K^+ and Na^+ between water and PVC in the presence of different ionophores 248(1988)131

Ion pair

Sodium perchlorate and chloride ion pairs 214 (1986)519

Ion-pair effects on the electroreduction and electrochromic properties of *ortho*-chloranil in dipolar aprotic solvents 216(1987)203

Surface ion pairing between electrochemically treated glassy carbon and alkali metal ions in acetonitrile 217(1987)453

Solvent and ion pairing effects on the reaction entropy for the electroreduction of aromatic molecules 219(1987)209

New aspects of the electrochemistry of heteropolyacids. Part III. Further proof of minimal solvation and ion pairing of silicotungstic and phosphotungstic species in acidic concentrated aqueous solutions of alkali-metal salts 230(1987)267

An infrared spectroelectrochemical investigation of the ion pairing reactions of the anions and dianions of TCNE and TCNQ 233(1987)223

Electron transfer reactions at the interface between two immiscible electrolyte solutions 244(1988)15

Ion resolvation

The standard Gibbs energy of ion resolvation and non-linear dielectric effects 235(1987)23

Ion scattering

Methodology for ion neutralization at solid/electrolyte interfaces 204(1986)173

Ion-selective electrode

Donnan exclusion failure in low anion site density membranes containing valinomycin 223 (1987)51

The role of PVC in ion selective electrode membranes 237(1987)181

The significance of exchange currents for the PVC/water interface 245(1988)113

Ion-sensitive membranes

Synthesis and characterization of new polyvinylchloride membranes for enhanced adhesion on electrode surfaces 202(1986)75

Ion size

The standard Gibbs energy of ion resolvation and non-linear dielectric effects 235(1987)23

Ion size evaluation for $LiClO_4$ solutions in selected mixtures of γ-butyrolactone with ethers 250(1988)165

Ion solvation

Ionic solvation at the solid/electrolyte interface: a statistical-mechanical approach 220(1987)213

On the role of ion solvation in electrode kinetics: $M^{n+} + n\,e^- \rightleftharpoons M(Hg)$ 234(1987)361

Ion transfer across the immiscible water–*o*-nitrotoluene interface 237(1987)113

Ion transfer

Stochastic approach to the ion transfer kinetics across the interface between two immiscible electrolyte solutions. Comparison with the experimental data 204(1986)257

The role of ionic transference in polymer-modified electrodes 206(1986)93

Ion transfer reactions across a liquid–liquid interface supported on a micropipette tip 208 (1986)179

Potassium ion transport processes across the interface of an immiscible liquid pair in the presence of crown ethers 210(1986)137

Investigation of ion transfer across the membrane-stabilized interface of two immiscible electrolyte solutions. Part I 217(1987)253

Ion transfer of bromophenol blue across liquid–liquid interfaces 220(1987)235

Voltammetric study of ion transfer across the water/*o*-nitrophenyloctyl ether interface. Part I. Reversible process 226(1987)21

The role of non-ionic polyoxyethylene ether surfactants on ion transfer across aqueous/organic solution interfaces studied by polarography with the electrolyte dropping electrode 227(1987)171

Study on the transfer of the base electrolyte ion TBA^+ across the water/nitrobenzene interface by the linear current scanning method 234(1987) 71

Ion transfer across the immiscible water–*o*-nitrotoluene interface 237(1987)113

The kinetics of ionic transfer across adsorbed phospholipid layers 243(1988)455

Electrode processes in mixed solvents. Correlations between electrochemical rate constants and Gibbs energy of transfer 248 (1988)35

On the nature of the transfer coefficient for ion transfer reactions 250(1988)225

Ion transport

Temperature effect on ion transport through the isolated human amnion. Part I. Electrophysiological studies 211(1986)383

Electrochemistry of asymmetric membranes 211 (1986)477

Electrochemical process in electrochromic films of lutetium diphthalocyanine 236(1987)163

The charge separation process in non-homogeneous electrolyte solutions 241(1988)57

***iR* drop**

Square-wave amperometry with *iR*-drop compensation 226(1987)147

All steady-state microelectrodes have the same "*iR* drop" 237(1987)303

Compensation for ohmic drop in the measurement of the potential difference at a liquid/liquid interface by the step current method 243(1988)81

Fast sweep cyclic voltammetry at ultra-microelectrodes. Evaluation of the method for fast electron-transfer kinetic measurements 243 (1988)321

Improved electronic equipment for square-wave amperometry 244(1988)91

Iridium

A model for anodic hydrous oxide growth at iridium 220(1987)83

Iridium-based mercury film electrode

An iridium-based mercury-film electrode. Part I. Selection of substrate and preparation 216 (1987)53

An iridium based mercury film electrode. Part II. Comparison of mercury-film electrode behaviors: theory versus reality 239(1988)113

Iridium complex

Impedance characteristics of a modified electrode 202(1986)69

Iridium electrode

Electrocatalysis by ad-atoms. Part XVIII. Enhancement of carbon monoxide oxidation on rhodium and iridium electrodes by oxygen adsorbing ad-atoms 202(1986)125

Kinetics of oxygen reduction at iridium electrodes in aqueous solutions 218(1987)265

Iridium ion

Analysis of a quasi-reversible two-electron cyclic voltammetric wave for an organometallic Ir(III)/Ir(I) couple at platinum and mercury electrodes 239(1988)253

Iridium oxide

Surface properties of $RuO_2 + IrO_2$ mixed oxide electrodes 214(1986)535

Iridium oxide film

Chemical analysis of the ionic content of hydrous iridium oxide films 240(1988)171

The kinetics of charging and discharging of iridium oxide films in aqueous and non-aqueous media 240(1988)185

Iron chelate

Mediating effect of ferric chelate compounds in microbial fuel cells with *Lactobacillus plantarum*, *Streptococcus lactis*, and *Erwinia dissolvens* 231 (1987)217

Activation of oxygen by metal complexes and its relevance to autoxidative processes in living systems 232(1987)29

Iron complex

Electrochemistry of iron(III) complexes with salicylaldehyde thiosemicarbazone and its S-methyl derivative 213(1986)85

Electrochemical oxidation of the tris-1,10-phenanthroline iron(II) cation in the presence of sodium dodecylsulfate 219(1987)125

Electrochemical behavior of iron–1,10-phenanthroline complexes at a carbon paste electrode 219(1987)139

Mechanism of oxidation of ferrous polydentate complexes by dioxygen 222(1987)173

Studies of the limiting currents associated with several oxidation reactions mediated by tris(2,2′-bipyridyl)iron(III) incorporated in Nafion® films on carbon electrodes 230(1987)109

Iron-induced Ca^{2+} release from rat liver mitochondria *via* H_2O_2 metabolism 232(1987) 203

Researches on chemically modified electrodes. Part XXIV. Preparation and characterization of Nafion polymer film modified electrodes containing Fe(II)–phen complex 233(1987)19

Adsorption of ferricyanide at Pt (111) as a function of electrode potential studied by Auger spectroscopy 234(1987)229

Electrochemical behaviour of a heme model complex in aqueous solution 235(1987)179

On the nature of electroactive sites in clay-modified electrodes 236(1987)43

Electrooxidative and electroreductive polymerization of 5-amino-1,10-phenanthroline ligand, iron and cobalt complexes in acetonitrile media 238(1987)197

Electrochemical behavior of 5-amino-1,10-phenanthroline and oxidative electropolymerization of tris[5-amino-1,10-phenanthroline]iron(II) 239(1988)175

Voltammetry at microcylinder electrodes. Part VI. Second-order catalytic reaction of Fe(edta) with H_2O_2 245(1988)39

Electrochemical reduction of iron(II) complexes with {3-(2-pyridyl)-5,6-diphenyl-1,2,4-triazine} 245(1988)201

Iron derivative

Spectro-electrochemistry of cobalt and iron tetrasulphonated phthalocyanines 213(1986)217

Iron electrode

In-situ investigation of the film growth mechanism using multiple internal reflection Fourier transform infrared spectroscopy (MIRFTIRS). Part I. Behaviour of iron and platinum electrodes in alkaline methanolic solutions 201(1986)413

Investigation of corrosion of a rotating iron electrode in HNO_3 by in-situ Raman spectroscopy 210(1986)259

In-situ investigation of the film growth mechanism using multiple internal reflection Fourier transform infrared spectroscopy (MIRFTIRS). Part II. Behaviour of iron and platinum electrodes in the presence of hexamethylenediamine in alkaline methanolic solutions 210(1986)295

A study of the passive film on iron by intensity modulated photocurrent spectroscopy 228(1987) 351

Electrolytic coating of titanium onto iron and nickel electrodes in the molten LiF + NaF + KF eutectic 230(1987)125

Electrokinetics of the reduction of chromium(VI) ions entrapped in chromium-modified passive iron electrodes 241(1988)265

The electrochemical reduction of oxygen on passive iron in alkaline solutions 243(1988)171

Iron group metal

Spectroscopic studies of water adsorption on iron group metals 228(1987)301

Iron ion

The mechanism of the deposition of manganese dioxide. Part III. Rotating ring–disc studies 201 (1986)123

Dealing with unequal diffusivities among reactants in kinetic studies at rotating disk and ring–disk electrodes. The reduction of H_2O_2 as catalyzed by Co^{II}(cyclam) and Fe(II) 216(1987) 249

Spectroelectrochemical study of the corrosion of a copper electrode in deaerated 1.0 *M* HCl solutions containing Fe(III). Effect of the corrosion inhibitor benzotriazole 220(1987)259

Effects of solution pH on the voltammetric behaviour of ferrous/ferric ions at zeolite-modified electrodes 246(1988)63

Estimation of charge transfer kinetic parameters from irreversible cyclic voltammograms at carbon fiber electrodes 247(1988)29

Studies of surface-modified glassy carbon electrodes obtained by electrochemical treatment. Its effect on $Ru(bpy)_3^{2+}$ adsorption and the electron-transfer rates of the Fe^{2+}/Fe^{3+} couple 248(1988)321

Electroreduction of Ni^{2+} and Fe^{2+} in a fused electrolyte. Formation of a two-component alloy and the role of the underpotential deposition 248(1988)369

Determination of experimental parameters in the Fe(III)/Fe(II) system in 1 *M* H_2SO_4, with a polycrystalline gold electrode, taking advantage of its non-linear behaviour 250(1988)321

Iron metabolism

Iron metabolism and oxygen toxicity 232(1987) 105

Iron naphthalocyanine

Electrocatalysis of O_2 reduction to water in different acid media by iron naphthalocyanines 246(1988)119

Iron oxohydroxide

AES depth profiling of electrochemically grown γ-FeOOH 246(1988)53

Composition and diffusion properties of γ-FeOOH deposited in sulphate solutions 247 (1988)185

Iron phthalocyanine

The cathodic reduction of oxygen at metal tetrasulfonato-phthalocyanines: influence of adsorption conditions on electrocatalysis 233 (1987)99

Adsorption and reduction of iron and cobalt phthalocyanines in DMSO at glassy carbon and pyrolytic graphite electrodes 234(1987)297

Iron porphyrin

Ligation of iron(II) by bromide ions in the redox chemistry of iron porphyrins. Effect of molecular superstructures 237(1987)131

Catalysis of the electrochemical reduction of carbon dioxide by iron("0") porphyrins 249 (1988)347

Iron redox couple

On the effect of the Fe^{2+}/Fe^{3+} redox couple on oxidation of carbon in hot H_3PO_4 213(1986)161

Kinetic studies using a rotating cylinder electrode. Part I. Electron transfer rates in ferrous/ferric sulfate on platinum 215(1986)151

Iron sulphate

Polypyrrole–clay-modified electrodes 243(1988) 367

Iron sulphide

Involvement of coordination chemistry during electron transfer in the stabilization of the pyrite (FeS_2) photoanode 242(1988)255

Iron sulphide electrode

Light-induced electron transfer and photoelectrocatalysis of chlorine evolution at FeS_2 electrodes 204(1986)185

Iron tetrasulphonato-phthalocyanine

The mechanism of oxygen reduction at iron tetrasulfonato-phthalocyanine incorporated in polypyrrole 233(1987)113

Irreversibility

Irreversibility and reactant adsorption in differential pulse polarography 218(1987)77

Irreversible process

Voltammetry at microcylinder electrodes. Part V. Pulse voltammetric current–potential curves for quasi-reversible and totally irreversible electrode reactions 206(1986)47

Theory of stationary current–potential curves at microdisk electrodes for quasi-reversible and totally irreversible electrode reactions 235(1987) 87

Cyclic voltammetry at the tubular electrode. Part II. Quasi-reversible and totally irreversible processes 238(1987)33

Ising model

On adsorption according to the lattice gas model (Ising model) 236(1987)21

Isoflurane

The electro-reduction of the anaesthetic gas isoflurane 244(1988)203

Isonicotinic amide

Electrochemical reduction of isonicotinic amide in a strong acid medium 250(1988)399

Isopolyanion

Electrocatalysis by electrodeposited heteropolyanions and isopolyanions 227(1987) 265

Isopoly oxometalate

Surface modifications with heteropoly and isopoly oxometalates. Part I. Qualitative aspects of the activation of electrode surfaces towards the hydrogen evolution reaction 243(1988)87

Surface modifications with heteropoly and isopoly oxometalates. Part II. Electrocatalytic behaviour of glassy carbon surfaces modified with 17-tungsto, 1-molybdo-diphosphate 243 (1988)105

Surface modifications with heteropoly and isopoly oxometalates. Part III. Electrode modification procedures. The necessity of proton interference during the electrodeposition of the h.e.r. catalysts 247(1988)157

Isopolytungstate

Activation of electrode surfaces by isopolytungstates 223(1987)287

Isoporphyrin

Oxidative voltammetry of some tetraphenylporphyrins in the presence of nucleophiles leading to isoporphyrins 234(1987) 145

Isoporphyrin formation upon electrochemical oxidation of zinc tetrakis(4-sulfonatophenyl)porphine in aqueous solution 246(1988) 363

Isopropanol

Kinetics of the anodic oxidation of isopropanol on chromium/titanium-oxide electrodes 229 (1987)339

Isoquinoline

An in-situ surface Fourier transform infrared study of the adsorption of isoquinoline at a stationary mercury electrode 247(1988)277

Isotope labelling

Oxygen evolution on Ru and RuO_2 electrodes studied using isotope labelling and on-line mass spectrometry 237(1987)251

Isotopic analysis

Where is the actual site for hydrogen evolution? Isotopic analysis for NiO-deposited $SrTiO_3$ photocatalyst 213(1986)319

J

Jellium

The double layer capacity of jellium with pseudopotentials 229(1987)39

Jellium electronic theory

Interfacial relaxation via s-polarized electroreflectance 235(1987)11

K

Kelvin vibrator

Calibration of the Kelvin vibrator for measurements of electronic work functions in a humid atmosphere 243(1988)337

Keto–enol equilibrium

Polarographic reduction of aldehydes and ketones. Part XXX. Effects of acid–base, hydration–dehydration and keto–enol equilibria on reduction of α-ketoglutaric and oxalacetic acid and their esters 226(1987)69

Ketoglutaric acid

Polarographic reduction of aldehydes and ketones. Part XXX. Effects of acid–base, hydration–dehydration and keto–enol equilibria on reduction of α-ketoglutaric and oxalacetic acid and their esters 226(1987)69

Ketone

Polarographic reduction of aldehydes and ketones. Part XXIV. Electroreduction of pyridinecarboxaldehydes in acidic solutions 213 (1986)245

Polarographic reduction of aldehydes and ketones. Part XXV. Electroreduction of pyridinecarboxaldehydes in aqueous buffered solutions 213(1986)255

Polarographic reduction of aldehydes and ketones. Part XXVI. Electroreduction and electrooxidation of pyridinecarboxaldehydes in alkaline solutions 213(1986)277

Polarographic reduction of aldehydes and ketones. Part XXVII. 1-Phenyl-1,2-propanedione 214(1986)237

Polarographic reduction of aldehydes and ketones. Part XXVIII. 1,2-Cyclohexanedione 214(1986)259

Kinetic-diffusion control

Mechanism of the electrochemical reduction of hydroxyiminoanthraquinones in DMF 207 (1986)151

Kinetic analysis

Kinetic analysis of a slow electron transfer coupled with a father–son reaction 220(1987)201

Kinetic parameter

A simple computer-based method for calculation of kinetic parameters from chronoamperometric and chronocoulometric data 209(1986)57

Rotating disk electrode: a re-examination of some kinetic criteria with a special reference to oxygen reduction 218(1987)53

A simple and alternative method for the evaluation of electrode kinetic parameters from normal pulse polarographic data 224(1987)49

Determination of the kinetic parameters of the oxygen reduction reaction using the rotating ring–disk electrode. Part I. Theory 229(1987)305

Determination of the kinetic parameters of the oxygen reduction reaction using the rotating ring–disk electrode. Part II. Applications 229 (1987)317

Kinetics

The kinetics of some substituted catechol/*o*-quinone couples at a carbon paste electrode 206 (1986)167

Metal substrate effects upon the kinetics of simple electrochemical reactions. The reduction of cobalt(III) ammines at single-crystal gold faces 209(1986)109

Determination of the kinetics of hydrogen evolution by analysis of the potential–current and potential–coverage curves 214(1986)615

The electrochemical reduction of diazodimedone. Kinetics and thermodynamics of the formation of the carbene anion radical 218(1987)227

The galvanostatic double-pulse method in the study of the kinetics of stepwise electrode processes involving the adsorption of intermediates 224(1987)67

Electrochemical kinetics at microelectrodes. Part III. Equivalency between band and hemicylinder electrodes 225(1987)33

Kolbe coupling reaction

Potential relaxation and interfacial capacitance behaviour of the Kolbe coupling reaction at Pt 242(1988)317

Kretschmann's ATR prism configuration

Polarization modulation infrared spectroscopic measurements of thiocyanate and cyanide at the silver electrode/aqueous electrolyte interface by means of Kretschmann's ATR prism configuration 215(1986)93

L

Laccase

Electrocatalysis of cathodic molecular oxygen reduction with biopolymers–enzymes and their models 206(1986)217

***β*-Lactam antibiotic**

Electrochemical behaviour of pyrazine derivatives: reduction of 2-hydroxy-3-phenyl-6-methylpyrazine 243(1988)133

Lactate oxidase

Mediated electron transfer of lactate oxidase and sarcosine oxidase with octacyanotungstate(IV) and octacyanomolybdate(IV) 240(1988)333

Lactobacillus plantarum

Mediating effect of ferric chelate compounds in microbial fuel cells with *Lactobacillus plantarum*, *Streptococcus lactis*, and *Erwinia dissolvens* 231 (1987)217

Lactobacillus salivarius

H^+–K^+ exchange and $\Delta\bar{\mu}_{H^+}$ in *Lactobacillus salivarius* 231(1987)503

Lactoperoxidase

Electrochemical conversion of lactoperoxidase, ceruloplasmin and alkaline phosphatase on mercury electrodes 211(1986)407

Ladder polymer

Electrochemical preparation of a ladder polymer containing phenazine rings 219(1987)117

Lampito mauritii

Effect of Ca^{2+} on electrobioluminescence of *Lampito Mauritii* 211(1986)341

Secretory differences in electrobioluminescence of *Lampito mauritii* upon segmentary electron input 231(1987)105

Langevin procedure

Fluctuation phenomena in electrochemistry. Part I. The formalism 208(1986)13

Langmuir adsorption isotherm

A formalism for performing chronocoulometry at a stationary planar or spherical electrode. Part I. Theoretical treatment with Langmuirian adsorption 224(1987)1

Langmuir–Blodgett multilayer film

Electrochemical control of reactivity of other redox species on an electrode coated with a Langmuir–Blodgett multilayer film 205(1986)329

Langmuir–Blodgett technique

Redox behavior of cytochrome *c* immobilized into a lecithin monolayer and deposited onto SnO_2 by the Langmuir–Blodgett technique 216 (1987)289

Comparative electrochemical studies of *N*-methyl-*N'*-hexadecyl viologen monomolecular films formed by irreversible adsorption and the Langmuir–Blodgett method 239(1988)441

Lanthanum chloride

Adsorption of chloride at the mercury/aqueous $LaCl_3$ interface 209(1986)183

Laplace plane analysis

The interfacial bioelectrochemistry of lipid bilayer membranes: Laplace plane analysis 212 (1986)361

Laplace space

A Laplace space rate/mechanism analysis of the two-electron chronoamperometric oxidation of *o*-dianisidine in sulfuric acid medium 202(1986)37

Large signal response

On the reconstruction of large signal responses from immittance data 223(1987)263

Laser

Prospects for transient IR reflection–absorption spectroscopy of adsorbed species on electrode surfaces. Cell design for a laser source 216(1987) 293

Laser illumination

Raman spectroscopy investigation of the silver oxide/silver electrode. Influence of experimental conditions 227(1987)21

Laser-induced electron ejection

Laser-induced electron ejection at metal surfaces. Evidence for photoelectroreduction of cobalt(III) and chromium(III) ammines by direct heterogeneous electron transfer 228(1987)265

Laser-induced photopotential

Pulsed laser-induced photopotentials at the cobalt-photosensitized ZnO/electrolyte interface 215(1986)161

Laser-induced temperature jump

Laser-induced temperature-jump coulostatics for the investigation of heterogeneous rate processes. Theory and application 248(1988)255

Laser irradiation

Photoelectron emission from poly- and single-crystalline platinum and gold electrodes using pulsed ultraviolet laser irradiation 228(1987)283

Latrotoxin

Electrical properties of a purified complex of α-latrotoxin and its receptor incorporated into planar lipid bilayers 231(1987)361

Lattice gas model

On adsorption according to the lattice gas model (Ising model) 236(1987)21

Layered crystal

Preparation and electrochemical characterization of WSe_2 electrodes having a wide range of doping densities 234(1987)133

Layered double hydroxide

Carbon composite electrodes containing alumina, layered double hydroxides, and zeolites 243 (1988)209

Lead

Electrodeposition of Pb onto Pt (111) surfaces containing iodine adlattices. Studies by low-energy electron diffraction and Auger spectroscopy 213(1986)293

Determination of copper, cadmium and lead in seawater by cathodic stripping voltammetry of complexes with 8-hydroxyquinoline 215(1986)111

Dc anodic stripping voltammetry at the mercury-film wall–jet electrode 215(1986)123

Extending the metal interface generality of surface-enhanced Raman spectroscopy: underpotential deposited layers of mercury, thallium, and lead on gold electrodes 217(1987) 367

The effects of the underpotential and overpotential deposition of lead and thallium on silver on the Raman spectra of adsorbates 217 (1987)385

Electrodeposition of lead on copper in acidic ammonium acetate solutions 243(1988)435

In-situ X-ray diffraction investigations of the UPD of Tl and Pb on Ag and Au electrodes 247(1988)297

Lead–acid battery

Electrochemical and spectroscopic methods of characterizing lead corrosion films 222(1987)347

Lead ad-atom

Effect of Pb adatoms on the chemisorption of formic acid at a smooth polycrystalline rhodium electrode in acid medium. A quantitative EMIRS investigation 249(1988)265

Lead amalgam electrode

Two-dimensional electrocrystallisation of $PbCO_3$ and $Pb_3(CO_3)_2(OH)_2$ on lead amalgam electrodes in sodium carbonate and bicarbonate solutions 233(1987)237

Lead complex

Electroanalytical chemistry of copper, lead and zinc complexes of amino acids at the ionic strength of seawater (0.70 *M* $NaClO_4$). Part III 208(1986)137

Adsorption of fulvic-like organic ligands and their Cd and Pb complexes at a mercury electrode 223(1987)235

Lead electrode

Photoactivity on the passivated lead electrode in H_2SO_4 under illumination during cyclic voltammetry within the potential range between $PbSO_4$/PbO and PbO_2/O_2 regions 202(1986)241

Effect of Sb on the electrochemical properties of $Pb/PbSO_4/H_2SO_4$ and $Pb/PbO/PbSO_4/H_2SO_4$ electrodes 218(1987) 135

The effects of adding Tl(I) to the electrolyte on the electrochemical and photoelectrochemical behaviour of passivated lead in H_2SO_4 in the potential range between the $PbSO_4$/PbO and PbO_2/O_2 regions 221(1987)197

Lead ion

SERS investigation of interfacial Pb(II) species in weakly acidic aqueous halide media 219 (1987)291

Lead oxide

Rechargeable manganese oxide electrodes. Part II. Physically modified materials 238(1987)93

Lead oxide electrode

Ozone and oxygen evolution on PbO_2 electrodes in acid solution 228(1987)407

Lead sulphate

Electrochemical investigations on the behaviour of thallous ions during the formation of $PbSO_4$ 238(1987)355

Lecithin

Electrical properties of a purified complex of α-latrotoxin and its receptor incorporated into planar lipid bilayers 231(1987)361

Lecithin monolayer

Redox behavior of cytochrome *c* immobilized into a lecithin monolayer and deposited onto SnO_2 by the Langmuir–Blodgett technique 216 (1987)289

Leucomethylene blue

Supramolecular phenomena in organic redox films at electrodes. Part II. The methylene blue/leucomethylene blue redox couple at the gold electrode 219(1987)183

Organic monolayer formation at a sulphur modified gold electrode. The methylene blue/leucomethylene blue redox couple 233 (1987)199

Electrochemical separation of the inner monolayer in methylene blue/leucomethylene blue conductive films induced by a sulphur-modified gold surface 250(1988)427

Leukaemia

Characterization and rapid evaluation of electrochemically oxidizable components in normal and pathological urine 232(1987)137

Levine's electrostatic model

Adsorption of chloride at the mercury/aqueous $LaCl_3$ interface 209(1986)183

Lewis base

Possible importance of adions in both the binding of Lewis bases and the electrocatalytic oxidation of dissolved organics at gold electrodes in aqueous media 210(1986)69

Ligand

Calculation of differential pulse polarographic curves for the reduction of complexes 216(1987)1

Differential pulse polarographic studies of copper(II)–polyamine complexes at low ligand concentrations 241(1988)281

Light-induced electron transfer

Light-induced electron transfer and photoelectrocatalysis of chlorine evolution at FeS_2 electrodes 204(1986)185

Light scattering

Light scattering from a nucleating surface 240 (1988)365

Lignin

Binding of copper(II) and zinc(II) ions on various lignins 214(1986)331

Limiting current

Studies of the limiting currents associated with several oxidation reactions mediated by tris(2,2′-bipyridyl)iron(III) incorporated in Nafion® films on carbon electrodes 230(1987)109

Voltammetry of metal complex systems with different diffusion coefficients of the species involved. Part I. Analytical approaches to the limiting current for the general case including association/dissociation kinetics 234(1987)1

Voltammetry of metal complex systems with different diffusion coefficients of the species involved. Part II. Behaviour of the limiting current and its dependence on association/dissociation kinetics and lability 234(1987)17

Limiting transference number

On the volume concept for the Walden product 248(1988)15

Linear current scanning method

Study on the transfer of the base electrolyte ion TBA^+ across the water/nitrobenzene interface by the linear current scanning method 234(1987) 71

Linear isotherm

Effects of quasi-reversible charge transfer on chronocoulometric relaxations in linearly adsorbing systems 246(1988)233

Linear sweep voltammetry

Linear sweep voltammetry at channel electrodes 206(1986)57

Linear sweep voltammetry at the tubular graphite electrode. Part III. Quasi-reversible processes 207(1986)41

Use of potential-step formulae to reduce computational time in the simulation of linear voltammetry by orthogonal collocation 208 (1986)165

Investigation of Pd + Co alloys by the linear potential sweep method 208(1986)169

First- and second-order chemical–electrochemical mechanisms. Extraction of standard potential, equilibrium and rate constants from linear sweep voltammetric curves 208(1986)197

New aspects of the electrochemistry of heteropolyacids. Reduction currents as a probe of solvent–electrolyte interactions 208(1986)343

Hydrodynamic voltammetry at channel electrodes. Part VIII. Theory of reversible voltammograms for chronoamperometry and linear sweep voltammetry 209(1986)247

The adsorption of RNAse *A*, BSA and cytochrome *c* at the graphite powder|liquid interface using in parallel the adsorption isotherm plot and linear sweep voltammetry on graphite paste electrode 211(1986)103

Comparison of linear sweep and staircase voltammetries using Walsh series 214(1986)141

Electrochemical oxidation of ethyl 3-oxo-3-phenyl-2-phenylhydrazonopropionate 220(1987) 311

General equivalence of linear scan and staircase voltammetry 222(1987)69

Linear sweep voltammetric approach for the study of monolayer formation. Distinct features of adsorption, nucleation–growth–collision and combined models 225(1987)93

Kinetics and mechanism of H and OH electrosorption on faceted (100) Pt electrodes in acid solutions 227(1987)183

Lateral modification and organization of mixed adlattices on polycrystalline platinum electrodes 230(1987)205

Pulsed linear sweep voltammetry with pulses of constant level in a potential scale, a polarization demanding condition in the study of platinum single crystal electrodes 236(1987)87

Linear sweep voltammetry at microband electrodes 237(1987)163

Voltammetry at microcylinder electrodes. Part VI. Second-order catalytic reaction of Fe(edta) with H_2O_2 245(1988)39

Linoleic acid

Effects of L-ascorbic acid and its palmitoyl derivative on the peroxidation of linoleic acid in aqueous solutions containing alcohol 232(1987) 163

Active oxygens and the peroxidation of linoleic acid catalysed by degraded species of ascorbic acid 232(1987)171

Liophobization

Modification of the liophobization method of DME glass capillaries against a polar liquid and their use in non-aqueous solvents 240(1988)317

Lipid

Interaction of cationic drugs with lipids of the spinach thylakoid membrane 211(1986)497

On irreversible changes upon heating lipid solutions 222(1987)277

A proposed mechanism underlying the process of Ca^{2+}-mediated transfer of DNA across biological membranes 231(1987)111

Use of 9-aminoacridine in the evaluation of liposome surface charge density: role of the adsorption on lipidic sites 231(1987)277

Fatty acid peroxyl radicals: their generation and reactivities 232(1987)37

Pentane measurement in man as an index of lipoperoxidation 232(1987)117

Formation, reactions and toxicity of aldehydes produced in the course of lipid peroxidation in cellular membranes 232(1987)187

Lipid peroxidation and brain mitochondrial damage induced by ethanol 232(1987)211

Effects of organic peroxides on human epidermal keratinocytes 232(1987)263

Role of lipid peroxidation and free radical scavengers on endotoxin shock 232(1987)295

Lipid hydroperoxide

Lipid hydroperoxides in sickle cell membranes 232(1987)257

Lipid peroxidation

Pentane measurement in man as an index of lipoperoxidation 232(1987)117

Evidence for carbon tetrachloride-induced lipid peroxidation *in vivo* by ^{23}Na relaxation times t_1 232(1987)179

Lipid peroxide

An electroanalytical approach to the determination of lipid peroxides 232(1987)127

Lipoic acid

Potentiometric measurement of lipoic acid reduction in microbial cultures. Part III. Experimental investigation and modeling of the effects exerted by beta-lactam antibiotics on the potential–time signals 231(1987)43

Liposome

Conformational transitions in the regulation of cytochrome *c* oxidase activity 211(1986)79

Calibration of the carotenoid band shift and the response of the external membrane potential probe oxonol VI with diffusion potentials in (proteo)liposomes and chloroplasts 212(1986)55

Liquid chromatography

Electrochemical detection for liquid chromatography using the wall–jet cell/ultramicroelectrode detector 216(1987)115

A kinetic analysis of the oxidation of methanol at platinum-based electrodes by quantitative determination of the reaction products using liquid chromatography 225(1987)281

Liquid electrolyte

Impedance spectroscopy and its use in analyzing the steady-state ac response of solid and liquid electrolytes 223(1987)25

Exchange diffusion in one dimension. Liquid electrolytes and mixed conductor membranes 243(1988)279

Liquid ion-exchange membrane electrode

Selectivity coefficient of hydrogen sulphate anion for liquid ion-exchange membrane electrodes based on nitrobenzene 233(1987)267

Liquid junction potential

Experimental studies of the liquid junction potential between electrolyte solutions in different solvents. Part VI. Stability of the liquid junction potential 225(1987)255

Studies on the liquid junction potential corrections of electrolytes at aqueous + mixed solvent boundaries 237(1987)149

Liquid/liquid interface

Ion transfer reactions across a liquid–liquid interface supported on a micropipette tip 208 (1986)179

Ion transfer of bromophenol blue across liquid–liquid interfaces 220(1987)235

Compensation for ohmic drop in the measurement of the potential difference at a liquid/liquid interface by the step current method 243(1988)81

Lithium

Quantum chemical calculations on the electrical double layer at the metal/vacuum interface. Part I. Hartree–Fock cluster descriptions 208(1986) 243

Lithium + aluminium alloy

Electrochemical formation of LiAl alloy in molten dimethylsulfone at 150 °C 209(1986)283

Lithium amalgam

Electrochemical reduction of Nafion 117 208 (1986)109

Lithium battery

An improvement of battery performance of lithium batteries assembled with a polypyrrole cathode formed electrochemically with the aid of a nitrile rubber insulating film 217(1987)203

The cathodic decomposition of propylene carbonate in lithium batteries 219(1987)273

Lithium chloride

Streaming method study of interfaces between immiscible electrolyte solutions 235(1987)287

Lithium electrode

The impedance of the Li^+/Li electrode in $SOCl_2$ 209(1986)351

The impedance of the Li^+/Li electrode in $SOCl_2$ containing acid electrolyte 237(1987)275

Lithium ion

Electrode kinetic studies of the $Zn^{2+}/Zn(Hg)$ and $Li^+/Li(Hg)$ couples in dimethylsulphoxide + propylene carbonate solvent systems 207 (1986)177

The impedance of the Li^+/Li electrode in $SOCl_2$ 209(1986)351

The kinetics of electroreduction of lithium ions in tetrahydrofuran at mercury and mercury amalgam electrodes 215(1986)237

The lithium salt of benzoquinone radical anion and voltammetric anomalies 235(1987)357

The impedance of the Li^+/Li electrode in $SOCl_2$ containing acid electrolyte 237(1987)275

Lithium perchlorate

Ion size evaluation for $LiClO_4$ solutions in selected mixtures of γ-butyrolactone with ethers 250(1988)165

Liver

The effects of physical exercise on the antioxidative capacity of the liver 232(1987)231

Induction of selenium-glutathione peroxidase by stimulation of metabolic hydrogen peroxide production *in vivo* 232(1987)247

Living system

Activation of oxygen by metal complexes and its relevance to autoxidative processes in living systems 232(1987)29

Localized electronic state

The influence of localized electronic states on the photoelectrochemical behavior of passive films 204(1986)197

Logarithmic analysis

A critical study of the use of logarithmic analysis as a criterion for elucidation of the reaction mechanism of electrodimerization processes in dc polarography 213(1986)23

Log plot

Effect of sphericity on the voltammetric (polarographic) log plot for reversible amalgam formation 218(1987)1

Long-range order

Long-range structural effects in the anomalous voltammetry on ultra-high vacuum prepared Pt (111) 250(1988)301

Low-energy electron diffraction

Electrodeposition of Pb onto Pt (111) surfaces containing iodine adlattices. Studies by low-energy electron diffraction and Auger spectroscopy 213(1986)293

Characterization of single-crystal electrode surfaces as a function of potential and pH by Auger spectroscopy and LEED. Pt (111) in aqueous $CaCl_2$ and HCl solutions 217(1987)101

Structure and composition of the Pt(s) [6(111) × (111)] step-terrace surface vs. pH and potential in aqueous Br^- solutions. Studies by LEED and Auger spectroscopy 217(1987)111

Electrochemical reactivity of 2,2′,5,5′-tetrahydroxybiphenyl and related compounds adsorbed at Pt (111) surfaces: studies by EELS, LEED, Auger spectroscopy and cyclic voltammetry 245(1988)253

M

Lumiflavin

An electrochemical investigation of the redox properties of lumiflavin in acidic media 217 (1987)65

Luminescor

Electrogenerated chemiluminescence. Part IL. Emission from acetonitrile solutions containing no added luminescors 222(1987)331

Luminol

Micellar complexes of energy transfer 211(1986) 95

Lung surfactant

Differential pulse-polarographic determination of formaldehyde in lung surfactant 211(1986)89

Lutetium

The rare earth substitution effect on the electrochemistry of diphthalocyanine films in contact with an acidic aqueous medium 249 (1988)181

Lutetium diphthalocyanine

Electron transfer between immiscible solutions. The hexacyanoferrate–lutetium biphthalocyanine system 244(1988)27

Lutetium diphthalocyanine film

Electrochemistry of a lutetium diphthalocyanine film in contact with an acidic aqueous medium 233(1987)77

Electrochemical process in electrochromic films of lutetium diphthalocyanine 236(1987)163

Electrochromism of octaalkoxymethyl-substituted lutetium diphthalocyanine 237(1987) 61

Lymphocyte

Interactions between electromagnetic fields and human lymphocytes. Experimental results and theoretical considerations 212(1986)561

Macrocyclic complex

An electrochemical examination of the coordination of O_2 and O_2^- with a Co^{II}-macrocyclic complex in dimethylsulfoxide 229 (1987)273

Macrocyclic compound

Polarographic studies on the interaction between macrocyclic compounds and cations or acids in acetonitrile 234(1987)251

Macrocyclic ligand

Electrochemical behaviour of a heme model complex in aqueous solution 235(1987)179

Macrocyclic polyamine

Indirect electroorganic reactions mediated by multivalent metal ion–macrocyclic polyamine complexes 243(1988)393

Macromorphology

Hydrodynamic effects of surfactants on the macromorphology of electrodeposited zinc and flow visualization. The flow-field throw 243 (1988)21

Hydrodynamic effects on the macromorphology of electrodeposited zinc and flow visualization. A flat plate electrode in a channel flow cell 249 (1988)35

Hydrodynamic effects on the macromorphology of electrodeposited zinc and flow visualization. The rotating disk electrode 249(1988)63

Macrophage

Tissue oxidation after endotoxin 232(1987)301

Magnesium chloride

Electrochemical studies of magnesium ions in magnesium chloride containing chloride melt at $710 \pm 10\,^{\circ}C$ 249(1988)191

Magnesium ion

Electrochemical studies of magnesium ions in magnesium chloride containing chloride melt at $710 \pm 10\,^{\circ}C$ 249(1988)191

Magnesium vanadium bronze

Electrochemical formation of a magnesium vanadium bronze $Mg_xV_2O_5$ in sulfone-based electrolytes at 150 °C 218(1987)241

Magnetic effect

Investigation of magnetic effects on mass transport at the electrode/electrolyte interface by impedance techniques 217(1987)443

Magnetic field

Frequency response of the limiting diffusion current to a magnetic field perturbation 227 (1987)275

Magnolia grandiflora

Biosensors using flower petal structures 222 (1987)343

Maleate ion

Adsorption of dicarboxylic ions on the (210) gold face from solutions at constant cationic strength 240(1988)291

Malonic acid

Control of the oscillation parameters in the Belousov–Zhabotinsky system by means of mixed catalysts 231(1987)243

Mammalian cell

Evidence for ac fields produced by mammalian cells 231(1987)287

Manganese dioxide

The mechanism of the deposition of manganese dioxide. Part II. Electrode impedance studies 201(1986)113

The mechanism of the deposition of manganese dioxide. Part III. Rotating ring–disc studies 201 (1986)123

In-situ Raman spectroscopy of manganese dioxide during the discharge process 243(1988) 219

Manganese dioxide electrode

Rechargeable manganese oxide electrodes. Part I. Chemically modified materials 223(1987)107

A kinetic investigation of the manganese dioxide electrode with a rotating quartz frequency balance 228(1987)455

Rechargeable manganese oxide electrodes. Part II. Physically modified materials 238(1987)93

Manganese porphyrin

Epoxidation of *cis*-cyclooctene by molecular oxygen electrocatalysed by polypyrrole–manganese porphyrin film modified electrodes 250(1988)191

Manganese tetraphenylporphyrin

Poly(pyrrole-manganese tetraphenylporphyrin) film electrodes in acetonitrile solution 239(1988) 433

Many-body effect

Many-body effects in electrochemisorption. Part I. Green function–superoperator formalism 229 (1987)51

Many-body effects in electrochemisorption. Part II. Operator averages and MF–HF limits 229 (1987)67

Many-body effects in electrochemisorption. Part III. Beyond mean field and Hartree–Fock 230 (1987)1

Many-body effects in electrochemisorption. Part IV. Multi-boson formalism 230(1987)23

Mass spectroscopy

Direct proof of the hydrogen in the methanol adsorbate at platinum — an ECTDMS study 229(1987)377

Evidence for COH as an adsorbed intermediate in the anodic oxidation of methanol by ECDTMS and SNIFTIRS 242(1988)327

The electrochemical reactivity of toluene at porous Pt electrodes 244(1988)273

Mass transfer

Transient mass transfer at partially blocked electrodes: a way to characterize topography 238(1987)67

Mass transport

Porous electrode modelling: quasi-stationary state 205(1986)91

Fluctuation phenomena in electrochemistry. Part II. Modelling the noise sources 208(1986)29

Investigation of magnetic effects on mass transport at the electrode/electrolyte interface by impedance techniques 217(1987)443

Electrochemical kinetics at microelectrodes. Part IV. Electrochemistry in media of low ionic strength 225(1987)49

Microstructural enhancement of mass transport through Nafion + Nuclepore composite membranes 235(1987)299

Mass transport to channel and tubular electrodes: the "Singh and Dutt approximation" 238(1987)43

An analysis of electrochemical reactions followed by series or complex chemical reactions 243 (1988)1

Competitive homogeneous chemical reactions occurring between two electron transfers. Application to *p*-nitrophenol reduction 243 (1988)293

The relationship between mass transport to channel and rotating disk electrodes 245(1988) 287

A reply to comments by Tokuda on our paper "The relationship between mass transport to channel and rotating disk electrodes" 245(1988) 303

The behavior of microdisk and microring electrodes. Mass transport to the disk in the unsteady state. Chronopotentiometry 250(1988) 257

The behavior of microdisk and microring electrodes. Mass transport to the disk in the unsteady state. Chronoamperometry 250(1988) 269

The behavior of microdisk and microring electrodes. Mass transport to the disk in the unsteady state. The ac response 250(1988)277

The behavior of microdisk and microring electrodes. Mass transport to the disk in the unsteady state. The effects of coupled chemical reactions: the CE mechanism 250(1988)285

Self-doped conducting copolymers: a charge and mass transport study of poly{pyrrole-co[3-(pyrrol-1-yl)propanesulfonate]} 250(1988)355

Maternal salt concentration

The human amniotic membrane: One membrane or several membranes? 211(1986)427

Mathematical model

Pulsed amperometric detection of sulfur compounds. Part II. Dependence of response on adsorption time 209(1986)171

Square-wave voltammetric peak current enhancements by adsorption and reversibility of the redox reaction 226(1987)239

Capacity of semiconductor electrodes with multiple bulk electronic states. Part I. Model and calculations for discrete states 228(1987)135

Mathematics

The theory of chronoamperometry for the investigation of electrocrystallization. Mathematical description and analysis in the case of diffusion-controlled growth 236(1987)1

Maximum bubble pressure technique

A test of the maximum bubble pressure method for electrocapillary measurements 237(1987)27

Interfacial behaviour of oligoriboadenylates at the mercury–solution interface 237(1987)261

Mean field approach

Many-body effects in electrochemisorption. Part III. Beyond mean field and Hartree–Fock 230 (1987)1

Mean field correlation approach

Many-body effects in electrochemisorption. Part II. Operator averages and MF–HF limits 229 (1987)67

Measured emf

Studies on the liquid junction potential corrections of electrolytes at aqueous + mixed solvent boundaries 237(1987)149

Mechanical breakdown

Electrical and mechanical breakdown of anodic films on tungsten in aqueous electrolytes 248 (1988)99

Mechanical / electrochemical model

Chemical and mechanical properties of redox polymer-modified electrodes. Part I. A mechanical/electrochemical model 219(1987)49

Mechanical strain

Novel tools for determining mechanically induced modifications of membrane structure: electrochemical and fluorescence methods 231 (1987)303

Mediator

A novel mediator for the investigation of the electrochemistry of metalloproteins 212(1986)99

Biofuel anode for cell reactions involving nicotinamide adenine dinucleotide as a charge carrier 212(1986)479

Effect of hydrophobic layers on the electrochemical electron transfer reaction of some mediators in microbial fuel cells 236(1987)305

The electro-reduction of the anaesthetic gas isoflurane 244(1988)203

Mediators for the oxidation of glutathione and other biological thiols 245(1988)131

Medicine

Singlet oxygen in biological systems 232(1987)91

Meldola Blue

Biofuel anode for cell reactions involving nicotinamide adenine dinucleotide as a charge carrier 212(1986)479

Membrane

Activation energy for charge transfer reactions in membranes. Proton-translocating proteins 204 (1986)245

Diffusion-migration impedances for finite, one-dimensional transport in thin layer and membrane cells. An analysis of derived electrical quantities and equivalent circuits 210(1986)1

Polyvinylalcohol–collagen membranes for enzyme immobilization 212(1986)149

Volume and ionic composition changes in erythrocytes after electric breakdown. Simulation and experiment 212(1986)455

Donnan exclusion failure in low anion site density membranes containing valinomycin 223 (1987)51

Mechanisms of membrane processes, electric gene transfer and cell fusion. Report on the workshop held at the "Zentrum für Interdisziplinäre Forschung" in Bielefeld on 3–4 April 1986 231 (1987)7

Membrane electrode

The effect of irreversible changes in the stoichiometry of oxygen reduction on the signal of membrane-covered oxygen probes 209(1986)19

Controlled-potential electrolysis at a membrane-coated electrode. Part III. Effect of the electric field in the dielectric 211(1986)353

Diphenhydramine-sensitive membrane electrodes based on poly(vinylchloride) matrices and their use in drug analysis 233(1987)29

Membrane permeability

Modification of human erythrocyte membrane potentials by the action of the polyoxyethylene detergent Triton X-100 211(1986)7

Hexachloroiridate(III/IV) on polymer-coated electrodes. Investigation of the membrane permeability and the charge-transport mechanism 229(1987)239

Membrane potential

Effect of dinitrophenol on membrane potential, membrane resistance and chlorophyll fluorescence of *Chara corallina* internodal cells at various pH values 231(1987)165

Transient peak membrane potential in a liquid membrane system generated by pH jump: non-linear response to perturbation 231(1987)193

Can the membrane potential of human erythrocytes suspended in isotonic unbuffered NaCl + KCl + sucrose media in the presence of cationic ionophore Triton X-100 be considered as the equilibrium membrane potential? 231 (1987)231

Membrane probe

Calibration of the carotenoid band shift and the response of the external membrane potential probe oxonol VI with diffusion potentials in (proteo)liposomes and chloroplasts 212(1986)55

Membrane reactivity

Digression on biochemical membrane reactivity in weak electromagnetic fields 212(1986)565

Membrane reconstitution

Electrical properties of a purified complex of α-latrotoxin and its receptor incorporated into planar lipid bilayers 231(1987)361

Membrane resistance

A quantitative theory of reversible electrical breakdown in bilayer membranes 211(1986)243

Membrane impedance of internodal cells of *Chara corallina* obtained by analysis of low level transients 231(1987)131

Effect of dinitrophenol on membrane potential, membrane resistance and chlorophyll fluorescence of *Chara corallina* internodal cells at various pH values 231(1987)165

Membrane transport

Membrane transport associated with double-layer charging of polymer modified electrodes 216 (1987)241

The transient response of electrodes coated with membrane-type polymer films under conditions of diffusion and migration of the redox ions 237(1987)13

Membrane vesicle

Dielectric spectroscopy of protein translational diffusion in prokaryotic membranes and membrane vesicles 211(1986)183

Mercaptoethanol

Adsorption of 2-mercaptoethanol and In(III)–2-mercaptoethanol on mercury electrodes in $HClO_4$ + $NaClO_4$ medium 238(1987)367

Mercaptopurine

Electrochemical behavior of horse heart cytochrome *c* in acid solutions using a 6-mercaptopurine-modified gold electrode 206 (1986)341

Mercuric cryptate

Electrochemical generation of mono- and dinuclear mercuric cryptates 202(1986)191

Mercurous oxalate

Multiple layer formation in the anodic deposition of $Hg_2C_2O_4$ 227(1987)147

Mercurous succinate

Activity coefficients for aqueous Na_2Succ solutions from emf measurements 230(1987)69

Mercury

Catalytic effects of Hg and Tl submonolayers on the electrooxidation of formic acid on Pt 205 (1986)135

Electrochemical adsorption and phase formation on mercury in oxalate ion solutions 207(1986)263

Adsorption of chloride at the mercury/aqueous $LaCl_3$ interface 209(1986)183

Anodic oxidation of mercury in the presence of thioether acids. Methylthioacetic acid 213(1986) 65

Determination of mercury in sea water by stripping voltammetry 214(1986)31

Electron exchange between mercury and denatured DNA strands 214(1986)373

Extending the metal interface generality of surface-enhanced Raman spectroscopy: underpotential deposited layers of mercury, thallium, and lead on gold electrodes 217(1987) 367

Partial charge transfer in the underpotential deposition of metals. Part II. Mercury deposition on polycrystalline gold electrodes 245(1988)21

On the nature of the transfer coefficient for ion transfer reactions 250(1988)225

Mercury / acetonitrile interface

Heterogeneous electron transfer kinetics for a variety of organic electrode reactions at the mercury–acetonitrile interface using either tetraethylammonium perchlorate or tetraheptylammonium perchlorate electrolyte 222(1987)129

Mercury amalgam

On the role of ion solvation in electrode kinetics: $M^{n+} + n\,e^- \rightleftharpoons M(Hg)$ 234(1987)361

Mercury amalgam electrode

The kinetics of electroreduction of lithium ions in tetrahydrofuran at mercury and mercury amalgam electrodes 215(1986)237

Mercury electrode

Rate constants of the electrode reactions of some quinones in hexamethylphosphoramide solutions at mercury electrodes 201(1986)205

Kinetics and mechanism of the $V(III) + e^- \rightleftarrows V(II)$ reaction at a mercury electrode in water + dimethylformamide mixtures 201(1986)283

A pulse polarographic measurement of the kinetics of dissociation of the $[Ru^{III}(edta)]_2$ dimer 202(1986)101

Mechanism of electron transfer through monomolecular films of neutral organic species adsorbed at an electrode surface 202(1986)169

Electrochemical generation of mono- and dinuclear mercuric cryptates 202(1986)191

Phase transitions in mercury + quinoline derivative systems. The anodic formation of Hg(I)–8-hydroxyquinoline-5-sulfonic acid chelate 202(1986)203

Cathodic hydrogen evolution on mercury from aqueous solutions of dilute acids at temperatures higher than 100 °C 204(1986)131

Specific adsorption of ascorbate ions on a mercury electrode in the presence of potassium perchlorate 206(1986)285

Reduction of complexes in unbuffered solutions. A unified treatment of the reduction of complexes at a stationary planar electrode or at an expanding mercury electrode 208(1986)57

Photoemission at a mercury electrode with the hydrogen ion as scavenger 208(1986)219

The growth of ordered films during the cathodic reduction of a tetraalkylammonium ion 209 (1986)91

Electrochemical reduction mechanism of 5(1H)-pyrromethenones in dimethylformamide on a mercury electrode 211(1986)125

Reduction of adenine nucleotides at the mercury electrode 211(1986)317

Voltammetric measurement of *cis*-dichlorodiammineplatinum(II) following interfacial accumulation at mercury electrodes 212(1986)395

Adsorption stripping square-wave voltammetry of copper ions in the presence of thiourea 214 (1986)65

Voltammetric determination of cyadox using adsorptive accumulation in a flow-through system 214(1986)115

Electrochemical reduction of Ni(II) on the hanging mercury drop electrode in the presence of dimethylglyoxime 214(1986)157

Cathodic stripping voltammetry of catechol and some catecholamines 214(1986)191

Adsorptive stripping voltammetry of biomacromolecules with transfer of the adsorbed layer 214(1986)359

Reduction of 2-cyclohexen-1-one in aqueous media on a mercury electrode 215(1986)293

Phase transitions in mercury–quinoline derivative systems. Anodic electrocrystallization processes in aqueous ferron solutions 215(1986)345

On the adsorption of cadmium(II) ions on a HMDE from KF + thiourea aqueous solutions. A chronocoulometric study 216(1987)273

Effect of sphericity on the voltammetric (polarographic) log plot for reversible amalgam formation 218(1987)1

Amalgam concentration at the surface of a spherical mercury electrode following a potential step 218(1987)41

Reversible oxidation processes in dichloromethane for triethyl-, diethyl-, trimethyl-, and dimethyllead compounds at mercury electrodes 218(1987)197

Electrogenerated $R_4N(Hg)_5$ films: stoichiometry and substituent effects 219(1987)247

The reduction mechanism of Cd(II) at mercury in dimethylsulfoxide containing tetraethylammonium perchlorate 221(1987)129

Electrochemical reduction of 1,1,4,4-tetraphenylbutatriene 222(1987)257

Double-layer structure at the mercury/solution interface with tetrahydrofuran and 2-methyltetrahydrofuran as solvents 222(1987)293

The mechanism of the electron-transfer reactions of cytochrome c_3 from *Desulfovibrio desulfuricans* Norway at a mercury electrode 223(1987)201

Adsorption of fulvic-like organic ligands and their Cd and Pb complexes at a mercury electrode 223(1987)235

Electrochemical study of the mechanism and kinetics of reductive glycoside elimination of adriamycin adsorbed on a mercury electrode surface 225(1987)187

Adsorptive stripping voltammetric behaviour of folic acid 225(1987)241

Electroreduction of primary alkyl iodides in acetonitrile 226(1987)27

The effect of cobalt ions on the catalytic hydrogen evolution at a mercury electrode 226(1987)51

Electrochemical behavior of the Eu(III/II)–EDTA system on a mercury electrode in water + dimethylsulphoxide (DMSO), water + acetonitrile (AN) and water + hexamethylphosphortriamide (HMPT) mixtures 226(1987)315

Novel oxidation processes for the methyltin compounds $(CH_3)_4Sn$, $(CH_3)_3SnCl$, $(CH_3)_2SnCl_2$ and CH_3SnCl_3 at mercury electrodes in dichloromethane 227(1987)29

Electrohydrodimerization of 2-cyclopenten-1-one in basic aqueous media on a mercury electrode 227(1987)55

Electrohydrodimerization of 4,4-dimethyl-2-cyclohexen-1-one in dimethylformamide on a mercury electrode 227(1987)67

Adsorption of a mixture of sodium dodecyl sulphate and dodecyl alcohol on a mercury electrode and its effect on the electrochemical processes of cadmium(II) in sodium chloride solution 227(1987)129

Multiple layer formation in the anodic deposition of $Hg_2C_2O_4$ 227(1987)147

The electrosorption valency of organic electrosorbates. Part II. Aromatic and heterocyclic compounds 229(1987)141

A study of the electrochemical reduction of bilirubin and its derivatives 231(1987)101

Solvent effects on heterogeneous electron transfer rates for organic redox couples: tert-nitrobutane reduction at mercury 233(1987)161

Alternative interpretations of kinetic data: the reduction of zinc at mercury electrodes 233 (1987)275

Electrode processes of the Eu(III)/Eu(II) system in water + hexamethylphosphortriamide mixtures 234(1987)263

Electrochemical reduction of bromonitriles: Mechanism and polarographic maxima 235 (1987)209

Electrode reactions at extremely negative potentials. Part II. The kinetics of the Ba(II)/Ba(Hg) electrode reaction in aqueous perchlorate solutions 236(1987)177

Adsorption of 2-mercaptoethanol and In(III)–2-mercaptoethanol on mercury electrodes in $HClO_4$ + $NaClO_4$ medium 238(1987)367

Electrodimerization of crotonic aldehyde in aqueous media on a mercury electrode 239 (1988)239

Analysis of a quasi-reversible two-electron cyclic voltammetric wave for an organometallic Ir(III)/Ir(I) couple at platinum and mercury electrodes 239(1988)253

Photocurrent kinetics during electron emission from a metal into an electrolyte solution. Part IX. Electrode reactions of the intermediates generated in the bromate ion reduction on mercury 241(1988)247

Coadsorption of Bi(III) and Cl^- at a mercury electrode 241(1988)329

A voltammetric study of thiazolidine-4-carboxylic acid on mercury electrodes 245(1988) 157

Electrochemical reduction of iron(II) complexes with {3-(2-pyridyl)-5,6-diphenyl-1,2,4-triazine} 245(1988)201

Influence of water on the electroreduction of 2-nitrophenylhydrazones in acetonitrile 246 (1988)399

Electrooxidative formation and characteristics of Cr(III)–thio complexes at mercury electrodes 247(1988)215

An in-situ surface Fourier transform infrared study of the adsorption of isoquinoline at a stationary mercury electrode 247(1988)277

Adsorption of β-cyclodextrin on the mercury electrode from water and a water + ethanol mixture 247(1988)287

Chronocoulometric study of electrode kinetics in the case of an adsorbed redox couple. Progesterone electroreduction on mercury from aqueous solutions 248(1988)55

Electrochemistry of the nickel–cyanide system at mercury electrodes. Part III. The role of intermediate products in the mechanism of $Ni(CN)_4^{2-}$ electroreduction at mercury electrodes 248(1988)139

Hydrophilic and hydrophobic domains in the flat protein conformomer as a cause of double step polarographic waves 248(1988)387

Mercury film electrode

Studies of the process of catalytic hydrogen evolution on the epoxy-resin-impregnated graphite-based mercury film electrode 213(1986) 127

Theoretical considerations on square wave and differential pulse voltammetry applied in anodic stripping with use of mercury film electrodes 213(1986)177

An iridium-based mercury-film electrode. Part I. Selection of substrate and preparation 216 (1987)53

Gamma-irradiated polymer-modified mercury film electrodes 222(1987)243

An iridium based mercury film electrode. Part II. Comparison of mercury-film electrode behaviors: theory versus reality 239(1988)113

Mercury ion

Deposition and electrochemical stripping of mercury ions on polypyrrole based modified electrodes 246(1988)181

Mercury nitrate

Comparative studies of electrochemical phase formation by amperometric and microscopic methods. Part I. Nucleation kinetics in dilute solutions of mercury nitrate 235(1987)237

Mercury oxidation

Determination of stability constants from polarographic anodic signals for metal complexes with some S-containing ligands 241(1988)113

Mercury / solution interface

Condensed thymine films at the mercury/water interface. Part I. General features 201(1986)133

Condensed thymine films at the mercury/water interface. Part II. Effects on electrode kinetics 201(1986)145

Phospholipid monolayers at the mercury/water interface 202(1986)253

Adsorption of aliphatic monoethers of ethylene glycol (alkoxyethanol) at the free water surface and at the Hg/solution interface 204(1986)299

Selective inhibition by tetraphenylphosphonium chloride 205(1986)299

On diffusion-controlled film formation and dissolution 205(1986)303

Adsorption of 2,3-dimethylpyridine at the mercury/electrolyte interface 209(1986)203

Adsorption of *N*-acetylglycine and *N*-benzoylglycine at the mercury–aqueous solution interface 210(1986)181

Adsorption and film formation of uracil derivatives at the mercury/electrolyte interface in the presence of different supporting electrolytes 213(1986)339

Condensed thymine films at the mercury/water interface. Part III. Thermodynamic analysis 218 (1987)273

Condensed thymine films at the mercury/water interface. Part IV. Stochastic measurements 218 (1987)287

Double-layer structure at the mercury/solution interface with tetrahydrofuran and 2-methyltetrahydrofuran as solvents 222(1987)293

On the formation of two-dimensional condensed films at the interface mercury/ferron aqueous buffered solutions 224(1987)237

Investigation of the adsorption kinetics of 2,3-dimethylpyridine at the mercury/electrolyte interface 224(1987)261

On the two modes of condensation displayed by thiourea at the mercury–water interface 226 (1987)267

Solvent structure at the mercury/solution interface in dimethylsulphoxide 226(1987)283

Condensed thymine films at the mercury/water interface. Part V. Phase transitions 230(1987)241

A sodium effect on the two-dimensional condensation of 6-methyl-uracil 236(1987)309

Phase transitions of salt monolayers at the mercury/water interface. Tetraphenylphosphonium chloride 236(1987)311

A test of the maximum bubble pressure method for electrocapillary measurements 237(1987)27

Interfacial behaviour of oligoriboadenylates at the mercury–solution interface 237(1987)261

The electrical double layer at the mercury/solution interface in organic solvents 244(1988)1

Phospholipid monolayers of di-oleoyl lecithin at the mercury/water interface 244(1988)99

Phospholipid monolayers of di-oleoyl lecithin (di-O-PC) at the mercury/water interface. Effects on faradaic reactions 248(1988)167

Two-dimensional nucleation according to an exponential law with diffusion-controlled growth in the adsorption of camphor-10-sulfonate at the mercury/electrolyte interface 250(1988)159

Mercury surface

Ab initio cluster model approach to the chemisorption of hydrogen on mercury 241 (1988)105

Mercury ultramicroelectrode

The behaviour of the mercury ultramicroelectrode 239(1988)427

Mersalyl

Modulation of the electrochemical membrane potential in mitochondria by sulfhydryl reagents 231(1987)261

Metabolism

Iron-induced Ca^{2+} release from rat liver mitochondria *via* H_2O_2 metabolism 232(1987) 203

Metabolite

Electrochemistry of methotrexate and its metabolites. Part II. Reduction of 7-hydroxymethotrexate 220(1987)323

Metal ad-atom

Some specific features of the catalytic role of upd foreign metal adatoms and water on the anodic oxidation of absolute methanol on Pt 221(1987)175

Metal analysis

Square wave voltammetry — a rapid and reliable determination method of Zn, Cd, Pb, Cu, Ni and Co in biological and environmental samples 214 (1986)51

Metal-assisted synthesis

Cathodic behaviour of $[(\eta^3\text{-}C_3H_5)Pd(Ph_2P\text{–}C_2H_4\text{–}PPh_2)]^+$ in acetonitrile solution: an electrochemical process involving very fast consecutive chemical reactions 230 (1987)165

Metal atom

The infrared spectra of surface metal atom vibrations. SNIFTIRS studies in the far infrared region using time resolved FTIR techniques 209 (1986)387

Metal complex

Electrode kinetics of metal complexes confined in electropolymerized poly(*N*,*N*-dialkyl substituted aniline) films on graphite surfaces 215(1986)191

Activation of oxygen by metal complexes and its relevance to autoxidative processes in living systems 232(1987)29

Voltammetry of metal complex systems with different diffusion coefficients of the species involved. Part I. Analytical approaches to the limiting current for the general case including association/dissociation kinetics 234(1987)1

Voltammetry of metal complex systems with different diffusion coefficients of the species involved. Part II. Behaviour of the limiting current and its dependence on association/dissociation kinetics and lability 234(1987)17

Voltammetry of metal complex systems with different diffusion coefficients of the species involved. Part III. The current–potential relation for the general case including association/dissociation kinetics 235(1987)1

Determination of stability constants from polarographic anodic signals for metal complexes with some S-containing ligands 241(1988)113

Metal compound

Role of metal complexes in the formation–detoxication action of active oxygen species 232(1987)21

Metal crystal

Nucleation rings around a growing crystal 220 (1987)169

Metal cyclam

Electrocatalytic reduction of nitrate and nitrite to hydroxylamine and ammonia using metal cyclams 224(1987)199

Metal electrode

A theory of adiabatic electron-transfer reactions 204(1986)31

Photoresponse of native photosynthetic systems and chlorophyll-containing films on metal electrodes 228(1987)109

Laser-induced electron ejection at metal surfaces. Evidence for photoelectroreduction of cobalt(III) and chromium(III) ammines by direct heterogeneous electron transfer 228(1987)265

The double layer capacity of jellium with pseudopotentials 229(1987)39

Dynamics of adiabatic electron transfer reactions at metal electrodes 230(1987)43

A unified model of the adiabatic reactions of electron transfer at metal electrodes 241(1988)45

Metal/inner layer capacity

A semiempirical approach to the metal/inner layer capacity in the absence of specific adsorption 239(1988)405

Metal ion

Reduction of complexes in unbuffered solutions. A unified treatment of the reduction of complexes at a stationary planar electrode or at an expanding mercury electrode 208(1986)57

Metal ions and complexes as modulators of protein–interfacial electron transport at graphite electrodes 217(1987)331

Cyclic voltammetric studies of nitrato complexes of various metal ions in molten $LiNO_3 + KNO_3$ at 180 °C 221(1987)115

On the role of ion solvation in electrode kinetics: $M^{n+} + n\,e^- \rightleftharpoons M(Hg)$ 234(1987)361

Metal layer

Hydrogen photoevolution at p-type silicon electrodes coated with discontinuous metal layers 228(1987)97

Metallic electrode

Electrocatalysis of CO_2 reduction at surface modified metallic and semiconducting electrodes 209(1986)101

Electrochemistry and photoelectrochemistry of chlorophyll on a metallic electrode. Part I. Properties of chlorophyll adsorption films on metals 227(1987)99

Electrochemistry and photoelectrochemistry of chlorophyll on a metallic electrode. Part II. Photoreaction of adsorbed chlorophyll 227 (1987)115

Metalliding

Application of cyclic voltammetry to the study of diffusion and metalliding processes 244(1988) 61

Metallocyanide

Metallocyanide modified nickel electrode surfaces. Enhanced currents from solution species 210(1986)323

Metallographic polishing

Influence of polishing and of electrochemical pretreatment on the performance of glassy-carbon electrodes in electrochemical detection 201(1986)11

Metalloporphyrin

Metalloporphyrin–polypyrrole film electrode: characterization and catalytic application 207 (1986)87

Solvent effects on electrode potentials of metalloporphyrins. Reduction of 5,10,15,20-tetraphenylporphinato complexes in non-aqueous media 235(1987)189

Metalloprotein

A novel mediator for the investigation of the electrochemistry of metalloproteins 212(1986)99

Metal–metal bond length

Structural consequences of electron-transfer reactions. Part XIV. Fast charge-transfer reactions of binuclear complexes undergoing large changes in metal–metal bond lengths 222 (1987)151

Metal/metal ion potential

Correlations between the equilibrium potential and the potential of zero charge of metals in different modifications 204(1986)343

Metal monolayer

Electrocatalytic influence of underpotential Tl, Pb and Bi monolayers on the electrochemical behaviour of rhodizonic acid and tetrahydroxy-1,4-benzoquinone on Pt in acid solutions 213 (1986)135

Metal phase analysis

Application of an electroanalytical method to metal phase analysis 242(1988)63

Metal phthalocyanine

A mechanistic study of the electro-oxidation of hydrazine on phthalocyanines of VO, Cr, Mn, Ni, Cu and Zn attached to graphite electrodes 210(1986)95

Metal/polyelectrolyte complex

Pulse polarography of metal/polyelectrolyte complexes and operation of the mean diffusion coefficient 202(1986)57

Metal/solution interface

The double-layer capacity of *sp* metals 205 (1986)323

On the role of local modes in the optics of the metal/electrolyte interface 228(1987)179

Electron density at the metal–liquid interface 245(1988)307

Effect of molecular interactions at the interface. Part II. The metal/non-aqueous electrolyte interface 247(1988)57

Metal/solution potential difference

Conditions enabling determination of entropy and enthalpy of activation of electrode reactions at zero metal–solution potential difference 210 (1986)167

Metal–solvent interaction

Electroreflectance spectroscopy of gold single crystals. Influence of the solvent 207(1986)235

Metal speciation

Application of ASV for trace metal speciation. Part V. The pseudo-polarography of zinc by RGCE 214(1986)37

Application of ASV for trace metal speciation. Part VI. A computerized pseudopolarographic system 214(1986)95

Metal–trithioanthrone film

Electrodeposition of metal–trithioanthrone films 249(1988)281

Metal/vacuum interface

Quantum chemical calculations on the electrical double layer at the metal/vacuum interface. Part II. Properties of single crystal surfaces 208 (1986)257

Methaemoglobin

Lipid hydroperoxides in sickle cell membranes 232(1987)257

Methane

Reduction of CO_2 and CO to methane on Cu foil electrodes 245(1988)223

A pyrolytic carbon film electrode for voltammetry. Part V. Characterization and comparison with the glassy carbon electrode by electrochemical pretreatment in basic solution 248(1988)283

Methanol

Electrocatalytic reduction of carbon dioxide to methanol. Part III. Use of an electrochemical photocell 201(1986)359

The electrochemical reduction of aqueous carbon dioxide to methanol at molybdenum electrodes with low overpotentials 205(1986)219

Electrocatalytic reduction of carbon dioxide to methanol. Part IV. Assessment of the current–potential curves leading to reduction 206(1986)209

Conductance of 1–1 electrolytes in methanol solutions from −45 to +25 °C 214(1986)485

Relationship of two electroactive forms of horse heart cytochrome *c* at gold and glassy carbon electrodes in water and methanol 218(1987)251

Electrocatalytic reduction of CO_2 to methanol. Part VIII. Photoassisted electrolysis and electrochemical photocell with n-TiO_2 anode 220(1987)333

Nitrogen fixation. Part I. Electrochemical reduction of titanium compounds in the presence of catechol and N_2 in MeOH or THF 230(1987) 143

Surface methoxylation as the key factor for the good performance of n-Si/methanol photoelectrochemical cells 233(1987)37

The real standard potential on the aqueous hydrogen scale of the silver/silver chloride electrode in methanol: the surface potential of methanol 243(1988)353

Nitrogen fixation. Part II. Nitrogen reduction by electrochemically generated vanadium(II) promoted by various organic ligands in basic methanol 250(1988)385

Methanol adsorbate

Infrared spectroscopic study of methanol and formic acid adsorbates on a platinum electrode. Part I. Comparison of the infrared absorption intensities of linear CO(a) derived from CO, CH_3OH and HCOOH 213(1986)149

Infrared spectroscopic study of methanol and formic acid adsorbates on a platinum electrode. Part II. Role of the linear CO(a) derived from methanol and formic acid in the electrocatalytic oxidation of CH_3OH and HCOOH 218(1987)155

Infrared spectroscopic study of the methanol adsorbates at a platinum electrode. Part I. Influence of the bulk concentration of methanol upon the nature of the adsorbates 225(1987)215

New results for the electrosorption of methanol on polycrystalline platinum in acid medium obtained by programmed potential voltammetry 234(1987)315

Infrared spectroscopic study of the methanol adsorbates at a platinum electrode. Part II. The Pt (100) surface in an acid medium 237(1987)119

Infrared spectroscopic study of the methanol adsorbates at a platinum electrode. Part III. Structural effects and behaviour of a polycrystalline surface 238(1987)323

Methanol dissociation

Electrochemical study on the poisoning intermediate formed from methanol dissociation at low index and stepped platinum surfaces 236 (1987)95

Methanol electrode

Application of a backward feed and exhaust (BFE) type methanol anode to zinc electrowinning 205(1986)125

Reduction of the cell voltage in copper electrowinning by using the methanol BFE anode 246(1988)313

Methanol oxidation

On-line mass spectroscopy of volatile products during methanol oxidation at platinum in acid solutions 201(1986)403

Electrocatalysis by ad-atoms. Part XX. Rate-determining step in methanol oxidation enhanced by oxygen-adsorbing ad-atoms 209(1986)151

Electrochemical oxidation of HCOONa on Pt in acidic solutions 220(1987)125

A polynuclear mixed-valent ruthenium oxide/cyanoruthenate composite that yields thin coatings on a glassy carbon electrode with high catalytic activity toward methanol oxidation 220 (1987)295

Some specific features of the catalytic role of upd foreign metal adatoms and water on the anodic oxidation of absolute methanol on Pt 221(1987)175

Influence of electrochemical activation of an Au electrode on its electrocatalytical activity in relation to the oxidation of methanol in basic medium 223(1987)277

A kinetic analysis of the oxidation of methanol at platinum-based electrodes by quantitative determination of the reaction products using liquid chromatography 225(1987)281

Identification of the adsorbate during methanol oxidation 229(1987)367

Direct proof of the hydrogen in the methanol adsorbate at platinum — an ECTDMS study 229(1987)377

Electrocatalysis by ad-atoms. Part XXI. Catalytic effects on the elementary steps in methanol oxidation by non-oxygen-adsorbing ad-atoms 229(1987)385

Preparation of highly dispersed Pt + Ru alloy clusters and the activity for the electrooxidation of methanol 229(1987)395

On the electrocatalytic oxidation of methanol vapors at Au–Nafion electrodes 235(1987)393

Electrocatalysis of methanol oxidation by adsorbed tin on platinum 238(1987)151

COH and CO as adsorbed intermediates during methanol oxidation on platinum 238(1987)383

Methanol oxidation on unsupported and carbon supported Pt + Ru anodes 240(1988)133

Base metal oxides as promotors for the electrochemical oxidation of methanol 240 (1988)349

Mechanisms of formic acid, methanol, and carbon monoxide electrooxidation at platinum as examined by single potential alteration infrared spectroscopy 241(1988)143

Evidence for COH as an adsorbed intermediate in the anodic oxidation of methanol by ECDTMS and SNIFTIRS 242(1988)327

Catalysis of the electrochemical oxidation of CH_3OH by molybdenum-modified platinum 248(1988)181

In-situ IR study of adsorption and oxidation of methanol on platinum and platinised glassy carbon electrodes in sulphuric acid solution 250 (1988)127

Enhancement in methanol oxidation by molybdenum modification of Pt–SPE electrodes 250(1988)213

New in-situ IR results on adsorption and oxidation of methanol on platinum in acidic solution 250(1988)451

Methanol + water mixture

The solvation potential at the interface between water and methanol + water mixtures 215(1986) 63

Methionine

A spectroelectrochemical study of carboxymethylated cytochrome-*c* 231(1987)27

Methotrexate

Electrochemistry of methotrexate and its metabolites. Part II. Reduction of 7-hydroxymethotrexate 220(1987)323

Methoxylation

Surface methoxylation as the key factor for the good performance of n-Si/methanol photoelectrochemical cells 233(1987)37

Methoxythiophene

Characterization and spectroelectrochemical studies of soluble polymerized 3-methoxythiophene 236(1987)239

Electrochemically controlled binding and release of salicylate, $TCNQ^{--}$ and ferrocyanide from films of oligomeric 3-methoxythiophene 247 (1988)173

Methylation

Effect of C(5) methylation on self- and heteroassociation of cytidine in aqueous solution 212(1986)449

Methylcyclohexane

The electrochemical reactivity of toluene at porous Pt electrodes 244(1988)273

Methyldihydroxypyrimidine

The two-dimensional condensation of 2-methyl-4,6-dihydroxy-pyrimidine at the water/mercury interface 249(1988)311

Methylene blue

Supramolecular phenomena in organic redox films at electrodes. Part II. The methylene blue/leucomethylene blue redox couple at the gold electrode 219(1987)183

Organic monolayer formation at a sulphur modified gold electrode. The methylene blue/leucomethylene blue redox couple 233 (1987)199

Square-wave voltammetry of an adsorbed reactant 248(1988)239

Electrochemical separation of the inner monolayer in methylene blue/leucomethylene blue conductive films induced by a sulphur-modified gold surface 250(1988)427

Methylethylimidazolium chloride

Electrodeposition of aluminium in aluminium chloride/1-methyl-3-ethylimidazolium chloride 248(1988)431

Methyloxazolidone

Electrochemical studies in 3-methyl-2-oxazolidone 248(1988)441

Methylphenylpyridinium ion

One-electron and two-electron reductions of 1-methyl-4-phenyl pyridinium (MPP^+) 242(1988) 171

The reaction between 1-methyl-4-phenylpyridinium (MPP^+) and superoxide anion in acetonitrile 250(1988)83

Methylpyrrole

Electrochemical immobilisation of enzymes. Part II. Glucose oxidase immobilised in poly-*N*-methylpyrrole 224(1987)37

Methyltetrahydrofuran

Double-layer structure at the mercury/solution interface with tetrahydrofuran and 2-methyltetrahydrofuran as solvents 222(1987)293

Methylthioacetic acid

Anodic oxidation of mercury in the presence of thioether acids. Methylthioacetic acid 213(1986) 65

Cathodic stripping voltammetry of thioether acids. Methylthioacetic and 2,2′-thiobisacetic acids 215(1986)103

Methyltin compound

Novel oxidation processes for the methyltin compounds $(CH_3)_4Sn$, $(CH_3)_3SnCl$, $(CH_3)_2SnCl_2$ and CH_3SnCl_3 at mercury electrodes in dichloromethane 227(1987)29

Methyl uracil

A sodium effect on the two-dimensional condensation of 6-methyl-uracil 236(1987)309

Methyl viologen

Electrochemical behavior of methyl viologen in zeolite particle films 208(1986)95

Effect of methylviologen on the hydrogen evolution at mercury electrodes in aqueous buffer solutions 230(1987)177

Mechanistic aspects of reaction selectivities on surfactant-modified Pd and Pt electrodes and catalysts 235(1987)131

Complex formation of methyl viologen and diquat with macrocyclic ether dibenzo-24-crown-8 240(1988)105

Micellar solution

Voltammetric determination of indole in micellar and emulsified media 234(1987)175

Micelle

Micellar complexes of energy transfer 211(1986) 95

Electrochemistry of bipyridyl derivatives of cobalt in solutions of anionic and cationic micelles 233(1987)173

Electrocatalytic reactions in organized assemblies. Part V. Dehalogenation of 4,4′-dibromobiphenyl in cationic micelles at bare and clay-modified carbon electrodes 245(1988)331

Miconazole

Interaction of calmodulin antagonists with yeast. Comparison with the effect of miconazole, dio-9 and ethidium on Sr^{2+} uptake, K^+ efflux and plasmamembrane ATPase activity 212(1986)519

Microband electrode

Theory of chronoamperometric curves at microband electrodes 225(1987)19

Derivation of an approximate equation for chronoamperometric curves at microband electrodes and its experimental verification 230 (1987)61

Linear sweep voltammetry at microband electrodes 237(1987)163

Microbial culture

Potentiometric measurement of lipoic acid reduction in microbial cultures. Part III. Experimental investigation and modeling of the effects exerted by beta-lactam antibiotics on the potential–time signals 231(1987)43

Microbial fuel cell

Effect of hydrophobic layers on the electrochemical electron transfer reaction of some mediators in microbial fuel cells 236(1987)305

Microbiological slime

An example of microbiologically influenced corrosion. The behaviour of stainless steels in natural seawater 212(1986)347

Microcalorimetry

Effect of C(5) methylation on self- and heteroassociation of cytidine in aqueous solution 212(1986)449

Microcylinder electrode

Electrochemical kinetics at microelectrodes. Part I. Quasi-reversible electron transfer at cylinders 206(1986)23

Voltammetry at microcylinder electrodes. Part V. Pulse voltammetric current–potential curves for quasi-reversible and totally irreversible electrode reactions 206(1986)47

Voltammetry at microcylinder electrodes. Part VI. Second-order catalytic reaction of Fe(edta) with H_2O_2 245(1988)39

Theory of irreversible cyclic voltammograms at microcylinder electrodes 247(1988)17

Estimation of charge transfer kinetic parameters from irreversible cyclic voltammograms at carbon fiber electrodes 247(1988)29

Microdisc electrode

The behavior of microdisk and microring electrodes 222(1987)107

Theory of stationary current–potential curves at microdisk electrodes for quasi-reversible and totally irreversible electrode reactions 235(1987) 87

Measurement of ultrafast electrode kinetics via steady-state voltammograms at microdisc electrodes 248(1988)467

The behavior of microdisk and microring electrodes. Mass transport to the disk in the unsteady state. Chronopotentiometry 250(1988) 257

The behavior of microdisk and microring electrodes. Mass transport to the disk in the unsteady state. Chronoamperometry 250(1988) 269

The behavior of microdisk and microring electrodes. Mass transport to the disk in the unsteady state. The ac response 250(1988)277

The behavior of microdisk and microring electrodes. Mass transport to the disk in the unsteady state. The effects of coupled chemical reactions: the CE mechanism 250(1988)285

Microelectrode

Solid state voltammetry of electroactive solutes in polyethylene oxide polymer films on microelectrodes 208(1986)185

Electrochemical kinetics at microelectrodes. Part II. Cyclic voltammetry at band electrodes 215 (1986)49

Diffusional impedance of stationary microelectrodes 215(1986)139

Hydrodynamic voltammetry at channel electrodes. Part IX. Edge effects at rectangular channel flow microelectrodes 217(1987)33

Chronoamperometric current at hemicylinder and band microelectrodes: theory and experiment 217(1987)417

Application of transient electrochemical techniques to inlaid ultra-microelectrodes. Assessment of fabrication quality 218(1987)187

Voltammetric measurements with microelectrodes in low-conductivity systems 220 (1987)31

Electrochemical kinetics at microelectrodes. Part III. Equivalency between band and hemicylinder electrodes 225(1987)33

Electrochemical kinetics at microelectrodes. Part IV. Electrochemistry in media of low ionic strength 225(1987)49

Microelectrode studies in cultured epithelial cells 231(1987)141

Simplifications in the theory of step experiments at microelectrodes 235(1987)97

All steady-state microelectrodes have the same "*iR* drop" 237(1987)303

Nucleation on active sites. Part IV. Invention of an electronic method of counting the number of crystals as a function of time; and the discovery of nucleation rate dispersion 239(1988)17

The microelectrode coupled with a collecting counter electrode 244(1988)339

Theory of electrochemical processes at an inlaid disc microelectrode under steady-state conditions 245(1988)71

Theory of microelectrode voltammetry with little electrolyte 250(1988)1

Microelectrode array

The onset of buoyancy-induced convection at a micro-mosaic electrode 229(1986)429

Diffusion to ensembles of microelectrodes 240 (1988)61

Microelectrophoresis

Microelectrophoresis and fluorescence studies of the glycoprotein sheath covering the outer membrane surface in murine neuroblastoma cells 231(1987)429

Microemulsion

Application of carbon-fiber microelectrodes to the study of non-conductive inverse microemulsions. Interpretation of the diffusion coefficients 210(1986)205

Microenvironment

Surface functionalization of electrodes with oxometalates entrapped in polymeric matrices. Evidence for a microenvironment effect 240 (1988)325

Micromachining

A new method for the study of potential-dependent interface characteristics for solids 237(1987)171

Microorganism

Mediating effect of ferric chelate compounds in microbial fuel cells with *Lactobacillus plantarum*, *Streptococcus lactis*, and *Erwinia dissolvens* 231 (1987)217

Micropipette tip

Ion transfer reactions across a liquid–liquid interface supported on a micropipette tip 208 (1986)179

Microporous film

Microporous aluminum oxide films at electrodes. Part II. Studies of electron transport in the Al_2O_3 matrix derivatized by adsorption of poly(4-vinylpyridine) 207(1986)49

Microporous glass

Microporous glass films as support media for electroactive films on electrodes 227(1987)287

Microporous membrane

Studies on the membrane potentials of a new microporous membrane in the presence of alkali chlorides with and without control of pores using precipitates of potassium salts 242(1988)155

Microprocessor instrumentation

Pulse voltammetry and polarography. Recent progress in microprocessor instrumentation 214 (1986)79

Microring electrode

The behavior of microdisk and microring electrodes 222(1987)107

The behavior of microdisk and microring electrodes. Mass transport to the disk in the unsteady state. Chronopotentiometry 250(1988) 257

The behavior of microdisk and microring electrodes. Mass transport to the disk in the unsteady state. Chronoamperometry 250(1988) 269

The behavior of microdisk and microring electrodes. Mass transport to the disk in the unsteady state. The ac response 250(1988)277

The behavior of microdisk and microring electrodes. Mass transport to the disk in the unsteady state. The effects of coupled chemical reactions: the CE mechanism 250(1988)285

Microscopy

Comparative studies of electrochemical phase formation by amperometric and microscopic methods. Part I. Nucleation kinetics in dilute solutions of mercury nitrate 235(1987)237

Comparative studies of electrochemical phase formation by amperometric and microscopic methods. Part II. Nucleation kinetics in the presence of surfactants 235(1987)249

Microstructure

Microstructural enhancement of mass transport through Nafion + Nuclepore composite membranes 235(1987)299

Microtubule

Microtubule-dependent membrane interactions studied in two types of double bilayer membrane systems 211(1986)395

Microwave absorption

Direct excitation of internal modes of DNA by microwaves 212(1986)63

Middle peak

Cyclic voltammetry of polyaniline: interpretation of the middle peak 249(1988)97

Migration

Electron hopping between fixed sites. Equivalent diffusion and migration laws 201(1986)211

The transient response of electrodes coated with membrane-type polymer films under conditions of diffusion and migration of the redox ions 237(1987)13

Diffusion-migration for one-dimensional mixed conduction in thin layers at steady state 238 (1987)1

Electron hopping between fixed sites. "Diffusion" and "migration" in counter-ion conservative redox membranes at steady state 242(1988)1

Milk

Enzyme sensor system for potentiometric urea determination in serum and milk 209(1986)69

Mirage effect

The mirage effect in electrochemistry 228(1987) 481

The mirage effect in photoelectrochemistry 243 (1988)187

Mitochondrial membrane

Modulation of the electrochemical membrane potential in mitochondria by sulfhydryl reagents 231(1987)261

Mitochondrion

Redox reactions in lipid bilayers and membrane bioenergetics 211(1986)19

Studies on the binding of dicyclohexylcarbodiimide to the mitochondrial bc_1 complex 212(1986)301

Proton flow through the intramembrane sector of the ATP synthase complex of bovine heart mitochondria 231(1987)147

The role of peroxides in mitochondrial reduction of dioxygen to water 232(1987)51

Iron-induced Ca^{2+} release from rat liver mitochondria *via* H_2O_2 metabolism 232(1987) 203

Lipid peroxidation and brain mitochondrial damage induced by ethanol 232(1987)211

Mixed conductor membrane

Exchange diffusion in one dimension. Liquid electrolytes and mixed conductor membranes 243(1988)279

Mixed electrode

Separation of partial processes at mixed electrodes 228(1987)347

Mixed electrolyte

Comparison of the ionic adsorption theories for the electrode/solution interface by computer simulation 234(1987)31

Mixed oxide electrode

Surface properties of $RuO_2 + IrO_2$ mixed oxide electrodes 214(1986)535

Mobile phase

Influence of the experimental conditions on the performance of the electrokinetic detector 226 (1987)227

Model membrane

Use of 9-aminoacridine in the evaluation of liposome surface charge density: role of the adsorption on lipidic sites 231(1987)277

Modified electrode

Impedance characteristics of a modified electrode 202(1986)69

Electropolymerisation and redox properties of bipyridyl–polypyrrole and Cu(II) bipyridyl–polypyrrole film electrodes 205(1986) 309

Electrochemical control of reactivity of other redox species on an electrode coated with a Langmuir–Blodgett multilayer film 205(1986)329

Metalloporphyrin–polypyrrole film electrode: characterization and catalytic application 207 (1986)87

Intra-molecular hydrogen bonding in surface-modified gold electrodes and the effect of specific anions on the electrochemistry of cytochrome *c* 208(1986)395

Electrocatalysis of CO_2 reduction at surface modified metallic and semiconducting electrodes 209(1986)101

Researches on chemically modified electrodes. Part XV. Preparation and electrochromism of the vanadium hexacyanoferrate film modified electrode 210(1986)31

Metallocyanide modified nickel electrode surfaces. Enhanced currents from solution species 210(1986)323

Electronically conducting poly-tris(5,5′-bis[(3-acrylyl-1-propoxy)carbonyl]-2,2′-bipyridine)ruthenium-modified electrodes. Studies of bilayer films and solution redox reactions 213(1986)203

Direct electrochemistry of horse-heart cytochrome *c* at amino acid-modified gold electrodes 213(1986)333

A phosphate-sensitive electrode based on $BiPO_4$-modified glassy carbon 214(1986)135

Electrocatalytic oxidation of cytochrome-*c* at a quaternized poly-4-vinylchloride/ferricyanide modified gold surface 215(1986)385

Researches on chemically modified electrodes. Part XVI. Electron diffusion coefficient in vanadium hexacyanoferrate film 217(1987)49

Direct electrochemistry of bacterial cytochrome c_{551} at surface-modified gold electrodes 217 (1987)129

Surface substitution reactions at modified gold electrodes and their effect on the electrochemistry of horse heart cytochrome *c* 217(1987)141

Combined electrochemical and radiotracer (cyclic voltradiometric) study of the motion of counter-ions in tetracyanoquinodimethane modified electrodes 218(1987)297

Chemical and mechanical properties of redox polymer-modified electrodes. Part I. A mechanical/electrochemical model 219(1987)49

Chemical and mechanical properties of redox polymer-modified electrodes. Part II. Redox thermodynamics of plasma-polymerized vinylferrocene electrodes 219(1987)71

Chemical and mechanical properties of redox polymer-modified electrodes. Part III. Redox thermodynamics of linear polyvinylferrocene electrodes 219(1987)91

Conversions of complex compounds and quinone on surface-modified electrodes 219(1987)153

Digital simulation of the channel flow-through electrochemical cell. A theoretical study of the determination of solute adsorption on modified electrodes 222(1987)117

Kinetics of mediated oxidation at electrodes modified by poly(styrenesulfonate) containing tris(2,2′-bipyridine)osmium(III/II) complexes as electron-transfer centers 222(1987)201

A poly(pyrrole–nickel(II)pyridiniumporphyrin)-modified electrode 224(1987)295

Electrocatalytic reduction of O_2 at electrodes modified by films of redox polymers with anthraquinone moieties 225(1987)177

Researches on chemically modified electrodes. Part XXIV. Preparation and characterization of Nafion polymer film modified electrodes containing Fe(II)–phen complex 233(1987)19

Characteristics of a glassy carbon electrode modified in a mixture of osmium tetroxide and hexacyanoruthenate 233(1987)87

A study of the electrochemical growth and optical properties of polymeric thionine films on platinum using ellipsometry 233(1987)125

Redox mediation involving oxide films as examined by surface-enhanced Raman spectroscopy: peroxodisulfate reduction at oxide-modified gold electrodes 234(1987)237

Direct electrochemistry of native and 4-chloro-3,5-dinitrophenyl (CDNP)-substituted cytochrome *c* at surface-modified gold and pyrolytic graphite electrodes 235(1987)153

Electrokinetics of the reduction of chromium(VI) ions entrapped in chromium-modified passive iron electrodes 241(1988)265

Easy preparation of electrodes modified by conjugated polypyridine films displaying coordinative properties and their effectiveness as mediators of electrocatalytic processes 242 (1988)131

Bifunctionalized polypyrrole modified electrodes containing reversible electron donor and acceptor moieties. Examples of electroinduced chemical reactions occurring inside polymer films 244 (1988)163

Transient charge transport through modified electrodes by EHD impedance 244(1988)325

Deposition and electrochemical stripping of mercury ions on polypyrrole based modified electrodes 246(1988)181

In-situ surface EXAFS at chemically modified electrodes 248(1988)77

Studies of surface-modified glassy carbon electrodes obtained by electrochemical treatment. Its effect on $Ru(bpy)_3^{2+}$ adsorption and the electron-transfer rates of the Fe^{3+}/Fe^{3+} couple 248(1988)321

Epoxidation of *cis*-cyclooctene by molecular oxygen electrocatalysed by polypyrrole–manganese porphyrin film modified electrodes 250(1988)191

Modified material

Rechargeable manganese oxide electrodes. Part I. Chemically modified materials 223(1987)107

Modified oxide film

Electron-transfer reactions on pure and modified oxide films 204(1986)153

Modified surface

Lateral modification and organization of mixed adlattices on polycrystalline platinum electrodes 230(1987)205

Modifier

Electrochemistry and spectroelectrochemistry of cytochrome *c* at a platinum electrode 226(1987) 199

Electroactive charge transfer polymers from anodic coupling of dibenzo-crown ethers. Part III. Intrinsic redox properties and preliminary use as electrode modifiers 240(1988)117

Modulated reflectance spectroscopy

Adsorption of *p*-nitroaniline on platinum studied by modulated reflectance spectroscopy 201 (1986)163

Modulator

Metal ions and complexes as modulators of protein–interfacial electron transport at graphite electrodes 217(1987)331

Molecular control

Molecular control of cytochrome oxidase activity 212(1986)159

Molecular diffusion layer

Homogeneous redox catalysis of electrochemical reactions. Electron transfers followed by a very fast chemical step 205(1986)43

Molecular film

Quinone molecular films derived from 1,5-diaminoanthraquinone 235(1987)381

Molecular model

Effect of molecular interactions at the interface. Part II. The metal/non-aqueous electrolyte interface 247(1988)57

Molecular orbital

Electrochemistry of thioxanthene, thioxanthone and related compounds in acetonitrile. Substituent effects and correlation of electrochemical behavior with molecular orbital calculations 210(1986)45

Correlation of the anodic peak potentials with the quantum mechanical properties of various vinyl compounds 237(1987)187

Molecular superstructure

Ligation of iron(II) by bromide ions in the redox chemistry of iron porphyrins. Effect of molecular superstructures 237(1987)131

Molecular transistor

A benzimidazobenzophenanthroline polymer molecular transistor fabricated using club sandwich electrodes 222(1987)193

Molten electrolyte

Molten alkali thiocyanates as solvents for transition metal electrodeposition 206(1986)253

Electrochemical behaviour of copper oxide in molten dimethyl sulfone at 150 °C 233(1987)189

Electroreduction of carbon dioxide to carbon monoxide in molten LiCl + KCl, LiF + KF + NaF, $Li_2CO_3 + Na_2CO_3 + K_2CO_3$ and $AlCl_3$ + NaCl 235(1987)369

The electrochemistry of molten $K_2S_2O_7$ + $K_2SO_4 + V_2O_5$ electrolytes 238(1987)163

Chronopotentiometric study of titanium in molten NaCl + KCl + K_2TiF_6 239(1988)203

Simultaneous EPR electrochemical measurements on polypyrrole in ambient temperature ionic liquids 241(1988)231

Electrochemical behaviour of $CuO + V_2O_5$ systems in molten dimethyl sulfone at 150 °C 242(1988)181

Simulation of cyclic voltammetry for the linked mechanism of the hydrogen electrode reaction in molten carbonates 249(1988)155

Chemical and electrochemical behaviour in molten alkali hydroxides. Part II. Electrochemistry of chalcogenide ions in the molten NaOH + KOH (49 mol%) eutectic mixture 250(1988)327

Molybdenum catalyst

Electrochemical evidence for two components in molybdenum-containing catalysts for dinitrogen fixation at ambient temperature and pressure 210(1986)173

Molybdenum complex

Dependence of heterogeneous charge transfer rate on coordination environment in $MoO(L–L)(S_2CNEt_2)_2$ complexes 213(1986)169

The role of ligands in the electrochemical behaviour and catalytic activity of molybdenum-containing catalyst for dinitrogen fixation under mild conditions 217(1987)425

Molybdenum electrode

The electrochemical reduction of aqueous carbon dioxide to methanol at molybdenum electrodes with low overpotentials 205(1986)219

Molybdenum ion

Dimerization of electrogenerated Mo(V) in sulphuric acid solutions 217(1987)305

Molybdenum-modified electrode

Catalysis of the electrochemical oxidation of CH_3OH by molybdenum-modified platinum 248(1988)181

Enhancement in methanol oxidation by molybdenum modification of Pt–SPE electrodes 250(1988)213

Monoclonal antibody

Electroporative gene transfer (electrotransfection): a method for strain improvement of animal cells 231(1987)253

Monocrystal

Response to pH of an electrode made up of a monocrystal of α-$Zr(HPO_4)_2 \cdot H_2O$ 216(1987) 283

Monolayer

Mechanism of electron transfer through monomolecular films of neutral organic species adsorbed at an electrode surface 202(1986)169

Phase transition processes displayed by coumarin monolayers at the water–mercury interphase 214(1986)597

Theory of electrode reactions of redox couples confined to electrode surfaces at monolayer levels. Part I. Expression of the current–potential relationship for simple redox reactions 217 (1987)1

Theory of electrode reactions of redox couples confined to electrode surfaces at monolayer levels. Part II. Cyclic voltammetry and ac impedance measurements 217(1987)15

Organized self-assembling monolayers on electrodes. Part I. Octadecyl derivatives on gold 219(1987)365

Linear sweep voltammetric approach for the study of monolayer formation. Distinct features of adsorption, nucleation–growth–collision and combined models 225(1987)93

The structure of H_2SO_4 monolayers on Au (111) 229(1987)99

Organic monolayer formation at a sulphur modified gold electrode. The methylene blue/leucomethylene blue redox couple 233 (1987)199

Two-dimensional electrocrystallisation of $PbCO_3$ and $Pb_3(CO_3)_2(OH)_2$ on lead amalgam electrodes in sodium carbonate and bicarbonate solutions 233(1987)237

The electrochemical oxidation of zinc studied by ellipsometry 234(1987)185

Comparative electrochemical studies of *N*-methyl-*N'*-hexadecyl viologen monomolecular films formed by irreversible adsorption and the Langmuir–Blodgett method 239(1988)441

Statistical analyses of the two-dimensional point pattern of silver monolayer deposition on a single crystal silver electrode 244(1988)39

Phospholipid monolayers of di-oleoyl lecithin at the mercury/water interface 244(1988)99

Electrochemical separation of the inner monolayer in methylene blue/leucomethylene blue conductive films induced by a sulphur-modified gold surface 250(1988)427

Monosaccharide autoxidation

Monosaccharide autoxidation: a potential source of oxidative stress in diabetes? Model reactions with nucleotides and protein 232(1987)283

Monovalent cation

Ion binding to a membrane with surface charge layers 211(1986)173

Monte Carlo method

Double layer structure at the interface between two immiscible electrolyte solutions 206(1986)69

The structure of water at a neutral interface 206(1986)131

Considerations of the spatial pattern of the 2D growth centres formed via time-dependent nucleation and growth mechanisms 209(1986)35

Statistical fluctuations in two-dimensional nucleation and growth processes 213(1986)17

Montmorillonite

Clay modified electrodes. Part VII. The electrochemical behavior of tetrathiafulvalenium-montmorillonite modified electrodes 229(1987)191

Electropolymerization of aniline intercalated in montmorillonite 233(1987)291

On the nature of electroactive sites in clay-modified electrodes 236(1987)43

Montmorillonite film

Clay modified electrodes. Part VIII. Electrochemical behavior at montmorillonite and polypyrrole–montmorillonite films on platinum and glassy carbon electrodes 234(1987)347

Morpholine

Cyclic voltammetric studies on nitrosubstituted *N*(thioacyl)piperidines and morpholines 239 (1988)227

Morphology

Potentiodynamic passivation of zinc in aqueous KOH solutions 201(1986)85

Characterization of $NiCo_2O_4$ electrodes for O_2 evolution. Part I. Electrochemical characterization of freshly prepared $NiCo_2O_4$ electrodes 208(1986)273

Characterization of $NiCo_2O_4$ electrodes for O_2 evolution. Part II. Non-electrochemical characterization of $NiCo_2O_4$ electrodes 208 (1986)297

Observation of morphological relaxation of copper and silver electrodes in solution using a quartz microbalance 216(1987)127

Electric-field-induced morphological alterations and fusion of hepatocytes 231(1987)9

Electrochemical investigations on the behaviour of thallous ions during the formation of $PbSO_4$ 238(1987)355

Changes in real surface area, crystallographic orientation and morphology of platinum electrodes caused by periodic potential treatments: phenomenological approach 239 (1988)67

Mouse

Electrofusion of rat and mouse blastomeres 211 (1986)513

Effect of temperature on peritubular cell membrane potential and potassium conductance in isolated perfused proximal tubules of the mouse 231(1987)419

Microelectrophoresis and fluorescence studies of the glycoprotein sheath covering the outer membrane surface in murine neuroblastoma cells 231(1987)429

Mouse diaphragm

The rate-limiting steps of the rising phase of miniature end plate currents in the mouse diaphragm 231(1987)153

Multi-boson formalism

Many-body effects in electrochemisorption. Part IV. Multi-boson formalism 230(1987)23

Multicomponent determination

A novel application of gas-diffusion electrodes as electrochemical gas sensors 248(1988)69

Multicycling

The ellipsometric characterization of Pt + Cr alloy surfaces in acid solutions 205(1986)163

Multifaceted reaction

Hypochlorite reduction at GaAs: a multifaceted reaction 224(1987)211

Multi-geometry electrode

A global finite element Galerkin/B-spline (GBS) numerical model of electrochemical kinetics, transport, and mechanism for multi-geometry working electrodes. Part I. Modeled Nernstian voltammetry 220(1987)1

Multimolecular layer

Electrocatalysis of dioxygen reduction in aqueous acid and base by multimolecular layer films of electropolymerized cobalt tetra(*o*-aminophenyl)porphyrin 217(1987)271

Multiple doping states

Capacity of semiconductor electrodes with multiple bulk electronic states. Part I. Model and calculations for discrete states 228(1987)135

Multiple strip electrode

Calculation of convective-diffusion current at multiple strip electrodes in a rectangular flow channel. Implications for electrochemical detection 205(1986)101

Multiplicity

Current peak multiplicity related to the $Ni/Ni(OH)_2$ electrode 210(1986)287

Multi-time-domain measurement

Examination of staircase, normal pulse and differential pulse voltammetry at inlaid ultramicroelectrodes using a computerized

multi-time-domain measurement method 241 (1988)1

Murexide complex

Thin-layer spectroelectrochemical investigations on the electrode mechanism of murexide complex with dysprosium 221(1987)143

Mutagen

Ac voltammetry: a control method for the damage to DNA caused in vitro by alkylating mutagens 227(1987)11

Mutant

Is DNA transport driven by the proton electrochemical potential difference in the naturally transformable bacteria, *Streptococcus pneumoniae*? 231(1987)269

Myoglobin

A study of the electron transfer and oxygen binding reactions of myoglobin 237(1987)81

N

NAD

Surface-enhanced Raman scattering of nicotinamide adenine dinucleotide (NAD^+) adsorbed on silver and gold electrodes 202 (1986)315

Electrochemical reduction of ε-adenine, ε-adenosine, and ε-NAD^+ in aqueous media 212 (1986)287

Biofuel anode for cell reactions involving nicotinamide adenine dinucleotide as a charge carrier 212(1986)479

NADH

Electrocatalytic oxidation of NADH by ferrocene derivatives and the influence of cyclodextrin complexation 234(1987)163

NADPH

Monosaccharide autoxidation: a potential source of oxidative stress in diabetes? Model reactions with nucleotides and protein 232(1987)283

Nafion

Electrode films of porous agarose impregnated with Nafion. Structural heterogeneity and its effects on electron transport 207(1986)73

Electrochemical reduction of Nafion 117 208 (1986)109

A study of the superselectivity of Nafion perfluorosulfonic membranes 216(1987)71

Electrode surface modification through Nafion-attached transition-metal cluster chalcogenide particles 229(1987)223

Microstructural enhancement of mass transport through Nafion + Nuclepore composite membranes 235(1987)299

On the electrocatalytic oxidation of methanol vapors at Au–Nafion electrodes 235(1987)393

Nafion film

Electrodeposition of Pt ultramicroparticles in Nafion films on glassy carbon electrodes 208 (1986)373

Studies of the limiting currents associated with several oxidation reactions mediated by tris(2,2′-bipyridyl)iron(III) incorporated in Nafion® films on carbon electrodes 230(1987)109

Researches on chemically modified electrodes. Part XXIV. Preparation and characterization of Nafion polymer film modified electrodes containing Fe(II)–phen complex 233(1987)19

Attempts to accelerate the rates of oxidation of ruthenium and osmium tetramethylcyclam complexes at graphite and glassy carbon electrodes and within Nafion coatings 237(1987) 69

Direct evidence for chemically distinct regions within Nafion films on electrodes 237(1987)191

Anodic behavior of Nafion-coated electrodes in basic media 247(1988)315

Naphthalene

Electrocatalysis of the nitration of naphthalene by N_2O_4 in aprotic media 225(1987)125

Naphthohydroquinone

Effect of non-aqueous solvents on the chemisorption and orientation of aromatic compounds at smooth polycrystalline platinum electrodes: naphthohydroquinone and tetrahydroxybiphenyl in water + acetonitrile solutions 201(1986)153

Natural waters

The influence of ultra-violet irradiation on the determination of nickel and cobalt in natural waters by adsorption voltammetry 214(1986)21

Trace metal speciation by ASV. Part VII. Interaction of zinc with Cl^-, NO_3^-, I^-, SO_4^{2-} and OH^- 226(1987)253

Amalgam voltammetric approach to heavy metal speciation in natural waters. Part I. Theoretical aspects and methodology 246(1988)15

Near-critical fluid

Electrochemistry in near-critical and supercritical fluids. Part VI. The electrochemistry of ferrocene and phenazine in acetonitrile between 25 and 300 °C 243(1988)117

Negative potential

Electrode reactions at extremely negative potentials. Part II. The kinetics of the Ba(II)/Ba(Hg) electrode reaction in aqueous perchlorate solutions 236(1987)177

Neodymium

The rare earth substitution effect on the electrochemistry of diphthalocyanine films in contact with an acidic aqueous medium 249 (1988)181

Neosepta

Studies on the membrane potentials of a new microporous membrane in the presence of alkali chlorides with and without control of pores using precipitates of potassium salts 242(1988)155

Nephrochloris salina

Photoresponse of native photosynthetic systems and chlorophyll-containing films on metal electrodes 228(1987)109

Nernstian limit

Amperometry at precipitate-based electrodes 242(1988)77

Nernstian voltammetry

A global finite element Galerkin/B-spline (GBS) numerical model of electrochemical kinetics, transport, and mechanism for multi-geometry working electrodes. Part I. Modeled Nernstian voltammetry 220(1987)1

Nesosteine

The interaction of nesosteine and *trans*-sobrerol with electrogenerated superoxide ion in anhydrous and wet acetonitrile 231(1987)339

Neuroblastoma cell

Microelectrophoresis and fluorescence studies of the glycoprotein sheath covering the outer membrane surface in murine neuroblastoma cells 231(1987)429

Neutral carrier

Electrochemistry of asymmetric membranes 211 (1986)477

Neutral interface

The structure of water at a neutral interface 206(1986)131

Neutral organic species

Mechanism of electron transfer through monomolecular films of neutral organic species adsorbed at an electrode surface 202(1986)169

Nickel

The influence of ultra-violet irradiation on the determination of nickel and cobalt in natural waters by adsorption voltammetry 214(1986)21

The induction of SERS on smooth Ag by the deposition of Ni and Co 217(1987)411

An electroanalytical investigation on the nickel-promoted electrochemical conversion of CO_2 to CO 219(1987)259

Nickel–cobalt oxide electrode

Characterization of $NiCo_2O_4$ electrodes for O_2 evolution. Part I. Electrochemical characterization of freshly prepared $NiCo_2O_4$ electrodes 208(1986)273

Characterization of $NiCo_2O_4$ electrodes for O_2 evolution. Part II. Non-electrochemical characterization of $NiCo_2O_4$ electrodes 208 (1986)297

Characterization of $NiCo_2O_4$ electrodes for O_2 evolution. Part III. Ageing phenomena of $NiCo_2O_4$ electrodes 208(1986)323

Nickel complex

A poly(pyrrole–nickel(II)pyridiniumporphyrin)-modified electrode 224(1987)295

Indirect electroorganic reactions mediated by multivalent metal ion–macrocyclic polyamine complexes 243(1988)393

Electrochemistry of the nickel–cyanide system at mercury electrodes. Part III. The role of intermediate products in the mechanism of $Ni(CN)_4^{2-}$ electroreduction at mercury electrodes 248(1988)139

Nickel electrode

Electrooxidation of formaldehyde on Cu + Ni alloy electrodes in alkaline solutions 201(1986)47

Metallocyanide modified nickel electrode surfaces. Enhanced currents from solution species 210(1986)323

Electrolytic coating of titanium onto iron and nickel electrodes in the molten LiF + NaF + KF eutectic 230(1987)125

Nickel hydroxide film

The electroformation of thick hydrous nickel hydroxide films through the application of periodic potential signals 225(1987)227

Nickel ion

Electrochemical reduction of Ni(II) on the hanging mercury drop electrode in the presence of dimethylglyoxime 214(1986)157

Electroreduction of Ni^{2+} and Fe^{2+} in a fused electrolyte. Formation of a two-component alloy and the role of the underpotential deposition 248(1988)369

Nickel-modified electrode

Photoelectrochemical characteristics of metal-modified epitaxial n-Si anodes. Part I. NiO(OH)-coated n^+/p-Si and n^+/n-Si electrodes for catalytic oxygen evolution 227 (1987)213

Nickel / nickel hydroxide electrode

Current peak multiplicity related to the $Ni/Ni(OH)_2$ electrode 210(1986)287

Nigericin

Ion carrier properties of nigericin studied by voltammetry at the interface of two immiscible electrolyte solutions 204(1986)267

Niobium ion

The electrochemical behaviour of Nb(V)/Nb(IV) in aqueous citrate solutions studied at the dropping mercury electrode 206(1986)153

Niobium oxide film

Amorphous semiconductor–electrolyte junction. Influence of the wavelength and oxide thickness on the photocharacteristics of a-Nb_2O_5 anodic films 228(1987)119

Nitrate ion

Thermokinetic instability of electrode processes. Part II. Transpassive dissolution of copper in nitrate solutions 207(1986)11

On the polarographic reduction of nitrate ion in the presence of zirconium(IV) 208(1986)117

Amperometric detection of nitrates using a flow-through membrane detector 214(1986)125

Electrocatalytic reduction of nitrate and nitrite to hydroxylamine and ammonia using metal cyclams 224(1987)199

An investigation of the titanium electrode in acid solutions and acid solutions containing uranium(VI) ions 225(1987)139

Nitration

Electrocatalysis of the nitration of naphthalene by N_2O_4 in aprotic media 225(1987)125

Nitrato complex

Cyclic voltammetric studies of nitrato complexes of various metal ions in molten $LiNO_3 + KNO_3$ at 180 °C 221(1987)115

Nitrenium ion

Spectroelectrochemical evidence for an intermediate in the electropolymerization of aniline 236(1987)189

Cyclic voltammetry of polyaniline: interpretation of the middle peak 249(1988)97

Nitric acid

Photoassisted and electrochemical reduction of nitric acid to hydroxylamine and ammonia 209 (1986)405

Investigation of corrosion of a rotating iron electrode in HNO_3 by in-situ Raman spectroscopy 210(1986)259

Nitrile rubber insulating film

An improvement of battery performance of lithium batteries assembled with a polypyrrole cathode formed electrochemically with the aid of a nitrile rubber insulating film 217(1987)203

Nitrite ion

Electrocatalytic reduction of nitrate and nitrite to hydroxylamine and ammonia using metal cyclams 224(1987)199

Nitroaniline

Adsorption of *p*-nitroaniline on platinum studied by modulated reflectance spectroscopy 201 (1986)163

Nitroanthracene ion

Study of the reactions of 9-nitroanthracene anion radicals and dianions in dimethylformamide by the controlled potential constant-voltage electrolysis method 224(1987)273

Nitrobenzene

Reduction of nitrobenzene in aqueous alkaline solution at an Ag electrode. Observation by SERS, RRDE and UV absorption 202(1986)231

Electrochemistry of concentrated organic redox solutions 215(1986)223

Two distinct surface conditions of a gold electrode from the viewpoint of the reduction of nitrobenzene in aqueous alkaline solution 221 (1987)245

Electrochemical reduction of substituted nitrobenzenes in *N,N*-dimethylformamide containing proton donating agents. Effect of the double layer on the basicity of the nitro group 226(1987)61

Selectivity coefficient of hydrogen sulphate anion for liquid ion-exchange membrane electrodes based on nitrobenzene 233(1987)267

Spectroscopic investigation of electrochemically active compounds. SERS of nitrobenzene, sulfide, ethylene and hydroquinone on Au 239(1988)361

Charge transfer across a polymer gel/liquid interface: the polyvinyl chloride + nitrobenzene gel/water interface 241(1988)133

Nitrobenzene / water interface

Potassium ion transfer across the nitrobenzene/water interface facilitated by valinomycin 234(1987)355

Nitrobutane

Solvent effects on heterogeneous electron transfer rates for organic redox couples: tert-nitrobutane reduction at mercury 233(1987)161

Nitrogen

Surface electrochemistry of the anodic N_2 generation reaction at Pt and Au, and the discovery of cathodic N_2 evolution 249(1988)217

Nitrogenase

The role of ligands in the electrochemical behaviour and catalytic activity of molybdenum-containing catalyst for dinitrogen fixation under mild conditions 217(1987)425

Nitrogen fixation

Electrochemical evidence for two components in molybdenum-containing catalysts for dinitrogen fixation at ambient temperature and pressure 210(1986)173

The role of ligands in the electrochemical behaviour and catalytic activity of molybdenum-containing catalyst for dinitrogen fixation under mild conditions 217(1987)425

Nitrogen fixation. Part II. Nitrogen reduction by electrochemically generated vanadium(II) promoted by various organic ligands in basic methanol 250(1988)385

Nitrogen oxide

Electrocatalysis of the nitration of naphthalene by N_2O_4 in aprotic media 225(1987)125

Nitromethane

Complementary study of the mechanism of anodic chlorine evolution in nitromethane 210 (1986)251

Application of the convolution potential sweep voltammetric method to the chlorine evolution reaction in nitromethane 221(1987)61

Nitrone

One-electron cleavage of sulphones in the presence of nitrones as spin traps 238(1987)393

Nitrophenol

Competitive homogeneous chemical reactions occurring between two electron transfers. Application to *p*-nitrophenol reduction 243 (1988)293

Nitrophenylguanidine

Electrochemical behaviour of 2-nitrophenylguanidines in acetonitrile 207(1986) 189

Nitrophenylhydrazone

Influence of water on the electroreduction of 2-nitrophenylhydrazones in acetonitrile 246 (1988)399

Nitrophenyloctyl ether

Voltammetric study of ion transfer across the water/*o*-nitrophenyloctyl ether interface. Part I. Reversible process 226(1987)21

Nitrosonaphthol

Electromodification of carbon-fibre electrodes by 2-nitroso-1-naphthol 207(1986)203

Nitro substitution

Cyclic voltammetric studies on nitrosubstituted *N*(thioacyl)piperidines and morpholines 239 (1988)227

Nitroxide free radical

A spin probe study of the water associated with a steady-state level of phosphoenzyme of the Ca-ATPase 231(1987)457

The state of water associated with the phosphoenzyme of the Ca-ATPase of sarcoplasmic reticulum. A spin probe study 231 (1987)473

Nitryl chloride

An electrochemical study of the molecular and ionic dissociation of NO_2Cl in aprotic media 209(1986)323

Noble metal electrode

Catalytic influence of underpotential-deposited submonolayers of heavy metals on D-glucose oxidation on various noble metal electrodes in alkaline media 237(1987)93

An investigation of the oxidation of formaldehyde on noble metal electrodes in alkaline solutions by electrochemically modulated infrared spectroscopy (EMIRS) 240(1988)161

Noise source

Fluctuation phenomena in electrochemistry. Part I. The formalism 208(1986)13

Fluctuation phenomena in electrochemistry. Part II. Modelling the noise sources 208(1986)29

Non-aqueous solvent

Effect of non-aqueous solvents on the chemisorption and orientation of aromatic compounds at smooth polycrystalline platinum electrodes: naphthohydroquinone and tetrahydroxybiphenyl in water + acetonitrile solutions 201(1986)153

Taking advantage of liquid ammonia to control the surface modification of silicon electrodes 216(1987)101

The electrochemistry of ferrocene in non-aqueous solvents 221(1987)165

The influence of a faradaic process on the double-layer capacity 229(1987)181

Determination of trace water in propylene carbonate using hexafluoroacetone 234(1987)107

Solvent effects on electrode potentials of metalloporphyrins. Reduction of 5,10,15,20-tetraphenylporphinato complexes in non-aqueous media 235(1987)189

Modification of the liophobization method of DME glass capillaries against a polar liquid and their use in non-aqueous solvents 240(1988)317

Non-electrochemical technique

Characterization of $NiCo_2O_4$ electrodes for O_2 evolution. Part II. Non-electrochemical characterization of $NiCo_2O_4$ electrodes 208 (1986)297

Non-equilibrium charge transfer

Electronic non-equilibrium charge transfer kinetics in anodic dark and photocurrents on n-III–V-semiconductor electrodes 209(1986)259

Non-homogeneous electrolyte

The charge separation process in non-homogeneous electrolyte solutions 241(1988)57

Non-ionic micelle

Electrocatalytic reactions in organized assemblies. Part I. Reduction of 4-bromobiphenyl in cationic and non-ionic micelles 240(1988)201

Non-kinetic hysteresis

Unusual quasi-reversibility (UQR) or apparent non-kinetic hysteresis in cyclic voltammetry. An elaboration upon the implications of N-shaped free energy relationships as explanation 240 (1988)1

Non-linear adsorption

Effects of quasi-reversible charge transfer on chronocoulometric relaxations in non-linearly adsorbing systems 246(1988)241

Non-local electrostatic theory

On the non-local electrostatic theory of hydration force 204(1986)79

Non-polar solvent

Double-layer studies in a non-polar solvent consisting of Al_2Br_6 and KBr in ethylbenzene 229(1987)165

Non-stoichiometric film

Electrochemical preparation of electrodes modified with non-stoichiometric mixed-valent tungsten(VI, V) oxides 248(1988)305

Normal pulse polarography

Pulse polarography: current–potential curves in normal pulse polarography, reverse pulse polarography, differential normal pulse polarography and differential pulse polarography for a slow charge-transfer step 205(1986)21

Kinetic currents in normal pulse polarography (NPP). Current–potential curves for an electrode process with a preceding chemical reaction (CE mechanism) 243(1988)263

Non-conventional normal pulse polarographic techniques with a static mercury electrode for applications at very low reactant concentrations 246(1988)283

Normal pulse voltammetry

Electrode kinetics of electroactive electropolymerized polymers deposited on graphite electrode surfaces 217(1987)239

Examination of staircase, normal pulse and differential pulse voltammetry at inlaid ultramicroelectrodes using a computerized multi-time-domain measurement method 241 (1988)1

N-shaped free energy curve

Unusual quasi-reversibility (UQR) or apparent non-kinetic hysteresis in cyclic voltammetry. An elaboration upon the implications of N-shaped free energy relationships as explanation 240 (1988)1

Nuclear number density

Note on a theory of three-dimensional electrochemical nucleation with diffusion-controlled growth 247(1988)135

Nuclear tunnelling

Electrochemistry at low temperatures down to 80 K. Further evidence for nuclear tunnelling in electron transfer reactions 205(1986)343

Nucleation

Formulation of current–time transients due to nucleation and coalescence of spherical-cap growth forms 209(1986)1

Considerations of the spatial pattern of the 2D growth centres formed via time-dependent nucleation and growth mechanisms 209(1986)35

Statistical fluctuations in two-dimensional nucleation and growth processes 213(1986)17

Nucleation on active sites. Part III. Nucleation modelled as a pure birth process and nucleation modelled as a birth-and-death process 215(1986)1

Condensed thymine films at the mercury/water interface. Part IV. Stochastic measurements 218 (1987)287

Nucleation rings around a growing crystal 220 (1987)169

Nucleation and growth of polythiophene films on gold electrodes 220(1987)351

On the formation of two-dimensional condensed films at the interface mercury/ferron aqueous buffered solutions 224(1987)237

Multiple layer formation in the anodic deposition of $Hg_2C_2O_4$ 227(1987)147

Comparative studies of electrochemical phase formation by amperometric and microscopic methods. Part I. Nucleation kinetics in dilute solutions of mercury nitrate 235(1987)237

Comparative studies of electrochemical phase formation by amperometric and microscopic methods. Part II. Nucleation kinetics in the presence of surfactants 235(1987)249

The theory of chronoamperometry for the investigation of electrocrystallization. Mathematical description and analysis in the case of diffusion-controlled growth 236(1987)1

Nucleation on active sites. Part IV. Invention of an electronic method of counting the number of crystals as a function of time; and the discovery of nucleation rate dispersion 239(1988)17

Light scattering from a nucleating surface 240 (1988)365

A computer simulation of nucleation 241(1988)79

Nucleation rings of $Ag_7O_8NO_3$ around dissolving silver crystals 241(1988)353

Statistical analyses of the two-dimensional point pattern of silver monolayer deposition on a single crystal silver electrode 244(1988)39

Underpotential deposition of silver on polyfaceted and electrochemically faceted Pt (100) electrodes. Application of the combined adsorption–desorption–nucleation and growth mechanism 244(1988)261

Note on a theory of three-dimensional electrochemical nucleation with diffusion-controlled growth 247(1988)135

Electrochemical nucleation and growth of copper on polycrystalline palladium 248(1988)219

Two-dimensional nucleation according to an exponential law with diffusion-controlled growth in the adsorption of camphor-10-sulfonate at the mercury/electrolyte interface 250(1988)159

Nucleation–Growth–Collision Model

Linear sweep voltammetric approach for the study of monolayer formation. Distinct features of adsorption, nucleation–growth–collision and combined models 225(1987)93

Nucleic acid

Photocurrents due to the capture of dry and hydrated electrons by nucleic acid molecules 226(1987)171

A proposed mechanism underlying the process of Ca^{2+}-mediated transfer of DNA across biological membranes 231(1987)111

Nucleophile

Oxidative voltammetry of some tetraphenylporphyrins in the presence of nucleophiles leading to isoporphyrins 234(1987) 145

Nuclepore

Microstructural enhancement of mass transport through Nafion + Nuclepore composite membranes 235(1987)299

Numerical method

A global finite element Galerkin/B-spline (GBS) numerical model of electrochemical kinetics, transport, and mechanism for multi-geometry working electrodes. Part I. Modeled Nernstian voltammetry 220(1987)1

The influence of Schmidt number and Reynolds number on the behavior of rotating ring–disk electrodes 234(1987)55

O

Obituary

Dogonadze, R. 204(1986)1

Hans Wolfgang Nürnberg (1930–1985) 214 (1986)1

Donald E. Smith (1936–1985) 222(1987)1

Wiktor Kemula (1902–1985) 226(1987)1

Octacyanomolybdate ion

Mediated electron transfer of lactate oxidase and sarcosine oxidase with octacyanotungstate(IV) and octacyanomolybdate(IV) 240(1988)333

Octacyanotungstate ion

Mediated electron transfer of lactate oxidase and sarcosine oxidase with octacyanotungstate(IV) and octacyanomolybdate(IV) 240(1988)333

Octadecyl derivative

Organized self-assembling monolayers on electrodes. Part I. Octadecyl derivatives on gold 219(1987)365

Octadecylpyridiniumpyridyl bromide

Incorporation of *N*-octadecyl-4-pyridinium-4′-pyridyl bromide or *N*-octadecyl-4,4′-bipyridinium dibromide into self-assembled hexadecylmercaptan monolayers on gold electrodes 246(1988)217

Oil phase

Kinetics of salt extraction into the high-permittivity oil phase. Part II. Extraction rates of simple salts determined with the data of electrolysis at the interface of two immiscible electrolyte solutions 229(1987)265

Oligomer

Surface free energy as the potential in oligomeric equilibria: prediction of hemoglobin disaggregation constant 231(1987)349

Oligophenyl

Electroactive polymeric films from oxidative coupling of oligophenyls 213(1986)53

Oligoriboadenylate

Interfacial behaviour of oligoriboadenylates at the mercury–solution interface 237(1987)261

One-electron exchange

Heterogeneous one-electron exchange of silicotungstic heteropolyanion in dimethylformamide 219(1987)355

On-line mass spectroscopy

On-line mass spectroscopy of volatile products during methanol oxidation at platinum in acid solutions 201(1986)403

Oxygen evolution on Ru and RuO_2 electrodes studied using isotope labelling and on-line mass spectrometry 237(1987)251

Electrocatalysis of methanol oxidation by adsorbed tin on platinum 238(1987)151

On-line measurement

Automatic on-line measurement of substrates in fermentation liquids with enzyme electrodes 231 (1987)399

Onsager model

One dimensional Onsager model for dye sensitized charge injection into semiconductors 228(1987)69

Open circuit

Open-circuit potential decay investigation of the surface layer of an electropolished Cu anode 210(1986)237

The influence of glucose and electrolyte composition on the voltammetric response and open-circuit potential decay of bright polycrystalline gold electrodes 212(1986)213

Stability of titanium tubes towards acid wash 214(1986)567

Kinetic theory of the open-circuit potential decay method for evaluation of behaviour of adsorbed intermediates. Analysis for the case of the H_2 evolution reaction 221(1987)1

Investigation of electron transfer processes at open circuit polyvinylferrocene films using rotating ring–disk electrodes 236(1987)139

Operational impedance

Frequency analysis of electrochemical step responses. Complex and operational impedances 205(1986)59

Optical electron transfer

Transition dipole–solvent interaction in optical electron transfer 228(1987)153

Optically active centre

Surface enhanced Raman scattering and local photoemission currents on the freshly prepared surface of a silver electrode 228(1987)197

Optically transparent thin layer electrode

Electrochemical and spectroscopic characterization of a gold plated reticulated vitreous carbon thin-layer electrode 248(1988)341

Optical microscopy

A method of obtaining a small number of nucleation sites and growing large crystal grains 239(1988)107

Optical path

Long optical path length thin-layer spectroelectrochemistry. Quantitation and potential dependence of electroinactive species adsorbed on platinum 222(1987)321

Optical probe

Spectroelectrochemical determination of trace concentrations by diffusion layer imaging 220 (1987)41

Optical process

On the study of thermal and optical processes in condensed media 204(1986)141

Optical spectroscopy

Voltammetric and spectral study of some aminotrinitrobenzenes and their radical anions 214(1986)213

Orbital energy scale

Orbital-energy-resolved partial charge transfer in chemisorption and electrochemical processes on semiconductors 250(1988)37

Order / disorder transition

Single crystal electrochemistry of rhodium. Anion effects and order/disorder transitions of clean and silver coated Rh (111) surfaces 244(1988)147

Ordered film

The growth of ordered films during the cathodic reduction of a tetraalkylammonium ion 209 (1986)91

Organic acceptor

Electrochemistry of organic acceptor compounds: aromatic anhydrides 238(1987)215

Organic adsorbate

Electrosorption of organics on three dimensional carbon fiber electrodes 214(1986)303

Organic adsorption

Determination of the potential due to a surface distribution of dipole systems with several imaging planes. Application to organic adsorption 239(1988)447

Organic dye

Cyclic voltammetry of dye-modified BLMs 212 (1986)435

Organic electrolyte

New organic electrolytes: tris(dialkylamino)sulfonium salts: $(R_2N)_3S^+X^-$ 248(1988)363

Organic electrosorbate

The electrosorption valency of organic electrosorbates. Part II. Aromatic and heterocyclic compounds 229(1987)141

Organic fuel

New oxygen cathodes for fuel cells with organic fuels 210(1986)277

Organic ion

On surface conductance measurements at the GaAs/electrolyte interface 228(1987)89

Organic ligand

Nitrogen fixation. Part II. Nitrogen reduction by electrochemically generated vanadium(II) promoted by various organic ligands in basic methanol 250(1988)385

Organic modifier

Surface lateral organic modifiers in platinum electrocatalysis 210(1986)315

Organic molecule

Heterogeneous electron transfer kinetics for a variety of organic electrode reactions at the mercury–acetonitrile interface using either tetraethylammonium perchlorate or tetraheptylammonium perchlorate electrolyte 222(1987)129

Electrochemical study on the poisoning intermediate formed from methanol dissociation at low index and stepped platinum surfaces 236 (1987)95

Organic peroxide

Effects of organic peroxides on human epidermal keratinocytes 232(1987)263

Organic redox couple

Solvent effects on heterogeneous electron transfer rates for organic redox couples: tert-nitrobutane reduction at mercury 233(1987)161

Organic redox film

Supramolecular phenomena in organic redox films at electrodes. Part II. The methylene blue/leucomethylene blue redox couple at the gold electrode 219(1987)183

Organic solvent

The electrical double layer at the mercury/solution interface in organic solvents 244(1988)1

Organic solvent + water mixture

Potentiometric titration of aluminium with fluoride in organic solvent + water mixtures by use of a fluoride-selective electrode 248(1988)87

Organic sulphide

Voltammetry of the complexes of the platinum metals with organic sulphides in acetonitrile 250 (1988)95

Organized assembly

Electrocatalytic reactions in organized assemblies. Part I. Reduction of 4-bromobiphenyl in cationic and non-ionic micelles 240(1988)201

Electrocatalytic reactions in organized assemblies. Part III. Reduction of allyl halides by bipyridyl derivatives of cobalt in anionic and cationic micelles 240(1988)217

Electrocatalytic reactions in organized assemblies. Part V. Dehalogenation of 4,4′-dibromobiphenyl in cationic micelles at bare and clay-modified carbon electrodes 245(1988)331

Organolead compound

Reversible oxidation processes in dichloromethane for triethyl-, diethyl-, trimethyl-, and dimethyllead compounds at mercury electrodes 218(1987)197

Organosilyl derivatization

Studies of protein–electrode interactions by organosilyl derivatisation of pyrolytic graphite electrodes 219(1987)319

Orientation

The influence of orientation on the electrocatalytic hydrogenation of hydroquinone chemisorbed at smooth polycrystalline platinum electrodes 239(1988)375

Orthogonal collocation

Use of potential-step formulae to reduce computational time in the simulation of linear voltammetry by orthogonal collocation 208 (1986)165

Non-stationary processes at polymer coated rotating disk electrodes. Part I. Model and simulation 235(1987)41

Electroanalytical investigations. Part VII. The simulation of fast chemical equilibrium reactions in cyclic voltammetric reaction–diffusion models with a combination of the heterogeneous equivalent technique and orthogonal collocation 235(1987)57

Electroanalytical investigations. Part VIII. The use of an expanding simulation space in the simulation of electrochemical reaction–diffusion models with orthogonal collocation 241(1988)17

Voltammetric response for the diffusion-controlled electrodeposition onto growing hemispherical nuclei 243(1988)57

Electroanalytical simulations. Part IX. The simulation of a second-order chemical reaction preceding a reversible electron transfer under cyclic voltammetric conditions using orthogonal collocation 250(1988)237

Oscillation

Oscillations generated by pulsating membrane crossing 211(1986)505

Control of the oscillation parameters in the Belousov–Zhabotinsky system by means of mixed catalysts 231(1987)243

Oscillations during electrolysis of alkaline iodide + iodate solutions 241(1988)349

Osmium complex

Valence levels of Ru(II) and Os(II) complexes studied by voltammetry and X-ray photoelectron spectroscopy 209(1986)135

Kinetics of mediated oxidation at electrodes modified by poly(styrenesulfonate) containing tris(2,2′-bipyridine)osmium(III/II) complexes as electron-transfer centers 222(1987)201

Electron transport dynamics in thin polymer films containing tris(2,2′-bipyridine)osmium(III/II) complexes 222(1987) 223

Attempts to accelerate the rates of oxidation of ruthenium and osmium tetramethylcyclam complexes at graphite and glassy carbon electrodes and within Nafion coatings 237(1987) 69

Electrogenerated chemiluminescence. Part 51. The tris(2,2′-bipyrazine)osmium(II) system 244 (1988)319

In-situ surface EXAFS at chemically modified electrodes 248(1988)77

Osmium ion

Diffusion–migration impedances for finite, one-dimensional transport in thin-layer and membrane cells. Part II. Mixed conduction cases: Os(III)/Os(II)ClO_4 polymer membranes including steady-state I–V responses 219(1987) 23

Osmium tetroxide

Characteristics of a glassy carbon electrode modified in a mixture of osmium tetroxide and hexacyanoruthenate 233(1987)87

Osmotic equilibrium

Application of the general model of osmotic and ionic equilibria of a cell to human erythrocytes suspended in isotonic unbuffered NaCl + KCl + sucrose media in the presence of cationic ionophore 231(1987)223

Outer-sphere electrochemical reduction

Kinetics of the outer-sphere electrochemical reduction of chlorophyll adsorbed on a metal electrode. Reorganization of the solvent 204 (1986)69

Outer-sphere electrode reaction

Condensed thymine films at the mercury/water interface. Part II. Effects on electrode kinetics 201(1986)145

Outer-sphere electron exchange

H/D isotope effect on outer sphere electron exchange 204(1986)21

Overlying layer

Effect of overlying layers on the kinetics of multilayer adsorption involving electron transfer 218(1987)331

Overoxidation

Anodic overoxidation of poly-*p*-phenylene in aqueous electrolytes 216(1987)157

Overpotential

The electrochemical reduction of aqueous carbon dioxide to methanol at molybdenum electrodes with low overpotentials 205(1986)219

Electrochemical nucleation and growth of copper on polycrystalline palladium 248(1988)219

Overpotential deposition

The effects of the underpotential and overpotential deposition of lead and thallium on silver on the Raman spectra of adsorbates 217 (1987)385

Oxalacetic acid

Polarographic reduction of aldehydes and ketones. Part XXX. Effects of acid–base, hydration–dehydration and keto–enol equilibria on reduction of α-ketoglutaric and oxalacetic acid and their esters 226(1987)69

Oxalate ion

Electrochemical adsorption and phase formation on mercury in oxalate ion solutions 207(1986)263

Oxalic acid

Multiple layer formation in the anodic deposition of $Hg_2C_2O_4$ 227(1987)147

Oxidation

A study of the conditions for the electrodeposition of polythiophen in acetonitrile 206(1986)147

An electrochemical study of the oxidation of thiazolidine-4-carboxylic acid on platinum electrodes 209(1986)339

Surface structural changes during oxidation of gold electrodes in aqueous media as detected using surface-enhanced Raman spectroscopy 209(1986)377

Conformational transitions in the regulation of cytochrome *c* oxidase activity 211(1986)79

On the effect of the Fe^{2+}/Fe^{3+} redox couple on oxidation of carbon in hot H_3PO_4 213(1986)161

Oxidation of 4,4′-dichlorobiphenyl at a ruthenium dioxide anode 213(1986)329

Reversible oxidation processes in dichloromethane for triethyl-, diethyl-, trimethyl-, and dimethyllead compounds at mercury electrodes 218(1987)197

The influence of Cu adatoms on a Pt electrode on the oxidation of formic acid 218(1987)327

Mechanism of oxidation of ferrous polydentate complexes by dioxygen 222(1987)173

The oxidation of chloride ions and bromide ions on ruthenium dioxide electrodes 225(1987)159

In-situ X-ray diffraction studies of Pt electrode/solution interfaces 229(1987)125

Extension of the sensitivity limit of amalgam electrodes, in dilute aquatic media, based on the study of their oxidation process 236(1987)67

Photoelectrochemistry of polycrystalline n-WO_3. Electrochemical characterization and photoassisted oxidation processes 238(1987)129

An investigation of the oxidation of formaldehyde on noble metal electrodes in alkaline solutions by electrochemically modulated infrared spectroscopy (EMIRS) 240(1988)161

Mediators for the oxidation of glutathione and other biological thiols 245(1988)131

Electrocatalytic hydrogenation and oxidation of model coal-derived compounds chemisorbed at smooth polycrystalline Pt: a survey 247(1988)241

Oxidation–reduction cycle

Surface enhanced Raman scattering of pyridine on Ag electrodes formed with controlled-rate oxidation–reduction cycles 217(1987)93

Oxidation–reduction mechanism

Radiolytic scanning of vitamin E–vitamin C oxidation–reduction mechanisms 232(1987)59

Oxidative phosphorylation

Considerations on the kinetics of an electrochemical model of oxidative phosphorylation 212(1986)245

Oxidative voltammetry

Oxidative voltammetry of some tetraphenylporphyrins in the presence of nucleophiles leading to isoporphyrins 234(1987) 145

Oxide

Uniformity of the electrical double layer on oxides 208(1986)401

Oxide electrode

Heterogeneous acid–base equilibria and reaction order of oxygen evolution on oxide electrodes 205(1986)347

Oxide film

Electron-transfer reactions on pure and modified oxide films 204(1986)153

State of surface oxide films at Pt anodes and "volcano" behaviour in electrocatalysis for anodic Cl_2 evolution 224(1987)163

Redox mediation involving oxide films as examined by surface-enhanced Raman spectroscopy: peroxodisulfate reduction at oxide-modified gold electrodes 234(1987)237

Oxide formation

Hydrogen electrosorption on single-crystal platinum stepped surfaces and the effects of oxide formation 205(1986)335

Oxide formation on gold single crystal stepped surfaces 249(1988)291

Oxide growth

A model for anodic hydrous oxide growth at iridium 220(1987)83

Oxide layer

The active surface area increase of rhodium electrodes through electroreduction of oxide layers produced by fast periodic potentials 237 (1987)237

Oxide / solution interface

The oxide/solution interface: specific effects of "indifferent" electrolytes 239(1988)419

Oxindolylalanine

Peroxidase-catalyzed and electrochemical oxidation of L-tryptophan 211(1986)257

Oxo complex

Effects of electrode surface pretreatments on the electrochemistry of a macrocyclic dioxoruthenium(VI) complex 226(1987)211

Oxometalate

Surface functionalization of electrodes with oxometalates entrapped in polymeric matrices. Evidence for a microenvironment effect 240 (1988)325

Distribution of oxometalates on polymer-covered electrodes. Compared catalytic activity of these new polymers and the corresponding oxometalates in solution 243(1988)481

Oxonol

Calibration of the carotenoid band shift and the response of the external membrane potential probe oxonol VI with diffusion potentials in (proteo)liposomes and chloroplasts 212(1986)55

Oxygen

Electrocatalysis by ad-atoms. Part XX. Rate-determining step in methanol oxidation enhanced by oxygen-adsorbing ad-atoms 209(1986)151

Mechanism of oxidation of ferrous polydentate complexes by dioxygen 222(1987)173

Thermodynamics of reactions involving oxyradicals and hydrogen peroxide 232(1987)3

Electrochemical and chemical reductions of oxygen dissolved in aqueous solutions 232(1987) 13

Role of metal complexes in the formation–detoxication action of active oxygen species 232(1987)21

Activation of oxygen by metal complexes and its relevance to autoxidative processes in living systems 232(1987)29

The role of peroxides in mitochondrial reduction of dioxygen to water 232(1987)51

Reactions of tetrahydropterins with oxygen and with other one-electron acceptors 232(1987)79

Active oxygens and the peroxidation of linoleic acid catalysed by degraded species of ascorbic acid 232(1987)171

The electroreduction of dioxygen on thin films of gold in alkaline solution 234(1987)193

Application of a polymer solid electrolyte for the vapor-phase electrocatalysis of dioxygen reduction by some cobalt porphyrins 238(1987) 259

Electrogenerated chemiluminescence. Part XLVIII. Electrochemistry and electrogenerated chemiluminescence of bis(2,4,6-trichlorophenyl) oxalate–luminescer systems 238(1987)277

Direct and alternating current voltammetry at an HMDE in solutions containing activated charcoal suspension 239(1988)91

Study of the electroreduction of dioxygen on thin films of platinum phthalocyanine in alkaline solutions. Part I. Electrochemical investigations 239(1988)273

Research on chemically modified electrodes. Catalytic reduction of dioxygen at a cobalt phthalocyanine-doped polyaniline film electrode 246(1988)101

Redox and electrocatalytic properties towards dioxygen reduction of ruthenium tetra(*ortho*-aminophenyl)porphyrin complexes with various axial ligands 246(1988)139

Epoxidation of *cis*-cyclooctene by molecular oxygen electrocatalysed by polypyrrole–manganese porphyrin film modified electrodes 250(1988)191

Oxygen binding

A study of the electron transfer and oxygen binding reactions of myoglobin 237(1987)81

Oxygen donation

Electrocatalysis by ad-atoms. Part XVII. Electronegativity effect on oxygen donation by oxygen-adsorbing ad-atoms and steric hindrance by alkyl groups in S_{hole} control in aldehyde oxidation 201(1986)23

Electrocatalysis by ad-atoms. Part XIX. Geometrical requirement in the oxygen donation step in glyoxylic acid oxidation enhanced by ad-atoms 202(1986)137

Oxygen electrode

New oxygen cathodes for fuel cells with organic fuels 210(1986)277

Oxygen evolution

Electrocatalysis by amorphous metals of hydrogen and oxygen evolution in alkaline solution 201(1986)61

The electrochemical mechanism of photosystem II functioning in chloroplasts 205(1986)245

Heterogeneous acid–base equilibria and reaction order of oxygen evolution on oxide electrodes 205(1986)347

Characterization of $NiCo_2O_4$ electrodes for O_2 evolution. Part I. Electrochemical characterization of freshly prepared $NiCo_2O_4$ electrodes 208(1986)273

Characterization of $NiCo_2O_4$ electrodes for O_2 evolution. Part II. Non-electrochemical characterization of $NiCo_2O_4$ electrodes 208 (1986)297

Characterization of $NiCo_2O_4$ electrodes for O_2 evolution. Part III. Ageing phenomena of $NiCo_2O_4$ electrodes 208(1986)323

Single crystals as model electrocatalysts. Oxygen evolution on RuO_2 (110) 210(1986)189

Effect of pH on the efficiency of the oxygen-evolving reaction in inside-out vesicles of thylakoids 212(1986)549

Efficient and stable oxygen evolution on zirconium nitride thin film electrodes prepared by the reactive RF sputtering technique 220 (1987)369

Photoelectrochemical characteristics of metal-modified epitaxial n-Si anodes. Part I. NiO(OH)-coated n^+/p-Si and n^+/n-Si electrodes for catalytic oxygen evolution 227 (1987)213

The problem of light-induced oxygen production at catalyst-loaded CdS suspensions 228(1987)45

Ozone and oxygen evolution on PbO_2 electrodes in acid solution 228(1987)407

Oxygen evolution on Ru and RuO_2 electrodes studied using isotope labelling and on-line mass spectrometry 237(1987)251

Formation of a higher palladium oxide in the oxygen evolution potential range 238(1987)115

Oxygen ion

The role of oxygen ion diffusion in the electrode reactions of β'' alumina 244(1988)123

Oxygen layer

Effect of the oxygen layer at solid Ru electrodes on hydrogen oxidation in acid solution 214 (1986)547

Oxygen overlayer

Competitive electroformation of silver and oxygen overlayers on polycrystalline rhodium in acid 246(1988)441

Oxygen probe

The effect of irreversible changes in the stoichiometry of oxygen reduction on the signal of membrane-covered oxygen probes 209(1986)19

Oxygen radical scavenger

Role of peroxides in the cerebral transmembrane ion fluxes and their relevance to ischemic brain edema 232(1987)307

Oxygen reduction

Potentiometric investigation of the kinetics of the polyaniline–oxygen reaction 202(1986)217

Oxygen reduction on pyrolysed carbon-supported transition metal chelates 205(1986)233

Electrocatalysis of cathodic molecular oxygen reduction with biopolymers–enzymes and their models 206(1986)217

Gas electrode reactions in molten carbonate media. Part I. Exchange current density of oxygen reduction in (Li + K)CO_3 eutectic at 650 °C 206 (1986)229

Gas electrode reactions in molten carbonate media. Part II. Oxygen reduction kinetics on conductive oxide electrodes in (Li + K)CO_3 eutectic at 650 °C 206(1986)241

The effect of irreversible changes in the stoichiometry of oxygen reduction on the signal of membrane-covered oxygen probes 209(1986)19

Gas electrode reactions in molten carbonate media. Part III. Temperature dependence of oxygen reduction kinetics in (Li + K)CO_3 eutectic 209(1986)125

Frequency response analysis of photocurrent doubling. The reduction of oxygen at p-GaAs 209(1986)307

Oxygen reduction on vacuum-deposited and adsorbed transition-metal phthalocyanine films 214(1986)523

Electrocatalysis of dioxygen reduction in aqueous acid and base by multimolecular layer films of electropolymerized cobalt tetra(*o*-aminophenyl)porphyrin 217(1987)271

Rotating disk electrode: a re-examination of some kinetic criteria with a special reference to oxygen reduction 218(1987)53

Kinetics of oxygen reduction at iridium electrodes in aqueous solutions 218(1987)265

Oxygen reduction on glassy carbon in 0.1 *M* HCl: RDE and XPS study 220(1987)161

Electrochemical and surface science investigations of PtCr alloy electrodes 220(1987) 269

Redox potential and electrocatalysis of O_2 reduction on transition metal chelates 221(1987) 95

Electrocatalytic reduction of O_2 at electrodes modified by films of redox polymers with anthraquinone moieties 225(1987)177

Determination of the kinetic parameters of the oxygen reduction reaction using the rotating ring–disk electrode. Part I. Theory 229(1987)305

Determination of the kinetic parameters of the oxygen reduction reaction using the rotating ring–disk electrode. Part II. Applications 229 (1987)317

Electrochemical and chemical reductions of oxygen dissolved in aqueous solutions 232(1987) 13

Light-driven hydrogen peroxide production as a way to solar energy conversion 232(1987)71

The cathodic reduction of oxygen at metal tetrasulfonato-phthalocyanines: influence of adsorption conditions on electrocatalysis 233 (1987)99

The mechanism of oxygen reduction at iron tetrasulfonato-phthalocyanine incorporated in polypyrrole 233(1987)113

The electroreduction of oxygen on pyrolytic graphite 233(1987)147

Determination of surface state densities from transient rotating ring–disc electrode measurements demonstrated on an n-TiO_2 electrode 236(1987)55

Oxygen photoelectroreduction on hydrogen phthalocyanine films in alkaline solutions 237 (1987)39

Electroreduction of O_2 catalyzed by vitamin B_{12} adsorbed on a graphite electrode 237(1987)145

Oxygen reduction on the Au (311) electrode surface in alkaline electrolyte 240(1988)239

The electrochemical reduction of oxygen on passive iron in alkaline solutions 243(1988)171

Electrocatalytic effects of redox polymer films on the reduction of O_2 on silicon semiconductors 245(1988)191

Electrocatalysis of O_2 reduction to water in different acid media by iron naphthalocyanines 246(1988)119

Electrocatalytic reduction of oxygen at a pyrolytic graphite electrode modified by adriamycin and its 7-deoxyaglycone 246(1988) 385

A study of the mechanisms of O_2 reduction at n- and p-InP in acid aqueous electrolyte 247(1988) 265

The electroreduction of oxygen on thin films of platinum phthalocyanine in alkaline solutions. Part II. Spectroelectrochemical data and mechanism 249(1988)167

Reduction of oxygen to water on cobalt-nitride thin film electrodes prepared by the reactive RF sputtering technique 250(1988)73

Oxygen sensor

Electrochemical method for the assessment of oxygen consumption in biological objects with an uneven distribution of respiration centres 226(1987)193

Oxygen toxicity

Iron metabolism and oxygen toxicity 232(1987) 105

Oxygen transfer

Urania–scandia + Pt composite electrodes for use in solid electrolyte cells 202(1986)93

Oxy radical

Thermodynamics of reactions involving oxyradicals and hydrogen peroxide 232(1987)3

Oxy radical–iminium theory

Charge transfer mechanism for carcinogenesis by alkylating and other agents 211(1986)305

Oxytetracycline hydrochloride

An ultraviolet spectral and polarographic investigation of the acid–base and complexation behaviour of oxytetracycline hydrochloride 214 (1986)199

Ozone

Ozone and oxygen evolution on PbO_2 electrodes in acid solution 228(1987)407

P

Pacemaker cell

The simplest possibility for the appearance of self-oscillations in pacemaker cells 231(1987)559

Palladium

The hydrogen region of the cyclic voltammetry of Pd: the effect of pH and anion 209(1986)371

Electrochemical nucleation and growth of copper on polycrystalline palladium 248(1988)219

Palladium alloy

Investigations on the electrooxidation of PF_3 adsorbed on Pd and Au + Pd alloys 201(1986)397

Palladium + cobalt alloy

Investigation of Pd + Co alloys by the linear potential sweep method 208(1986)169

Palladium complex

Cathodic behaviour of $[(\eta^3\text{-}C_3H_5)Pd(Ph_2P\text{–}C_2H_4\text{–}PPh_2)]^+$ in acetonitrile solution: an electrochemical process involving very fast consecutive chemical reactions 230 (1987)165

Palladium + copper alloy

Intermetallic compound phase formation in Pd + Cu alloy powders 239(1988)409

Palladium electrode

Thin-layer voltammetry of palladium in acid electrolytes 207(1986)279

Mechanistic aspects of reaction selectivities on surfactant-modified Pd and Pt electrodes and catalysts 235(1987)131

Infrared spectra of CO adsorbed on palladium and platinum electrodes co-existing with another adsorbed species in acidic solution 245(1988)245

Modifications of palladium electrode surfaces produced by periodic potential treatments 246 (1988)165

Palladium film

"Transparent" metals: preparation and characterization of light-transmitting palladium, rhodium, and rhenium films 228(1987)167

Palladium ion

Electrocatalytic oxidation of formic acid on Pd + Pt alloys of different bulk composition in acidic medium 245(1988)145

Palladium oxide

Formation of a higher palladium oxide in the oxygen evolution potential range 238(1987)115

Palladium + platinum alloy

Electrocatalytic oxidation of formic acid on Pd + Pt alloys of different bulk composition in acidic medium 245(1988)145

Palladium surface

Initial stages of electrooxidation of Pd (100) surfaces in sulfuric acid solution: an XPS study 217(1987)435

Palmitoyl derivative

Effects of L-ascorbic acid and its palmitoyl derivative on the peroxidation of linoleic acid in aqueous solutions containing alcohol 232(1987) 163

Parabolic flow

Flow phenomena in FIA and flow electrolysis 239(1988)1

Parallel condenser

The model of two parallel condensers and the application of the Helmholtz formula to adsorption of polar surfactants from aqueous solutions 201(1986)247

Paraquat

Electropolymerized multilayer and copolymeric structures based on substituted pyrroles 246 (1988)321

Partial charge transfer coefficient

On the coverage dependence of the partial charge transfer coefficient 202(1986)1

Partial differential equation

Electroanalytical investigations. Part VIII. The use of an expanding simulation space in the simulation of electrochemical reaction–diffusion models with orthogonal collocation 241(1988)17

Particle size effect

A particle size effect in the sensitization of TiO_2 electrodes by a CdS deposit 204(1986)225

Passivation

Geometric influences on the spontaneous passivation of copper in alkaline hexacyanoferrate(III) solutions under conditions of free convection 213(1986)75

The analysis of dissolved Cr^{3+} with the rotating ring–disc technique and its application to the corrosion of Cr in the passive state 216(1987)229

The effects of adding Tl(I) to the electrolyte on the electrochemical and photoelectrochemical behaviour of passivated lead in H_2SO_4 in the potential range between the $PbSO_4$/PbO and PbO_2/O_2 regions 221(1987)197

The formation of the passive layer on Cr in 0.5 *M* H_2SO_4. A combined electrochemical and surface analytical study 228(1987)365

Kinetics of the anodic oxidation of isopropanol on chromium/titanium-oxide electrodes 229 (1987)339

Photoelectrochemical study of the effect of inhibitor on the passivation of copper in sodium hydroxide aqueous electrolyte 244(1988)333

Passive copper electrode

A photoelectrochemical study of passive copper in alkaline solutions 210(1986)213

Passive film

The influence of localized electronic states on the photoelectrochemical behavior of passive films 204(1986)197

A study of the passive film on iron by intensity modulated photocurrent spectroscopy 228(1987) 351

Electrochemistry of ferrocene in acetonitrile. Evidence for irreversible kinetic behavior due to passive film formation 237(1987)269

Penicillin

A voltammetric study of thiazolidine-4-carboxylic acid on mercury electrodes 245(1988) 157

Pentafluorobenzoic acid

Product-selective electroreduction of 2,3,4,5,6-pentafluorobenzoic acid to 2,3,4,5,6-pentafluorobenzyl and 2,3,5,6-tetrafluorobenzyl alcohols using solid cathodes in aqueous sulfuric acid 238(1987)315

Pentane

Pentane measurement in man as an index of lipoperoxidation 232(1987)117

Perchlorate ion

The growth of compact layers at the electrode interface. Part I. Complexes of cobalt, nickel and iron with 2,2′-bipyridine and 2,2′,2″-terpyridine in aqueous sodium perchlorate 206(1986)269

Specific adsorption of ascorbate ions on a mercury electrode in the presence of potassium perchlorate 206(1986)285

Investigation of ion transfer across the membrane-stabilized interface of two immiscible electrolyte solutions. Part I 217(1987)253

Electrode reactions at extremely negative potentials. Part II. The kinetics of the Ba(II)/Ba(Hg) electrode reaction in aqueous perchlorate solutions 236(1987)177

Adsorption of 2-mercaptoethanol and In(III)–2-mercaptoethanol on mercury electrodes in $HClO_4 + NaClO_4$ medium 238(1987)367

The interpretation of solution electrolyte vibrational bands in potential-difference infrared spectroscopy 239(1988)55

Anomalous transient behavior in the electrogenerated chemiluminescence of 9,10-diphenylanthracene 242(1988)107

Perchloric acid

The influence of surface crystallography on the rate of hydrogen evolution at Pt electrodes 226 (1987)351

Electrochemistry of the ordered Rh (111) electrode. Surface preparation and voltammetry in $HClO_4$ electrolyte 227(1987)259

The temperature dependence of the double-layer properties of gold faces in perchloric acid solutions. Part I. The (210) gold face 229(1987) 107

"In situ" analysis by infrared reflectance spectroscopy of the adsorbed species resulting from the electrosorption of ethanol on platinum in acid medium 229(1987)353

The double layer of single crystal gold electrodes in liquid and solid $HClO_4 \cdot 5.5\ H_2O$ 230(1987)281

The temperature dependence of the double-layer properties of gold faces in perchloric acid solutions. Part II. The (110) gold face 236(1987) 283

Infrared spectra of CO adsorbed on palladium and platinum electrodes co-existing with another adsorbed species in acidic solution 245(1988)245

Electrochemical synthesis and properties of polycarbazole films in protic acid media 246 (1988)73

Synthesis and properties of film electrodes from *N*-substituted carbazoles in acid medium 246 (1988)87

Correlation of heterogeneous electron transfer rates with structural change in cobalt tetraaza macrocyclic complexes 250(1988)107

Percolation conductivity

Percolation conductivity in a perfluorosulphonic membrane with sorbed NaOH 234(1987)341

Perfluorinated film

Proton leakage through perfluorinated anion exchange membranes 210(1986)329

Perfluoroalkanesulphonic acid

Extraordinary temperature effect on the hydrogen electrode potential in concentrated perfluoroalkanesulfonic acids 219(1987)347

Perfluorosulphonic ion

A study of the superselectivity of Nafion perfluorosulfonic membranes 216(1987)71

Perfluorosulphonic membrane

Percolation conductivity in a perfluorosulphonic membrane with sorbed NaOH 234(1987)341

Periodic potential

The electroformation of thick hydrous nickel hydroxide films through the application of periodic potential signals 225(1987)227

Changes in real surface area, crystallographic orientation and morphology of platinum electrodes caused by periodic potential treatments: phenomenological approach 239 (1988)67

Modifications of palladium electrode surfaces produced by periodic potential treatments 246 (1988)165

Permeability

Differences in permeability of dioleoylphosphatidylcholine model membranes containing saturated or unsaturated phosphatidic acids 211(1986)167

Permittivity

Kinetics of salt extraction into the high-permittivity oil phase. Rate measurement by electrolysis at the interface of two immiscible electrolyte solutions 213(1986)323

The standard Gibbs energy of ion resolvation and non-linear dielectric effects 235(1987)23

Peroxidase

A method for estimation of hydrogen peroxide based on mediated electron transfer reactions of peroxidases at electrodes 201(1986)1

Peroxidase-catalyzed and electrochemical oxidation of L-tryptophan 211(1986)257

Peroxidation

Fatty acid peroxyl radicals: their generation and reactivities 232(1987)37

Pentane measurement in man as an index of lipoperoxidation 232(1987)117

Effects of L-ascorbic acid and its palmitoyl derivative on the peroxidation of linoleic acid in aqueous solutions containing alcohol 232(1987) 163

Active oxygens and the peroxidation of linoleic acid catalysed by degraded species of ascorbic acid 232(1987)171

Formation, reactions and toxicity of aldehydes produced in the course of lipid peroxidation in cellular membranes 232(1987)187

Lipid peroxidation and brain mitochondrial damage induced by ethanol 232(1987)211

Effects of organic peroxides on human epidermal keratinocytes 232(1987)263

Role of lipid peroxidation and free radical scavengers on endotoxin shock 232(1987)295

Tissue oxidation after endotoxin 232(1987)301

Peroxide

Role of peroxides in the cerebral transmembrane ion fluxes and their relevance to ischemic brain edema 232(1987)307

The electrochemical reduction of oxygen on passive iron in alkaline solutions 243(1988)171

Peroxodisulphate reduction

Redox mediation involving oxide films as examined by surface-enhanced Raman spectroscopy: peroxodisulfate reduction at oxide-modified gold electrodes 234(1987)237

Peroxomonosulphate ion

Recent thermodynamic data for some reactions of peroxomonosulphate ion 214(1986)481

Peroxyl radical

Formation and reaction of peroxyl radicals of polynucleotides and DNA in aqueous solution 232(1987)147

Persulphate ion

The effect of underpotential deposition of heavy metals on the kinetics of the cathodic reduction of chromium(VI) and persulphates on platinum 237(1987)137

Pertechnetate ion

Mechanism and kinetics of the stepwise voltammetric reduction of pertechnetate in alkaline solution to Tc(VI), Tc(V) and Tc(IV) 219(1987)221

Quantitative analytical assay of small amounts of technetium by stripping chronopotentiometry at a glassy carbon electrode 241(1988)125

Perturbation

Application of the fast Walsh–Hadamard transform and the fast Haar transform for electrochemical impedance measurements based on a periodic square-wave perturbation signal derived from Walsh functions 222(1987)367

Transient peak membrane potential in a liquid membrane system generated by pH jump: non-linear response to perturbation 231(1987)193

Perturbation function

Chronopotentiometry with non-linear perturbation functions at the DME with a preceding blank period 227(1987)1

Perturbation molecular orbital theory

Consideration of electrochemical dimerization reactions in terms of the perturbation molecular orbital theory. Part II. Determination of the parameters of the correlation equation 209 (1986)43

Pesticide

Investigations on the oxidation of the carbamate pesticide Aminocarb 239(1988)187

Electroanalytical study of the pesticide Guthion 244(1988)221

Phase-selective impedance measurement

A simulation analysis of errors in the measurement of standard electrochemical rate constants from phase-selective impedance data 222(1987)21

Phase angle

A systematic approach to faradaic current, charging current and phase angle measurement by digital alternating current polarography 222 (1987)35

Phase diagram

Spectroelectrochemical study of polyaniline: the construction of a pH–potential phase diagram 219(1987)335

Phase formation

Condensed thymine films at the mercury/water interface. Part I. General features 201(1986)133

Electrochemical adsorption and phase formation on mercury in oxalate ion solutions 207(1986)263

Comparative studies of electrochemical phase formation by amperometric and microscopic methods. Part I. Nucleation kinetics in dilute solutions of mercury nitrate 235(1987)237

Comparative studies of electrochemical phase formation by amperometric and microscopic methods. Part II. Nucleation kinetics in the presence of surfactants 235(1987)249

Intermetallic compound phase formation in Pd + Cu alloy powders 239(1988)409

Phase transition

On the problem of phase transitions in electrochemical adsorption reactions 208(1986)69

Phase transitions in mercury–quinoline derivative systems. Anodic electrocrystallization processes in aqueous ferron solutions 215(1986)345

Condensed thymine films at the mercury/water interface. Part V. Phase transitions 230(1987)241

pH and chain length dependence of phosphatidic acid phase transition parameters 231(1987)509

On adsorption according to the lattice gas model (Ising model) 236(1987)21

Phase transitions of salt monolayers at the mercury/water interface. Tetraphenylphosphonium chloride 236(1987)311

Phenanthroline

Interfacial spectroelectrochemical Raman study of the silver/1,10-phenanthroline system in chloride medium 207(1986)127

Electrochemical oxidation of the tris-1,10-phenanthroline iron(II) cation in the presence of sodium dodecylsulfate 219(1987)125

Electrochemical behavior of iron–1,10-phenanthroline complexes at a carbon paste electrode 219(1987)139

Electroanalysis with modified carbon paste electrodes. Coordination trends, selectivity and sensitivity 242(1988)87

Phenazine

Electrochemical preparation of a ladder polymer containing phenazine rings 219(1987)117

Electrochemistry in near-critical and supercritical fluids. Part VI. The electrochemistry of ferrocene and phenazine in acetonitrile between 25 and 300 °C 243(1988)117

Cyclic voltammetry of polyaniline: interpretation of the middle peak 249(1988)97

Phenolic antioxidant

Fatty acid peroxyl radicals: their generation and reactivities 232(1987)37

Phenothiazine

Electropolymerized multilayer and copolymeric structures based on substituted pyrroles 246 (1988)321

Phenylenediamine

Electrochemical preparation of a ladder polymer containing phenazine rings 219(1987)117

Phenylmaleimide

On the electrochemical reduction of *N*-phenylmaleimide and related compounds 202 (1986)299

Comments on the paper "The electrochemical reduction of some fused ring systems" by H.M. Fahmy, B. Nashed, F.A. Khalifa, A. Abdel Moneim and M. Abdel Azzem, and on the short communication "On the electrochemical reduction of *N*-phenylmaleimide and related compounds" by H. Lund 213(1986)159

Phenylpropanedione

Polarographic reduction of aldehydes and ketones. Part XXVII. 1-Phenyl-1,2-propanedione 214(1986)237

Phenylselenobenzonitrile

Electrochemical synthesis of phenylselenobenzonitriles and phenyltellurobenzonitriles by the $S_{RN}1$ mechanism using a redox catalyst 238(1987)239

Phenyltellurobenzonitrile

Electrochemical synthesis of phenylselenobenzonitriles and phenyltellurobenzonitriles by the $S_{RN}1$ mechanism using a redox catalyst 238(1987)239

Phospha-azene

Electrochemistry of some *N*-substituted phospha-λ^5-azenes in acetonitrile. Mechanistic aspects, electrophoric group behavior, and substituent effects 236(1987)219

Phosphate ion

The kinetics of anion equilibration of human erythrocytes in phosphate-containing media of low chloride concentration 211(1986)67

Phosphate-sensitive electrode

A phosphate-sensitive electrode based on $BiPO_4$-modified glassy carbon 214(1986)135

Phosphatidic acid

pH and chain length dependence of phosphatidic acid phase transition parameters 231(1987)509

Phosphatidylcholine

Adsorption of phospholipids at the interface between two immiscible electrolyte solutions. Part I. Equilibrium adsorption of phosphatidylcholines at the water/nitrobenzene interface 242(1988)277

Phosphoenzyme

A spin probe study of the water associated with a steady-state level of phosphoenzyme of the Ca-ATPase 231(1987)457

The state of water associated with the phosphoenzyme of the Ca-ATPase of sarcoplasmic reticulum. A spin probe study 231 (1987)473

Phospholipid

Adsorption of phospholipids at the interface between two immiscible electrolyte solutions 227(1987)281

Adsorption of phospholipids at the interface between two immiscible electrolyte solutions. Part I. Equilibrium adsorption of phosphatidylcholines at the water/nitrobenzene interface 242(1988)277

Phospholipid bilayer

On the non-local electrostatic theory of hydration force 204(1986)79

Phospholipid monolayer

Phospholipid monolayers at the mercury/water interface 202(1986)253

The kinetics of ionic transfer across adsorbed phospholipid layers 243(1988)455

Phospholipid monolayers of di-oleoyl lecithin at the mercury/water interface 244(1988)99

Phospholipid monolayers of di-oleoyl lecithin (di-O-PC) at the mercury/water interface. Effects on faradaic reactions 248(1988)167

Phosphoric acid

Influence of Cl^- ions on the photoelectrochemical behaviour of the Cu/H_3PO_4 system 210(1986)247

On the effect of the Fe^{2+}/Fe^{3+} redox couple on oxidation of carbon in hot H_3PO_4 213(1986)161

Phosphorus trifluoride

Investigations on the electrooxidation of PF_3 adsorbed on Pd and Au + Pd alloys 201(1986)397

Phosphorylation

The role of peroxides in mitochondrial reduction of dioxygen to water 232(1987)51

Phosphotungstic heteropolyanion

New aspects of the electrochemistry of heteropolyacids. Part IV. Acidity dependent cyclic voltammetric behaviour of phosphotungstic and silicotungstic heteropolyanions in water and *N,N*-dimethylformamide 227(1987)77

New aspects of the electrochemistry of heteropolyacids. Part III. Further proof of minimal solvation and ion pairing of silicotungstic and phosphotungstic species in acidic concentrated aqueous solutions of alkali-metal salts 230(1987)267

Photoacoustic spectroscopy

Effect of brightener on copper plating. In situ investigation by the PAS technique 243(1988)475

Photoactivity

Photoactivity on the passivated lead electrode in H_2SO_4 under illumination during cyclic voltammetry within the potential range between $PbSO_4/PbO$ and PbO_2/O_2 regions 202(1986)241

Photoanode

Stabilization of the polycarbazole protected n-InSe photoanode for photoelectrochemical solar cells 248(1988)233

Photoassist

Photoassisted and electrochemical reduction of nitric acid to hydroxylamine and ammonia 209 (1986)405

Photocapacitance spectroscopy

Photocapacitance spectroscopy of thin film cadmium selenide electrodes 216(1987)41

Photocatalysis

Where is the actual site for hydrogen evolution? Isotopic analysis for NiO-deposited $SrTiO_3$ photocatalyst 213(1986)319

Formation of ethyl alcohol in the photocatalytic reduction of carbon dioxide by SiC and ZnSe/metal powders 225(1987)287

Electrochemical and photocatalytic properties of water-soluble tin(IV) *meso*-tetraanilinporphyrin 226(1987)157

Photocatalytic reduction of carbon dioxide with metal-loaded SiC powders 247(1988)333

Photocell

Electrocatalytic reduction of CO_2 to methanol. Part VIII. Photoassisted electrolysis and electrochemical photocell with n-TiO_2 anode 220(1987)333

Photochargeable device

A photochargeable device composed of bilayer membranes of poly(3-methylthiophene) and Prussian Blue 227(1987)255

Photochemical oxidation

Electrochemical and photochemical oxidation of the deazapurine nucleotide drug tubercidin-5′-monophosphate 239(1988)161

Photochemical reduction

Voltammetric characteristics of the RuO_2 film electrode in relation to the catalytic properties of RuO_2 for the photochemical production of hydrogen 247(1988)253

Photochemistry

Photochemistry of photosynthetic reaction centres 212(1986)77

Photocorrosion

Electrochemical stabilization of illuminated single crystal WSe_2 anodes 242(1988)191

Photocurrent

Charge carrier dynamics in the picosecond time domain in photoelectrochemical cells 204(1986) 211

Electronic non-equilibrium charge transfer kinetics in anodic dark and photocurrents on n-III–V-semiconductor electrodes 209(1986)259

Frequency response analysis of photocurrent doubling. The reduction of oxygen at p-GaAs 209(1986)307

Electronic non-equilibrium charge transfer mechanisms in alternating photocurrents on semiconductor electrodes 221(1987)33

Photocurrents due to the capture of dry and hydrated electrons by nucleic acid molecules 226(1987)171

Photocurrent kinetics during electron emission from a metal into an electrolyte solution. Part IX. Electrode reactions of the intermediates generated in the bromate ion reduction on mercury 241(1988)247

The electrochemistry of alkaline $K_3Cr(CN)_6$ solutions at p-GaAs 243(1988)161

On the evaluation of the flatband potential from photocurrent measurements 244(1988)307

Photoeffect

Photoeffect on a Cu anode during electropolishing 210(1986)229

Experimental study of illumination effects on the cathodic current–voltage curve on n-GaAs 223 (1987)215

Photoelectroanalysis

Signal-to-noise enhancement using carbon fiber electrodes in the photoelectroanalytical detection of tris(2,2′-bipyridine)ruthenium(II) 208(1986)77

Photoelectrocatalysis

Light-induced electron transfer and photoelectrocatalysis of chlorine evolution at FeS_2 electrodes 204(1986)185

Photoelectrochemical cell

Charge carrier dynamics in the picosecond time domain in photoelectrochemical cells 204(1986) 211

Surface methoxylation as the key factor for the good performance of n-Si/methanol photoelectrochemical cells 233(1987)37

Photosynthetic production of H_2O_2 from water at n-TiO_2 electrodes in a photoelectrochemical cell: influence of electrolyte pH and Pt electrodeposition 237(1987)225

Photoelectrochemical microscopy

Photoelectrochemical microscopy as a probe of localized properties of thin TiO_2 films 237 (1987)295

Photoelectrochemical model

In vitro photoelectrochemical model of the *Z* scheme in green plant photosynthesis 231(1987) 325

Photoelectrochemistry

The influence of localized electronic states on the photoelectrochemical behavior of passive films 204(1986)197

Photoassisted electro-reduction of CO_2 on p-GaAs in the presence of Ni cyclam^{2+} 206(1986) 333

Photoelectrochemistry of *para*-diethynylbenzene copper(I) acetylides deposited as thin films onto copper electrodes 207(1986)247

Photoelectrochemical and chemical corrosion inhibition of n-type GaAs in highly concentrated iodide solutions 209(1986)219

A photoelectrochemical study of passive copper in alkaline solutions 210(1986)213

Influence of Cl^- ions on the photoelectrochemical behaviour of the Cu/H_3PO_4 system 210(1986)247

Cathodic generation of $CdSe_xTe_{1-x}$ at Te film electrodes 215(1986)249

Electrochemical and photoelectrochemical consequences of "doping" zinc tetraphenylporphyrin with axial pi acid ligands 221(1987)83

The effects of adding Tl(I) to the electrolyte on the electrochemical and photoelectrochemical behaviour of passivated lead in H_2SO_4 in the potential range between the $PbSO_4/PbO$ and PbO_2/O_2 regions 221(1987)197

Electrochemistry and photoelectrochemistry of chlorophyll on a metallic electrode. Part I. Properties of chlorophyll adsorption films on metals 227(1987)99

Electrochemistry and photoelectrochemistry of chlorophyll on a metallic electrode. Part II. Photoreaction of adsorbed chlorophyll 227 (1987)115

Photoelectrochemical characteristics of metal-modified epitaxial n-Si anodes. Part I. NiO(OH)-coated n^+/p-Si and n^+/n-Si electrodes for catalytic oxygen evolution 227 (1987)213

Photoelectrochemical properties of semiconductor diamond 228(1987)19

Amorphous semiconductor–electrolyte junction. Influence of the wavelength and oxide thickness on the photocharacteristics of a-Nb_2O_5 anodic films 228(1987)119

Photoelectrochemistry of polycrystalline n-WO_3. Electrochemical characterization and photoassisted oxidation processes 238(1987)129

Involvement of coordination chemistry during electron transfer in the stabilization of the pyrite (FeS_2) photoanode 242(1988)255

The mirage effect in photoelectrochemistry 243 (1988)187

Photoelectrochemical study of the effect of inhibitor on the passivation of copper in sodium hydroxide aqueous electrolyte 244(1988)333

Effects of electrolytes on the photoelectrochemical reduction of carbon dioxide at illuminated p-type cadmium telluride and p-type indium phosphide electrodes in aqueous solutions 249(1988)143

Photoelectrode

Surface treatments of n-$CuInSe_2$ polycrystalline electrodes for photoelectrochemical applications 208(1986)85

A polymer-film based photoelectrode containing immobilized quencher and chromophore polymer blends 224(1987)59

Chemical modification of GaPc–Cl thin film photoelectrodes 248(1988)349

Photoelectrolysis

Energetics and dynamics of the interface of RuS_2 and implications for photoelectrolysis of water 201(1986)263

Photoelectron

Photoelectron emission from poly- and single-crystalline platinum and gold electrodes using pulsed ultraviolet laser irradiation 228(1987)283

Photoelectroreduction

Laser-induced electron ejection at metal surfaces. Evidence for photoelectroreduction of cobalt(III) and chromium(III) ammines by direct heterogeneous electron transfer 228(1987)265

Photoemission

Photoemission approach to the investigation of the electric double layer 204(1986)281

Photoemission at a mercury electrode with the hydrogen ion as scavenger 208(1986)219

Surface enhanced Raman scattering and local photoemission currents on the freshly prepared surface of a silver electrode 228(1987)197

Photointercalation

Photointercalation of hydrogen in p-type tungsten diselenide 209(1986)395

Photopolarography

Paths of the electroreduction of 2,2′-bipyridyl 226(1987)117

Photopotential

Pulsed laser-induced photopotentials at the cobalt-photosensitized ZnO/electrolyte interface 215(1986)161

Photoreaction

Electrochemistry and photoelectrochemistry of chlorophyll on a metallic electrode. Part II. Photoreaction of adsorbed chlorophyll 227 (1987)115

Photoreduction

Light-driven hydrogen peroxide production as a way to solar energy conversion 232(1987)71

Oxygen photoelectroreduction on hydrogen phthalocyanine films in alkaline solutions 237 (1987)39

Photoresponse

Picosecond time-resolved measurements of fast recombination losses in the photoresponse of semiconductor/liquid junction cells 228(1987)29

Photoresponse of native photosynthetic systems and chlorophyll-containing films on metal electrodes 228(1987)109

Photosensitization

Electrochemical and photocatalytic properties of water-soluble tin(IV) *meso*-tetraanilinporphyrin 226(1987)157

Photo and radiation-induced formation of thymidine hydroperoxides 232(1987)155

Electrochemical and FTIR spectroscopic characterization of ferrocyanide-modified TiO_2 electrodes designed for efficient photosensitization 246(1988)411

Photosynthesis

The electrochemical mechanism of photosystem II functioning in chloroplasts 205(1986)245

Photochemistry of photosynthetic reaction centres 212(1986)77

From biological membrane processes to industrial membrane technologies 231(1987)121

In vitro photoelectrochemical model of the *Z* scheme in green plant photosynthesis 231(1987) 325

Photosynthetic bacterium

Investigation of electrochemical double-layer effects on chromatophore membranes of photosynthetic bacteria 214(1986)407

Photosystem

The electrochemical mechanism of photosystem II functioning in chloroplasts 205(1986)245

Spectroelectrochemical behaviour of water bounded Chl *a* in the presence of various acceptors 231(1987)17

Photovoltaic cell

The photovoltaic effect of an insulating polymer-hybridized p-Si solar cell 241(1988)379

Phthalocyanine

A mechanistic study of the electro-oxidation of hydrazine on phthalocyanines of VO, Cr, Mn, Ni, Cu and Zn attached to graphite electrodes 210(1986)95

Spectro-electrochemistry of cobalt and iron tetrasulphonated phthalocyanines 213(1986)217

Phthalocyanine electrode

Reduction and reoxidation of metal-free phthalocyanine electrodes in non-aqueous media. Electrochemical behavior and spectroscopic analysis 221(1987)105

Phthalocyanine film

Oxygen reduction on vacuum-deposited and adsorbed transition-metal phthalocyanine films 214(1986)523

Physical exercise

The effects of physical exercise on the antioxidative capacity of the liver 232(1987)231

Physiological fluid

An electroanalytical approach to the determination of lipid peroxides 232(1987)127

Pi acid

Electrochemical and photoelectrochemical consequences of "doping" zinc tetraphenylporphyrin with axial pi acid ligands 221(1987)83

Picrate ion

Kinetic analysis of the picrate ion transfer across the interface between two immiscible electrolyte solutions from impedance measurements at the equilibrium potential 242(1988)291

Piezoelectric nucleation

Piezoelectric nucleation mechanism in electrocrystallisation 217(1987)209

Pigeon breast muscle

Azide binding to cytochrome *c* oxidase. Effects on the oxidation–reduction and spectral properties of cytochromes *a* and a_3 231(1987) 369

Site of azide interaction with cytochrome *c* oxidase in submitochondrial particles from pigeon breast muscle 231(1987)383

Pinacol

Electrochemical behaviour of 4-acetyl-1 phenoxyalkyl ammonium salts. An example of a system with adsorption of both substrate and reduction products 236(1987)253

Piperidine

Cyclic voltammetric studies on nitrosubstituted *N*(thioacyl)piperidines and morpholines 239 (1988)227

Pitting

Electrical breakdown and pitting in anodic films on tungsten in halogen ion-containing solutions 248(1988)117

Pit volume

Evaluation of pit volume by measurement of corrosion potential fluctuations for type 304 stainless steel 241(1988)385

Plane electrode

Unified treatment of single potential step voltammetries at a plane electrode and at the DME. New polarisation modes 247(1988)37

Theory of the chronoamperometric and polarographic response of the catalytic-deactivation mechanism 249(1988)23

Plasma polymerization

Chemical and mechanical properties of redox polymer-modified electrodes. Part II. Redox thermodynamics of plasma-polymerized vinylferrocene electrodes 219(1987)71

Plasma protein

Radical-trapping antioxidants *in vitro* and *in vivo* 232(1987)219

Platelet

Human fibrinogen adsorption onto surface-energy-controlled substrata 212(1986)27

Platinized platinum electrode

Radiotracer study of the adsorption of H_2S at a platinized platinum electrode 206(1986)297

Investigation of ruthenium deposition onto a platinized platinum electrode in sulfuric acid media 230(1987)233

Radiotracer study of the adsorption of taurine at a platinized platinum electrode 241(1988)343

Radiotracer study of the adsorption of Ca^{2+} ions on a platinized platinum electrode in acid medium 248(1988)411

Platinum

Different processes contributing to the development of preferred oriented platinum surfaces by fast periodic potential perturbation techniques 205(1986)279

Characterization of single-crystal electrode surfaces as a function of potential and pH by Auger spectroscopy and LEED. Pt (111) in aqueous $CaCl_2$ and HCl solutions 217(1987)101

Structure and composition of the Pt(s) [6(111) × (111)] step-terrace surface vs. pH and potential in aqueous Br^- solutions. Studies by LEED and Auger spectroscopy 217(1987)111

Comparative study of CO adsorbates for different structures of platinum surfaces 227(1987)199

The in-situ preparation of well-defined, single crystal electrodes 230(1987)221

Quantitative analysis of the distribution of the hydrogen adsorption states at platinum surfaces. Part II. Application to Pt (110), stepped and polyoriented platinum surfaces in sulphuric acid medium 233(1987)251

In situ X-ray diffraction measurements of the surface structure of Pt in the presence of "weakly" adsorbed H 247(1988)311

Platinum black

Characterization of sulfur layers from reduced sulfur dioxide on porous platinum black/Teflon electrodes 246(1988)193

Platinum bonded solid polymer electrolyte electrode

Enhancement in methanol oxidation by molybdenum modification of Pt–SPE electrodes 250(1988)213

Platinum + chromium alloy electrode

The ellipsometric characterization of Pt + Cr alloy surfaces in acid solutions 205(1986)163

Electrochemical and surface science investigations of PtCr alloy electrodes 220(1987) 269

Platinum complex

Electrochemistry of platinum complexes. Part I. Polarographic reduction mechanism with reference to electrochemical detection 238(1987) 297

Platinum electrode

Effect of non-aqueous solvents on the chemisorption and orientation of aromatic compounds at smooth polycrystalline platinum electrodes: naphthohydroquinone and tetrahydroxybiphenyl in water + acetonitrile solutions 201(1986)153

Adsorption of *p*-nitroaniline on platinum studied by modulated reflectance spectroscopy 201 (1986)163

Two-electron oxidation of *N,N,N′,N′*-tetramethyl naphthidine in acetonitrile. The reactivity of its dication to aromatic nucleophilic substitution by pyridine 201(1986)367

On-line mass spectroscopy of volatile products during methanol oxidation at platinum in acid solutions 201(1986)403

In-situ investigation of the film growth mechanism using multiple internal reflection Fourier transform infrared spectroscopy (MIRFTIRS). Part I. Behaviour of iron and platinum electrodes in alkaline methanolic solutions 201(1986)413

Structural effects in electrocatalysis: oxidation of formic acid and hydrogen adsorption on platinum single-crystal stepped surfaces 204(1986)329

Catalytic effects of Hg and Tl submonolayers on the electrooxidation of formic acid on Pt 205 (1986)135

Surface properties of polycrystalline platinum and their influence on formic acid oxidation 205(1986)151

Electrochemical adsorption behaviour of platinum stepped surfaces in sulphuric acid solutions 205(1986)267

Hydrogen electrosorption on single-crystal platinum stepped surfaces and the effects of oxide formation 205(1986)335

A study of the conditions for the electrodeposition of polythiophen in acetonitrile 206(1986)147

Chemisorbed CO on a polycrystalline platinum electrode. The effect of conditioning of the surface and of partial pressure of CO 206(1986) 197

Electrochemical coating of a platinum electrode by a poly(pyrrole) film containing the *fac*-Re(2,2′-bipyridine)$(CO)_3Cl$ system. Application to electrocatalytic reduction of CO_2 207(1986)315

Electrochemical behavior of methyl viologen in zeolite particle films 208(1986)95

Electrocatalysis by ad-atoms. Part XX. Rate-determining step in methanol oxidation enhanced by oxygen-adsorbing ad-atoms 209(1986)151

Pulsed amperometric detection of sulfur compounds. Part I. Initial studies at platinum electrodes in alkaline solutions 209(1986)159

An electrochemical study of the oxidation of thiazolidine-4-carboxylic acid on platinum electrodes 209(1986)339

Researches on chemically modified electrodes. Part XV. Preparation and electrochromism of the vanadium hexacyanoferrate film modified electrode 210(1986)31

Investigation of chloroform adsorption on a platinum electrode by the tracer method 210 (1986)161

Complementary study of the mechanism of anodic chlorine evolution in nitromethane 210 (1986)251

In-situ investigation of the film growth mechanism using multiple internal reflection Fourier transform infrared spectroscopy (MIRFTIRS). Part II. Behaviour of iron and platinum electrodes in the presence of hexamethylenediamine in alkaline methanolic solutions 210(1986)295

Surface EXAFS of an electrochemical interface. Iodine on platinum (111) 210(1986)311

Surface lateral organic modifiers in platinum electrocatalysis 210(1986)315

Electrocatalytic influence of underpotential Tl, Pb and Bi monolayers on the electrochemical behaviour of rhodizonic acid and tetrahydroxy-1,4-benzoquinone on Pt in acid solutions 213 (1986)135

Infrared spectroscopic study of methanol and formic acid adsorbates on a platinum electrode. Part I. Comparison of the infrared absorption intensities of linear CO(a) derived from CO, CH_3OH and HCOOH 213(1986)149

Underpotential deposition of silver on polycrystalline platinum electrodes. Controlling phenomena derived from potentiostatic transients 213(1986)301

The effects of anions on hydrogen electrosorption on platinum single-crystal electrodes 214(1986) 555

Kinetic studies using a rotating cylinder electrode. Part I. Electron transfer rates in ferrous/ferric sulfate on platinum 215(1986)151

A UPS, XPS and work function study of emersed silver, platinum and gold electrodes 215(1986)331

The effect of adsorbed carbon monoxide on hydrogen adsorption and hydrogen evolution on platinum 215(1986)357

Radiotracer study of the adsorption of CN^- ions and simultaneous adsorption of Ca^{2+} and CN^- ions at a platinized platinum electrode in alkaline medium. Novel experimental evidence for cation adsorption induced by strongly chemisorbed anions 215(1986)369

Electrocatalytic oxidation of ethylene glycol. Part III. In-situ infrared reflectance spectroscopic study of the strongly bound species resulting from its chemisorption at a platinum electrode in aqueous medium 216(1987)169

Kinetics of hydroquinone chemisorption at polycrystalline platinum electrodes. The effect of surface roughness 217(1987)121

Infrared spectroscopic study of methanol and formic acid adsorbates on a platinum electrode. Part II. Role of the linear CO(a) derived from methanol and formic acid in the electrocatalytic oxidation of CH_3OH and HCOOH 218(1987)155

"In situ" investigation by simultaneous voltammetry and UV–visible reflectance spectroscopy of some viologen radicals adsorbed on a platinum electrode 218(1987)307

The influence of Cu adatoms on a Pt electrode on the oxidation of formic acid 218(1987)327

A coupled voltammetric and radiometric (voltradiometric) study of the simultaneous adsorption of hydrogen and anions at platinized platinum electrodes 218(1987)337

Hydrogenative/cathodic stripping of iodine chemisorbed on smooth polycrystalline platinum electrodes 219(1987)327

Catalysis of quinone–hydroquinone redox reactions at polypyrrole benzenesulphonate-coated platinum electrodes 220(1987)55

Electrochemical oxidation of HCOONa on Pt in acidic solutions 220(1987)125

Application of the convolution potential sweep voltammetric method to the chlorine evolution reaction in nitromethane 221(1987)61

A conducting polymer derived from *para*-aminodiphenylamine 221(1987)69

Cyclic voltammetric studies of nitrato complexes of various metal ions in molten $LiNO_3 + KNO_3$ at 180 °C 221(1987)115

Some specific features of the catalytic role of upd foreign metal adatoms and water on the anodic oxidation of absolute methanol on Pt 221(1987)175

Electrochemical procedure for the development of large active surface area platinum electrodes with preferred crystallographic orientations 221 (1987)239

Electroactivity of strongly-adsorbed redox centers: reduction of iodine chemisorbed on platinum in aprotic solvent 221(1987)281

Long optical path length thin-layer spectroelectrochemistry. Quantitation and potential dependence of electroinactive species adsorbed on platinum 222(1987)321

Electrogenerated chemiluminescence. Part IL. Emission from acetonitrile solutions containing no added luminescors 222(1987)331

State of surface oxide films at Pt anodes and "volcano" behaviour in electrocatalysis for anodic Cl_2 evolution 224(1987)163

The behaviour of electrodispersed platinum electrodes for the voltammetric electrooxidation of reduced carbon dioxide 224(1987)189

Quantitative analysis of the distribution of the hydrogen adsorption states at platinum surfaces. Part I. Application to Pt (100) in sulphuric acid medium 225(1987)205

Infrared spectroscopic study of the methanol adsorbates at a platinum electrode. Part I. Influence of the bulk concentration of methanol upon the nature of the adsorbates 225(1987)215

A kinetic analysis of the oxidation of methanol at platinum-based electrodes by quantitative determination of the reaction products using liquid chromatography 225(1987)281

Electrochemistry and spectroelectrochemistry of cytochrome *c* at a platinum electrode 226(1987) 199

The influence of surface crystallography on the rate of hydrogen evolution at Pt electrodes 226 (1987)351

Kinetics and mechanism of H and OH electrosorption on faceted (100) Pt electrodes in acid solutions 227(1987)183

Reinvestigation of the potential dependence of the adsorption of acetic acid on platinum electrodes by a radiotracer method 227(1987)223

Surface Raman spectroscopy at Pt electrodes 228(1987)219

Photoelectron emission from poly- and single-crystalline platinum and gold electrodes using pulsed ultraviolet laser irradiation 228(1987)283

In-situ X-ray diffraction studies of Pt electrode/solution interfaces 229(1987)125

Clay modified electrodes. Part VII. The electrochemical behavior of tetrathiafulvalenium-montmorillonite modified electrodes 229(1987)191

Competition between the rearrangement of electrodeposited overlayers of copper on platinum and the hydrogen electrode reactions 229(1987)327

"In situ" analysis by infrared reflectance spectroscopy of the adsorbed species resulting from the electrosorption of ethanol on platinum in acid medium 229(1987)353

Identification of the adsorbate during methanol oxidation 229(1987)367

Direct proof of the hydrogen in the methanol adsorbate at platinum — an ECTDMS study 229(1987)377

Electrocatalysis by ad-atoms. Part XXI. Catalytic effects on the elementary steps in methanol oxidation by non-oxygen-adsorbing ad-atoms 229(1987)385

Derivation of an approximate equation for chronoamperometric curves at microband electrodes and its experimental verification 230 (1987)61

Lateral modification and organization of mixed adlattices on polycrystalline platinum electrodes 230(1987)205

Cyclic voltammetric study of glucose oxidation on an oxide-covered platinum electrode in the presence of an underpotential-deposited thallium layer 231(1987)59

A study of the electrochemical growth and optical properties of polymeric thionine films on platinum using ellipsometry 233(1987)125

Voltammetric determination of indole in micellar and emulsified media 234(1987)175

New results for the electrosorption of methanol on polycrystalline platinum in acid medium obtained by programmed potential voltammetry 234(1987)315

"In situ" spectroelectrochemical studies of *N,N'*-dibenzyl and *N,N'*-diheptyl viologen radicals adsorbed on metallic (Pt, Au) electrodes 234(1987)329

Clay modified electrodes. Part VIII. Electrochemical behavior at montmorillonite and polypyrrole–montmorillonite films on platinum and glassy carbon electrodes 234(1987)347

Mechanistic aspects of reaction selectivities on surfactant-modified Pd and Pt electrodes and catalysts 235(1987)131

An in situ infrared study of the oxidation of sulfur dioxide on platinum electrodes 235(1987) 361

Pulsed linear sweep voltammetry with pulses of constant level in a potential scale, a polarization demanding condition in the study of platinum single crystal electrodes 236(1987)87

Electrochemical study on the poisoning intermediate formed from methanol dissociation at low index and stepped platinum surfaces 236 (1987)95

Infrared spectroscopic study of the methanol adsorbates at a platinum electrode. Part II. The Pt (100) surface in an acid medium 237(1987)119

The effect of underpotential deposition of heavy metals on the kinetics of the cathodic reduction of chromium(VI) and persulphates on platinum 237(1987)137

Electrocatalysis of methanol oxidation by adsorbed tin on platinum 238(1987)151

Infrared spectroscopic study of the methanol adsorbates at a platinum electrode. Part III. Structural effects and behaviour of a polycrystalline surface 238(1987)323

COH and CO as adsorbed intermediates during methanol oxidation on platinum 238(1987)383

Changes in real surface area, crystallographic orientation and morphology of platinum electrodes caused by periodic potential treatments: phenomenological approach 239 (1988)67

Rotating-disc electrode studies of the anodic oxidation of iodide in concentrated iodine + iodide solutions 239(1988)149

Electrochemical behavior of 5-amino-1,10-phenanthroline and oxidative electropolymerization of tris[5-amino-1,10-phenanthroline]iron(II) 239(1988)175

Analysis of a quasi-reversible two-electron cyclic voltammetric wave for an organometallic Ir(III)/Ir(I) couple at platinum and mercury electrodes 239(1988)253

Vibrational spectroscopy on platinum single-crystal electrodes. Part I. In-situ infrared spectroscopic studies of the adsorption and oxidation of CO on Pt (111) in sulphuric acid 239(1988)347

The influence of orientation on the electrocatalytic hydrogenation of hydroquinone chemisorbed at smooth polycrystalline platinum electrodes 239(1988)375

Single crystal radio-electrochemistry: adsorption of acetic acid on well-defined Pt (111) surfaces 239(1988)413

Methanol oxidation on unsupported and carbon supported Pt + Ru anodes 240(1988)133

The mechanism of electrocatalytic oxidation of formic acid on Pt (100) and Pt (111) in sulphuric acid solution: an EMIRS study 240(1988)147

Adsorption of CO on a Pt electrode in acidic solution. IR-active and -inactive CO's adsorbed in the double-layer region 240(1988)281

On the pH dependence of the reductive desorption of iodine at polycrystalline and single-crystal platinum electrodes in aqueous solvents 240(1988)309

Mechanisms of formic acid, methanol, and carbon monoxide electrooxidation at platinum as examined by single potential alteration infrared spectroscopy 241(1988)143

Electrochemical oxidation of CO on Pt in acidic and alkaline solutions. Part I. Voltammetric study on the adsorbed species and effects of aging and Sn(IV) pretreatment 241(1988)163

Reversible redox, hydrodesulfurization and anodic oxidation of chemisorbed thiophenols. A comparison at platinum and gold electrodes 241 (1988)199

Electrosorption of hydrogen and sulphuric acid anions on single-crystal platinum stepped surfaces. Part I. The [110] zone 241(1988)309

An in-situ infra-red study of poly thiophene growth 242(1988)47

Cyclohexanone as an effective hydride interceptor at platinum electrodes in non-aqueous media. Characterization via effects on the electrogenerated chemiluminescence of 9,10-diphenylanthracene 242(1988)123

Structural effects in electrocatalysis. Oxidation of D-glucose on Pt (100), (110) and (111) single crystal electrodes and the effect of upd adlayers of Pb, Tl and Bi 242(1988)221

Potential relaxation and interfacial capacitance behaviour of the Kolbe coupling reaction at Pt 242(1988)317

Chemical modification of Pt electrodes by tetra(4-pyridyl)porphyrin through siloxane polymer formation 243(1988)193

A study of HSO_4^- and SO_4^{2-} co-adsorption on a platinum electrode in sulfuric acid by in-situ FT-IR reflection absorption spectroscopy 243 (1988)203

An irreversible structure sensitive adsorption step in bismuth underpotential deposition at platinum electrodes 243(1988)419

Spectroscopic identification of the adsorbed intermediate in hydrogen evolution on platinum 243(1988)445

Underpotential deposition of silver on polyfaceted and electrochemically faceted Pt (100) electrodes. Application of the combined adsorption–desorption–nucleation and growth mechanism 244(1988)261

The electrochemical reactivity of toluene at porous Pt electrodes 244(1988)273

An in situ surface Fourier transform infrared study of complexes of lithium, magnesium, potassium and lanthanum ferrocyanide at platinum and gold electrodes 244(1988)301

On the origin of the "unusual splitting" of voltammograms of the Pt (111) electrode 244 (1988)347

Infrared spectra of CO adsorbed on palladium and platinum electrodes co-existing with another adsorbed species in acidic solution 245(1988)245

Electrochemical reactivity of 2,2′,5,5′-tetrahydroxybiphenyl and related compounds adsorbed at Pt (111) surfaces: studies by EELS, LEED, Auger spectroscopy and cyclic voltammetry 245(1988)253

Deposition and electrochemical stripping of mercury ions on polypyrrole based modified electrodes 246(1988)181

Electrocatalytic oxidation of glucose at platinum in alkaline medium: on the role of temperature 246(1988)349

On the adsorption and oxidation of ethanol on platinum as studied with in-situ IR spectroscopy 246(1988)449

Cathodic electropolymerization of polythiophene on platinum and various semiconducting electrodes 246(1988)467

Electrocatalytic hydrogenation and oxidation of model coal-derived compounds chemisorbed at smooth polycrystalline Pt: a survey 247(1988)241

The reorganization energy of the aqueous proton 249(1988)15

Surface electrochemistry of the anodic N_2 generation reaction at Pt and Au, and the discovery of cathodic N_2 evolution 249(1988)217

Electrocatalysis by ad-atoms. Part XXII. S_{hole} control by ad-atoms on HCOOH oxidation 249 (1988)253

Self-assembled surfactant monolayers on electrode surfaces. The formation of surfactant viologen monolayers on gold and platinum 249 (1988)333

Electrode kinetics of the Cu(II)/Cu(I) system at platinum in water + dimethylsulphoxide (DMSO) mixtures 250(1988)61

Correlation of heterogeneous electron transfer rates with structural change in cobalt tetraaza macrocyclic complexes 250(1988)107

Long-range structural effects in the anomalous voltammetry on ultra-high vacuum prepared Pt (111) 250(1988)301

New in-situ IR results on adsorption and oxidation of methanol on platinum in acidic solution 250(1988)451

Platinum electrodeposition

Photosynthetic production of H_2O_2 from water at n-TiO_2 electrodes in a photoelectrochemical cell: influence of electrolyte pH and Pt electrodeposition 237(1987)225

Platinum / glassy carbon electrode

In-situ IR study of adsorption and oxidation of methanol on platinum and platinised glassy carbon electrodes in sulphuric acid solution 250 (1988)127

Platinum group bimetallic catalyst

Preparation and characterization of carbon-based fuel-cell electrodes with platinum-group bimetallic catalysts 223(1987)91

Platinum group complex

Voltammetry of the complexes of the platinum metals with organic sulphides in acetonitrile 250 (1988)95

Platinum group metal

Effect of the nature of platinum group metals on the formation and properties of adatom silver coatings 224(1987)225

Platinum ion

Dc polarographic study of catalytic hydrogen evolution in the Pt(IV)–As(III) system 247 (1988)329

Platinum layer

Study of the platinum/electrolyte interface using surface plasmon excitation at stratified electrodes. Part I. Preparation and characterization of the electrodes 228(1987)251

Platinum microdisc electrode

Use of microelectrodes for the study of a fast chemical step in an electrode reaction 202(1986) 83

Electrochemistry of concentrated organic redox solutions 215(1986)223

Platinum microparticle

Electrodeposition of Pt ultramicroparticles in Nafion films on glassy carbon electrodes 208 (1986)373

Electrochemical dispersion of Pt microparticles on glassy carbon electrodes 223(1987)223

Preparation and electrocatalytic properties of conducting films of polypyrrole containing platinum microparticulates 240(1988)89

Platinum phthalocyanine

Study of the electroreduction of dioxygen on thin films of platinum phthalocyanine in alkaline solutions. Part I. Electrochemical investigations 239(1988)273

The electroreduction of oxygen on thin films of platinum phthalocyanine in alkaline solutions. Part II. Spectroelectrochemical data and mechanism 249(1988)167

Platinum + ruthenium alloy

Preparation of highly dispersed Pt + Ru alloy clusters and the activity for the electrooxidation of methanol 229(1987)395

Platinum salt

Studies of the process of catalytic hydrogen evolution on the epoxy-resin-impregnated graphite-based mercury film electrode 213(1986) 127

Elimination of the influence of interfering ions in the voltammetry of catalytic hydrogen evolution in the presence of platinum salts 250 (1988)411

Platinum / solution interface

Study of the platinum/electrolyte interface using surface plasmon excitation at stratified electrodes. Part I. Preparation and characterization of the electrodes 228(1987)251

In-situ X-ray diffraction studies of Pt electrode/solution interfaces 229(1987)125

Study of the platinum/electrolyte interface using surface plasmon excitation at stratified electrodes. Part II. Optical behaviour of Pt/H_2SO_4 and $Pt/H_2SO_4 + Cu^{2+}$ systems 246 (1988)43

Podophyllotoxin derivative

Electrochemistry of podophyllotoxin derivatives. Part II. Oxidation of teniposide and some epipodophyllotoxin derivatives 220(1987)101

Point of zero charge

Correlations between the equilibrium potential and the potential of zero charge of metals in different modifications 204(1986)343

Application of a modified version of the streaming method for the determination of the pzc of liquid gallium 215(1986)83

The temperature coefficient of the potential of zero charge of the (110) face of silver 218(1987) 355

Inner-layer capacity at the pzc for perfect (111), (100) and (110) faces of silver. Surface area and capacitance contributions of superficial defects for real electrodes 224(1987)285

Silver–water interactions. Part I. Model of the inner layer at the metal/water interface 230 (1987)189

Study of gold low index faces in KPF_6 solutions. Part I. Experimental behaviour and determination of the points of zero charge 234 (1987)93

Streaming method study of interfaces between immiscible electrolyte solutions 235(1987)287

Electron transfer reactions at the interface between two immiscible electrolyte solutions 244(1988)15

Poisoning

Electrochemical study on the poisoning intermediate formed from methanol dissociation at low index and stepped platinum surfaces 236 (1987)95

Infrared spectroscopic study of the methanol adsorbates at a platinum electrode. Part II. The Pt (100) surface in an acid medium 237(1987)119

Polarization

Pulsed linear sweep voltammetry with pulses of constant level in a potential scale, a polarization demanding condition in the study of platinum single crystal electrodes 236(1987)87

Unified treatment of single potential step voltammetries at a plane electrode and at the DME. New polarisation modes 247(1988)37

Polarization time

Raman spectroscopy investigation of the silver oxide/silver electrode. Influence of experimental conditions 227(1987)21

Polarization window

Salting out of hydrophobic ions at immiscible electrolyte interfaces 217(1987)261

s-Polarized light

Interfacial relaxation via s-polarized electroreflectance 235(1987)11

Polarizing unit

Improved electronic equipment for square-wave amperometry 244(1988)91

Polarographic analyzer

Computer automation of polarographic analyzer PAR 384B and development of specific implementation software 250(1988)293

Polarographic maximum

Improved method of the determination of traces of surfactants by means of suppression of the polarographic maximum of the first kind 218 (1987)93

Electrochemical reduction of bromonitriles: Mechanism and polarographic maxima 235 (1987)209

Polarographic wave

Determination of the individual electrochemical parameters from a single composite dc wave by the Gauss–Newton method: dc wave composed of three waves 223(1987)79

Polarography

Polarographic behaviour of dimedone-2-arylazo derivatives in alcoholic aqueous media 201 (1986)101

On the polarographic reduction of nitrate ion in the presence of zirconium(IV) 208(1986)117

Polarographic study on the interaction between alkali metal cations and acyclic polyamines in acetonitrile 209(1986)297

Polarographic modelling of metabolic processes of cancerostatic anthracyclines 212(1986)135

Polarographic study of poly(α-D-glutamic acid) in acid solutions 212(1986)193

Bioelectrochemical approach to the role of glutathione in strong ethanol ingestion 212 (1986)333

The chlordiazepoxide–albumin binding. A bioelectrochemical approach 212(1986)471

The effect of pH on the adsorption and the association of cytidine, cytidine-5′-monophosphate and cytidine-5′-diphosphate at the charged interface 212(1986)485

Polarographic reduction of aldehydes and ketones. Part XXIV. Electroreduction of pyridinecarboxaldehydes in acidic solutions 213 (1986)245

Polarographic reduction of aldehydes and ketones. Part XXV. Electroreduction of pyridinecarboxaldehydes in aqueous buffered solutions 213(1986)255

Pulse voltammetry and polarography. Recent progress in microprocessor instrumentation 214 (1986)79

Electrochemical reduction of tellurium(IV) 214 (1986)179

An ultraviolet spectral and polarographic investigation of the acid–base and complexation behaviour of oxytetracycline hydrochloride 214 (1986)199

Polarographic reduction of aldehydes and ketones. Part XXVIII. 1,2-Cyclohexanedione 214(1986)259

Polarographic behaviour and degradation studies of triazolam 214(1986)275

Electron exchange between mercury and denatured DNA strands 214(1986)373

Mechanism and kinetics of the stepwise voltammetric reduction of pertechnetate in alkaline solution to Tc(VI), Tc(V) and Tc(IV) 219(1987)221

The electroreduction of 2- and 3-cyanopyridinium ions 220(1987)139

Electroreduction of primary alkyl iodides in acetonitrile 226(1987)27

The effect of cobalt ions on the catalytic hydrogen evolution at a mercury electrode 226(1987)51

Paths of the electroreduction of 2,2′-bipyridyl 226(1987)117

Polarographic studies of drugs of triphenylethene derivatives. Part I 226(1987)129

Novel oxidation processes for the methyltin compounds $(CH_3)_4Sn$, $(CH_3)_3SnCl$, $(CH_3)_2SnCl_2$ and CH_3SnCl_3 at mercury electrodes in dichloromethane 227(1987)29

A study of the electrochemical reduction of bilirubin and its derivatives 231(1987)101

Electrochemical behaviour of cytochrome *c* at low potentials 231(1987)297

Polarographic analysis of human serum albumin–benzodiazepine interactions 231(1987) 535

Polarographic studies on the interaction between macrocyclic compounds and cations or acids in acetonitrile 234(1987)251

Electrochemistry of platinum complexes. Part I. Polarographic reduction mechanism with reference to electrochemical detection 238(1987) 297

Electrodimerization of crotonic aldehyde in aqueous media on a mercury electrode 239 (1988)239

Competitive homogeneous chemical reactions occurring between two electron transfers. Application to *p*-nitrophenol reduction 243 (1988)293

Global analysis of kinetic current in dc polarography. Application to pyridine-4-aldehyde reduction 243(1988)309

Electroanalytical study of the pesticide Guthion 244(1988)221

Effect of poly(α-D-glutamic acid) on the polarographic reduction of 3,6-diaminoacridines 244(1988)235

A voltammetric study of thiazolidine-4-carboxylic acid on mercury electrodes 245(1988) 157

On the influence of adsorption of electroactive species on the polarographic determination of stability constants 246(1988)271

Hydrophilic and hydrophobic domains in the flat protein conformomer as a cause of double step polarographic waves 248(1988)387

Theory of the chronoamperometric and polarographic response of the catalytic-deactivation mechanism 249(1988)23

The transfer of carboxylate and sulphonate anions at the aqueous/organic solution interface studied by polarography with the electrolyte solution dropping electrode 249(1988)109

Electrochemical reduction of isonicotinic amide in a strong acid medium 250(1988)399

Polaromicrotribometry

A new method for the study of potential-dependent interface characteristics for solids 237(1987)171

Polaron state

Electrochemical in situ EPR evidence of two polaron–bipolaron states in polyaniline 236 (1987)199

Polar surfactant

The model of two parallel condensers and the application of the Helmholtz formula to adsorption of polar surfactants from aqueous solutions 201(1986)247

Polyamine

Differential pulse polarographic studies of copper(II)–polyamine complexes at low ligand concentrations 241(1988)281

Polyaniline

ECD materials for the three primary colors developed by polyanilines 209(1986)227

A conducting polymer derived from *para*-aminodiphenylamine 221(1987)69

Spectroelectrochemical evidence for an intermediate in the electropolymerization of aniline 236(1987)189

Electrochemical in situ EPR evidence of two polaron–bipolaron states in polyaniline 236 (1987)199

Cyclic voltammetry of polyaniline: interpretation of the middle peak 249(1988)97

Polyaniline film

Potentiometric investigation of the kinetics of the polyaniline–oxygen reaction 202(1986)217

Electrode kinetics of metal complexes confined in electropolymerized poly(*N*,*N*-dialkyl substituted aniline) films on graphite surfaces 215(1986)191

Spectroelectrochemical study of polyaniline: the construction of a pH–potential phase diagram 219(1987)335

Spectroelectrochemical study of polyaniline versus potential in the equilibrium state 220 (1987)67

Electrodeposition of polythiophene, polypyrrole and polyaniline by the cyclic potential sweep method 235(1987)259

Kinetics of polyaniline formation and redox processes 242(1988)243

Research on chemically modified electrodes. Catalytic reduction of dioxygen at a cobalt phthalocyanine-doped polyaniline film electrode 246(1988)101

Polyazulene film

Interpretation of polyazulene electropolymerization considering faradaic current efficiency and capacitive current effects during the growth and redox switching steps 241(1988)211

Polycarbazole film

Electrochemical synthesis and properties of polycarbazole films in protic acid media 246 (1988)73

Stabilization of the polycarbazole protected n-InSe photoanode for photoelectrochemical solar cells 248(1988)233

Polychlorinated biphenyl

Oxidation of 4,4′-dichlorobiphenyl at a ruthenium dioxide anode 213(1986)329

Polycrystalline surface

Infrared spectroscopic study of the methanol adsorbates at a platinum electrode. Part III. Structural effects and behaviour of a polycrystalline surface 238(1987)323

Polydentate complex

Mechanism of oxidation of ferrous polydentate complexes by dioxygen 222(1987)173

Polydiphenylamine

Electrochemical synthesis and study of polydiphenylamine 220(1987)287

Polyelectrolyte

Charge-controllable polypyrrole/polyelectrolyte composite membranes. Part II. Effect of incorporated anion size on the electrochemical oxidation–reduction process 224(1987)123

Polyelectrolyte film

Charge-transport rates in polyelectrolyte films on electrodes. Disparate diffusion coefficients for alizarin red S with two separate electroactive centers 247(1988)339

Polyene

Indirect reduction of polyenes. Redox catalysis involving dienes and trienes in weakly protonating media 221(1987)275

Polyether bridge

Electroactive charge-transfer polymers from anodic coupling of dibenzo-crown ethers. Part II. Influence of the complexing properties of the polyether rings 206(1986)115

Polyethylene oxide polymer film

Solid state voltammetry of electroactive solutes in polyethylene oxide polymer films on microelectrodes 208(1986)185

Polyethylene sulphide

Electrochemical ring-opening polymerization of episulfides. Obtaining crystalline doped polyethylene and polypropylene sulfide films by anodic polarization 207(1986)117

Polyfluorene film

Catalytic behaviour of polymeric coatings in cathodic cleavage reactions: the importance of using polyfluorene 240(1988)355

Polyfluorobenzyl alcohol

Product-selective electroreduction of 2,3,4,5,6-pentafluorobenzoic acid to 2,3,4,5,6-pentafluorobenzyl and 2,3,5,6-tetrafluorobenzyl alcohols using solid cathodes in aqueous sulfuric acid 238(1987)315

Polyglutamic acid

Effect of poly(α-D-glutamic acid) on the polarographic reduction of 3,6-diaminoacridines 244(1988)235

Polymer film

Electroactive polymeric films from oxidative coupling of oligophenyls 213(1986)53

Redox polymer films from cathodic coupling of 4,4′-dibromobenzophenone and 2,7-dibromofluorenone 215(1986)377

Electrochemistry of tetracyanoquinodimethane polymer-modified electrodes. Effect of polymer film composition on site-site interactions 217 (1987)313

Diffusion–migration impedances for finite, one-dimensional transport in thin-layer and membrane cells. Part II. Mixed conduction cases: Os(III)/Os(II)ClO_4 polymer membranes including steady-state I–V responses 219(1987) 23

Electrochemical synthesis and study of polydiphenylamine 220(1987)287

A benzimidazobenzophenanthroline polymer molecular transistor fabricated using club sandwich electrodes 222(1987)193

Electron transport dynamics in thin polymer films containing tris(2,2′-bipyridine)osmium(III/II) complexes 222(1987) 223

Characterization and spectroelectrochemical studies of soluble polymerized 3-methoxythiophene 236(1987)239

Polymer gel/liquid interface

Charge transfer across a polymer gel/liquid interface. A voltammetric detector for a flow system 217(1987)213

Charge transfer across a polymer gel/liquid interface: the polyvinyl chloride + nitrobenzene gel/water interface 241(1988)133

Polymerization

Electrochemical ring-opening polymerization of episulfides. Obtaining crystalline doped polyethylene and polypropylene sulfide films by anodic polarization 207(1986)117

Raman spectroscopic investigation of aniline: adsorption and polymerisation 224(1987)253

Electrochemical preparation of a polyparaphenylene film and a polyparaphenylene/polyacrylamine functional film 229(1987)215

Electrooxidative and electroreductive polymerization of 5-amino-1,10-phenanthroline ligand, iron and cobalt complexes in acetonitrile media 238(1987)197

Polymerisation of terthiophene at controlled doping level 250(1988)219

Polymer matrix

Surface functionalization of electrodes with oxometalates entrapped in polymeric matrices. Evidence for a microenvironment effect 240 (1988)325

Polymer-modified electrode

The effect of the counter ion concentration on the electrochemistry of tetracyanoquinodimethane polymer film electrodes 201(1986)301

The role of ionic transference in polymer-modified electrodes 206(1986)93

Effects of resistance and capacitance on the chronoamperometry of polymer-coated electrodes as modeled by a finite elements digital simulation 216(1987)11

Membrane transport associated with double-layer charging of polymer modified electrodes 216 (1987)241

Electrochemistry of tetracyanoquinodimethane polymer-modified electrodes. Effect of polymer film composition on site–site interactions 217 (1987)313

Polymer-modified electrodes. Part V. The use of hydrodynamically modulated rotating-disk electrodes in the study of the mediated oxidation of $[Fe(CN)_6]^{4-}$ at ruthenium-containing polymer-modified electrodes 218(1987)341

Gamma-irradiated polymer-modified mercury film electrodes 222(1987)243

A polymer-film based photoelectrode containing immobilized quencher and chromophore polymer blends 224(1987)59

Hexachloroiridate(III/IV) on polymer-coated electrodes. Investigation of the membrane permeability and the charge-transport mechanism 229(1987)239

Researches on chemically modified electrodes. Part XXIV. Preparation and characterization of Nafion polymer film modified electrodes containing Fe(II)–phen complex 233(1987)19

Non-stationary processes at polymer coated rotating disk electrodes. Part I. Model and simulation 235(1987)41

Quinone molecular films derived from 1,5-diaminoanthraquinone 235(1987)381

Structurally heterogeneous electrode films of acrylamide/vinylpyridine gels. Dynamics of ferricyanide mediated electrooxidation of ascorbic acid and their dependence on the electrode film structure and composition 236 (1987)113

The transient response of electrodes coated with membrane-type polymer films under conditions of diffusion and migration of the redox ions 237(1987)13

Catalytic behaviour of polymeric coatings in cathodic cleavage reactions: the importance of using polyfluorene 240(1988)355

In situ observation of copper redox in a polymer modified electrode using EXAFS spectroelectrochemistry 240(1988)361

Cyclic voltammetric and potentiometric behavior of tetracyanoquinodimethane polymer film electrodes. Effect of the nature and the concentration of the supporting electrolyte 242 (1988)265

Distribution of oxometalates on polymer-covered electrodes. Compared catalytic activity of these new polymers and the corresponding oxometalates in solution 243(1988)481

Selective electrocatalytic reduction of hexachloroacetone on a viologen polymer modified electrode in aqueous media 245(1988) 313

Preparation and application of conducting polymers containing chemically active counterions for analytical purposes 247(1988)145

Poly(methoxyethoxyethoxymethyl)thiophene

Electrochemical and chemical formation of blends, composites and co-polymers of 3-(methoxyethoxyethoxymethyl)thiophene 247 (1988)351

Polymethylthiophene

The incorporation of electrolyte cations into polypyrrole and poly-3-methylthiophene during electrochemical reduction 223(1987)283

A photochargeable device composed of bilayer membranes of poly(3-methylthiophene) and Prussian Blue 227(1987)255

Polymethylthiophene film

Electrolyte effect on the electrochemical properties of poly(3-methylthiophene) thin films 218(1987)107

Polynucleation index

Electric-field-induced morphological alterations and fusion of hepatocytes 231(1987)9

Polynucleotide

The influence of electrostatic interactions on the binding of bivalent cations to polynucleotides 214(1986)343

Formation and reaction of peroxyl radicals of polynucleotides and DNA in aqueous solution 232(1987)147

Polyoxyethylene ether surfactant

The role of non-ionic polyoxyethylene ether surfactants on ion transfer across aqueous/organic solution interfaces studied by polarography with the electrolyte dropping electrode 227(1987)171

Polypeptide

Alamethicin induced conductances in lipid bilayers. Part II. Decomposition of the observed (compound) process 214(1986)427

Polyphenylene

Anodic overoxidation of poly-*p*-phenylene in aqueous electrolytes 216(1987)157

Electrochemical polymerization of paradialkoxybenzenes. Part I. Anodic oxidation of paradimethoxybenzene in dry acetonitrile 218 (1987)173

Polyphenylene film

Electrochemical preparation of a polyparaphenylene film and a polyparaphenylene/polyacrylamine functional film 229(1987)215

Polypropylene sulphide

Electrochemical ring-opening polymerization of episulfides. Obtaining crystalline dopcd polyethylene and polypropylene sulfide films by anodic polarization 207(1986)117

Polypyridine film

Easy preparation of electrodes modified by conjugated polypyridine films displaying coordinative properties and their effectiveness as mediators of electrocatalytic processes 242 (1988)131

Polypyridyl osmium complex

Electrogenerated chemiluminescence. Part 51. The tris(2,2′-bipyrazine)osmium(II) system 244 (1988)319

Polypyrrole

The influence of water on the electrodeposition of polypyrrole in acetonitrile 206(1986)139

The incorporation of electrolyte cations into polypyrrole and poly-3-methylthiophene during electrochemical reduction 223(1987)283

The mechanism of electrodeposition of composite polymers including polypyrrole 227(1987)229

The mechanism of oxygen reduction at iron tetrasulfonato-phthalocyanine incorporated in polypyrrole 233(1987)113

Simultaneous EPR electrochemical measurements on polypyrrole in ambient temperature ionic liquids 241(1988)231

Polypyrrole–clay-modified electrodes 243(1988) 367

Polypyrrole benzensulphonate

Catalysis of quinone–hydroquinone redox reactions at polypyrrole benzenesulphonate-coated platinum electrodes 220(1987)55

Polypyrrole cathode

An improvement of battery performance of lithium batteries assembled with a polypyrrole cathode formed electrochemically with the aid of a nitrile rubber insulating film 217(1987)203

Polypyrrole electrode

Thermoelectrochemical properties of a polypyrrole electrode 201(1986)409

Polypyrrole film

Metalloporphyrin–polypyrrole film electrode: characterization and catalytic application 207 (1986)87

Electrochemical coating of a platinum electrode by a poly(pyrrole) film containing the *fac*-$Re(2,2'\text{-bipyridine})(CO)_3Cl$ system. Application to electrocatalytic reduction of CO_2 207(1986)315

Behaviour of some poly(pyrrole–anthraquinone) films in DMSO electrolytes 219(1987)165

Redox and electrocatalytic properties of cobalt–bipyridyl–polypyrrole film electrodes 224(1987)95

Catalysis of 1,2-dibromo-1,2-diphenylethane reduction on platinum and carbon felt electrodes coated by polypyrrole films containing 4,4′-bipyridinium groups. Effects of film thickness, film composition and comparison with homogeneous catalysis 224(1987)111

Charge-controllable polypyrrole/polyelectrolyte composite membranes. Part II. Effect of incorporated anion size on the electrochemical oxidation–reduction process 224(1987)123

A poly(pyrrole–nickel(II)pyridiniumporphyrin)-modified electrode 224(1987)295

Poly-(3-methylpyrrole-4-carboxylic acid): an electronically conducting ion-exchange polymer 225(1987)273

Combined electrochemical and radiotracer study of anion sorption from aqueous solutions into polypyrrole films 230(1987)257

Electrodeposition of polythiophene, polypyrrole and polyaniline by the cyclic potential sweep method 235(1987)259

Poly(pyrrole-manganese tetraphenylporphyrin) film electrodes in acetonitrile solution 239(1988) 433

Preparation and electrocatalytic properties of conducting films of polypyrrole containing platinum microparticulates 240(1988)89

Bifunctionalized polypyrrole modified electrodes containing reversible electron donor and acceptor moieties. Examples of electroinduced chemical reactions occurring inside polymer films 244 (1988)163

Deposition and electrochemical stripping of mercury ions on polypyrrole based modified electrodes 246(1988)181

Epoxidation of *cis*-cyclooctene by molecular oxygen electrocatalysed by polypyrrole–manganese porphyrin film modified electrodes 250(1988)191

Polypyrrole–montmorillonite film

Clay modified electrodes. Part VIII. Electrochemical behavior at montmorillonite and polypyrrole–montmorillonite films on platinum and glassy carbon electrodes 234(1987)347

Polystyrene film

Electrodes coated with polystyrene films containing surface-active agents. Attachment of screening capabilities for electrode reactions of electroactive ionic species 242(1988)143

Polystyrenesulphonate

Kinetics of mediated oxidation at electrodes modified by poly(styrenesulfonate) containing tris(2,2′-bipyridine)osmium(III/II) complexes as electron-transfer centers 222(1987)201

Polytetrafluoroethylene

Electrochemical reduction of Nafion 117 208 (1986)109

Characterization of sulfur layers from reduced sulfur dioxide on porous platinum black/Teflon electrodes 246(1988)193

Polythiophene

A study of the conditions for the electrodeposition of polythiophen in acetonitrile 206(1986)147

An in-situ infra-red study of poly thiophene growth 242(1988)47

Cathodic electropolymerization of polythiophene on platinum and various semiconducting electrodes 246(1988)467

Polythiophene film

Nucleation and growth of polythiophene films on gold electrodes 220(1987)351

Electrodeposition of polythiophene, polypyrrole and polyaniline by the cyclic potential sweep method 235(1987)259

A spectroelectrochemical study of the electrodeposition of polythiophene films 243 (1988)403

Conductivity and capacity of polythiophene films: impedance study 244(1988)311

Polyvinylalcohol

Polyvinylalcohol–collagen membranes for enzyme immobilization 212(1986)149

Polyvinyl butyral

The photovoltaic effect of an insulating polymer-hybridized p-Si solar cell 241(1988)379

Polyvinylchloride

Electrocatalytic oxidation of cytochrome-*c* at a quaternized poly-4-vinylchloride/ferricyanide modified gold surface 215(1986)385

Charge transfer across a polymer gel/liquid interface: the polyvinyl chloride + nitrobenzene gel/water interface 241(1988)133

Polyvinylchloride film

Diphenhydramine-sensitive membrane electrodes based on poly(vinylchloride) matrices and their use in drug analysis 233(1987)29

Polyvinylchloride membrane

Synthesis and characterization of new polyvinylchloride membranes for enhanced adhesion on electrode surfaces 202(1986)75

Apparent ion-exchange current densities at valinomycin-based potassium ion-selective PVC membranes obtained with an ac-impedance method 229(1987)249

The role of PVC in ion selective electrode membranes 237(1987)181

Exchange of K^+ and Na^+ between water and PVC in the presence of different ionophores 248(1988)131

Polyvinylchloride/water interface

The significance of exchange currents for the PVC/water interface 245(1988)113

The determination and characterisation of apparent ion-exchange currents at PVC/water interfaces 245(1988)117

Polyvinylferrocene electrode

Chemical and mechanical properties of redox polymer-modified electrodes. Part III. Redox thermodynamics of linear polyvinylferrocene electrodes 219(1987)91

Polyvinylferrocene film

Investigation of electron transfer processes at open circuit polyvinylferrocene films using rotating ring–disk electrodes 236(1987)139

Chemical modification of GaPc–Cl thin film photoelectrodes 248(1988)349

The development of redox-modified electrodes as charge-accumulating devices for use in higher sensitivity detection systems 250(1988)417

Polyvinylfluoranthene

The electro-reduction of the anaesthetic gas isoflurane 244(1988)203

Polyvinylpyridine

Microporous aluminum oxide films at electrodes. Part II. Studies of electron transport in the Al_2O_3 matrix derivatized by adsorption of poly(4-vinylpyridine) 207(1986)49

Polyvinylpyridine complex

Electrocatalysis of cathodic molecular oxygen reduction with biopolymers–enzymes and their models 206(1986)217

Polyvinylpyridine film

Impedance characteristics of a modified electrode 202(1986)69

The role of ionic transference in polymer-modified electrodes 206(1986)93

Hexachloroiridate(III/IV) on polymer-coated electrodes. Investigation of the membrane permeability and the charge-transport mechanism 229(1987)239

Ac-impedance studies of carbon electrodes coated with poly-4-vinylpyridine films containing the $Fe(CN)_6^{3-/4-}$ redox couple 235(1987)169

Chronocoulometric and rotating disc electrode determination of the charge propagation current through poly-4-vinylpyridine films containing hexachloroiridate anions 250(1988)341

Poole–Frenkel effect

The influence of localized electronic states on the photoelectrochemical behavior of passive films 204(1986)197

Pool model

Effects of restricted diffusion at ultramicroelectrodes in brain tissue. The pool model: Theory and experiment for chronoamperometry 213(1986)31

Pore

Electrochemical polarization of activated carbon and graphite powder suspensions. Part II. Exchange of ions between electrolyte and pores 214(1986)295

Alamethicin induced conductances in lipid bilayers. Part II. Decomposition of the observed (compound) process 214(1986)427

Alamethicin induced conductances in lipid bilayers. Part III. Derivation of the properties of the elementary process from the (compound) observed process 214(1986)441

Pore formation

The kinetics of ionic transfer across adsorbed phospholipid layers 243(1988)455

Porous electrode

Porous electrode modelling: quasi-stationary state 205(1986)91

Electroadsorption of bacteria on porous carbon and graphite electrodes 231(1987)175

Porous graphite electrode

Biofuel anode for cell reactions involving nicotinamide adenine dinucleotide as a charge carrier 212(1986)479

Porphine complex

Comparison of electrochemical redox processes on silver electrode surfaces between *meso*-tetrakis(2-*N*-methylpyridyl)porphine and *meso*-tetrakis(4-*N*-methylpyridyl)porphine. Study by surface-enhanced resonance Raman scattering spectroscopy 215(1986)209

Porphyrin

Spectroelectrochemistry of cobalt "capped" porphyrins 202(1986)111

A poly(pyrrole–nickel(II)pyridiniumporphyrin)-modified electrode 224(1987)295

Postsynaptic channel

The rate-limiting steps of the rising phase of miniature end plate currents in the mouse diaphragm 231(1987)153

Potassium accumulation

An electrochemical study of energy-dependent potassium accumulation in *E. coli*. Part XI. The Trk system in anaerobically and aerobically grown cells 211(1986)417

Potassium bromide

Double-layer studies in a non-polar solvent consisting of Al_2Br_6 and KBr in ethylbenzene 229(1987)165

Potassium fluoride

Application of the Gouy–Chapman–Stern–Grahame model of the electrical double layer to the determination of single ion activities of KF aqueous solutions 226(1987)341

Potassium hexafluorophosphate

Study of gold low index faces in KPF_6 solutions. Part I. Experimental behaviour and determination of the points of zero charge 234 (1987)93

Study of gold low-index faces in KPF_6 solutions. Part II. Analysis of the experimental results 236 (1987)267

The temperature dependence of the double layer parameters of the (111) face of silver 244(1988) 133

Potassium hydroxide

Potentiodynamic passivation of zinc in aqueous KOH solutions 201(1986)85

Effects of KOH solution on the surface properties of Teflon 213(1986)43

The potential dependence of silicon anisotropic etching in KOH at 60 °C 238(1987)103

The electrochemistry of $YBa_2Cu_3O_{7-\delta}$ in aqueous potassium hydroxide 248(1988)461

Potassium iodide

Adlattice structure and hydrophobicity of Pt (111) in aqueous potassium iodide solutions. Influence of pH and electrode potential 222 (1987)305

Potassium ion

Electrochemical reduction of Nafion 117 208 (1986)109

Potassium ion transport processes across the interface of an immiscible liquid pair in the presence of crown ethers 210(1986)137

Interaction of calmodulin antagonists with yeast. Comparison with the effect of miconazole, dio-9 and ethidium on Sr^{2+} uptake, K^+ efflux and plasmamembrane ATPase activity 212(1986)519

Microelectrode studies in cultured epithelial cells 231(1987)141

Energy-dependent K^+ uptake and H^+–K^+ exchange in *Salmonella typhimurium* 231(1987) 183

Effect of temperature on peritubular cell membrane potential and potassium conductance in isolated perfused proximal tubules of the mouse 231(1987)419

H^+–K^+ exchange and $\Delta\bar{\mu}_{H^+}$ in *Lactobacillus salivarius* 231(1987)503

Potassium ion transfer across the nitrobenzene/water interface facilitated by valinomycin 234(1987)355

Study of the prussian blue/prussian white redox reaction by cyclic voltammothermometry 236 (1987)209

Chemical analysis of the ionic content of hydrous iridium oxide films 240(1988)171

Exchange of K^+ and Na^+ between water and PVC in the presence of different ionophores 248(1988)131

Potassium ion-selective electrode

Apparent ion-exchange current densities at valinomycin-based potassium ion-selective PVC membranes obtained with an ac-impedance method 229(1987)249

Potassium salt

Activity coefficients of potassium salts in concentrated bovine serum albumin solutions 231(1987)489

Studies on the membrane potentials of a new microporous membrane in the presence of alkali chlorides with and without control of pores using precipitates of potassium salts 242(1988)155

Potassium sulphate

The electrochemistry of molten $K_2S_2O_7$ + K_2SO_4 + V_2O_5 electrolytes 238(1987)163

Potassium uptake

Energy-dependent K^+ uptake and H^+–K^+ exchange in *Salmonella typhimurium* 231(1987) 183

Potential–coverage curve

Determination of the kinetics of hydrogen evolution by analysis of the potential–current and potential–coverage curves 214(1986)615

Potential–current curve

Determination of the kinetics of hydrogen evolution by analysis of the potential–current and potential–coverage curves 214(1986)615

Potential decay

Open-circuit potential decay investigation of the surface layer of an electropolished Cu anode 210(1986)237

Kinetic theory of the open-circuit potential decay method for evaluation of behaviour of adsorbed intermediates. Analysis for the case of the H_2 evolution reaction 221(1987)1

Potential difference

Compensation for ohmic drop in the measurement of the potential difference at a liquid/liquid interface by the step current method 243(1988)81

Potential distribution

Ion binding to a membrane with surface charge layers 211(1986)173

Potential drop

Double layer structure at the interface between two immiscible electrolyte solutions 206(1986)69

The electrical double layer at the mercury/solution interface in organic solvents 244(1988)1

Potential jump

Investigation of the adsorption kinetics of 2,3-dimethylpyridine at the mercury/electrolyte interface 224(1987)261

Potential perturbation technique

Different processes contributing to the development of preferred oriented platinum surfaces by fast periodic potential perturbation techniques 205(1986)279

Potential range

The electrical double layer of carbon and graphite electrodes. Part III. Charge and dimensional changes at wide potential range 206(1986)101

Potential relaxation

Potential relaxation and interfacial capacitance behaviour of the Kolbe coupling reaction at Pt 242(1988)317

Potential scale

Voltammetric study of ion transfer across the water/*o*-nitrophenyloctyl ether interface. Part I. Reversible process 226(1987)21

Potential shift

Erratum on the determination of the shift between the potential scales in liquid ammonia solutions and in aqueous solutions 225(1987)263

Potential step

The influence of water on the electrodeposition of polypyrrole in acetonitrile 206(1986)139

Use of potential-step formulae to reduce computational time in the simulation of linear voltammetry by orthogonal collocation 208 (1986)165

Electrochemical and SEM characterization of Ag electrodes roughened by potential sweep and potential step processes in aqueous chloride and chloride + pyridine media 217(1987)79

Concentration of a solution-soluble electroactive species at the surface of a spherical electrode following a potential step 218(1987)29

Amalgam concentration at the surface of a spherical mercury electrode following a potential step 218(1987)41

Electrochemical polymerization of β-substituted and β,β'-disubstituted selenophenes 238(1987) 225

Electrochemical nucleation and growth of copper on polycrystalline palladium 248(1988)219

Potential sweep

Electrochemical and SEM characterization of Ag electrodes roughened by potential sweep and potential step processes in aqueous chloride and chloride + pyridine media 217(1987)79

Potential–time curve

Chronopotentiometry at a dropping mercury electrode. Effects of electrode sphericity on the potential–time curves and the transition times of an ECE mechanism 219(1987)13

Chronopotentiometry with non-linear perturbation functions at the DME with a preceding blank period 227(1987)1

Potentiometric measurement of lipoic acid reduction in microbial cultures. Part III. Experimental investigation and modeling of the effects exerted by beta-lactam antibiotics on the potential–time signals 231(1987)43

Potentiodynamic investigation

Effect of Sb on the electrochemical properties of $Pb/PbSO_4/H_2SO_4$ and $Pb/PbO/PbSO_4/H_2SO_4$ electrodes 218(1987) 135

Potentiodynamic passivation

Potentiodynamic passivation of zinc in aqueous KOH solutions 201(1986)85

Faradaic impedance methods as applied to the study of the potentiodynamic passivation of zinc in alkaline media 247(1988)323

Potentiodynamic technique

Implicit calculation of boundary values in digital simulation applied to several types of electrochemical experiment 240(1988)27

Potentiodynamic treatment

Characterization of $NiCo_2O_4$ electrodes for O_2 evolution. Part III. Ageing phenomena of $NiCo_2O_4$ electrodes 208(1986)323

Potentiometric titration

Potentiometric titration of aluminium with fluoride in organic solvent + water mixtures by use of a fluoride-selective electrode 248(1988)87

Potentiometry

Enzyme sensor system for potentiometric urea determination in serum and milk 209(1986)69

An electrochemical study of the molecular and ionic dissociation of NO_2Cl in aprotic media 209(1986)323

The Belousov–Zhabotinsky system catalyzed by ferroin. Experimental behaviour and theoretical pattern 211(1986)485

A potentiometric study on the redox properties of hemoglobin from *Camelus dromedarius* 211 (1986)521

Potentiometric study of the cadmium(II)–chloride and cadmium(II)–bromide association equilibria in ammonium nitrate + dimethyl sulphoxide melts 225(1987)111

Site of azide interaction with cytochrome *c* oxidase in submitochondrial particles from pigeon breast muscle 231(1987)383

Cyclic voltammetric and potentiometric behavior of tetracyanoquinodimethane polymer film electrodes. Effect of the nature and the concentration of the supporting electrolyte 242 (1988)265

Potentiostatic pulse technique

Kinetics of polyaniline formation and redox processes 242(1988)243

Potentiostatic relaxation

Effects of quasi-reversible charge transfer on chronocoulometric relaxations in linearly adsorbing systems 246(1988)233

Potentiostatic response

Potentiostatic response when reactant and product are adsorbed at an electrode expanding with any power law or at a DME (expanding sphere electrode model) 247(1988)99

Potentiostatic step

Nucleation and growth of polythiophene films on gold electrodes 220(1987)351

Potentiostatic transient

Underpotential deposition of silver on polycrystalline platinum electrodes. Controlling phenomena derived from potentiostatic transients 213(1986)301

The analysis of dissolved Cr^{3+} with the rotating ring–disc technique and its application to the corrosion of Cr in the passive state 216(1987)229

Potentiostatic treatment

Characterization of $NiCo_2O_4$ electrodes for O_2 evolution. Part III. Ageing phenomena of $NiCo_2O_4$ electrodes 208(1986)323

Power law

Chronopotentiometry with programmed current at an electrode expanding with any power law. Theoretical study of an ECE mechanism 219 (1987)1

Precancerous stage

Deficiency in the catalase activity in human precancerous stages of *Xeroderma pigmentosum*. Comparison with XP, AT and Blomm's cultured fibroblasts and SV_{40} transformed human cell extracts 232(1987)271

Precipitate-based electrode

Amperometry at precipitate-based electrodes 242(1988)77

Precipitated phase

Application of an electroanalytical method to metal phase analysis 242(1988)63

Precipitation

Analysis of the cyclic voltammograms associated with deposition or precipitation of the electrochemical product 245(1988)51

Preparative electrolysis

Product distribution in preparative-scale electrolysis. Part VIII. Transition between fast and slow chemical kinetics. Application to mechanisms involving one or two first-order consecutive chemical steps 236(1987)31

The evaluation of electrochemical reaction rate data using first order analytical models 248 (1988)1

Pressure

Electrochemical evidence for two components in molybdenum-containing catalysts for dinitrogen fixation at ambient temperature and pressure 210(1986)173

Pretreatment

Experimental study of illumination effects on the cathodic current–voltage curve on n-GaAs 223 (1987)215

Electrochemical dispersion of Pt microparticles on glassy carbon electrodes 223(1987)223

Effects of electrode surface pretreatments on the electrochemistry of a macrocyclic dioxoruthenium(VI) complex 226(1987)211

The electroreduction of oxygen on pyrolytic graphite 233(1987)147

Electrochemical oxidation of CO on Pt in acidic and alkaline solutions. Part I. Voltammetric study on the adsorbed species and effects of aging and Sn(IV) pretreatment 241(1988)163

A pyrolytic carbon film electrode for voltammetry. Part V. Characterization and comparison with the glassy carbon electrode by electrochemical pretreatment in basic solution 248(1988)283

Primary colour

ECD materials for the three primary colors developed by polyanilines 209(1986)227

Electrochromic properties of vacuum evaporated organic thin films. Part I. Electrochromic thin films of the three primary colors 247(1988)193

Product-selective synthesis

Product-selective electroreduction of 2,3,4,5,6-pentafluorobenzoic acid to 2,3,4,5,6-pentafluorobenzyl and 2,3,5,6-tetrafluorobenzyl alcohols using solid cathodes in aqueous sulfuric acid 238(1987)315

Product distribution

Product distribution in preparative-scale electrolysis. Part VIII. Transition between fast and slow chemical kinetics. Application to mechanisms involving one or two first-order consecutive chemical steps 236(1987)31

Progesterone

Non-conventional normal pulse polarographic techniques with a static mercury electrode for applications at very low reactant concentrations 246(1988)283

Chronocoulometric study of electrode kinetics in the case of an adsorbed redox couple. Progesterone electroreduction on mercury from aqueous solutions 248(1988)55

Programmed current

Chronopotentiometry with programmed current at an electrode expanding with any power law. Theoretical study of an ECE mechanism 219 (1987)1

Programmed potential voltammetry

New results for the electrosorption of methanol on polycrystalline platinum in acid medium obtained by programmed potential voltammetry 234(1987)315

Prokaryotic membrane

Dielectric spectroscopy of protein translational diffusion in prokaryotic membranes and membrane vesicles 211(1986)183

Promoter

Base metal oxides as promotors for the electrochemical oxidation of methanol 240 (1988)349

IR reflectance studies of electron transfer promoters for cytochrome *c* on a gold electrode 245(1988)275

Electrochemical behavior of cytochrome c_3 from *Desulfovibrio vulgaris* Hildenborough. Promoter activity at the pyrolytic graphite electrode 249 (1988)241

Propanediol

Study of the electrooxidation of 1,2-propanediol on an Au electrode in basic medium 248(1988)193

Propane oxidation

Current doubling during propane oxidation on the n-TiO_2 anode in trifluoromethanesulfonic acid monohydrate 220(1987)173

Propanol

Study of the electrooxidation of n-propanol on an Au electrode in basic medium 206(1986)179

Propionitrile

Reaction entropies in quinone reduction in *N,N*-dimethylformamide and propionitrile 242 (1988)323

Propylene carbonate

Electrode kinetic studies of the $Zn^{2+}/Zn(Hg)$ and $Li^{+}/Li(Hg)$ couples in dimethylsulphoxide + propylene carbonate solvent systems 207 (1986)177

Electroreflectance spectroscopy of gold single crystals. Influence of the solvent 207(1986)235

The single crystal metal–non-aqueous solvent interface. Underpotential deposition of Cd on Ag (111) in propylene carbonate 216(1987)261

The cathodic decomposition of propylene carbonate in lithium batteries 219(1987)273

Determination of trace water in propylene carbonate using hexafluoroacetone 234(1987)107

Underpotential deposition of copper and silver on polycrystalline ruthenium electrodes 244 (1988)249

Behaviour of some copper(II) salts in propylene carbonate. Standard electrode potential of the Cu^{2+}/Cu system at 25 °C 245(1988)123

Propylene oxide

The electrochemical production of propylene oxide 214(1986)283

An analysis of electrochemical reactions followed by series or complex chemical reactions 243 (1988)1

Prosthetic group

Electrochemical behaviour of cytochrome *c* at low potentials 231(1987)297

Protein

Metal ions and complexes as modulators of protein–interfacial electron transport at graphite electrodes 217(1987)331

Iron metabolism and oxygen toxicity 232(1987) 105

Monosaccharide autoxidation: a potential source of oxidative stress in diabetes? Model reactions with nucleotides and protein 232(1987)283

The application of adsorptive stripping voltammetry for a study of the reaction of human serum albumin with anti-human serum albumin 235(1987)317

Protein conformomer

Hydrophilic and hydrophobic domains in the flat protein conformomer as a cause of double step polarographic waves 248(1988)387

Protein–electrode interaction

Studies of protein–electrode interactions by organosilyl derivatisation of pyrolytic graphite electrodes 219(1987)319

Protein solubilization

A somewhat unusual desad peak observed with the protein-solubilizing detergent CHAPS 222 (1987)271

Protein translational diffusion

Dielectric spectroscopy of protein translational diffusion in prokaryotic membranes and membrane vesicles 211(1986)183

Proteoliposome

Comparison of ATP synthesis efficiencies in ATPase proteoliposomes of different complexities 212(1986)167

Protic acid

Electrochemical reduction of iron(II) complexes with (3-(2-pyridyl)-5,6-diphenyl-1,2,4-triazine) 245(1988)201

Proton-translocating protein

Activation energy for charge transfer reactions in membranes. Proton-translocating proteins 204 (1986)245

Protonation

Electrochemical reactions with protonations at equilibrium. Part XIII. Experimental study of the homogeneous electron exchange in quinone/dihydroquinone systems 208(1986)357

Protonation of radical anions by the parent compound. Effect of structure in the hydroxypyrimidines 212(1986)371

Electro-organic reactions. Part 34. Kinetic basicities of some electrogenerated organic dianions and the competition between protonation and reproportionation 250(1988)373

Proton discharge

The reorganization energy of the aqueous proton 249(1988)15

Proton displacement

The significance of interfacial charge and proton displacements for the mechanism of energy transduction in biomembranes 212(1986)273

Proton exchange

ESR-spectroscopic investigation of the parallel electron and proton exchange between quinones and their radicals. Part I. Measurements at 298 K 229(1987)297

Proton flow

Proton flow through the intramembrane sector of the ATP synthase complex of bovine heart mitochondria 231(1987)147

Proton interference

Surface modifications with heteropoly and isopoly oxometalates. Part III. Electrode modification procedures. The necessity of proton interference during the electrodeposition of the h.e.r. catalysts 247(1988)157

Proton leakage

Proton leakage through perfluorinated anion exchange membranes 210(1986)329

Proton–potassium pump

H^+–K^+ exchange and $\Delta\bar{\mu}_{H^+}$ in *Lactobacillus salivarius* 231(1987)503

Proton pump

A non-linear kinetic model of chemiosmotic energy coupling 211(1986)193

Proton reduction

Dependence of the kinetics of proton reduction at gold electrodes on the surface crystallographic orientation 223(1987)171

Proton transfer

A quantum mechanical theory of the proton and electron transfer in weakly polar solvents 204 (1986)97

Entropic and enthalpic components of the symmetry factor for electrochemical proton transfer from various proton donors over a wide temperature range 214(1986)633

Proton transfer across the water/nitrobenzene interface facilitated by acridine chloride 234 (1987)85

Proton translocation

Considerations on the kinetics of an electrochemical model of oxidative phosphorylation 212(1986)245

Protrusive surface

Voltammetry at geometrically uneven electrodes. Part I. Chronoamperometry at model electrodes with rectangular hollow or protrusive surfaces 246(1988)1

Prussian Blue

Researches on chemically modified electrodes. Part XV. Preparation and electrochromism of the vanadium hexacyanoferrate film modified electrode 210(1986)31

Study of the prussian blue/prussian white redox reaction by cyclic voltammothermometry 236 (1987)209

Prussian Blue film

A photochargeable device composed of bilayer membranes of poly(3-methylthiophene) and Prussian Blue 227(1987)255

Ion flux during electrochemical charging of Prussian Blue films 234(1987)213

Prussian White

Study of the prussian blue/prussian white redox reaction by cyclic voltammothermometry 236 (1987)209

Pseudomonas aeruginosa

Direct electrochemistry of bacterial cytochrome c_{551} at surface-modified gold electrodes 217 (1987)129

Pseudopotential

Mixed pseudo-potential approach to the on-top chemisorption of atomic hydrogen on the (100) silver surface 216(1987)29

The double layer capacity of jellium with pseudopotentials 229(1987)39

Psychotherapeutic agent

Polarographic analysis of human serum albumin–benzodiazepine interactions 231(1987) 535

Pterin radical

Reactions of tetrahydropterins with oxygen and with other one-electron acceptors 232(1987)79

Pulsating membrane crossing

Oscillations generated by pulsating membrane crossing 211(1986)505

Pulse amplitude

Pulsed linear sweep voltammetry with pulses of constant level in a potential scale, a polarization demanding condition in the study of platinum single crystal electrodes 236(1987)87

Pulsed amperometry

Pulsed amperometric detection of sulfur compounds. Part I. Initial studies at platinum electrodes in alkaline solutions 209(1986)159

Pulsed amperometric detection of sulfur compounds. Part II. Dependence of response on adsorption time 209(1986)171

Pulsed laser irradiation

The effect of pulsed laser irradiation on the properties of glassy carbon electrodes 250(1988) 173

Pulse polarography

Pulse polarography of metal/polyelectrolyte complexes and operation of the mean diffusion coefficient 202(1986)57

A pulse polarographic measurement of the kinetics of dissociation of the $[Ru^{III}(edta)]_2$ dimer 202(1986)101

The electrochemistry of 2-aminoacrylic acid derivatives in acidic media as studied by background corrected pulse polarographic techniques and controlled potential electrolysis 218(1987)213

Reactant adsorption in pulse polarography. Part V. Predominant adsorption of product 223 (1987)271

A simple and alternative method for the evaluation of electrode kinetic parameters from normal pulse polarographic data 224(1987)49

Pulse polarography: theory for the current–potential curves of an EE mechanism 235(1987)71

Pulse polarography: influence of amalgam formation on the current–potential curves in normal pulse polarography, reverse pulse polarography, differential normal pulse polarography and differential pulse polarography for a slow charge-transfer step 243(1988)241

Pulse radiolysis

Fatty acid peroxyl radicals: their generation and reactivities 232(1987)37

Radiolytic scanning of vitamin E–vitamin C oxidation–reduction mechanisms 232(1987)59

Pulse voltammetry

Voltammetry at microcylinder electrodes. Part V. Pulse voltammetric current–potential curves for quasi-reversible and totally irreversible electrode reactions 206(1986)47

Pulse voltammetry and polarography. Recent progress in microprocessor instrumentation 214 (1986)79

Pure birth process

Nucleation on active sites. Part III. Nucleation modelled as a pure birth process and nucleation modelled as a birth-and-death process 215(1986)1

Purine

Electrochemical oxidation of 6-thiouric acid 221 (1987)155

Pyrazine

The coupling of the double-layer admittance and the faradaic admittance of a stepwise electrode reaction complicated by adsorption of the reactants with experimental verification on the reduction of pyrazine 202(1986)271

Analysis of the interfacial admittance in the case of a two-step two-electron electrode reaction with a diffusing intermediate, with application to the reduction of pyrazine 222(1987)45

Pyrazine derivative

Electrochemical behaviour of pyrazine derivatives: reduction of 2-hydroxy-3-phenyl-6-methylpyrazine 243(1988)133

Pyridine

Two-electron oxidation of *N,N,N′,N′*-tetramethyl naphthidine in acetonitrile. The reactivity of its dication to aromatic nucleophilic substitution by pyridine 201(1986)367

Adsorption of pyridine at the polycrystalline gold–solution interface 207(1986)213

Electrochemical and SEM characterization of Ag electrodes roughened by potential sweep and potential step processes in aqueous chloride and chloride + pyridine media 217(1987)79

Surface enhanced Raman scattering of pyridine on Ag electrodes formed with controlled-rate oxidation–reduction cycles 217(1987)93

Adsorption of pyridine at the Au (100)–solution interface 238(1987)333

Pyridine aldehyde

Global analysis of kinetic current in dc polarography. Application to pyridine-4-aldehyde reduction 243(1988)309

Pyridinecarboxaldehyde

Polarographic reduction of aldehydes and ketones. Part XXIV. Electroreduction of pyridinecarboxaldehydes in acidic solutions 213 (1986)245

Polarographic reduction of aldehydes and ketones. Part XXV. Electroreduction of pyridinecarboxaldehydes in aqueous buffered solutions 213(1986)255

Polarographic reduction of aldehydes and ketones. Part XXVI. Electroreduction and electrooxidation of pyridinecarboxaldehydes in alkaline solutions 213(1986)277

Pyridoxal phosphate

Electrochemical behaviour of pyridoxal-5′-phosphate Schiff base with *n*-hexylamine 212 (1986)317

Hydration–dehydration of the electroactive group on the electrochemical behaviour of pyridoxal-5′-phosphate 212(1986)325

Pyridyldiphenyltriazine

Electrochemical reduction of iron(II) complexes with {3-(2-pyridyl)-5,6-diphenyl-1,2,4-triazine} 245(1988)201

Pyrimidine

Cathodic stripping voltammetry of 2-thioorotic acid at the hanging mercury drop electrode 237 (1987)105

Pyrite photoelectrode

Involvement of coordination chemistry during electron transfer in the stabilization of the pyrite (FeS_2) photoanode 242(1988)255

Pyrolysed carbon

Oxygen reduction on pyrolysed carbon-supported transition metal chelates 205(1986)233

Pyrolysis

Oxygen reduction on pyrolysed carbon-supported transition metal chelates 205(1986)233

Pyrolytic carbon film electrode

A pyrolytic carbon film electrode for voltammetry. Part V. Characterization and comparison with the glassy carbon electrode by electrochemical pretreatment in basic solution 248(1988)283

Pyrolytic graphite electrode

Electrochemical oxidation of xanthosine 216 (1987)137

Studies of protein–electrode interactions by organosilyl derivatisation of pyrolytic graphite electrodes 219(1987)319

Electrochemical oxidation of ethyl 3-oxo-3-phenyl-2-phenylhydrazonopropionate 220(1987) 311

Redox potential and electrocatalysis of O_2 reduction on transition metal chelates 221(1987) 95

Electrochemical oxidation of 6-thiouric acid 221 (1987)155

Electrochemical oxidation of 9-β-D-ribofuranosyluric acid in basic solution 223 (1987)119

Electrochemical oxidation of guanosine. Formation of some novel guanine oligonucleosides 224(1987)137

Charge transfer reaction inverse photoemission spectroscopy (CTRIPS). Part II. Electrode specificity 228(1987)293

The cathodic reduction of oxygen at metal tetrasulfonato-phthalocyanines: influence of adsorption conditions on electrocatalysis 233 (1987)99

The mechanism of oxygen reduction at iron tetrasulfonato-phthalocyanine incorporated in polypyrrole 233(1987)113

The electroreduction of oxygen on pyrolytic graphite 233(1987)147

The electroreduction of dioxygen on thin films of gold in alkaline solution 234(1987)193

Adsorption and reduction of iron and cobalt phthalocyanines in DMSO at glassy carbon and pyrolytic graphite electrodes 234(1987)297

Direct electrochemistry of native and 4-chloro-3,5-dinitrophenyl (CDNP)-substituted cytochrome *c* at surface-modified gold and pyrolytic graphite electrodes 235(1987)153

On the nature of electroactive sites in clay-modified electrodes 236(1987)43

Mechanism of the electrochemical oxidation of 2-aminopyridine at a pyrolytic graphite electrode 242(1988)209

Electrocatalytic reduction of oxygen at a pyrolytic graphite electrode modified by adriamycin and its 7-deoxyaglycone 246(1988) 385

Electrochemical oxidation of sulphacetamide 247(1988)229

Electrochemical behavior of cytochrome c_3 from *Desulfovibrio vulgaris* Hildenborough. Promoter activity at the pyrolytic graphite electrode 249 (1988)241

Pyrrole

Electrochemical study of poly(PHAS) in acetonitrile and water + acetonitrile electrolytes 238(1987)183

Solvent effect on electrochemical polymerization of aromatic compounds 242(1988)203

Catalytic electrosynthesis of conducting polymers 244(1988)115

Electrochemical and electropolymerization reactions of undiluted anilines and pyrrole 245 (1988)321

Self-doped conducting copolymers: a charge and mass transport study of poly{pyrrole-co[3-(pyrrol-1-yl)propanesulfonate]} 250(1988)355

Pyrrolylpropanesulphonate

Self-doped conducting copolymers: a charge and mass transport study of poly{pyrrole-co[3-(pyrrol-1-yl)propanesulfonate]} 250(1988)355

Pyrromethenone

Electrochemical reduction mechanism of 5(1H)-pyrromethenones in dimethylformamide on a mercury electrode 211(1986)125

Q

Qualitative analysis

Computer-assisted voltammetry with a multi-level random signal. Part I. Generation of input potential signal and sampling timing of the response current 235(1987)117

Quantum chemistry

On the electroreduction mechanism of halobenzenes. Part I. A quantum chemical approach 219(1987)197

Quantum theory

Some remarks on the theory of chemical elementary processes with charge transfer in condensed systems 204(1986)13

Quantum transition state theory: transport of a heavy charged particle 204(1986)85

A quantum mechanical theory of the proton and electron transfer in weakly polar solvents 204 (1986)97

Quartz crystal electrode

Ion flux during electrochemical charging of Prussian Blue films 234(1987)213

Quartz frequency balance

A kinetic investigation of the manganese dioxide electrode with a rotating quartz frequency balance 228(1987)455

Quartz microbalance

Observation of morphological relaxation of copper and silver electrodes in solution using a quartz microbalance 216(1987)127

An in situ study on the mechanism of the electrochemical dissolution of copper in oxygenated sulphuric acid. An application of the quartz microbalance 219(1987)311

Cyclic voltammetry and quartz microbalance electrogravimetry of IgG and anti-IgG reactions on silver 223(1987)67

Underpotential metal deposition on gold, monitored in situ with a quartz microbalance 239(1988)321

A study of the electrosorption of bromide and iodide ions on gold using the quartz crystal microbalance 243(1988)343

Quasi-electroneutrality

Diffusion-migration for one-dimensional mixed conduction in thin layers at steady state 238 (1987)1

Quasi-reversible process

Electrochemical kinetics at microelectrodes. Part I. Quasi-reversible electron transfer at cylinders 206(1986)23

Voltammetry at microcylinder electrodes. Part V. Pulse voltammetric current–potential curves for quasi-reversible and totally irreversible electrode reactions 206(1986)47

Linear sweep voltammetry at the tubular graphite electrode. Part III. Quasi-reversible processes 207(1986)41

Theory of stationary current–potential curves at microdisk electrodes for quasi-reversible and totally irreversible electrode reactions 235(1987) 87

Cyclic voltammetry at the tubular electrode. Part II. Quasi-reversible and totally irreversible processes 238(1987)33

Quasi-stationary state

Porous electrode modelling: quasi-stationary state 205(1986)91

Quaternary structure

Brdička-type catalytic currents of hemoglobins. Part III. pH dependence of the catalytic current — an indication of quaternary structure changes? 231(1987)71

Quencher

A polymer-film based photoelectrode containing immobilized quencher and chromophore polymer blends 224(1987)59

Quinizarine

Electrochemistry of quinizarine adsorbed on a glassy carbon electrode in aqueous solutions 239 (1988)209

Quinoline complex

Electrode reactions of nickel(II)–, copper(II)– and zinc(II)–8-quinolinethiolato complexes in *N*,*N*-dimethylformamide 205(1986)209

Quinoline derivative

Phase transitions in mercury + quinoline derivative systems. The anodic formation of Hg(I)–8-hydroxyquinoline-5-sulfonic acid chelate 202(1986)203

Quinoline radical anion

Electrochemistry in near-critical and supercritical fluids. Part V. The dimerization of quinoline and acridine radical anions and dianions in ammonia from −70 °C to 150 °C 240(1988)253

Quinone

Rate constants of the electrode reactions of some quinones in hexamethylphosphoramide solutions at mercury electrodes 201(1986)205

The kinetics of some substituted catechol/*o*-quinone couples at a carbon paste electrode 206 (1986)167

Electrochemical reactions with protonations at equilibrium. Part XIII. Experimental study of the homogeneous electron exchange in quinone/dihydroquinone systems 208(1986)357

Conversions of complex compounds and quinone on surface-modified electrodes 219(1987)153

Redox reactions of quinones on carbon materials 223(1987)161

The influence of a faradaic process on the double-layer capacity 229(1987)181

ESR-spectroscopic investigation of the parallel electron and proton exchange between quinones and their radicals. Part I. Measurements at 298 K 229(1987)297

Electrochemical reactivity of biologically active quinone/hydroquinone sesquiterpenoids on glassy carbon electrodes 231(1987)567

Theory of microelectrode voltammetry with little electrolyte 250(1988)1

Quinone reduction

Reaction entropies in quinone reduction in *N,N*-dimethylformamide and propionitrile 242 (1988)323

Quinoxaline

A novel mediator for the investigation of the electrochemistry of metalloproteins 212(1986)99

R

Radical

Study of the reactions of 9-nitroanthracene anion radicals and dianions in dimethylformamide by the controlled potential constant-voltage electrolysis method 224(1987)273

Radical anion

Protonation of radical anions by the parent compound. Effect of structure in the hydroxypyrimidines 212(1986)371

Voltammetric and spectral study of some aminotrinitrobenzenes and their radical anions 214(1986)213

Radical–ion bond cleavage

Single electron transfer rate measurements. Interpretation when a radical–ion bond cleavage reaction occurs within the encounter pair 205 (1986)35

Radical oxidation

Electrochemical and photochemical oxidation of the deazapurine nucleotide drug tubercidin-5′-monophosphate 239(1988)161

Radio-electrochemistry

Single crystal radio-electrochemistry: adsorption of acetic acid on well-defined Pt (111) surfaces 239(1988)413

Radiofrequency field

Low-level pulsed radiofrequency fields and the treatment of soft-tissue injuries 212(1986)531

Radiofrequency sputtering

Efficient and stable oxygen evolution on zirconium nitride thin film electrodes prepared by the reactive RF sputtering technique 220 (1987)369

Reduction of oxygen to water on cobalt-nitride thin film electrodes prepared by the reactive RF sputtering technique 250(1988)73

Radiolysis

Photo and radiation-induced formation of thymidine hydroperoxides 232(1987)155

Radiolytic scanning

Radiolytic scanning of vitamin E–vitamin C oxidation–reduction mechanisms 232(1987)59

Radiometry

A coupled voltammetric and radiometric (voltradiometric) study of the simultaneous adsorption of hydrogen and anions at platinized platinum electrodes 218(1987)337

Radioprotection

Electrochemical behaviour of aminothiol radioprotectors 212(1986)427

Formation and reaction of peroxyl radicals of polynucleotides and DNA in aqueous solution 232(1987)147

Radiotracer

Radiotracer study of the adsorption of sulphuric acid on rhodized electrodes 201(1986)187

A radiotracer study of the adsorption of H_2SO_4 at ruthenium electrodes 205(1986)259

Radiotracer study of the adsorption of H_2S at a platinized platinum electrode 206(1986)297

Radiotracer study of the adsorption of CN^- ions and simultaneous adsorption of Ca^{2+} and CN^- ions at a platinized platinum electrode in alkaline medium. Novel experimental evidence for cation adsorption induced by strongly chemisorbed anions 215(1986)369

Combined electrochemical and radiotracer (cyclic voltradiometric) study of the motion of counter-ions in tetracyanoquinodimethane modified electrodes 218(1987)297

Reinvestigation of the potential dependence of the adsorption of acetic acid on platinum electrodes by a radiotracer method 227(1987)223

Combined electrochemical and radiotracer study of anion sorption from aqueous solutions into polypyrrole films 230(1987)257

Radiotracer study of the adsorption of taurine at a platinized platinum electrode 241(1988)343

Radiotracer study of the adsorption of Ca^{2+} ions on a platinized platinum electrode in acid medium 248(1988)411

Raman spectro-electrochemistry

High-temperature "in-situ" surface Raman spectro-electrochemistry in aqueous solutions 208(1986)175

Raman spectroscopy

Interfacial spectroelectrochemical Raman study of the silver/1,10-phenanthroline system in chloride medium 207(1986)127

Investigation of corrosion of a rotating iron electrode in HNO_3 by in-situ Raman spectroscopy 210(1986)259

Surface-enhanced Raman spectroscopy of *p*-dimethylaminobenzonitrile: Field dependence and molecular orientation 214(1986)675

Comparison of electrochemical redox processes on silver electrode surfaces between *meso*-tetrakis(2-*N*-methylpyridyl)porphine and *meso*-tetrakis(4-*N*-methylpyridyl)porphine. Study by surface-enhanced resonance Raman scattering spectroscopy 215(1986)209

Surface enhanced Raman scattering of pyridine on Ag electrodes formed with controlled-rate oxidation–reduction cycles 217(1987)93

An electrochemical and SERS investigation of the influence of pH on the effectiveness of some corrosion inhibitors of copper 217(1987)187

Extending the metal interface generality of surface-enhanced Raman spectroscopy: underpotential deposited layers of mercury, thallium, and lead on gold electrodes 217(1987) 367

The effects of the underpotential and overpotential deposition of lead and thallium on silver on the Raman spectra of adsorbates 217 (1987)385

Raman spectroscopy of adsorbates on thin film electrodes deposited on silver substrates 217 (1987)397

The induction of SERS on smooth Ag by the deposition of Ni and Co 217(1987)411

SERS investigation of interfacial Pb(II) species in weakly acidic aqueous halide media 219 (1987)291

Surface-enhanced Raman scattering (SERS) on silver electrodes as a technical tool in the study of the electrochemical reduction of cyanopyridines and in quantitative analysis 220 (1987)339

Raman spectroscopic investigation of aniline: adsorption and polymerisation 224(1987)253

Raman spectroscopy investigation of the silver oxide/silver electrode. Influence of experimental conditions 227(1987)21

Surface enhanced Raman scattering and local photoemission currents on the freshly prepared surface of a silver electrode 228(1987)197

Surface Raman spectroscopy at Pt electrodes 228(1987)219

Aspects of the adsorption of chloride on silver revealed through surface enhanced Raman scattering 228(1987)229

An electrochemical and spectroelectrochemical analysis of the oxide/p-indium phosphide semiconductor surface using Fourier transform infrared and Raman scattering spectroscopies 233(1987)1

Surface-enhanced Raman scattering at gold electrodes: dependence on electrochemical pretreatment conditions and comparisons with silver 233(1987)211

Redox mediation involving oxide films as examined by surface-enhanced Raman spectroscopy: peroxodisulfate reduction at oxide-modified gold electrodes 234(1987)237

Spectroscopic investigation of electrochemically active compounds. SERS of nitrobenzene, sulfide, ethylene and hydroquinone on Au 239(1988)361

In-situ Raman spectroscopy of manganese dioxide during the discharge process 243(1988) 219

The adsorption of aniline on gold: a SERS study 250(1988)143

Random Adsorption Model

Linear sweep voltammetric approach for the study of monolayer formation. Distinct features of adsorption, nucleation–growth–collision and combined models 225(1987)93

Random signal

Computer-assisted voltammetry with a multi-level random signal. Part I. Generation of input potential signal and sampling timing of the response current 235(1987)117

Rapid scan voltammetry

Background subtraction for rapid scan voltammetry 209(1986)77

Rare earth substitution

The rare earth substitution effect on the electrochemistry of diphthalocyanine films in contact with an acidic aqueous medium 249 (1988)181

Rat

Electrofusion of rat and mouse blastomeres 211 (1986)513

Rate constant

Rate constants of the electrode reactions of some quinones in hexamethylphosphoramide solutions at mercury electrodes 201(1986)205

Use of microelectrodes for the study of a fast chemical step in an electrode reaction 202(1986) 83

Single electron transfer rate measurements. Interpretation when a radical–ion bond cleavage reaction occurs within the encounter pair 205 (1986)35

First- and second-order chemical–electrochemical mechanisms. Extraction of standard potential, equilibrium and rate constants from linear sweep voltammetric curves 208(1986)197

Dependence of the true rate constant of homogeneous electron transfer on solvent relaxation time and viscosity 209(1986)223

Determination of the kinetic parameters for the Ti(III)/Ti(IV) couple using a rotating disk electrode 209(1986)275

A simulation analysis of errors in the measurement of standard electrochemical rate constants from phase-selective impedance data 222(1987)21

A simple and alternative method for the evaluation of electrode kinetic parameters from normal pulse polarographic data 224(1987)49

ESR-spectroscopic investigation of the parallel electron and proton exchange between quinones and their radicals. Part I. Measurements at 298 K 229(1987)297

Electrode processes of the V(III)/V(II) and Eu(III)/Eu(II) systems in mixed water + acetone solvents 230(1987)155

Cathodic behaviour of $[(\eta^3\text{-}C_3H_5)Pd(Ph_2P\text{–}C_2H_4\text{–}PPh_2)]^+$ in acetonitrile solution: an electrochemical process involving very fast consecutive chemical reactions 230 (1987)165

Determination of electrochemical kinetic parameters using the Bond–Henderson–Oldham "global analysis" 230(1987)273

Voltammetry of metal complex systems with different diffusion coefficients of the species involved. Part I. Analytical approaches to the limiting current for the general case including association/dissociation kinetics 234(1987)1

Voltammetry of metal complex systems with different diffusion coefficients of the species involved. Part II. Behaviour of the limiting current and its dependence on association/dissociation kinetics and lability 234(1987)17

Electrode processes of the Eu(III)/Eu(II) system in water + hexamethylphosphortriamide mixtures 234(1987)263

Voltammetry of metal complex systems with different diffusion coefficients of the species involved. Part III. The current–potential relation for the general case including association/dissociation kinetics 235(1987)1

Electrochemical digital simulation by Runge–Kutta integration 240(1988)17

Competitive homogeneous chemical reactions occurring between two electron transfers. Application to *p*-nitrophenol reduction 243 (1988)293

Global analysis of kinetic current in dc polarography. Application to pyridine-4-aldehyde reduction 243(1988)309

The kinetics of ionic transfer across adsorbed phospholipid layers 243(1988)455

Electron transfer reactions at the interface between two immiscible electrolyte solutions 244(1988)15

Chemical and electrochemical equilibria and kinetics in aqueous Cr(III)/Cr(II) chloride solutions 244(1988)179

Theory of irreversible cyclic voltammograms at microcylinder electrodes 247(1988)17

Estimation of charge transfer kinetic parameters from irreversible cyclic voltammograms at carbon fiber electrodes 247(1988)29

Electrode processes in mixed solvents. Correlations between electrochemical rate constants and Gibbs energy of transfer 248 (1988)35

Laser-induced temperature-jump coulostatics for the investigation of heterogeneous rate processes. Theory and application 248(1988)255

Measurement of ultrafast electrode kinetics via steady-state voltammograms at microdisc electrodes 248(1988)467

Correlation of heterogeneous electron transfer rates with structural change in cobalt tetraaza macrocyclic complexes 250(1988)107

Determination of experimental parameters in the Fe(III)/Fe(II) system in 1 *M* H_2SO_4, with a polycrystalline gold electrode, taking advantage of its non-linear behaviour 250(1988)321

Rate process

Some remarks on the theory of chemical elementary processes with charge transfer in condensed systems 204(1986)13

Reaction–diffusion model

Electroanalytical investigations. Part VIII. The use of an expanding simulation space in the simulation of electrochemical reaction–diffusion models with orthogonal collocation 241(1988)17

Reaction mechanism

A critical study of the use of logarithmic analysis as a criterion for elucidation of the reaction mechanism of electrodimerization processes in dc polarography 213(1986)23

Electrochemical synthesis of phenylselenobenzonitriles and phenyltellurobenzonitriles by the $S_{RN}1$ mechanism using a redox catalyst 238(1987)239

Reaction model

The evaluation of electrochemical reaction rate data using first order analytical models 248 (1988)1

Reaction rate

Solvent effect on the rate of homogeneous and electrochemical electron exchange 247(1988)85

Recapture current

Electrochemical generation and recapture currents are linked by Hilbert transformation 218(1987)15

Receptor

Electrical properties of a purified complex of α-latrotoxin and its receptor incorporated into planar lipid bilayers 231(1987)361

Receptor molecule

Complex formation of methyl viologen and diquat with macrocyclic ether dibenzo-24-crown-8 240(1988)105

Recessed disc microelectrode

A comparison of the chronoamperometric response at inlaid and recessed disc microelectrodes 249(1988)1

Rechargeable electrode

Rechargeable manganese oxide electrodes. Part I. Chemically modified materials 223(1987)107

Rechargeable manganese oxide electrodes. Part II. Physically modified materials 238(1987)93

Recombination

Recombination and charge transfer at the illuminated n-CdTe/electrolyte interface. Simplified kinetic model 220(1987)179

Picosecond time-resolved measurements of fast recombination losses in the photoresponse of semiconductor/liquid junction cells 228(1987)29

Rectangular flow channel

Calculation of convective-diffusion current at multiple strip electrodes in a rectangular flow channel. Implications for electrochemical detection 205(1986)101

Rectangular surface

Voltammetry at geometrically uneven electrodes. Part I. Chronoamperometry at model electrodes with rectangular hollow or protrusive surfaces 246(1988)1

Redox catalysis

Indirect reduction of polyenes. Redox catalysis involving dienes and trienes in weakly protonating media 221(1987)275

Heterogeneous and homogeneous redox catalysed reduction of some sulfilimines 223(1987)185

Electrochemical synthesis of phenylselenobenzonitriles and phenyltellurobenzonitriles by the $S_{RN}1$ mechanism using a redox catalyst 238(1987)239

Redox catalysis allied with spin trapping. An efficient way for characterization of free radicals formed at very negative potentials 246(1988)457

Redox centre

Electron transfer between immiscible solutions. The hexacyanoferrate–lutetium biphthalocyanine system 244(1988)27

Redox compound

Electrochemical control of reactivity of other redox species on an electrode coated with a Langmuir–Blodgett multilayer film 205(1986)329

Redox conversion

Electrochemical conversion of lactoperoxidase, ceruloplasmin and alkaline phosphatase on mercury electrodes 211(1986)407

Redox couple

Current peak multiplicity related to the $Ni/Ni(OH)_2$ electrode 210(1986)287

The Belousov–Zhabotinsky system catalyzed by ferroin. Experimental behaviour and theoretical pattern 211(1986)485

Theory of multiple square wave voltammetries 213(1986)1

Electrochemistry of concentrated organic redox solutions 215(1986)223

Theory of electrode reactions of redox couples confined to electrode surfaces at monolayer levels. Part I. Expression of the current–potential relationship for simple redox reactions 217 (1987)1

Theory of electrode reactions of redox couples confined to electrode surfaces at monolayer levels. Part II. Cyclic voltammetry and ac impedance measurements 217(1987)15

Conversions of complex compounds and quinone on surface-modified electrodes 219(1987)153

Ac-impedance studies of carbon electrodes coated with poly-4-vinylpyridine films containing the $Fe(CN)_6^{3-/4-}$ redox couple 235(1987)169

Solvent effects on the electrode kinetics of simple redox couples. Investigations on the electrochemical behaviour of the V(III)/V(II) system in water + acetonitrile mixtures 237 (1987)209

Chronocoulometric study of electrode kinetics in the case of an adsorbed redox couple. Progesterone electroreduction on mercury from aqueous solutions 248(1988)55

Electron transfer reactions to soluble redox couples at $Ba_2YCu_3O_7$ and CuO electrodes 249 (1988)205

Redox-electrode reaction

Theory of stationary current–voltage curves of redox-electrode reactions in hydrodynamic voltammetry. Part XI. Wall–jet electrodes 206 (1986)37

Redox ion

The transient response of electrodes coated with membrane-type polymer films under conditions of diffusion and migration of the redox ions 237(1987)13

Redox mechanism

Electrochemical in situ EPR evidence of two polaron–bipolaron states in polyaniline 236 (1987)199

Redox mediator

A method for estimation of hydrogen peroxide based on mediated electron transfer reactions of peroxidases at electrodes 201(1986)1

Redox membrane

Electron hopping between fixed sites. "Diffusion" and "migration" in counter-ion conservative redox membranes at steady state 242(1988)1

Redox membrane-coated electrode

Diffusion-migration impedances for finite, one-dimensional transport in thin layer and membrane cells. An analysis of derived electrical quantities and equivalent circuits 210(1986)1

Redox-modified electrode

The development of redox-modified electrodes as charge-accumulating devices for use in higher sensitivity detection systems 250(1988)417

Redox polymer

Electroactive charge-transfer polymers from anodic coupling of dibenzo-crown ethers. Part II. Influence of the complexing properties of the polyether rings 206(1986)115

Electrocatalytic reduction of O_2 at electrodes modified by films of redox polymers with anthraquinone moieties 225(1987)177

Temperature dependence of charge transport processes in surface deposited redox polymer layers 250(1988)207

Redox polymer film

Chemical and mechanical properties of redox polymer-modified electrodes. Part I. A mechanical/electrochemical model 219(1987)49

Chemical and mechanical properties of redox polymer-modified electrodes. Part II. Redox thermodynamics of plasma-polymerized vinylferrocene electrodes 219(1987)71

Chemical and mechanical properties of redox polymer-modified electrodes. Part III. Redox thermodynamics of linear polyvinylferrocene electrodes 219(1987)91

Electrocatalytic effects of redox polymer films on the reduction of O_2 on silicon semiconductors 245(1988)191

Redox potential

Redox potential and electrocatalysis of O_2 reduction on transition metal chelates 221(1987) 95

Redox protein

The determination, by ellipsometry, of the mode of adsorption on gold of some promoters of redox-protein direct electrochemistry 202(1986) 303

Redox reaction

Redox reactions at film-covered electrodes. A new approach to a study of fluorine anodes 206(1986)313

Redox reactions in lipid bilayers and membrane bioenergetics 211(1986)19

Redox reactions of quinones on carbon materials 223(1987)161

Square-wave voltammetric peak current enhancements by adsorption and reversibility of the redox reaction 226(1987)239

Study of the prussian blue/prussian white redox reaction by cyclic voltammothermometry 236 (1987)209

Redox reagent

Flatband potential shift of n-type GaAs in CH_3CN containing different redox reagents 237 (1987)289

Redox series

Redox series of complexes with a mixed coordination sphere $[Ru(bpy)_2(5,5'\text{-}COOEtbpy)]^{2+}$ 222(1987)161

Redox state

Structure changes of viologen + β-cyclodextrin inclusion complex corresponding to the redox state of viologen 210(1986)265

Reduction

On the polarographic reduction of nitrate ion in the presence of zirconium(IV) 208(1986)117

Metal substrate effects upon the kinetics of simple electrochemical reactions. The reduction of cobalt(III) ammines at single-crystal gold faces 209(1986)109

Frequency response analysis of photocurrent doubling. The reduction of oxygen at p-GaAs 209(1986)307

Photoassisted and electrochemical reduction of nitric acid to hydroxylamine and ammonia 209 (1986)405

Reduction of adenine nucleotides at the mercury electrode 211(1986)317

Electrochemical behaviour of pyridoxal-5'-phosphate Schiff base with *n*-hexylamine 212 (1986)317

Square-wave polarography of bismuth 214 (1986)103

Electrochemical reduction of Ni(II) on the hanging mercury drop electrode in the presence of dimethylglyoxime 214(1986)157

Electrochemical reduction of tellurium(IV) 214 (1986)179

Polarographic reduction of aldehydes and ketones. Part XXVII. 1-Phenyl-1,2-propanedione 214(1986)237

Polarographic reduction of aldehydes and ketones. Part XXVIII. 1,2-Cyclohexanedione 214(1986)259

Reduction of 2-cyclohexen-1-one in aqueous media on a mercury electrode 215(1986)293

Adsorption and reduction of formic acid on p-type silicon electrodes 215(1986)307

New aspects of the electrochemistry of heteropolyacids. Part II. Coupled electron and proton transfers in the reduction of silicotungstic species 217(1987)287

Mechanism and kinetics of the stepwise voltammetric reduction of pertechnetate in alkaline solution to Tc(VI), Tc(V) and Tc(IV) 219(1987)221

Reduction and reoxidation of metal-free phthalocyanine electrodes in non-aqueous media. Electrochemical behavior and spectroscopic analysis 221(1987)105

Two distinct surface conditions of a gold electrode from the viewpoint of the reduction of nitrobenzene in aqueous alkaline solution 221 (1987)245

Analysis of the interfacial admittance in the case of a two-step two-electron electrode reaction with a diffusing intermediate, with application to the reduction of pyrazine 222(1987)45

Electrochemical reduction of 1,1,4,4-tetraphenylbutatriene 222(1987)257

Heterogeneous and homogeneous redox catalysed reduction of some sulfilimines 223(1987)185

An investigation of the titanium electrode in acid solutions and acid solutions containing uranium(VI) ions 225(1987)139

Reduction current

New aspects of the electrochemistry of heteropolyacids. Reduction currents as a probe of solvent–electrolyte interactions 208(1986)343

Reduction mechanism

The reduction mechanism of Cd(II) at mercury in dimethylsulfoxide containing tetraethylammonium perchlorate 221(1987)129

Reduction potential

Solvent effects on electrode potentials of metalloporphyrins. Reduction of 5,10,15,20-tetraphenylporphinato complexes in non-aqueous media 235(1987)189

Reduction wave

Polarographic study of poly(α-D-glutamic acid) in acid solutions 212(1986)193

Reductive scavenger

A polymer-film based photoelectrode containing immobilized quencher and chromophore polymer blends 224(1987)59

Reference electrode

Erratum on the determination of the shift between the potential scales in liquid ammonia solutions and in aqueous solutions 225(1987)263

Regeneration

Theoretical study of the chronopotentiometric response with programmed current of electrode processes with regeneration mechanisms 241 (1988)33

Relaxation technique

On the kinetics of the cathodic deposition of aluminium on glassy carbon and tungsten electrodes from $AlCl_3$ + NaCl + KCl melts 210 (1986)127

Relaxation time

Dependence of the true rate constant of homogeneous electron transfer on solvent relaxation time and viscosity 209(1986)223

Evidence for carbon tetrachloride-induced lipid peroxidation *in vivo* by ^{23}Na relaxation times t_1 232(1987)179

Renal tubule

Effect of temperature on peritubular cell membrane potential and potassium conductance in isolated perfused proximal tubules of the mouse 231(1987)419

Reorganization energy

The reorganization energy of the aqueous proton 249(1988)15

Reoxidation

Reduction and reoxidation of metal-free phthalocyanine electrodes in non-aqueous media. Electrochemical behavior and spectroscopic analysis 221(1987)105

Reproducibility

Ultramicroelectrode sensors and detectors. Considerations of the stability, sensitivity, reproducibility, and mechanism of ion transport in gas phase chromatography and in high performance liquid phase chromatography 244 (1988)81

Rescinnamine

Cyclic voltammetry and differential pulse voltammetry of rescinnamine 208(1986)127

Residual current

Background subtraction for rapid scan voltammetry 209(1986)77

Resistance

Solution resistance determinations for FT Faradaic Admittance measurements 213(1986) 313

Effects of resistance and capacitance on the chronoamperometry of polymer-coated electrodes as modeled by a finite elements digital simulation 216(1987)11

Resistivity

An electrochemical cell for voltammetric studies using a dropping mercury electrode in solutions of high resistivity 249(1988)327

Respiration

Modulation of the electrochemical membrane potential in mitochondria by sulfhydryl reagents 231(1987)261

Respiration centre

Electrochemical method for the assessment of oxygen consumption in biological objects with an uneven distribution of respiration centres 226(1987)193

Respiratory control ratio

Conformational transitions in the regulation of cytochrome *c* oxidase activity 211(1986)79

Reticulated vitreous carbon electrode

Electrochemical and spectroscopic characterization of a gold plated reticulated vitreous carbon thin-layer electrode 248(1988)341

Reverse pulse polarography

Pulse polarography: current–potential curves in normal pulse polarography, reverse pulse polarography, differential normal pulse polarography and differential pulse polarography for a slow charge-transfer step 205(1986)21

Reversible electrodeposition

Theory of cyclic voltammetry for reversible electrodeposition of insoluble products 201 (1986)199

Reversible reaction

Characteristic criteria for a reversible reaction in ac polarography 222(1987)11

Reynolds number

The influence of Schmidt number and Reynolds number on the behavior of rotating ring–disk electrodes 234(1987)55

Rhenium complex

Electrochemical and mechanistic studies of $[Re(CO)_3(dmbpy)Cl]$ and their relation to the catalytic reduction of CO_2 201(1986)347

Electrochemical coating of a platinum electrode by a poly(pyrrole) film containing the *fac*-Re(2,2′-bipyridine)$(CO)_3Cl$ system. Application to electrocatalytic reduction of CO_2 207(1986)315

Rhenium film

"Transparent" metals: preparation and characterization of light-transmitting palladium, rhodium, and rhenium films 228(1987)167

Rhodium electrode

Radiotracer study of the adsorption of sulphuric acid on rhodized electrodes 201(1986)187

Electrocatalysis by ad-atoms. Part XVIII. Enhancement of carbon monoxide oxidation on rhodium and iridium electrodes by oxygen adsorbing ad-atoms 202(1986)125

In situ infrared reflectance spectroscopic study of the adsorption of formic acid at a rhodium electrode 204(1986)315

Electrochemical faceting and preferred crystallographic orientation of rhodium electrodes 221(1987)229

Electrochemistry of the ordered Rh (111) electrode. Surface preparation and voltammetry in $HClO_4$ electrolyte 227(1987)259

The active surface area increase of rhodium electrodes through electroreduction of oxide layers produced by fast periodic potentials 237 (1987)237

Electrochemical investigation of an electrodeposited rhodium electrode in acid solutions 242(1988)97

Single crystal electrochemistry of rhodium. Anion effects and order/disorder transitions of clean and silver coated Rh (111) surfaces 244(1988)147

Competitive electroformation of silver and oxygen overlayers on polycrystalline rhodium in acid 246(1988)441

Effect of Pb adatoms on the chemisorption of formic acid at a smooth polycrystalline rhodium electrode in acid medium. A quantitative EMIRS investigation 249(1988)265

Rhodium film

"Transparent" metals: preparation and characterization of light-transmitting palladium, rhodium, and rhenium films 228(1987)167

Rhodizonic acid

Electrocatalytic influence of underpotential Tl, Pb and Bi monolayers on the electrochemical behaviour of rhodizonic acid and tetrahydroxy-1,4-benzoquinone on Pt in acid solutions 213 (1986)135

Riboflavin cofactor

Attachment of riboflavin derivatives to electrode surfaces 244(1988)287

Ribofuranosyluric acid

Electrochemical oxidation of 9-β-D-ribofuranosyluric acid in basic solution 223 (1987)119

RNAse *A*

The adsorption of RNAse *A*, BSA and cytochrome *c* at the graphite powder|liquid interface using in parallel the adsorption isotherm plot and linear sweep voltammetry on graphite paste electrode 211(1986)103

Rotating cylinder electrode

Kinetic studies using a rotating cylinder electrode. Part I. Electron transfer rates in ferrous/ferric sulfate on platinum 215(1986)151

Rotating disc electrode

Stability and electrocatalytic activity of the oxo-bridged dimer $[(bpy)_2(H_2O)RuORu(OH_2)(bpy)_2]^{4+}$ in basic solutions 205(1986)185

New aspects of the electrochemistry of heteropolyacids. Reduction currents as a probe of solvent–electrolyte interactions 208(1986)343

Determination of the kinetic parameters for the Ti(III)/Ti(IV) couple using a rotating disk electrode 209(1986)275

Voltammetric studies of tellurium film and hydrogen telluride formation in acidic tellurite solution 215(1986)261

Rotating disk electrode: a re-examination of some kinetic criteria with a special reference to oxygen reduction 218(1987)53

Polymer-modified electrodes. Part V. The use of hydrodynamically modulated rotating-disk electrodes in the study of the mediated oxidation of $[Fe(CN)_6]^{4-}$ at ruthenium-containing polymer-modified electrodes 218(1987)341

Oxygen reduction on glassy carbon in 0.1 *M* HCl: RDE and XPS study 220(1987)161

Kinetics of mediated oxidation at electrodes modified by poly(styrenesulfonate) containing tris(2,2′-bipyridine)osmium(III/II) complexes as electron-transfer centers 222(1987)201

Electron transport dynamics in thin polymer films containing tris(2,2′-bipyridine)osmium(III/II) complexes 222(1987) 223

Non-stationary processes at polymer coated rotating disk electrodes. Part I. Model and simulation 235(1987)41

Transient mass transfer at partially blocked electrodes: a way to characterize topography 238(1987)67

An iridium based mercury film electrode. Part II. Comparison of mercury-film electrode behaviors: theory versus reality 239(1988)113

Rotating-disc electrode studies of the anodic oxidation of iodide in concentrated iodine + iodide solutions 239(1988)149

Electrochemical behaviour of tungsten in alkaline media. Part I. NaOH solutions 243(1988)379

The relationship between mass transport to channel and rotating disk electrodes 245(1988) 287

On the transposition of theoretical equations or working curves for rotating disk electrodes to those for channel electrodes and vice versa. Comments on a paper by Unwin and Compton 245(1988)299

A reply to comments by Tokuda on our paper "The relationship between mass transport to channel and rotating disk electrodes" 245(1988) 303

Hydrodynamic effects on the macromorphology of electrodeposited zinc and flow visualization. The rotating disk electrode 249(1988)63

Diffusion coefficients of silver ions in $CuSO_4$ + H_2SO_4 solutions 249(1988)123

Electron transfer reactions to soluble redox couples at $Ba_2YCu_3O_7$ and CuO electrodes 249 (1988)205

Chronocoulometric and rotating disc electrode determination of the charge propagation current through poly-4-vinylpyridine films containing hexachloroiridate anions 250(1988)341

Rotating glassy carbon electrode

Application of ASV for trace metal speciation. Part V. The pseudo-polarography of zinc by RGCE 214(1986)37

Rotating iron electrode

Investigation of corrosion of a rotating iron electrode in HNO_3 by in-situ Raman spectroscopy 210(1986)259

Rotating platinum disc electrode

Investigation of two radical intermediates in the anodic oxidation of 1,4-dihydropyridines by electrochemiluminescence 215(1986)179

Rotating ring–disc electrode

The mechanism of the deposition of manganese dioxide. Part III. Rotating ring–disc studies 201 (1986)123

Reduction of nitrobenzene in aqueous alkaline solution at an Ag electrode. Observation by SERS, RRDE and UV absorption 202(1986)231

Oxygen reduction on pyrolysed carbon-supported transition metal chelates 205(1986)233

The role of ionic transference in polymer-modified electrodes 206(1986)93

Characterization of $NiCo_2O_4$ electrodes for O_2 evolution. Part I. Electrochemical characterization of freshly prepared $NiCo_2O_4$ electrodes 208(1986)273

Hopscotch-finite-difference simulation of the rotating ring–disc electrode 215(1986)11

The analysis of dissolved Cr^{3+} with the rotating ring–disc technique and its application to the corrosion of Cr in the passive state 216(1987)229

Membrane transport associated with double-layer charging of polymer modified electrodes 216 (1987)241

Electrochemical oxidation of *N*-substituted 1,4- and 1,2-dihydropyridine derivatives. Studies using the rotating ring–disk electrode and ESR 226(1987)103

Determination of the kinetic parameters of the oxygen reduction reaction using the rotating ring–disk electrode. Part I. Theory 229(1987)305

Determination of the kinetic parameters of the oxygen reduction reaction using the rotating ring–disk electrode. Part II. Applications 229 (1987)317

The influence of Schmidt number and Reynolds number on the behavior of rotating ring–disk electrodes 234(1987)55

Determination of surface state densities from transient rotating ring–disc electrode measurements demonstrated on an n-TiO_2 electrode 236(1987)55

Investigation of electron transfer processes at open circuit polyvinylferrocene films using rotating ring–disk electrodes 236(1987)139

Oxygen reduction on the Au (311) electrode surface in alkaline electrolyte 240(1988)239

Partial charge transfer in the underpotential deposition of metals. Part II. Mercury deposition on polycrystalline gold electrodes 245(1988)21

Electrocatalysis of O_2 reduction to water in different acid media by iron naphthalocyanines 246(1988)119

Roughening

Modifications of palladium electrode surfaces produced by periodic potential treatments 246 (1988)165

Runge–Kutta integration

Electrochemical digital simulation by Runge–Kutta integration 240(1988)17

Ruthenium complex

A pulse polarographic measurement of the kinetics of dissociation of the $[Ru^{III}(edta)]_2$ dimer 202(1986)101

Stability and electrocatalytic activity of the oxo-bridged dimer $[(bpy)_2(H_2O)RuORu(OH_2)(bpy)_2]^{4+}$ in basic solutions 205(1986)185

Signal-to-noise enhancement using carbon fiber electrodes in the photoelectroanalytical detection of tris(2,2′-bipyridine)ruthenium(II) 208(1986)77

Valence levels of Ru(II) and Os(II) complexes studied by voltammetry and X-ray photoelectron spectroscopy 209(1986)135

Electronically conducting poly-tris(5,5′-bis[(3-acrylyl-1-propoxy)carbonyl]-2,2′-bipyridine)ruthenium-modified electrodes. Studies of bilayer films and solution redox reactions 213(1986)203

Polymer-modified electrodes. Part V. The use of hydrodynamically modulated rotating-disk electrodes in the study of the mediated oxidation of $[Fe(CN)_6]^{4-}$ at ruthenium-containing polymer-modified electrodes 218(1987)341

Redox series of complexes with a mixed coordination sphere $[Ru(bpy)_2(5,5'\text{-}COOEtbpy)]^{2+}$ 222(1987)161

Effects of electrode surface pretreatments on the electrochemistry of a macrocyclic dioxoruthenium(VI) complex 226(1987)211

Direct evidence for chemically distinct regions within Nafion films on electrodes 237(1987)191

Electrodes coated with polystyrene films containing surface-active agents. Attachment of screening capabilities for electrode reactions of electroactive ionic species 242(1988)143

Polypyrrole–clay-modified electrodes 243(1988) 367

Redox and electrocatalytic properties towards dioxygen reduction of ruthenium tetra(*ortho*-aminophenyl)porphyrin complexes with various axial ligands 246(1988)139

Linear relationships between ligand composition and reversible half-wave potentials of ruthenium(III) and ruthenium(II) complexes with two kinds of β-diketones 246(1988)225

Electropolymerized multilayer and copolymeric structures based on substituted pyrroles 246 (1988)321

In-situ surface EXAFS at chemically modified electrodes 248(1988)77

Studies of surface-modified glassy carbon electrodes obtained by electrochemical treatment. Its effect on $Ru(bpy)_3^{2+}$ adsorption and the electron-transfer rates of the Fe^{2+}/Fe^{3+} couple 248(1988)321

Effects of the solution pH on the electrochemical behaviour of $Ru(bpy)_3^{2+}$ and $Fe(CN)_6^{3-}$ ions at a clay-modified electrode 249(1988)133

Ruthenium compound

The electrochemistry of hexacyanoruthenate at carbon electrodes and the use of ruthenium compounds as mediators in the glucose/glucose oxidase system 206(1986)327

Mediators for the oxidation of glutathione and other biological thiols 245(1988)131

Ruthenium deposition

Investigation of ruthenium deposition onto a platinized platinum electrode in sulfuric acid media 230(1987)233

Ruthenium dioxide

Surface properties of $RuO_2 + IrO_2$ mixed oxide electrodes 214(1986)535

Ruthenium dioxide electrode

Single crystals as model electrocatalysts. Oxygen evolution on RuO_2 (110) 210(1986)189

Oxidation of 4,4′-dichlorobiphenyl at a ruthenium dioxide anode 213(1986)329

The oxidation of chloride ions and bromide ions on ruthenium dioxide electrodes 225(1987)159

Electrochemistry of sub-monolayer silver deposits on single crystal RuO_2 (110), (001) and (111) electrodes 236(1987)295

Oxygen evolution on Ru and RuO_2 electrodes studied using isotope labelling and on-line mass spectrometry 237(1987)251

Voltammetric characteristics of the RuO_2 film electrode in relation to the catalytic properties of RuO_2 for the photochemical production of hydrogen 247(1988)253

Ruthenium electrode

A radiotracer study of the adsorption of H_2SO_4 at ruthenium electrodes 205(1986)259

Effect of the oxygen layer at solid Ru electrodes on hydrogen oxidation in acid solution 214 (1986)547

Oxygen evolution on Ru and RuO_2 electrodes studied using isotope labelling and on-line mass spectrometry 237(1987)251

Methanol oxidation on unsupported and carbon supported Pt + Ru anodes 240(1988)133

Underpotential deposition of copper and silver on polycrystalline ruthenium electrodes 244 (1988)249

Ruthenium oxide / cyanoruthenate composite

A polynuclear mixed-valent ruthenium oxide/cyanoruthenate composite that yields thin coatings on a glassy carbon electrode with high catalytic activity toward methanol oxidation 220 (1987)295

Ruthenium sulphide

Energetics and dynamics of the interface of RuS_2 and implications for photoelectrolysis of water 201(1986)263

Ruthenium tetramethylcyclam complex

Attempts to accelerate the rates of oxidation of ruthenium and osmium tetramethylcyclam complexes at graphite and glassy carbon electrodes and within Nafion coatings 237(1987) 69

S

Salicyclic acid

Temperature dependence of the ionisation constants and evaluation of the related thermodynamic parameters for salicyclic acid and meta-hydroxybenzoic acid 214(1986)473

Salicylaldehyde thiosemicarbazone

Electrochemistry of iron(III) complexes with salicylaldehyde thiosemicarbazone and its S-methyl derivative 213(1986)85

Salicylate ion

Electrochemically controlled binding and release of salicylate, $TCNQ^{\cdot -}$ and ferrocyanide from films of oligomeric 3-methoxythiophene 247 (1988)173

Saline diffusion

From biological membrane processes to industrial membrane technologies 231(1987)121

Salmonella typhimurium

Energy-dependent K^+ uptake and H^+–K^+ exchange in *Salmonella typhimurium* 231(1987) 183

Salt extraction

Kinetics of salt extraction into the high-permittivity oil phase. Rate measurement by electrolysis at the interface of two immiscible electrolyte solutions 213(1986)323

Kinetics of salt extraction into the high-permittivity oil phase. Part II. Extraction rates of simple salts determined with the data of electrolysis at the interface of two immiscible electrolyte solutions 229(1987)265

Salting out

Salting out of hydrophobic ions at immiscible electrolyte interfaces 217(1987)261

Salt monolayer

Phase transitions of salt monolayers at the mercury/water interface. Tetraphenylphosphonium chloride 236(1987)311

Sampling time

Computer-assisted voltammetry with a multi-level random signal. Part I. Generation of input potential signal and sampling timing of the response current 235(1987)117

Sandwich electrode

A benzimidazobenzophenanthroline polymer molecular transistor fabricated using club sandwich electrodes 222(1987)193

Saponin

Influence of saponin on the electric parameters and the electrophoretic mobility of erythrocytes 231(1987)35

Sarcoplasmic reticulum

The state of water associated with the phosphoenzyme of the Ca-ATPase of sarcoplasmic reticulum. A spin probe study 231 (1987)473

Sarcosine oxidase

Mediated electron transfer of lactate oxidase and sarcosine oxidase with octacyanotungstate(IV) and octacyanomolybdate(IV) 240(1988)333

Saul'yev algorithm

On the use of the Saul'yev algorithms in the digital simulation of electrochemical processes 250(1988)457

Scanning electron microscopy

Electrochemical and SEM characterization of Ag electrodes roughened by potential sweep and potential step processes in aqueous chloride and chloride + pyridine media 217(1987)79

Scanning tunneling microscopy (STM) and scanning electron microscopy (SEM) of electrodispersed gold electrodes 240(1988)77

Scanning tunnelling microscopy

Scanning tunneling microscopy (STM) and scanning electron microscopy (SEM) of electrodispersed gold electrodes 240(1988)77

Scanning tunneling microscopy at potential controlled electrode surfaces in electrolytic environment 243(1988)225

An in-situ scanning tunneling microscopy study of Au (111) with atomic scale resolution 248 (1988)451

Scan rate

Ultramicroelectrodes: cyclic voltammetry above one million V s^{-1} 248(1988)447

Scavenger

Photoemission at a mercury electrode with the hydrogen ion as scavenger 208(1986)219

Schiff base

Electrochemical behaviour of pyridoxal-5′-phosphate Schiff base with *n*-hexylamine 212 (1986)317

Schmidt number

The influence of Schmidt number and Reynolds number on the behavior of rotating ring–disk electrodes 234(1987)55

Screening

Electrodes coated with polystyrene films containing surface-active agents. Attachment of screening capabilities for electrode reactions of electroactive ionic species 242(1988)143

Screw-dislocation-free face

Shape and propagation rate of monatomic layers upon electrocrystallization of cadmium onto a screw-dislocation-free (0001) crystal face 208 (1986)153

Seawater

Electroanalytical chemistry of copper, lead and zinc complexes of amino acids at the ionic strength of seawater (0.70 *M* $NaClO_4$). Part III 208(1986)137

An example of microbiologically influenced corrosion. The behaviour of stainless steels in natural seawater 212(1986)347

Determination of mercury in sea water by stripping voltammetry 214(1986)31

Determination of copper, cadmium and lead in seawater by cathodic stripping voltammetry of complexes with 8-hydroxyquinoline 215(1986)111

Determination of antimony in seawater by cathodic stripping voltammetry 235(1987)275

Determination of cystine and cysteine in seawater using cathodic stripping voltammetry in the presence of Cu(II) 239(1988)137

Seaweed

Non-linear ionic fluxes in an electrically exposed cell 212(1986)89

Second-order process

Derivation and experimental verification of approximate explicit equations in differential pulse polarography. Part II. Second-order processes 201(1986)237

Electroanalytical simulations. Part IX. The simulation of a second-order chemical reaction preceding a reversible electron transfer under cyclic voltammetric conditions using orthogonal collocation 250(1988)237

Selective electrode

Kinetic model of amperometric selective electrodes with immobilized bacteria 212(1986)5

Selectivity coefficient

Selectivity coefficient of hydrogen sulphate anion for liquid ion-exchange membrane electrodes based on nitrobenzene 233(1987)267

Selenium

Induction of selenium-glutathione peroxidase by stimulation of metabolic hydrogen peroxide production *in vivo* 232(1987)247

Selenophene

Electrochemical polymerization of β-substituted and β,β'-disubstituted selenophenes 238(1987) 225

Self-assembly

Self-assembled surfactant monolayers on electrode surfaces. The formation of surfactant viologen monolayers on gold and platinum 249 (1988)333

Self-association

Effect of C(5) methylation on self- and heteroassociation of cytidine in aqueous solution 212(1986)449

Self-diffusion coefficient

New possibilities for obtaining more accurate results of self-diffussion coefficients by adapting the capillary tube technique 216(1987)89

Self-doped copolymer

Self-doped conducting copolymers: a charge and mass transport study of poly[pyrrole-co[3-(pyrrol-1-yl)propanesulfonate]] 250(1988)355

Self-oscillation

The simplest possibility for the appearance of self-oscillations in pacemaker cells 231(1987)559

Semiconductor

Photoelectrochemistry of *para*-diethynylbenzene copper(I) acetylides deposited as thin films onto copper electrodes 207(1986)247

A potential- and charge-consistent model for the adsorption dependence of the semiconductor flatband potential 210(1986)197

A photoelectrochemical study of passive copper in alkaline solutions 210(1986)213

Light-induced reduction of cytochrome *c* by colloidal TiO_2 212(1986)125

Photocapacitance spectroscopy of thin film cadmium selenide electrodes 216(1987)41

Electrode surface modification through Nafion-attached transition-metal cluster chalcogenide particles 229(1987)223

Electrolyte electroreflectance. Easy and reliable flat-band potential measurements 244(1988)69

Orbital-energy-resolved partial charge transfer in chemisorption and electrochemical processes on semiconductors 250(1988)37

Semiconductor diamond

Photoelectrochemical properties of semiconductor diamond 228(1987)19

Semiconductor electrode

A particle size effect in the sensitization of TiO_2 electrodes by a CdS deposit 204(1986)225

Electrocatalysis of CO_2 reduction at surface modified metallic and semiconducting electrodes 209(1986)101

Electronic non-equilibrium charge transfer kinetics in anodic dark and photocurrents on n-III–V-semiconductor electrodes 209(1986)259

Electrolyte electroabsorption: a spectroscopic technique for thin film semiconducting electrodes 218(1987)347

Space charge capacity on semiconductor electrodes at electronic non-equilibrium 221 (1987)23

Electronic non-equilibrium charge transfer mechanisms in alternating photocurrents on semiconductor electrodes 221(1987)33

A comparison of anodic charge-transfer kinetics between dark p-type and illuminated n-type GaP/$Fe(CN)_6^{4-}$ interfaces 221(1987)187

One dimensional Onsager model for dye sensitized charge injection into semiconductors 228(1987)69

Capacity of semiconductor electrodes with multiple bulk electronic states. Part I. Model and calculations for discrete states 228(1987)135

On the accessibility of the bandgap on semiconductor interfaces by non-equilibrium Fermi energies of electrons and holes 239(1988)9

In situ modification of the energetic structure of the n-GaP/NH_3 junction in the presence of solvated electrons 246(1988)29

Cathodic electropolymerization of polythiophene on platinum and various semiconducting electrodes 246(1988)467

A study of the mechanisms of O_2 reduction at n- and p-InP in acid aqueous electrolyte 247(1988) 265

Effects of electrolytes on the photoelectrochemical reduction of carbon dioxide at illuminated p-type cadmium telluride and p-type indium phosphide electrodes in aqueous solutions 249(1988)143

Semiconductor / liquid junction

A capacitance relaxation method for studying surface states at the semiconductor–liquid junction 225(1987)79

Amorphous semiconductor–electrolyte junction. Influence of the wavelength and oxide thickness on the photocharacteristics of a-Nb_2O_5 anodic films 228(1987)119

Interfacial energetics of electrodeposited cadmium selenide in acetonitrile 239(1988)307

Semiconductor / liquid junction cell

Picosecond time-resolved measurements of fast recombination losses in the photoresponse of semiconductor/liquid junction cells 228(1987)29

Semiconductor powder

Formation of ethyl alcohol in the photocatalytic reduction of carbon dioxide by SiC and ZnSe/metal powders 225(1987)287

Semiconductor surface

An electrochemical and spectroelectrochemical analysis of the oxide/p-indium phosphide semiconductor surface using Fourier transform infrared and Raman scattering spectroscopies 233(1987)1

Semiempirical approach

A semiempirical approach to the metal/inner layer capacity in the absence of specific adsorption 239(1988)405

Sensitivity

Extension of the sensitivity limit of amalgam electrodes, in dilute aquatic media, based on the study of their oxidation process 236(1987)67

Ultramicroelectrode sensors and detectors. Considerations of the stability, sensitivity, reproducibility, and mechanism of ion transport in gas phase chromatography and in high performance liquid phase chromatography 244 (1988)81

The development of redox-modified electrodes as charge-accumulating devices for use in higher sensitivity detection systems 250(1988)417

Sensitization

A particle size effect in the sensitization of TiO_2 electrodes by a CdS deposit 204(1986)225

Sensor

Electrochemical immobilisation of enzymes. Part I. Theory 224(1987)27

Serum

Enzyme sensor system for potentiometric urea determination in serum and milk 209(1986)69

Sharp boundary model

Activation energy of electrode reactions: the non-local effects 228(1987)329

S_{hole} control

Electrocatalysis by ad-atoms. Part XVII. Electronegativity effect on oxygen donation by oxygen-adsorbing ad-atoms and steric hindrance by alkyl groups in S_{hole} control in aldehyde oxidation 201(1986)23

Electrocatalysis by ad-atoms. Part XIX. Geometrical requirement in the oxygen donation step in glyoxylic acid oxidation enhanced by ad-atoms 202(1986)137

Electrocatalysis by ad-atoms. Part XXII. S_{hole} control by ad-atoms on HCOOH oxidation 249 (1988)253

Short-lived intermediate

Homogeneous redox catalysis of electrochemical reactions. Electron transfers followed by a very fast chemical step 205(1986)43

Sickle cell anaemia

Lipid hydroperoxides in sickle cell membranes 232(1987)257

Sieve plate cell

The electrochemical production of propylene oxide 214(1986)283

Signal-to-noise enhancement

Signal-to-noise enhancement using carbon fiber electrodes in the photoelectroanalytical detection of tris(2,2′-bipyridine)ruthenium(II) 208(1986)77

Silane

Attachment of riboflavin derivatives to electrode surfaces 244(1988)287

Silicon

Surface methoxylation as the key factor for the good performance of n-Si/methanol photoelectrochemical cells 233(1987)37

The potential dependence of silicon anisotropic etching in KOH at 60 °C 238(1987)103

Silicon carbide

Photocatalytic reduction of carbon dioxide with metal-loaded SiC powders 247(1988)333

Silicon electrode

Adsorption and reduction of formic acid on p-type silicon electrodes 215(1986)307

Taking advantage of liquid ammonia to control the surface modification of silicon electrodes 216(1987)101

Photoelectrochemical characteristics of metal-modified epitaxial n-Si anodes. Part I. NiO(OH)-coated n^+/p-Si and n^+/n-Si electrodes for catalytic oxygen evolution 227 (1987)213

Hydrogen photoevolution at p-type silicon electrodes coated with discontinuous metal layers 228(1987)97

The photovoltaic effect of an insulating polymer-hybridized p-Si solar cell 241(1988)379

Electrocatalytic effects of redox polymer films on the reduction of O_2 on silicon semiconductors 245(1988)191

Silicone membrane

Silicone membrane-covered dissolved-oxygen electrode insensitive to flow and medium properties 206(1986)321

Silicon phthalocyanine

Spectroscopic and electrochemical studies of transition-metal tetrasulfonated phthalocyanines.

Part VIII. Spectroelectrochemical studies of stacked-ring silicon phthalocyanines 229(1987) 285

Silicotungstic heteropolyanion

New aspects of the electrochemistry of heteropolyacids. Part II. Coupled electron and proton transfers in the reduction of silicotungstic species 217(1987)287

Heterogeneous one-electron exchange of silicotungstic heteropolyanion in dimethylformamide 219(1987)355

New aspects of the electrochemistry of heteropolyacids. Part IV. Acidity dependent cyclic voltammetric behaviour of phosphotungstic and silicotungstic heteropolyanions in water and *N,N*-dimethylformamide 227(1987)77

Activation of electrode surfaces. Semiquantitative characterization of electrode surfaces modified with heteropolyanions 230(1987)85

New aspects of the electrochemistry of heteropolyacids. Part III. Further proof of minimal solvation and ion pairing of silicotungstic and phosphotungstic species in acidic concentrated aqueous solutions of alkali-metal salts 230(1987)267

Siloxane polymer

Chemical modification of Pt electrodes by tetra(4-pyridyl)porphyrin through siloxane polymer formation 243(1988)193

Silver

Underpotential deposition of silver on polycrystalline platinum electrodes. Controlling phenomena derived from potentiostatic transients 213(1986)301

The temperature coefficient of the potential of zero charge of the (110) face of silver 218(1987) 355

A modification of the last step of surface preparation for gold and silver single crystal faces 220(1987)155

Inner-layer capacity at the pzc for perfect (111), (100) and (110) faces of silver. Surface area and capacitance contributions of superficial defects for real electrodes 224(1987)285

Structure and composition of the Ag (111) surface as a function of electrode potential in aqueous halide solutions 229(1987)1

Underpotential deposition of copper and silver on polycrystalline ruthenium electrodes 244 (1988)249

Underpotential deposition of silver on polyfaceted and electrochemically faceted Pt (100) electrodes. Application of the combined adsorption–desorption–nucleation and growth mechanism 244(1988)261

Silver ad-atom

Effect of the nature of platinum group metals on the formation and properties of adatom silver coatings 224(1987)225

Silver cell

Studies on the liquid junction potential corrections of electrolytes at aqueous + mixed solvent boundaries 237(1987)149

Silver complex

Nucleation rings of $Ag_7O_8NO_3$ around dissolving silver crystals 241(1988)353

Silver crystal

Nucleation rings of $Ag_7O_8NO_3$ around dissolving silver crystals 241(1988)353

Silver electrode

Reduction of nitrobenzene in aqueous alkaline solution at an Ag electrode. Observation by SERS, RRDE and UV absorption 202(1986)231

Surface-enhanced Raman scattering of nicotinamide adenine dinucleotide (NAD^+) adsorbed on silver and gold electrodes 202 (1986)315

Adsorption on well-defined solid surfaces. Chloride adsorption on a (110) face of silver 204(1986)291

Interfacial spectroelectrochemical Raman study of the silver/1,10-phenanthroline system in chloride medium 207(1986)127

Amperometric detection of nitrates using a flow-through membrane detector 214(1986)125

Surface-enhanced Raman spectroscopy of *p*-dimethylaminobenzonitrile: Field dependence and molecular orientation 214(1986)675

Polarization modulation infrared spectroscopic measurements of thiocyanate and cyanide at the silver electrode/aqueous electrolyte interface by means of Kretschmann's ATR prism configuration 215(1986)93

Comparison of electrochemical redox processes on silver electrode surfaces between *meso*-tetrakis(2-*N*-methylpyridyl)porphine and *meso*-tetrakis(4-*N*-methylpyridyl)porphine. Study by surface-enhanced resonance Raman scattering spectroscopy 215(1986)209

A UPS, XPS and work function study of emersed silver, platinum and gold electrodes 215(1986)331

Mixed pseudo-potential approach to the on-top chemisorption of atomic hydrogen on the (100) silver surface 216(1987)29

Observation of morphological relaxation of copper and silver electrodes in solution using a quartz microbalance 216(1987)127

The single crystal metal–non-aqueous solvent interface. Underpotential deposition of Cd on Ag (111) in propylene carbonate 216(1987)261

Electrochemical and SEM characterization of Ag electrodes roughened by potential sweep and potential step processes in aqueous chloride and chloride + pyridine media 217(1987)79

Surface enhanced Raman scattering of pyridine on Ag electrodes formed with controlled-rate oxidation–reduction cycles 217(1987)93

The effects of the underpotential and overpotential deposition of lead and thallium on silver on the Raman spectra of adsorbates 217 (1987)385

Raman spectroscopy of adsorbates on thin film electrodes deposited on silver substrates 217 (1987)397

The induction of SERS on smooth Ag by the deposition of Ni and Co 217(1987)411

Study of the atomic stability of Ag (111) and Ag (100) electrodes in contact with NaF solutions 218(1987)319

SERS investigation of interfacial Pb(II) species in weakly acidic aqueous halide media 219 (1987)291

Surface-enhanced Raman scattering (SERS) on silver electrodes as a technical tool in the study of the electrochemical reduction of cyanopyridines and in quantitative analysis 220 (1987)339

Cyclic voltammetry and quartz microbalance electrogravimetry of IgG and anti-IgG reactions on silver 223(1987)67

Complexation and adsorption of thiourea in sulphate medium on electrochemically roughened silver electrodes 227(1987)159

Surface enhanced Raman scattering and local photoemission currents on the freshly prepared surface of a silver electrode 228(1987)197

Aspects of the adsorption of chloride on silver revealed through surface enhanced Raman scattering 228(1987)229

Ellipsometric study of the Ag (single crystal)/NaF interface with a view to obtaining the electron distribution profile 229(1987)19

The interaction of Br with Ag (110): comparison of electrochemical and gas-phase adsorption measurements 229(1987)87

Spectroscopic and electrochemical studies of transition-metal tetrasulfonated phthalocyanines. Part VIII. Spectroelectrochemical studies of stacked-ring silicon phthalocyanines 229(1987) 285

Surface-enhanced Raman scattering at gold electrodes: dependence on electrochemical pretreatment conditions and comparisons with silver 233(1987)211

Effect of surface crystallographic orientation upon specific adsorption of azide at silver electrodes as examined by potential-difference infrared spectroscopy 235(1987)327

Statistical analyses of the two-dimensional point pattern of silver monolayer deposition on a single crystal silver electrode 244(1988)39

The temperature dependence of the double layer parameters of the (111) face of silver 244(1988) 133

In-situ X-ray diffraction investigations of the UPD of Tl and Pb on Ag and Au electrodes 247(1988)297

Silver film

Electrochemistry of sub-monolayer silver deposits on single crystal RuO_2 (110), (001) and (111) electrodes 236(1987)295

Silver ion

Impedance studies of the cell Ag/Ag beta" alumina/Ag 228(1987)417

Preparation and application of conducting polymers containing chemically active counterions for analytical purposes 247(1988)145

Diffusion coefficients of silver ions in $CuSO_4$ + H_2SO_4 solutions 249(1988)123

Silver nitrate

A method of obtaining a small number of nucleation sites and growing large crystal grains 239(1988)107

Silver overlayer

Competitive electroformation of silver and oxygen overlayers on polycrystalline rhodium in acid 246(1988)441

Silver oxide / silver electrode

Raman spectroscopy investigation of the silver oxide/silver electrode. Influence of experimental conditions 227(1987)21

Silver / silver chloride electrode

The real standard potential on the aqueous hydrogen scale of the silver/silver chloride electrode in methanol: the surface potential of methanol 243(1988)353

Silver–water interaction

Silver–water interactions. Part I. Model of the inner layer at the metal/water interface 230 (1987)189

Simulation

Electrochemical kinetics at microelectrodes. Part I. Quasi-reversible electron transfer at cylinders 206(1986)23

The structure of water at a neutral interface 206(1986)131

Use of potential-step formulae to reduce computational time in the simulation of linear voltammetry by orthogonal collocation 208 (1986)165

Structural simulation of electrochemical impedances 209(1986)11

A potential- and charge-consistent model for the adsorption dependence of the semiconductor flatband potential 210(1986)197

Volume and ionic composition changes in erythrocytes after electric breakdown. Simulation and experiment 212(1986)455

Hopscotch-finite-difference simulation of the rotating ring–disc electrode 215(1986)11

Electrochemical kinetics at microelectrodes. Part II. Cyclic voltammetry at band electrodes 215 (1986)49

Calculation of differential pulse polarographic curves for the reduction of complexes 216(1987)1

Effects of resistance and capacitance on the chronoamperometry of polymer-coated electrodes as modeled by a finite elements digital simulation 216(1987)11

Electroanalytical investigations. Part VI. The simulation of fast chemical equilibrium reactions in cyclic voltammetric reaction–diffusion models with spline collocation 217(1987)225

A simulation analysis of errors in the measurement of standard electrochemical rate constants from phase-selective impedance data 222(1987)21

Propagational inadequacy of the Hopscotch finite difference algorithm: the enhancement of performance when used with an exponentially expanding grid for simulation of electrochemical diffusion problems 222(1987)101

Digital simulation of the channel flow-through electrochemical cell. A theoretical study of the determination of solute adsorption on modified electrodes 222(1987)117

Inclusion complexes of isomeric chloronitrobenzenes with α- and β-cyclodextrins studied by polarography. Analysis of the possibilities of the method 226(1987)137

Derivation of an approximate equation for chronoamperometric curves at microband electrodes and its experimental verification 230 (1987)61

Comparison of the ionic adsorption theories for the electrode/solution interface by computer simulation 234(1987)31

Non-stationary processes at polymer coated rotating disk electrodes. Part I. Model and simulation 235(1987)41

On the non-linear response to charging of a relaxing capacitor 237(1987)1

Electroanalytical investigations. Part VIII. The use of an expanding simulation space in the simulation of electrochemical reaction–diffusion models with orthogonal collocation 241(1988)17

A computer simulation of nucleation 241(1988)79

Simulation of cyclic voltammetry for the linked mechanism of the hydrogen electrode reaction in molten carbonates 249(1988)155

Electroanalytical simulations. Part IX. The simulation of a second-order chemical reaction preceding a reversible electron transfer under cyclic voltammetric conditions using orthogonal collocation 250(1988)237

On the use of the Saul'yev algorithms in the digital simulation of electrochemical processes 250(1988)457

Singh and Dutt approximation

Mass transport to channel and tubular electrodes: the "Singh and Dutt approximation" 238(1987)43

Single crystal

Surface states on cadmium sulfide and the influence of etching 205(1986)291

Electroreflectance spectroscopy of gold single crystals. Influence of the solvent 207(1986)235

Quantum chemical calculations on the electrical double layer at the metal/vacuum interface. Part II. Properties of single crystal surfaces 208 (1986)257

Single crystals as model electrocatalysts. Oxygen evolution on RuO_2 (110) 210(1986)189

Single-crystal electrode

Adsorption on well-defined solid surfaces. Chloride adsorption on a (110) face of silver 204(1986)291

Structural effects in electrocatalysis: oxidation of formic acid and hydrogen adsorption on platinum single-crystal stepped surfaces 204(1986)329

Electrochemical adsorption behaviour of platinum stepped surfaces in sulphuric acid solutions 205(1986)267

Hydrogen electrosorption on single-crystal platinum stepped surfaces and the effects of oxide formation 205(1986)335

Shape and propagation rate of monatomic layers upon electrocrystallization of cadmium onto a screw-dislocation-free (0001) crystal face 208 (1986)153

Metal substrate effects upon the kinetics of simple electrochemical reactions. The reduction of cobalt(III) ammines at single-crystal gold faces 209(1986)109

Note on the behaviour of the (111) gold face in electrolytic solutions 210(1986)303

Surface EXAFS of an electrochemical interface. Iodine on platinum (111) 210(1986)311

The effects of anions on hydrogen electrosorption on platinum single-crystal electrodes 214(1986) 555

The single crystal metal–non-aqueous solvent interface. Underpotential deposition of Cd on Ag (111) in propylene carbonate 216(1987)261

Elementary steps of electrochemical oxidation of single-crystal planes of Au. Part II. A chemical and structural basis of oxidation of the (111) plane 228(1987)429

The in-situ preparation of well-defined, single crystal electrodes 230(1987)221

The double layer of single crystal gold electrodes in liquid and solid $HClO_4 \cdot 5.5\ H_2O$ 230(1987)281

Pulsed linear sweep voltammetry with pulses of constant level in a potential scale, a polarization demanding condition in the study of platinum single crystal electrodes 236(1987)87

Adsorption of pyridine at the Au (100)–solution interface 238(1987)333

Single crystal radio-electrochemistry: adsorption of acetic acid on well-defined Pt (111) surfaces 239(1988)413

Oxygen reduction on the Au (311) electrode surface in alkaline electrolyte 240(1988)239

Adsorption of dicarboxylic ions on the (210) gold face from solutions at constant cationic strength 240(1988)291

On the pH dependence of the reductive desorption of iodine at polycrystalline and single-crystal platinum electrodes in aqueous solvents 240(1988)309

Electrosorption of hydrogen and sulphuric acid anions on single-crystal platinum stepped surfaces. Part I. The [110] zone 241(1988)309

Electrochemical stabilization of illuminated single crystal WSe_2 anodes 242(1988)191

Statistical analyses of the two-dimensional point pattern of silver monolayer deposition on a single crystal silver electrode 244(1988)39

Electrolyte electroreflectance. Easy and reliable flat-band potential measurements 244(1988)69

Single crystal electrochemistry of rhodium. Anion effects and order/disorder transitions of clean and silver coated Rh (111) surfaces 244(1988)147

On the origin of the "unusual splitting" of voltammograms of the Pt (111) electrode 244 (1988)347

Adsorption of dicarboxylic ions on the (311) face of gold from solutions at constant cationic strength 248(1988)209

An in-situ scanning tunneling microscopy study of Au (111) with atomic scale resolution 248 (1988)451

Oxide formation on gold single crystal stepped surfaces 249(1988)291

Single ion activity

Application of the Gouy–Chapman–Stern–Grahame model of the electrical double layer to the determination of single ion activities of KF aqueous solutions 226(1987)341

Singlet oxygen

Singlet oxygen in biological systems 232(1987)91

Site density

Donnan exclusion failure in low anion site density membranes containing valinomycin 223 (1987)51

Site–site interactions

Electrochemistry of tetracyanoquinodimethane polymer-modified electrodes. Effect of polymer film composition on site–site interactions 217 (1987)313

Size quantization

Size quantization in small colloidal CdS particles studied with stopped flow spectrometry 228 (1987)55

Small disc electrode

Square wave voltammetry at small disk electrodes. Theory and experiment 202(1986)23

Sobrerol

The interaction of nesosteine and *trans*-sobrerol with electrogenerated superoxide ion in anhydrous and wet acetonitrile 231(1987)339

Sodium atom

Evidence for carbon tetrachloride-induced lipid peroxidation *in vivo* by ^{23}Na relaxation times t_1 232(1987)179

Sodium channel

Molecular mechanisms of gated ion channels 212(1986)341

Sodium dodecylsulphate

Electrochemical oxidation of the tris-1,10-phenanthroline iron(II) cation in the presence of sodium dodecylsulfate 219(1987)125

Adsorption of a mixture of sodium dodecyl sulphate and dodecyl alcohol on a mercury electrode and its effect on the electrochemical processes of cadmium(II) in sodium chloride solution 227(1987)129

Sodium effect

A sodium effect on the two-dimensional condensation of 6-methyl-uracil 236(1987)309

Sodium fluoride

Study of the atomic stability of Ag (111) and Ag (100) electrodes in contact with NaF solutions 218(1987)319

Ellipsometric study of the Ag (single crystal)/NaF interface with a view to obtaining the electron distribution profile 229(1987)19

Sodium formate

Electrochemical oxidation of HCOONa on Pt in acidic solutions 220(1987)125

Sodium hydroxide

Percolation conductivity in a perfluorosulphonic membrane with sorbed NaOH 234(1987)341

Electrochemical behaviour of tungsten in alkaline media. Part I. NaOH solutions 243(1988)379

Photoelectrochemical study of the effect of inhibitor on the passivation of copper in sodium hydroxide aqueous electrolyte 244(1988)333

Sodium ion

The sodium responsive tungsten bronze electrode. An electrode for sodium ion analysis of DNA solutions 220(1987)225

The simplest possibility for the appearance of self-oscillations in pacemaker cells 231(1987)559

Exchange of K^+ and Na^+ between water and PVC in the presence of different ionophores 248(1988)131

Sodium perchlorate

Sodium perchlorate and chloride ion pairs 214 (1986)519

Sodium succinate

Activity coefficients for aqueous Na_2Succ solutions from emf measurements 230(1987)69

Sodium sulphate

Composition and diffusion properties of γ-FeOOH deposited in sulphate solutions 247 (1988)185

Sodium tetraphenylborate

Experimental study of Volta potentials in water/nitrobenzene systems with anion adsorption 204(1986)273

The role of PVC in ion selective electrode membranes 237(1987)181

Soft-tissue injury

Low-level pulsed radiofrequency fields and the treatment of soft-tissue injuries 212(1986)531

Software

Computer automation of polarographic analyzer PAR 384B and development of specific implementation software 250(1988)293

Solar cell

Stabilization of the polycarbazole protected n-InSe photoanode for photoelectrochemical solar cells 248(1988)233

Solar energy

Light-driven hydrogen peroxide production as a way to solar energy conversion 232(1987)71

Sol–gel method

Formation of H_2O_2 at the illuminated TiO_2 film electrode prepared by the sol–gel method and its chemical states 209(1986)399

Solid electrolyte

Urania–scandia + Pt composite electrodes for use in solid electrolyte cells 202(1986)93

Impedance spectroscopy and its use in analyzing the steady-state ac response of solid and liquid electrolytes 223(1987)25

Steady state current flow in solid binary electrolyte cells 225(1987)1

Impedance studies of the cell Ag/Ag beta" alumina/Ag 228(1987)417

Solid/electrolyte interface

Methodology for ion neutralization at solid/electrolyte interfaces 204(1986)173

Ionic solvation at the solid/electrolyte interface: a statistical-mechanical approach 220(1987)213

Solid polymer electrolyte

Reduction of carbon dioxide on partially-immersed Au plate electrode and Au–SPE electrode 238(1987)247

Application of a polymer solid electrolyte for the vapor-phase electrocatalysis of dioxygen reduction by some cobalt porphyrins 238(1987) 259

Solid-state junction

On the accessibility of the bandgap on semiconductor interfaces by non-equilibrium Fermi energies of electrons and holes 239(1988)9

Solid-state voltammetry

Solid state voltammetry of electroactive solutes in polyethylene oxide polymer films on microelectrodes 208(1986)185

Solvated electron

In situ modification of the energetic structure of the n-GaP/NH_3 junction in the presence of solvated electrons 246(1988)29

Solvation

New aspects of the electrochemistry of heteropolyacids. Part III. Further proof of minimal solvation and ion pairing of silicotungstic and phosphotungstic species in acidic concentrated aqueous solutions of alkali-metal salts 230(1987)267

Ion transfer across the immiscible water–*o*-nitrotoluene interface 237(1987)113

Solvation potential

The solvation potential at the interface between water and methanol + water mixtures 215(1986) 63

Solvent

Dependence of the true rate constant of homogeneous electron transfer on solvent relaxation time and viscosity 209(1986)223

Solvent and ion pairing effects on the reaction entropy for the electroreduction of aromatic molecules 219(1987)209

Experimental studies of the liquid junction potential between electrolyte solutions in different solvents. Part VI. Stability of the liquid junction potential 225(1987)255

Solvent effects in a non-primitive electrolyte model 247(1988)73

Solvent dynamics

Solvent dynamics and vibrational effects in electron transfer reactions 204(1986)59

Solvent effect

Solvent effects on heterogeneous electron transfer rates for organic redox couples: tert-nitrobutane reduction at mercury 233(1987)161

Solvent effect on electrochemical polymerization of aromatic compounds 242(1988)203

Solvent–electrolyte interaction

New aspects of the electrochemistry of heteropolyacids. Reduction currents as a probe of solvent–electrolyte interactions 208(1986)343

Solvent monolayer

Some general statistical-mechanical considerations on the entropy of a solvent monolayer or multilayer against a charged wall 250(1988)23

Solvent multilayer

Some general statistical-mechanical considerations on the entropy of a solvent monolayer or multilayer against a charged wall 250(1988)23

Solvent polarization

A unified model of the adiabatic reactions of electron transfer at metal electrodes 241(1988)45

Solvent reorganization

Kinetic behaviour of electrochemical proton discharge in relation to the proton source and its environment 204(1986)111

Solvent structure

Solvent structure at the mercury/solution interface in dimethylsulphoxide 226(1987)283

Sorption

Sorption from the gaseous phase in stripping voltammetry of halogens 224(1987)303

Soybean lecithin

Electrical properties of a purified complex of α-latrotoxin and its receptor incorporated into planar lipid bilayers 231(1987)361

Space charge capacity

Space charge capacity on semiconductor electrodes at electronic non-equilibrium 221 (1987)23

Spatial dispersion

Activation energy of electrode reactions: the non-local effects 228(1987)329

Spatial pattern

Considerations of the spatial pattern of the 2D growth centres formed via time-dependent nucleation and growth mechanisms 209(1986)35

Speciation

Trace metal speciation by ASV. Part VII. Interaction of zinc with Cl^-, NO_3^-, I^-, SO_4^{2-} and OH^- 226(1987)253

Amalgam voltammetric approach to heavy metal speciation in natural waters. Part I. Theoretical aspects and methodology 246(1988)15

Anodic stripping voltammetry at ultramicroelectrodes for metal speciation studies in aqueous solutions of low ionic strength 246 (1988)297

Specific adsorption

A semiempirical approach to the metal/inner layer capacity in the absence of specific adsorption 239(1988)405

Spectroelectrochemistry

Spectroelectrochemistry of cobalt "capped" porphyrins 202(1986)111

Interfacial spectroelectrochemical Raman study of the silver/1,10-phenanthroline system in chloride medium 207(1986)127

Spectro-electrochemistry of cobalt and iron tetrasulphonated phthalocyanines 213(1986)217

Behaviour of some poly(pyrrole–anthraquinone) films in DMSO electrolytes 219(1987)165

Spectroelectrochemical study of polyaniline: the construction of a pH–potential phase diagram 219(1987)335

Spectroelectrochemical determination of trace concentrations by diffusion layer imaging 220 (1987)41

Spectroelectrochemical study of polyaniline versus potential in the equilibrium state 220 (1987)67

Spectroelectrochemical study of the corrosion of a copper electrode in deaerated 1.0 *M* HCl solutions containing Fe(III). Effect of the corrosion inhibitor benzotriazole 220(1987)259

Thin-layer spectroelectrochemical investigations on the electrode mechanism of murexide complex with dysprosium 221(1987)143

Long optical path length thin-layer spectroelectrochemistry. Quantitation and potential dependence of electroinactive species adsorbed on platinum 222(1987)321

Electrochemistry and spectroelectrochemistry of cytochrome *c* at a platinum electrode 226(1987) 199

Spectroscopic and electrochemical studies of transition-metal tetrasulfonated phthalocyanines. Part VIII. Spectroelectrochemical studies of stacked-ring silicon phthalocyanines 229(1987) 285

Spectroelectrochemical behaviour of water bounded Chl *a* in the presence of various acceptors 231(1987)17

A spectroelectrochemical study of carboxymethylated cytochrome-*c* 231(1987)27

An electrochemical and spectroelectrochemical analysis of the oxide/p-indium phosphide semiconductor surface using Fourier transform infrared and Raman scattering spectroscopies 233(1987)1

An infrared spectroelectrochemical investigation of the ion pairing reactions of the anions and dianions of TCNE and TCNQ 233(1987)223

"In situ" spectroelectrochemical studies of *N,N'*-dibenzyl and *N,N'*-diheptyl viologen radicals adsorbed on metallic (Pt, Au) electrodes 234(1987)329

Spectroelectrochemical evidence for an intermediate in the electropolymerization of aniline 236(1987)189

Characterization and spectroelectrochemical studies of soluble polymerized 3-methoxythiophene 236(1987)239

Direct evidence for chemically distinct regions within Nafion films on electrodes 237(1987)191

The effects of temperature and electrolyte at acidic and alkaline pH on the electron transfer reactions of cytochrome *c* at In_2O_3 electrodes 239(1988)291

A spectroelectrochemical study of the electrodeposition of polythiophene films 243 (1988)403

Isoporphyrin formation upon electrochemical oxidation of zinc tetrakis(4-sulfonatophenyl)porphine in aqueous solution 246(1988) 363

Electrochemical and spectroscopic characterization of a gold plated reticulated vitreous carbon thin-layer electrode 248(1988)341

The electroreduction of oxygen on thin films of platinum phthalocyanine in alkaline solutions. Part II. Spectroelectrochemical data and mechanism 249(1988)167

Spectrophotometry

An electrochemical investigation of the redox properties of lumiflavin in acidic media 217 (1987)65

Chemical and electrochemical equilibria and kinetics in aqueous Cr(III)/Cr(II) chloride solutions 244(1988)179

Spectroscopy

A UPS, XPS and work function study of emersed silver, platinum and gold electrodes 215(1986)331

Reduction and reoxidation of metal-free phthalocyanine electrodes in non-aqueous media. Electrochemical behavior and spectroscopic analysis 221(1987)105

Electrochemical and spectroscopic methods of characterizing lead corrosion films 222(1987)347

Formation of a higher palladium oxide in the oxygen evolution potential range 238(1987)115

Sperm whale

A study of the electron transfer and oxygen binding reactions of myoglobin 237(1987)81

Spherical-cap nuclei

Formulation of current–time transients due to nucleation and coalescence of spherical-cap growth forms 209(1986)1

Spherical convolution

Concentration of a solution-soluble electroactive species at the surface of a spherical electrode following a potential step 218(1987)29

Spherical electrode

Calculation of reversible cyclic voltammograms at spherical electrodes 206(1986)1

Concentration of a solution-soluble electroactive species at the surface of a spherical electrode following a potential step 218(1987)29

Amalgam concentration at the surface of a spherical mercury electrode following a potential step 218(1987)41

A formalism for performing chronocoulometry at a stationary planar or spherical electrode. Part I. Theoretical treatment with Langmuirian adsorption 224(1987)1

Currents in thin layer electrochemical cells with spherical and conical electrodes 238(1987)9

Sphericity

Effect of sphericity on the voltammetric (polarographic) log plot for reversible amalgam formation 218(1987)1

Spinach

Interaction of cationic drugs with lipids of the spinach thylakoid membrane 211(1986)497

Spin probe

A spin probe study of the water associated with a steady-state level of phosphoenzyme of the Ca-ATPase 231(1987)457

The state of water associated with the phosphoenzyme of the Ca-ATPase of sarcoplasmic reticulum. A spin probe study 231 (1987)473

Spin trap

One-electron cleavage of sulphones in the presence of nitrones as spin traps 238(1987)393

Redox catalysis allied with spin trapping. An efficient way for characterization of free radicals formed at very negative potentials 246(1988)457

Spline collocation

Electroanalytical investigations. Part VI. The simulation of fast chemical equilibrium reactions in cyclic voltammetric reaction–diffusion models with spline collocation 217(1987)225

***sp* metal**

The double-layer capacity of *sp* metals 205 (1986)323

Square-wave amperometry

Square-wave amperometry with *iR*-drop compensation 226(1987)147

Improved electronic equipment for square-wave amperometry 244(1988)91

Square-wave polarography

Square-wave polarography of bismuth 214 (1986)103

Square-wave voltammetry

Square wave voltammetry at small disk electrodes. Theory and experiment 202(1986)23

Reversible square-wave voltammograms. Independence of electrode geometry 207(1986)25

Theory of multiple square wave voltammetries 213(1986)1

Theoretical considerations on square wave and differential pulse voltammetry applied in anodic stripping with use of mercury film electrodes 213(1986)177

Square wave voltammetry — a rapid and reliable determination method of Zn, Cd, Pb, Cu, Ni and Co in biological and environmental samples 214 (1986)51

Square-wave voltammetry of berberine 219 (1987)281

Square-wave voltammetric peak current enhancements by adsorption and reversibility of the redox reaction 226(1987)239

Square wave voltammetry in a thin-layer cell 240(1988)45

Square-wave voltammetry of an adsorbed reactant 248(1988)239

Stability constant

Determination of stability constants of some cadmium complexes by polarographic techniques in the presence of electrode adsorption 213 (1986)235

Determination of stability constants from polarographic anodic signals for metal complexes with some S-containing ligands 241(1988)113

On the influence of adsorption of electroactive species on the polarographic determination of stability constants 246(1988)271

Computer automation of polarographic analyzer PAR 384B and development of specific implementation software 250(1988)293

Stacked ring

Spectroscopic and electrochemical studies of transition-metal tetrasulfonated phthalocyanines. Part VIII. Spectroelectrochemical studies of stacked-ring silicon phthalocyanines 229(1987) 285

Stainless steel

An example of microbiologically influenced corrosion. The behaviour of stainless steels in natural seawater 212(1986)347

Reduction and reoxidation of metal-free phthalocyanine electrodes in non-aqueous media. Electrochemical behavior and spectroscopic analysis 221(1987)105

Evaluation of pit volume by measurement of corrosion potential fluctuations for type 304 stainless steel 241(1988)385

Electrochemical studies of magnesium ions in magnesium chloride containing chloride melt at 710 ± 10 °C 249(1988)191

Staircase potential

Reversible square-wave voltammograms. Independence of electrode geometry 207(1986)25

Staircase voltammetry

Comparison of linear sweep and staircase voltammetries using Walsh series 214(1986)141

General equivalence of linear scan and staircase voltammetry 222(1987)69

Examination of staircase, normal pulse and differential pulse voltammetry at inlaid ultramicroelectrodes using a computerized multi-time-domain measurement method 241 (1988)1

Staircase waveform

Theory of multiple square wave voltammetries 213(1986)1

Standard electrode potential

Behaviour of some copper(II) salts in propylene carbonate. Standard electrode potential of the Cu^{2+}/Cu system at 25 °C 245(1988)123

Standard hydrogen electrode

Calibration of the Kelvin vibrator for measurements of electronic work functions in a humid atmosphere 243(1988)337

Standard potential

First- and second-order chemical–electrochemical mechanisms. Extraction of standard potential, equilibrium and rate constants from linear sweep voltammetric curves 208(1986)197

The real standard potential on the aqueous hydrogen scale of the silver/silver chloride electrode in methanol: the surface potential of methanol 243(1988)353

Standard state

Standard states and the Frumkin adsorption isotherm for substances at electrode interphases 244(1988)53

Static mercury electrode

Non-conventional normal pulse polarographic techniques with a static mercury electrode for applications at very low reactant concentrations 246(1988)283

Stationary electrode

Theoretical study of the chronopotentiometric response with programmed current of electrode processes with regeneration mechanisms 241 (1988)33

Stationary planar electrode

Reduction of complexes in unbuffered solutions. A unified treatment of the reduction of complexes at a stationary planar electrode or at an expanding mercury electrode 208(1986)57

Adsorption in double potential step chronocoulometry 241(1988)89

Potentiostatic response when reactant and product are adsorbed at an electrode expanding with any power law or at a DME (expanding sphere electrode model) 247(1988)99

Statistical analysis

Statistical analyses of the two-dimensional point pattern of silver monolayer deposition on a single crystal silver electrode 244(1988)39

Statistical mechanics

Ionic solvation at the solid/electrolyte interface: a statistical-mechanical approach 220(1987)213

Some general statistical-mechanical considerations on the entropy of a solvent monolayer or multilayer against a charged wall 250(1988)23

Statistical theory

Transient aqueous pores in bilayer membranes: a statistical theory 211(1986)211

Steel

Application of an electroanalytical method to metal phase analysis 242(1988)63

Inhibition of the acid corrosion of steel by 4-amino-3-hydrazino-5-thio-1,2,4-triazoles 246 (1988)433

Step analysis

Frequency analysis of electrochemical step responses. Complex and operational impedances 205(1986)59

Step current method

Compensation for ohmic drop in the measurement of the potential difference at a liquid/liquid interface by the step current method 243(1988)81

Step experiment

Simplifications in the theory of step experiments at microelectrodes 235(1987)97

Stepped surface

Oxide formation on gold single crystal stepped surfaces 249(1988)291

Stochastic approach

Stochastic approach to the ion transfer kinetics across the interface between two immiscible electrolyte solutions. Comparison with the experimental data 204(1986)257

Stoichiometry

Stoichiometry of a tetraalkylammonium "amalgam" 205(1985)319

The effect of irreversible changes in the stoichiometry of oxygen reduction on the signal of membrane-covered oxygen probes 209(1986)19

Tetraalkylammonium–lead: electrogeneration and stoichiometry 247(1988)345

Stopped flow spectrometry

Size quantization in small colloidal CdS particles studied with stopped flow spectrometry 228 (1987)55

Stratified electrode

Recent improvements in the study of the electrochemical interface by surface plasmon excitation 204(1986)229

Study of the platinum/electrolyte interface using surface plasmon excitation at stratified electrodes. Part I. Preparation and characterization of the electrodes 228(1987)251

Study of the platinum/electrolyte interface using surface plasmon excitation at stratified electrodes. Part II. Optical behaviour of Pt/H_2SO_4 and $Pt/H_2SO_4 + Cu^{2+}$ systems 246 (1988)43

Streaming method

Application of a modified version of the streaming method for the determination of the pzc of liquid gallium 215(1986)83

Streaming method study of interfaces between immiscible electrolyte solutions 235(1987)287

Streptococcus lactis

Mediating effect of ferric chelate compounds in microbial fuel cells with *Lactobacillus plantarum*, *Streptococcus lactis*, and *Erwinia dissolvens* 231 (1987)217

Streptococcus pneumoniae

Is DNA transport driven by the proton electrochemical potential difference in the naturally transformable bacteria, *Streptococcus pneumoniae*? 231(1987)269

Stripping chronopotentiometry

Quantitative analytical assay of small amounts of technetium by stripping chronopotentiometry at a glassy carbon electrode 241(1988)125

Stripping voltammetry

Stripping voltammetry with adsorptive accumulation for trace measurements of titanium 208(1986)383

Determination of mercury in sea water by stripping voltammetry 214(1986)31

Sorption from the gaseous phase in stripping voltammetry of halogens 224(1987)303

Adsorptive stripping voltammetric behaviour of folic acid 225(1987)241

Anodic stripping voltammetry at ultramicroelectrodes for metal speciation studies in aqueous solutions of low ionic strength 246 (1988)297

Strong acid

Cyclic potential sweep electropolymerization of aniline. The role of anions in the polymerization mechanism 239(1988)387

Electrochemical reduction of isonicotinic amide in a strong acid medium 250(1988)399

Strontium ion

Interaction of calmodulin antagonists with yeast. Comparison with the effect of miconazole, dio-9 and ethidium on Sr^{2+} uptake, K^+ efflux and plasmamembrane ATPase activity 212(1986)519

Strontium titanium oxide

Where is the actual site for hydrogen evolution? Isotopic analysis for NiO-deposited $SrTiO_3$ photocatalyst 213(1986)319

Structural effect

Long-range structural effects in the anomalous voltammetry on ultra-high vacuum prepared Pt (111) 250(1988)301

Structural probe

Electrochemical behaviour of biological macromolecules 211(1986)275

Submicrodisc electrode

Current distribution at a submicrodisc electrode 227(1987)271

Submicroelectrode

Analytical application of submicroelectrodes in solutions containing little or no supporting electrolyte 213(1986)189

Submitochondrial particle

Azide binding to cytochrome *c* oxidase. Effects on the oxidation–reduction and spectral properties of cytochromes *a* and a_3 231(1987) 369

Site of azide interaction with cytochrome *c* oxidase in submitochondrial particles from pigeon breast muscle 231(1987)383

Submonolayer

Catalytic effects of Hg and Tl submonolayers on the electrooxidation of formic acid on Pt 205 (1986)135

Substituent effect

Electrochemistry of some *N*-substituted phospha-λ^5-azenes in acetonitrile. Mechanistic aspects, electrophoric group behavior, and substituent effects 236(1987)219

Substituent effects on electrochemical reduction of viologen dimer and trimer with ethylene spacer 239(1988)397

Substituted pyrrole

Electropolymerized multilayer and copolymeric structures based on substituted pyrroles 246 (1988)321

Succinate ion

Adsorption of dicarboxylic ions on the (210) gold face from solutions at constant cationic strength 240(1988)291

Succinylation

Electrochemical behaviour of cytochrome *c* at low potentials 231(1987)297

Sulphacetamide

Electrochemical oxidation of sulphacetamide 247(1988)229

Sulpha drug

Electrochemical oxidation of sulphacetamide 247(1988)229

Sulphate ion

Complexation and adsorption of thiourea in sulphate medium on electrochemically roughened silver electrodes 227(1987)159

Combined electrochemical and radiotracer study of anion sorption from aqueous solutions into polypyrrole films 230(1987)257

Sulphide

Spectroscopic investigation of electrochemically active compounds. SERS of nitrobenzene, sulfide, ethylene and hydroquinone on Au 239(1988)361

Sulphilimine

Heterogeneous and homogeneous redox catalysed reduction of some sulfilimines 223(1987)185

Sulphonate ion

The transfer of carboxylate and sulphonate anions at the aqueous/organic solution interface studied by polarography with the electrolyte solution dropping electrode 249(1988)109

Sulphone

Mechanistic studies on the electrosynthesis of sulfones 214(1986)221

One-electron cleavage of sulphones in the presence of nitrones as spin traps 238(1987)393

Sulphur

An investigation of the sulphur(−II)/sulphur(0) system on gold electrodes 216(1987)213

Organic monolayer formation at a sulphur modified gold electrode. The methylene blue/leucomethylene blue redox couple 233 (1987)199

Sulphur compound

Pulsed amperometric detection of sulfur compounds. Part I. Initial studies at platinum electrodes in alkaline solutions 209(1986)159

Pulsed amperometric detection of sulfur compounds. Part II. Dependence of response on adsorption time 209(1986)171

Sulphur dioxide

An in situ infrared study of the oxidation of sulfur dioxide on platinum electrodes 235(1987) 361

The impedance of the Li^+/Li electrode in $SOCl_2$ containing acid electrolyte 237(1987)275

Characterization of sulfur layers from reduced sulfur dioxide on porous platinum black/Teflon electrodes 246(1988)193

Sulphuric acid

Radiotracer study of the adsorption of sulphuric acid on rhodized electrodes 201(1986)187

A radiotracer study of the adsorption of H_2SO_4 at ruthenium electrodes 205(1986)259

Electrochemical adsorption behaviour of platinum stepped surfaces in sulphuric acid solutions 205(1986)267

Electrochemical faceting of polycrystalline gold in 1 *M* H_2SO_4 215(1986)317

Dimerization of electrogenerated Mo(V) in sulphuric acid solutions 217(1987)305

Initial stages of electrooxidation of Pd (100) surfaces in sulfuric acid solution: an XPS study 217(1987)435

An in situ study on the mechanism of the electrochemical dissolution of copper in oxygenated sulphuric acid. An application of the quartz microbalance 219(1987)311

The effects of adding Tl(I) to the electrolyte on the electrochemical and photoelectrochemical behaviour of passivated lead in H_2SO_4 in the potential range between the $PbSO_4/PbO$ and PbO_2/O_2 regions 221(1987)197

Quantitative analysis of the distribution of the hydrogen adsorption states at platinum surfaces. Part I. Application to Pt (100) in sulphuric acid medium 225(1987)205

The formation of the passive layer on Cr in 0.5 *M* H_2SO_4. A combined electrochemical and surface analytical study 228(1987)365

The structure of H_2SO_4 monolayers on Au (111) 229(1987)99

Investigation of ruthenium deposition onto a platinized platinum electrode in sulfuric acid media 230(1987)233

Quantitative analysis of the distribution of the hydrogen adsorption states at platinum surfaces. Part II. Application to Pt (110), stepped and polyoriented platinum surfaces in sulphuric acid medium 233(1987)251

Product-selective electroreduction of 2,3,4,5,6-pentafluorobenzoic acid to 2,3,4,5,6-pentafluorobenzyl and 2,3,5,6-tetrafluorobenzyl alcohols using solid cathodes in aqueous sulfuric acid 238(1987)315

Electrochemical investigations on the behaviour of thallous ions during the formation of $PbSO_4$ 238(1987)355

Vibrational spectroscopy on platinum single-crystal electrodes. Part I. In-situ infrared spectroscopic studies of the adsorption and oxidation of CO on Pt (111) in sulphuric acid 239(1988)347

The mechanism of electrocatalytic oxidation of formic acid on Pt (100) and Pt (111) in sulphuric acid solution: an EMIRS study 240(1988)147

Electrochemical stabilization of illuminated single crystal WSe_2 anodes 242(1988)191

Study of the platinum/electrolyte interface using surface plasmon excitation at stratified electrodes. Part II. Optical behaviour of Pt/H_2SO_4 and $Pt/H_2SO_4 + Cu^{2+}$ systems 246 (1988)43

Diffusion coefficients of silver ions in $CuSO_4 + H_2SO_4$ solutions 249(1988)123

In-situ IR study of adsorption and oxidation of methanol on platinum and platinised glassy carbon electrodes in sulphuric acid solution 250 (1988)127

Determination of experimental parameters in the Fe(III)/Fe(II) system in 1 *M* H_2SO_4, with a polycrystalline gold electrode, taking advantage of its non-linear behaviour 250(1988)321

Sulphuric acid ion

Electrosorption of hydrogen and sulphuric acid anions on single-crystal platinum stepped surfaces. Part I. The [110] zone 241(1988)309

A study of HSO_4^- and SO_4^{2-} co-adsorption on a platinum electrode in sulfuric acid by in-situ FT-IR reflection absorption spectroscopy 243 (1988)203

Sulphur ligand

Determination of stability constants from polarographic anodic signals for metal complexes with some S-containing ligands 241(1988)113

Sulphur-modified gold electrode

Electrochemical separation of the inner monolayer in methylene blue/leucomethylene blue conductive films induced by a sulphur-modified gold surface 250(1988)427

Sulphydryl group

Electrode process of glutamate dehydrogenase in differential pulse polarography 211(1986)329

Sulphydryl reagent

Modulation of the electrochemical membrane potential in mitochondria by sulfhydryl reagents 231(1987)261

Superconductor electrode

Electrochemistry at $YBa_2Cu_3O_7$ superconductor electrodes at temperatures above T_c 243(1988)465

The electrochemistry of $YBa_2Cu_3O_{7-\delta}$ in aqueous potassium hydroxide 248(1988)461

Supercritical fluid

Electrochemistry in near-critical and supercritical fluids. Part V. The dimerization of quinoline and acridine radical anions and dianions in ammonia from −70 °C to 150 °C 240(1988)253

Electrochemistry in near-critical and supercritical fluids. Part VI. The electrochemistry of ferrocene and phenazine in acetonitrile between 25 and 300 °C 243(1988)117

Superficial defect

Inner-layer capacity at the pzc for perfect (111), (100) and (110) faces of silver. Surface area and capacitance contributions of superficial defects for real electrodes 224(1987)285

Superoperator formalism

Many-body effects in electrochemisorption. Part I. Green function–superoperator formalism 229 (1987)51

Superoxide anion

The interaction of nesosteine and *trans*-sobrerol with electrogenerated superoxide ion in anhydrous and wet acetonitrile 231(1987)339

An electrochemical investigation of the interaction between the superoxide ion and cations of group 2a in aqueous solutions 246 (1988)155

Superoxide anion radical

Reactions of tetrahydropterins with oxygen and with other one-electron acceptors 232(1987)79

Lipid hydroperoxides in sickle cell membranes 232(1987)257

The reaction between 1-methyl-4-phenylpyridinium (MPP^+) and superoxide anion in acetonitrile 250(1988)83

Superoxide dismutation

Thermodynamics of reactions involving oxyradicals and hydrogen peroxide 232(1987)3

Superselectivity

A study of the superselectivity of Nafion perfluorosulfonic membranes 216(1987)71

Supporting electrolyte

Analytical application of submicroelectrodes in solutions containing little or no supporting electrolyte 213(1986)189

Coadsorption of Ti(III) and Cl^- at a mercury electrode 241(1988)329

Cyclic voltammetric and potentiometric behavior of tetracyanoquinodimethane polymer film electrodes. Effect of the nature and the concentration of the supporting electrolyte 242 (1988)265

Supramolecular organization

Supramolecular phenomena in organic redox films at electrodes. Part II. The methylene blue/leucomethylene blue redox couple a. the gold electrode 219(1987)183

Surface-active agent

Cathodic stripping voltammetry of catechol and some catecholamines 214(1986)191

Electrodes coated with polystyrene films containing surface-active agents. Attachment of screening capabilities for electrode reactions of electroactive ionic species 242(1988)143

Surface analysis

The formation of the passive layer on Cr in 0.5 *M* H_2SO_4. A combined electrochemical and surface analytical study 228(1987)365

Surface area

Determination of the surface area of gold electrodes by iodine chemisorption 233(1987)283

Changes in real surface area, crystallographic orientation and morphology of platinum electrodes caused by periodic potential treatments: phenomenological approach 239 (1988)67

Electrochemical investigation of an electrodeposited rhodium electrode in acid solutions 242(1988)97

Surface charge density

Use of 9-aminoacridine in the evaluation of liposome surface charge density: role of the adsorption on lipidic sites 231(1987)277

Surface charge layer

Ion binding to a membrane with surface charge layers 211(1986)173

Surface conductance

On surface conductance measurements at the GaAs/electrolyte interface 228(1987)89

Surface deposition

Temperature dependence of charge transport processes in surface deposited redox polymer layers 250(1988)207

Surface dipole potential

Ionic adsorption and the surface dipole potential 235(1987)387

Surface electrochemistry

Surface electrochemistry of the anodic N_2 generation reaction at Pt and Au, and the discovery of cathodic N_2 evolution 249(1988)217

Surface-enhanced Raman spectroscopy

Reduction of nitrobenzene in aqueous alkaline solution at an Ag electrode. Observation by SERS, RRDE and UV absorption 202(1986)231

Surface-enhanced Raman scattering of nicotinamide adenine dinucleotide (NAD^+) adsorbed on silver and gold electrodes 202 (1986)315

Surface structural changes during oxidation of gold electrodes in aqueous media as detected using surface-enhanced Raman spectroscopy 209(1986)377

Surface free energy

Surface free energy as the potential in oligomeric equilibria: prediction of hemoglobin disaggregation constant 231(1987)349

Surface layer

Photoeffect on a Cu anode during electropolishing 210(1986)229

Open-circuit potential decay investigation of the surface layer of an electropolished Cu anode 210(1986)237

Surface modification

Taking advantage of liquid ammonia to control the surface modification of silicon electrodes 216(1987)101

Surface modifications with heteropoly and isopoly oxometalates. Part I. Qualitative aspects of the activation of electrode surfaces towards the hydrogen evolution reaction 243(1988)87

Surface modifications with heteropoly and isopoly oxometalates. Part II. Electrocatalytic behaviour of glassy carbon surfaces modified with 17-tungsto, 1-molybdo-diphosphate 243 (1988)105

Modifications of palladium electrode surfaces produced by periodic potential treatments 246 (1988)165

Surface plasmon excitation

Recent improvements in the study of the electrochemical interface by surface plasmon excitation 204(1986)229

Study of the platinum/electrolyte interface using surface plasmon excitation at stratified electrodes. Part I. Preparation and characterization of the electrodes 228(1987)251

Study of the platinum/electrolyte interface using surface plasmon excitation at stratified electrodes. Part II. Optical behaviour of Pt/H_2SO_4 and $Pt/H_2SO_4 + Cu^{2+}$ systems 246 (1988)43

Surface potential

Silver–water interactions. Part I. Model of the inner layer at the metal/water interface 230 (1987)189

The real standard potential on the aqueous hydrogen scale of the silver/silver chloride electrode in methanol: the surface potential of methanol 243(1988)353

Surface preparation

A modification of the last step of surface preparation for gold and silver single crystal faces 220(1987)155

Electrochemistry of the ordered Rh (111) electrode. Surface preparation and voltammetry in $HClO_4$ electrolyte 227(1987)259

Surface roughness

Kinetics of hydroquinone chemisorption at polycrystalline platinum electrodes. The effect of surface roughness 217(1987)121

On the role of local modes in the optics of the metal/electrolyte interface 228(1987)179

Electrochemical investigation of an electrodeposited rhodium electrode in acid solutions 242(1988)97

Electrochemical and FTIR spectroscopic characterization of ferrocyanide-modified TiO_2 electrodes designed for efficient photosensitization 246(1988)411

Surface science

Electrochemical and surface science investigations of PtCr alloy electrodes 220(1987) 269

Surface spectroscopy

Electrochemisorption of hexahydroxyplatinate(IV) on thin titania films 228(1987)471

Surface state

Surface states on cadmium sulfide and the influence of etching 205(1986)291

A capacitance relaxation method for studying surface states at the semiconductor–liquid junction 225(1987)79

Surface state density

Determination of surface state densities from transient rotating ring–disc electrode measurements demonstrated on an n-TiO_2 electrode 236(1987)55

Surface structural change

Surface structural changes during oxidation of gold electrodes in aqueous media as detected using surface-enhanced Raman spectroscopy 209(1986)377

Surface substitution

Surface substitution reactions at modified gold electrodes and their effect on the electrochemistry of horse heart cytochrome *c* 217(1987)141

Surface tension

Standard states and the Frumkin adsorption isotherm for substances at electrode interphases 244(1988)53

Surface treatment

Surface treatments of n-$CuInSe_2$ polycrystalline electrodes for photoelectrochemical applications 208(1986)85

Surfactant

Improved method of the determination of traces of surfactants by means of suppression of the polarographic maximum of the first kind 218 (1987)93

Comparative studies of electrochemical phase formation by amperometric and microscopic methods. Part II. Nucleation kinetics in the presence of surfactants 235(1987)249

Voltammetric maxima of the third kind from reactant adsorption at the HMDE 235(1987)343

Hydrodynamic effects of surfactants on the macromorphology of electrodeposited zinc and flow visualization. The flow-field throw 243 (1988)21

Surfactant monolayer

Self-assembled surfactant monolayers on electrode surfaces. The formation of surfactant viologen monolayers on gold and platinum 249 (1988)333

Suspension effect

The suspension effect. A consequence of an imperfection in measurement technique 206 (1986)349

Switching potential

Characterization of $NiCo_2O_4$ electrodes for O_2 evolution. Part III. Ageing phenomena of $NiCo_2O_4$ electrodes 208(1986)323

Symmetry factor

Entropic and enthalpic components of the symmetry factor for electrochemical proton transfer from various proton donors over a wide temperature range 214(1986)633

Temperature dependence of the symmetry factor in electrode kinetics 214(1986)655

T

Tamoxiphene

Polarographic studies of drugs of triphenylethene derivatives. Part I 226(1987)129

Tantalum oxide film

Electronic current and breakdown characteristics of tantalum oxide films 239(1988)125

Taurine

Radiotracer study of the adsorption of taurine at a platinized platinum electrode 241(1988)343

Tautomerization

Electrochemistry of quinizarine adsorbed on a glassy carbon electrode in aqueous solutions 239 (1988)209

Technetium

Quantitative analytical assay of small amounts of technetium by stripping chronopotentiometry at a glassy carbon electrode 241(1988)125

Technetium ion

Mechanism and kinetics of the stepwise voltammetric reduction of pertechnetate in alkaline solution to Tc(VI), Tc(V) and Tc(IV) 219(1987)221

Teflon

Effects of KOH solution on the surface properties of Teflon 213(1986)43

Tellurium film

Voltammetric studies of tellurium film and hydrogen telluride formation in acidic tellurite solution 215(1986)261

Tellurium film electrode

Cathodic generation of $CdSe_xTe_{1-x}$ at Te film electrodes 215(1986)249

Tellurium ion

Electrochemical reduction of tellurium(IV) 214 (1986)179

Temkin isotherm

Study of the electrooxidation of n-propanol on an Au electrode in basic medium 206(1986)179

Temperature

Cathodic hydrogen evolution on mercury from aqueous solutions of dilute acids at temperatures higher than 100 °C 204(1986)131

Electrochemistry at low temperatures down to 80 K. Further evidence for nuclear tunnelling in electron transfer reactions 205(1986)343

High-temperature "in-situ" surface Raman spectro-electrochemistry in aqueous solutions 208(1986)175

Gas electrode reactions in molten carbonate media. Part III. Temperature dependence of oxygen reduction kinetics in $(Li + K)CO_3$ eutectic 209(1986)125

Electrochemical formation of LiAl alloy in molten dimethylsulfone at 150 °C 209(1986)283

On the kinetics of the cathodic deposition of aluminium on glassy carbon and tungsten electrodes from $AlCl_3 + NaCl + KCl$ melts 210 (1986)127

Electrochemical evidence for two components in molybdenum-containing catalysts for dinitrogen fixation at ambient temperature and pressure 210(1986)173

Current peak multiplicity related to the $Ni/Ni(OH)_2$ electrode 210(1986)287

Temperature effect on ion transport through the isolated human amnion. Part I. Electrophysiological studies 211(1986)383

Temperature dependence of the ionisation constants and evaluation of the related thermodynamic parameters for salicyclic acid and meta-hydroxybenzoic acid 214(1986)473

Conductance of 1–1 electrolytes in methanol solutions from −45 to +25 °C 214(1986)485

Entropic and enthalpic components of the symmetry factor for electrochemical proton transfer from various proton donors over a wide temperature range 214(1986)633

Temperature dependence of the symmetry factor in electrode kinetics 214(1986)655

Influence of temperature on the kinetics of Zn(II) electroreduction from water + dimethylsulfoxide mixtures 215(1986)287

Taking advantage of liquid ammonia to control the surface modification of silicon electrodes 216(1987)101

Electrochemical formation of a magnesium vanadium bronze $Mg_xV_2O_5$ in sulfone-based electrolytes at 150 °C 218(1987)241

Extraordinary temperature effect on the hydrogen electrode potential in concentrated perfluoroalkanesulfonic acids 219(1987)347

Cyclic voltammetric studies of nitrato complexes of various metal ions in molten $LiNO_3 + KNO_3$ at 180 °C 221(1987)115

On irreversible changes upon heating lipid solutions 222(1987)277

Electrochemical oxidation of *N*-substituted 1,4- and 1,2-dihydropyridine derivatives. Studies using the rotating ring–disk electrode and ESR 226(1987)103

Impedance studies of the cell Ag/Ag beta″ alumina/Ag 228(1987)417

The temperature dependence of the double-layer properties of gold faces in perchloric acid solutions. Part I. The (210) gold face 229(1987) 107

Electrolytic coating of titanium onto iron and nickel electrodes in the molten LiF + NaF + KF eutectic 230(1987)125

The rate-limiting steps of the rising phase of miniature end plate currents in the mouse diaphragm 231(1987)153

Effect of temperature on peritubular cell membrane potential and potassium conductance in isolated perfused proximal tubules of the mouse 231(1987)419

Electron-transfer reactions and associated conformational changes. The effect of disproportionation on the oxidation of dixanthylene at elevated temperatures 233(1987) 63

Electrochemical behaviour of copper oxide in molten dimethyl sulfone at 150 °C 233(1987)189

On adsorption according to the lattice gas model (Ising model) 236(1987)21

The temperature dependence of the double-layer properties of gold faces in perchloric acid solutions. Part II. The (110) gold face 236(1987) 283

The potential dependence of silicon anisotropic etching in KOH at 60 °C 238(1987)103

Electrochemical investigations on the behaviour of thallous ions during the formation of $PbSO_4$ 238(1987)355

Electronic current and breakdown characteristics of tantalum oxide films 239(1988)125

The effects of temperature and electrolyte at acidic and alkaline pH on the electron transfer reactions of cytochrome *c* at In_2O_3 electrodes 239(1988)291

Electrochemistry in near-critical and supercritical fluids. Part V. The dimerization of quinoline and acridine radical anions and dianions in ammonia from −70 °C to 150 °C 240(1988)253

Simultaneous EPR electrochemical measurements on polypyrrole in ambient temperature ionic liquids 241(1988)231

Electrochemical behaviour of $CuO + V_2O_5$ systems in molten dimethyl sulfone at 150 °C 242(1988)181

Electrochemistry in near-critical and supercritical fluids. Part VI. The electrochemistry of ferrocene and phenazine in acetonitrile between 25 and 300 °C 243(1988)117

The electrical double layer at the mercury/solution interface in organic solvents 244(1988)1

The role of oxygen ion diffusion in the electrode reactions of β'' alumina 244(1988)123

The temperature dependence of the double layer parameters of the (111) face of silver 244(1988) 133

Behaviour of some copper(II) salts in propylene carbonate. Standard electrode potential of the Cu^{2+}/Cu system at 25 °C 245(1988)123

Electrocatalytic oxidation of glucose at platinum in alkaline medium: on the role of temperature 246(1988)349

Electrochemical studies of magnesium ions in magnesium chloride containing chloride melt at 710 ± 10 °C 249(1988)191

Temperature dependence of charge transport processes in surface deposited redox polymer layers 250(1988)207

Temperature coefficient

The temperature coefficient of the potential of zero charge of the (110) face of silver 218(1987) 355

A novel application of gas-diffusion electrodes as electrochemical gas sensors 248(1988)69

Teniposide

Electrochemistry of podophyllotoxin derivatives. Part II. Oxidation of teniposide and some epipodophyllotoxin derivatives 220(1987)101

Tensammetry

On the adsorption of aliphatic alcohols on gold. Part II 201(1986)387

Electrochemical behaviour of 4-acetyl-1 phenoxyalkyl ammonium salts. An example of a system with adsorption of both substrate and reduction products 236(1987)253

The adsorption of aniline on gold: a SERS study 250(1988)143

Terpyridine complex

The growth of compact layers at the electrode interface. Part I. Complexes of cobalt, nickel and iron with 2,2′-bipyridine and 2,2′,2″-terpyridine in aqueous sodium perchlorate 206(1986)269

Terramycin

Cyclic voltammetry and chronopotentiometry with cyclic linear current scanning of terramycin at the water/nitrobenzene interface 214(1986)459

Terthiophene

Polymerisation of terthiophene at controlled doping level 250(1988)219

Tertiary alcohol

Electrochemical oxidation of 9-β-D-ribofuranosyluric acid in basic solution 223 (1987)119

Tetraalkylammonium "amalgam"

Stoichiometry of a tetraalkylammonium "amalgam" 205(1985)319

Tetraalkylammonium ion

Stochastic approach to the ion transfer kinetics across the interface between two immiscible electrolyte solutions. Comparison with the experimental data 204(1986)257

The growth of ordered films during the cathodic reduction of a tetraalkylammonium ion 209 (1986)91

Tetraalkylammonium–lead

Tetraalkylammonium–lead: electrogeneration and stoichiometry 247(1988)345

Tetraalkylammonium perchlorate

On the nature of the transfer coefficient for ion transfer reactions 250(1988)225

Tetraanilinporphyrin

Electrochemical and photocatalytic properties of water-soluble tin(IV) *meso*-tetraanilinporphyrin 226(1987)157

Tetrabutylammonium ion

Direct evidence for interfacial condensation in the adsorption of tetrabutylammonium ions 206 (1986)307

Study on the transfer of the base electrolyte ion TBA^+ across the water/nitrobenzene interface by the linear current scanning method 234(1987) 71

Tetrabutylammonium tetrafluoroborate

Charge transfer reaction inverse photoemission spectroscopy (CTRIPS). Part II. Electrode specificity 228(1987)293

Tetrabutylammonium tetraphenylborate

Streaming method study of interfaces between immiscible electrolyte solutions 235(1987)287

Tetrachloromethane

Evidence for carbon tetrachloride-induced lipid peroxidation *in vivo* by ^{23}Na relaxation times t_1 232(1987)179

Tetracyanoethylene

Electrolyte effects on the cyclic voltammetry of TCNQ and TCNE 215(1986)273

Tetracyanoethylene ion

An infrared spectroelectrochemical investigation of the ion pairing reactions of the anions and dianions of TCNE and TCNQ 233(1987)223

Tetracyanoquinodimethane

Electrolyte effects on the cyclic voltammetry of TCNQ and TCNE 215(1986)273

Tetracyanoquinodimethane film

The effect of the counter ion concentration on the electrochemistry of tetracyanoquinodimethane polymer film electrodes 201(1986)301

Electrochemistry of tetracyanoquinodimethane polymer-modified electrodes. Effect of polymer film composition on site–site interactions 217 (1987)313

Combined electrochemical and radiotracer (cyclic voltradiometric) study of the motion of counter-ions in tetracyanoquinodimethane modified electrodes 218(1987)297

Cyclic voltammetric and potentiometric behavior of tetracyanoquinodimethane polymer film electrodes. Effect of the nature and the concentration of the supporting electrolyte 242 (1988)265

Tetracyanoquinodimethane ion

An infrared spectroelectrochemical investigation of the ion pairing reactions of the anions and dianions of TCNE and TCNQ 233(1987)223

Electrochemically controlled binding and release of salicylate, $TCNQ^{\cdot-}$ and ferrocyanide from films of oligomeric 3-methoxythiophene 247 (1988)173

Tetracycline antibiotic

Trace measurements of tetracyclines using adsorptive stripping voltammetry 211(1986)147

Tetraethylammonium ion

The kinetics of ionic transfer across adsorbed phospholipid layers 243(1988)455

Tetraethylammonium perchlorate

The reduction mechanism of Cd(II) at mercury in dimethylsulfoxide containing tetraethylammonium perchlorate 221(1987)129

Heterogeneous electron transfer kinetics for a variety of organic electrode reactions at the mercury–acetonitrile interface using either tetraethylammonium perchlorate or tetraheptylammonium perchlorate electrolyte 222(1987)129

Tetraethylammonium picrate

Experimental study of Volta potentials in water/nitrobenzene systems with anion adsorption 204(1986)273

Tetraheptylammonium perchlorate

Heterogeneous electron transfer kinetics for a variety of organic electrode reactions at the mercury–acetonitrile interface using either tetraethylammonium perchlorate or tetraheptylammonium perchlorate electrolyte 222(1987)129

Tetrahydrofuran

The kinetics of electroreduction of lithium ions in tetrahydrofuran at mercury and mercury amalgam electrodes 215(1986)237

Double-layer structure at the mercury/solution interface with tetrahydrofuran and 2-methyltetrahydrofuran as solvents 222(1987)293

Nitrogen fixation. Part I. Electrochemical reduction of titanium compounds in the presence of catechol and N_2 in MeOH or THF 230(1987) 143

Ion size evaluation for $LiClO_4$ solutions in selected mixtures of γ-butyrolactone with ethers 250(1988)165

Tetrahydropterin

Reactions of tetrahydropterins with oxygen and with other one-electron acceptors 232(1987)79

Tetrahydroxybenzoquinone

Electrocatalytic influence of underpotential Tl, Pb and Bi monolayers on the electrochemical behaviour of rhodizonic acid and tetrahydroxy-1,4-benzoquinone on Pt in acid solutions 213 (1986)135

Tetrahydroxybiphenyl

Effect of non-aqueous solvents on the chemisorption and orientation of aromatic compounds at smooth polycrystalline platinum electrodes: naphthohydroquinone and tetrahydroxybiphenyl in water + acetonitrile solutions 201(1986)153

Electrochemical reactivity of 2,2′,5,5′-tetrahydroxybiphenyl and related compounds adsorbed at Pt (111) surfaces: studies by EELS, LEED, Auger spectroscopy and cyclic voltammetry 245(1988)253

Tetramethoxyphenylporphyrin

New oxygen cathodes for fuel cells with organic fuels 210(1986)277

Tetramethylammonium ion

Electrogenerated $R_4N(Hg)_5$ films: stoichiometry and substituent effects 219(1987)247

Tetramethylnaphthidine

Two-electron oxidation of *N,N,N′,N′*-tetramethyl naphthidine in acetonitrile. The reactivity of its dication to aromatic nucleophilic substitution by pyridine 201(1986)367

Tetramine

Polarographic studies on the interaction between macrocyclic compounds and cations or acids in acetonitrile 234(1987)251

Tetraphenylarsonium-tetraphenylborate assumption

Studies on the liquid junction potential corrections of electrolytes at aqueous + mixed solvent boundaries 237(1987)149

Tetraphenylbutatriene

Electrochemical reduction of 1,1,4,4-tetraphenylbutatriene 222(1987)257

Tetraphenylphosphonium chloride

Selective inhibition by tetraphenylphosphonium chloride 205(1986)299

Phase transitions of salt monolayers at the mercury/water interface. Tetraphenylphosphonium chloride 236(1987)311

Tetraphenylphthalic anhydride

Electrochemistry of organic acceptor compounds: aromatic anhydrides 238(1987)215

Tetraphenylporphinato complex

Solvent effects on electrode potentials of metalloporphyrins. Reduction of 5,10,15,20-tetraphenylporphinato complexes in non-aqueous media 235(1987)189

Tetraphenylporphinatozinc

Oxidative voltammetry of some tetraphenylporphyrins in the presence of nucleophiles leading to isoporphyrins 234(1987) 145

Tetraphenylporphine

Oxidative voltammetry of some tetraphenylporphyrins in the presence of nucleophiles leading to isoporphyrins 234(1987) 145

Tetrapyridylporphyrin

Chemical modification of Pt electrodes by tetra(4-pyridyl)porphyrin through siloxane polymer formation 243(1988)193

Tetrasulphonato-phthalocyanine

The cathodic reduction of oxygen at metal tetrasulfonato-phthalocyanines: influence of adsorption conditions on electrocatalysis 233 (1987)99

Tetrathiafulvalenium ion

Clay modified electrodes. Part VII. The electrochemical behavior of tetrathiafulvalenium-montmorillonite modified electrodes 229(1987)191

Tetrathiafulvalinium tetracyanoquinodimethanide

Amperometric enzyme electrodes. Part III. A conducting salt electrode for the oxidation of four different flavoenzymes 218(1987)119

Thallium

Catalytic effects of Hg and Tl submonolayers on the electrooxidation of formic acid on Pt 205 (1986)135

Extending the metal interface generality of surface-enhanced Raman spectroscopy: underpotential deposited layers of mercury, thallium, and lead on gold electrodes 217(1987) 367

The effects of the underpotential and overpotential deposition of lead and thallium on silver on the Raman spectra of adsorbates 217 (1987)385

Cyclic voltammetric study of glucose oxidation on an oxide-covered platinum electrode in the presence of an underpotential-deposited thallium layer 231(1987)59

In-situ X-ray diffraction investigations of the UPD of Tl and Pb on Ag and Au electrodes 247(1988)297

Thallium ion

Background subtraction for rapid scan voltammetry 209(1986)77

Adsorption of Tl(I) on mercury in azide media 209(1986)361

The effects of adding Tl(I) to the electrolyte on the electrochemical and photoelectrochemical behaviour of passivated lead in H_2SO_4 in the potential range between the $PbSO_4/PbO$ and PbO_2/O_2 regions 221(1987)197

Electrochemical investigations on the behaviour of thallous ions during the formation of $PbSO_4$ 238(1987)355

Theoretical analysis

Thermokinetic instability of electrode processes. Part I. Theoretical analysis 207(1986)1

Thermal decomposition

Surface properties of $RuO_2 + IrO_2$ mixed oxide electrodes 214(1986)535

Thermal equilibrium

Comparison and discussion of some theories of the equilibrium electrical double layer in liquid electrolytes 223(1987)1

Thermal explosion

Thermokinetic instability of electrode processes. Part I. Theoretical analysis 207(1986)1

Thermal process

On the study of thermal and optical processes in condensed media 204(1986)141

Thermodynamic data

Temperature dependence of the ionisation constants and evaluation of the related thermodynamic parameters for salicylic acid and meta-hydroxybenzoic acid 214(1986)473

Recent thermodynamic data for some reactions of peroxomonosulphate ion 214(1986)481

The electrosorption valency of organic electrosorbates. Part II. Aromatic and heterocyclic compounds 229(1987)141

Thermodynamics

Correlations between the equilibrium potential and the potential of zero charge of metals in different modifications 204(1986)343

The electrochemical reduction of diazodimedone. Kinetics and thermodynamics of the formation of the carbene anion radical 218(1987)227

Chemical and mechanical properties of redox polymer-modified electrodes. Part III. Redox thermodynamics of linear polyvinylferrocene electrodes 219(1987)91

Thermodynamics of reactions involving oxyradicals and hydrogen peroxide 232(1987)3

Thermoeffect

Photoeffect on a Cu anode during electropolishing 210(1986)229

Thermoelectrochemistry

Thermoelectrochemical properties of a polypyrrole electrode 201(1986)409

Thermokinetic instability

Thermokinetic instability of electrode processes. Part I. Theoretical analysis 207(1986)1

Thermokinetic instability of electrode processes. Part II. Transpassive dissolution of copper in nitrate solutions 207(1986)11

Thermophilic cyanobacterium

Comparison of ATP synthesis efficiencies in ATPase proteoliposomes of different complexities 212(1986)167

Thianthrene

Charge transfer reaction inverse photoemission spectroscopy (CTRIPS). Part II. Electrode specificity 228(1987)293

Thiazolidinecarboxylic acid

An electrochemical study of the oxidation of thiazolidine-4-carboxylic acid on platinum electrodes 209(1986)339

A voltammetric study of thiazolidine-4-carboxylic acid on mercury electrodes 245(1988) 157

Thin film

Study of the electroreduction of dioxygen on thin films of platinum phthalocyanine in alkaline solutions. Part I. Electrochemical investigations 239(1988)273

Comparison of visible transmission spectroscopic and ellipsometric data obtained during the deposition of thin films on electrodes 244(1988) 353

Electrochromic properties of vacuum evaporated organic thin films. Part I. Electrochromic thin films of the three primary colors 247(1988)193

The electroreduction of oxygen on thin films of platinum phthalocyanine in alkaline solutions. Part II. Spectroelectrochemical data and mechanism 249(1988)167

Thin-film electrode

Electrolyte electroabsorption: a spectroscopic technique for thin film semiconducting electrodes 218(1987)347

Chemical modification of GaPc–Cl thin film photoelectrodes 248(1988)349

Reduction of oxygen to water on cobalt-nitride thin film electrodes prepared by the reactive RF sputtering technique 250(1988)73

Thin-layer cell

Currents in thin layer electrochemical cells with spherical and conical electrodes 238(1987)9

Square wave voltammetry in a thin-layer cell 240(1988)45

Thin-layer electrode

Anodic overoxidation of poly-*p*-phenylene in aqueous electrolytes 216(1987)157

Thin-layer gas electrode

A novel application of gas-diffusion electrodes as electrochemical gas sensors 248(1988)69

Thin-layer voltammetry

Thin-layer voltammetry of palladium in acid electrolytes 207(1986)279

Thin oxide film

Electrochemical and XPS measurements on thin oxide films on zirconium 217(1987)159

Thiobisacetic acid

Cathodic stripping voltammetry of thioether acids. Methylthioacetic and 2,2′-thiobisacetic acids 215(1986)103

Thio complex

Electrooxidative formation and characteristics of Cr(III)–thio complexes at mercury electrodes 247(1988)215

Thiocyanate

Molten alkali thiocyanates as solvents for transition metal electrodeposition 206(1986)253

Thiocyanate ion

Polarization modulation infrared spectroscopic measurements of thiocyanate and cyanide at the silver electrode/aqueous electrolyte interface by means of Kretschmann's ATR prism configuration 215(1986)93

Thioether acid

Anodic oxidation of mercury in the presence of thioether acids. Methylthioacetic acid 213(1986) 65

Cathodic stripping voltammetry of thioether acids. Methylthioacetic and 2,2′-thiobisacetic acids 215(1986)103

Thioguanine

Electrochemical oxidation of 6-thioguanine 207 (1986)101

Thionine film

A study of the electrochemical growth and optical properties of polymeric thionine films on platinum using ellipsometry 233(1987)125

Thionyl chloride

The impedance of the Li^+/Li electrode in $SOCl_2$ 209(1986)351

The impedance of the Li^+/Li electrode in $SOCl_2$ containing acid electrolyte 237(1987)275

Thioorotic acid

Cathodic stripping voltammetry of 2-thioorotic acid at the hanging mercury drop electrode 237 (1987)105

Thiophene

Solvent effect on electrochemical polymerization of aromatic compounds 242(1988)203

Thiophenol

Reversible redox, hydrodesulfurization and anodic oxidation of chemisorbed thiophenols. A comparison at platinum and gold electrodes 241 (1988)199

Thiosulphate ion

Electro-oxidation of thiosulphate ion on gold. Study by means of cyclic voltammetry and Auger electron spectroscopy 250(1988)443

Thiourea

On the catalytic effect of thiourea on the electrochemical reduction of cadmium(II) ions at the DME from aqueous 1 *M* KF solutions 201 (1986)33

Pulsed amperometric detection of sulfur compounds. Part I. Initial studies at platinum electrodes in alkaline solutions 209(1986)159

Adsorption stripping square-wave voltammetry of copper ions in the presence of thiourea 214 (1986)65

Standard states and standard adsorption Gibbs energy of substances at electrode interfaces 216 (1987)21

On the adsorption of cadmium(II) ions on a HMDE from KF + thiourea aqueous solutions. A chronocoulometric study 216(1987)273

On the two modes of condensation displayed by thiourea at the mercury–water interface 226 (1987)267

Complexation and adsorption of thiourea in sulphate medium on electrochemically roughened silver electrodes 227(1987)159

Thiouric acid

Electrochemical oxidation of 6-thiouric acid 221 (1987)155

Thioxanthene

Electrochemistry of thioxanthene, thioxanthone and related compounds in acetonitrile. Substituent effects and correlation of electrochemical behavior with molecular orbital calculations 210(1986)45

Thioxanthine

Electrochemical and xanthine oxidase-catalyzed oxidation of 6-thioxanthine 233(1987)49

Thioxanthone

Electrochemistry of thioxanthene, thioxanthone and related compounds in acetonitrile. Substituent effects and correlation of electrochemical behavior with molecular orbital calculations 210(1986)45

Thylakoid

Interaction of cationic drugs with lipids of the spinach thylakoid membrane 211(1986)497

Effect of pH on the efficiency of the oxygen-evolving reaction in inside-out vesicles of thylakoids 212(1986)549

Thymidine hydroperoxide

Photo and radiation-induced formation of thymidine hydroperoxides 232(1987)155

Thymine film

Condensed thymine films at the mercury/water interface. Part I. General features 201(1986)133

Condensed thymine films at the mercury/water interface. Part II. Effects on electrode kinetics 201(1986)145

Condensed thymine films at the mercury/water interface. Part III. Thermodynamic analysis 218 (1987)273

Condensed thymine films at the mercury/water interface. Part IV. Stochastic measurements 218 (1987)287

Condensed thymine films at the mercury/water interface. Part V. Phase transitions 230(1987)241

Time

Nucleation on active sites. Part IV. Invention of an electronic method of counting the number of crystals as a function of time; and the discovery of nucleation rate dispersion 239(1988)17

Time-resolved measurement

Picosecond time-resolved measurements of fast recombination losses in the photoresponse of semiconductor/liquid junction cells 228(1987)29

Time-resolved polarography

Photocurrent kinetics during electron emission from a metal into an electrolyte solution. Part IX. Electrode reactions of the intermediates generated in the bromate ion reduction on mercury 241(1988)247

Time domain spectroscopy

Surface states on cadmium sulfide and the influence of etching 205(1986)291

Tin

Electrocatalysis of methanol oxidation by adsorbed tin on platinum 238(1987)151

Tin-doped indium oxide electrode

A study of the electron transfer and oxygen binding reactions of myoglobin 237(1987)81

Tin complex

Electrochemical and photocatalytic properties of water-soluble tin(IV) *meso*-tetraanilinporphyrin 226(1987)157

Tin diphthalocyanine

The role of phase transfer catalysts in two phase redox reactions 247(1988)203

Tin ion

Electrochemical oxidation of CO on Pt in acidic and alkaline solutions. Part I. Voltammetric study on the adsorbed species and effects of aging and Sn(IV) pretreatment 241(1988)163

Tin oxide electrode

Redox behavior of cytochrome *c* immobilized into a lecithin monolayer and deposited onto SnO_2 by the Langmuir–Blodgett technique 216 (1987)289

Determination of unimolecular electron transfer rate constants for strongly adsorbed cytochrome *c* on tin oxide electrodes 221(1987)265

Tissue oxidation

Tissue oxidation after endotoxin 232(1987)301

Titanium

Stripping voltammetry with adsorptive accumulation for trace measurements of titanium 208(1986)383

Stability of titanium tubes towards acid wash 214(1986)567

Titanium compound

Nitrogen fixation. Part I. Electrochemical reduction of titanium compounds in the presence of catechol and N_2 in MeOH or THF 230(1987) 143

Titanium dioxide

Light-induced reduction of cytochrome *c* by colloidal TiO_2 212(1986)125

Titanium dioxide electrode

A particle size effect in the sensitization of TiO_2 electrodes by a CdS deposit 204(1986)225

Electrocatalysis of cathodic reactions on titanium dioxide surfaces derivatised with tungstosilicic acid ($SiW_{12}O_{40}^{4-}$) 209(1986)391

Formation of H_2O_2 at the illuminated TiO_2 film electrode prepared by the sol–gel method and its chemical states 209(1986)399

Current doubling during propane oxidation on the n-TiO_2 anode in trifluoromethanesulfonic acid monohydrate 220(1987)173

Electrocatalytic reduction of CO_2 to methanol. Part VIII. Photoassisted electrolysis and electrochemical photocell with n-TiO_2 anode 220(1987)333

Determination of surface state densities from transient rotating ring–disc electrode measurements demonstrated on an n-TiO_2 electrode 236(1987)55

Photosynthetic production of H_2O_2 from water at n-TiO_2 electrodes in a photoelectrochemical cell: influence of electrolyte pH and Pt electrodeposition 237(1987)225

Electrochemical and FTIR spectroscopic characterization of ferrocyanide-modified TiO_2 electrodes designed for efficient photosensitization 246(1988)411

Titanium dioxide film

Electrochemisorption of hexahydroxyplatinate(IV) on thin titania films 228(1987)471

Photoelectrochemical microscopy as a probe of localized properties of thin TiO_2 films 237 (1987)295

Titanium electrode

An investigation of the titanium electrode in acid solutions and acid solutions containing uranium(VI) ions 225(1987)139

Titanium ion

Determination of the kinetic parameters for the Ti(III)/Ti(IV) couple using a rotating disk electrode 209(1986)275

Electrolytic coating of titanium onto iron and nickel electrodes in the molten LiF + NaF + KF eutectic 230(1987)125

Chronopotentiometric study of titanium in molten NaCl + KCl + K_2TiF_6 239(1988)203

Titanium substrate

Electrochemical investigation of an electrodeposited rhodium electrode in acid solutions 242(1988)97

Toluene

The electrochemical reactivity of toluene at porous Pt electrodes 244(1988)273

Topography

Formulation of current–time transients due to nucleation and coalescence of spherical-cap growth forms 209(1986)1

Condensed thymine films at the mercury/water interface. Part V. Phase transitions 230(1987)241

Transient mass transfer at partially blocked electrodes: a way to characterize topography 238(1987)67

Total body irradiation

Characterization and rapid evaluation of electrochemically oxidizable components in normal and pathological urine 232(1987)137

Total Radical-trapping Antioxidant Parameter

Radical-trapping antioxidants *in vitro* and *in vivo* 232(1987)219

Toxicity

Formation, reactions and toxicity of aldehydes produced in the course of lipid peroxidation in cellular membranes 232(1987)187

Amalgam voltammetric approach to heavy metal speciation in natural waters. Part I. Theoretical aspects and methodology 246(1988)15

Toxic metal

Voltammetric determination of Cu, Cd, Hg, Pb and Zn in cereals 226(1987)263

Trace metal complexation

Extension of the sensitivity limit of amalgam electrodes, in dilute aquatic media, based on the study of their oxidation process 236(1987)67

Trace metal speciation

Trace metal speciation by ASV. Part VII. Interaction of zinc with Cl^-, NO_3^-, I^-, SO_4^{2-} and OH^- 226(1987)253

Tracer method

Investigation of chloroform adsorption on a platinum electrode by the tracer method 210 (1986)161

Transcription

Some biological effects of electromagnetic fields 211(1986)39

Transduction

Absorption and conversion of electric field energy by membrane bound ATPases 211(1986)457

Transductive coupling

The sequence and energetics of cell membrane transductive coupling to intracellular enzyme systems 211(1986)447

Transfection

Electroporative gene transfer (electrotransfection): a method for strain improvement of animal cells 231(1987)253

Transfer activity coefficient

Studies on the liquid junction potential corrections of electrolytes at aqueous + mixed solvent boundaries 237(1987)149

Transfer coefficient

The electrochemical behaviour of Nb(V)/Nb(IV) in aqueous citrate solutions studied at the dropping mercury electrode 206(1986)153

A simple and alternative method for the evaluation of electrode kinetic parameters from normal pulse polarographic data 224(1987)49

Theory of irreversible cyclic voltammograms at microcylinder electrodes 247(1988)17

On the nature of the transfer coefficient for ion transfer reactions 250(1988)225

Determination of experimental parameters in the Fe(III)/Fe(II) system in 1 *M* H_2SO_4, with a polycrystalline gold electrode, taking advantage of its non-linear behaviour 250(1988)321

Transformation

Theory of chronoamperometric curves at microband electrodes 225(1987)19

Transformed cell line

Deficiency in the catalase activity in human precancerous stages of *Xeroderma pigmentosum*. Comparison with XP, AT and Blomm's cultured fibroblasts and SV_{40} transformed human cell extracts 232(1987)271

Transient current

Hydrodynamic voltammetry at channel electrodes. Part VIII. Theory of reversible voltammograms for chronoamperometry and linear sweep voltammetry 209(1986)247

Transient technique

Application of transient electrochemical techniques to inlaid ultra-microelectrodes. Assessment of fabrication quality 218(1987)187

Determination of surface state densities from transient rotating ring–disc electrode measurements demonstrated on an n-TiO_2 electrode 236(1987)55

Transition metal

Molten alkali thiocyanates as solvents for transition metal electrodeposition 206(1986)253

Oxygen reduction on vacuum-deposited and adsorbed transition-metal phthalocyanine films 214(1986)523

Transition metal chelate

Oxygen reduction on pyrolysed carbon-supported transition metal chelates 205(1986)233

Redox potential and electrocatalysis of O_2 reduction on transition metal chelates 221(1987) 95

Transition metal cluster

Electrode surface modification through Nafion-attached transition-metal cluster chalcogenide particles 229(1987)223

Transition metal oxide

Mechanism of chlorine evolution on oxide anodes. Study of pH effects 228(1987)393

Translocation

In vivo measurements of the translocation of electrochemically active substances across a bio-membrane 231(1987)519

Transmembrane potential

A quantitative theory of reversible electrical breakdown in bilayer membranes 211(1986)243

Transmission spectroscopy

A spectroelectrochemical study of the electrodeposition of polythiophene films 243 (1988)403

Transparent electrode

A search for conditions permitting model behavior of the $Fe(CN)_6^{3-/4-}$ system 226(1987) 305

Transparent metal

"Transparent" metals: preparation and characterization of light-transmitting palladium, rhodium, and rhenium films 228(1987)167

Transpassive dissolution

Thermokinetic instability of electrode processes. Part II. Transpassive dissolution of copper in nitrate solutions 207(1986)11

Transport

Diffusion–migration impedances for finite, one-dimensional transport in thin-layer and membrane cells. Part II. Mixed conduction cases: Os(III)/Os(II)ClO_4 polymer membranes including steady-state I–V responses 219(1987) 23

Triazolam

Polarographic behaviour and degradation studies of triazolam 214(1986)275

Tributyltin hydride

Reactivity of carbonylmanganese radicals toward tributyltin hydride. Kinetics analysis of the anodic oxidation of $Mn(CO)_3[P(OPh)_3]_2^-$ 241 (1988)181

Trichloroacetic acid

Determination of activity coefficients in aqueous solutions of trichloroacetic acid from emf measurements at 25 °C 230(1987)77

Trichlorophenoxide ion

Electrogenerated chemiluminescence. Part XLVIII. Electrochemistry and electrogenerated chemiluminescence of bis(2,4,6-trichlorophenyl) oxalate–luminescer systems 238(1987)277

Trichlorophenyl oxalate

Electrogenerated chemiluminescence. Part XLVIII. Electrochemistry and electrogenerated chemiluminescence of bis(2,4,6-trichlorophenyl) oxalate–luminescer systems 238(1987)277

Triethylenetetramine

Polarographic study on the interaction between alkali metal cations and acyclic polyamines in acetonitrile 209(1986)297

Trifluoperazine

Interaction of calmodulin antagonists with yeast. Comparison with the effect of miconazole, dio-9 and ethidium on Sr^{2+} uptake, K^+ efflux and plasmamembrane ATPase activity 212(1986)519

Trifluoromethanesulphonic acid

Current doubling during propane oxidation on the n-TiO_2 anode in trifluoromethanesulfonic acid monohydrate 220(1987)173

Trimethoprim

Electrochemical reduction of 2,4-diamino-5-(3,4,5-trimethoxybenzyl)-6-chloropyrimidine 213(1986)111

Trimethoxycinnamic substituent

Cyclic voltammetry and differential pulse voltammetry of rescinnamine 208(1986)127

Trimethylenebisthymine

1,1′-Trimethylenebisthymine as synthetic model of dinucleotide TpT. Electrochemical reduction 201(1986)329

Triphenylene

Electroactive charge-transfer polymers from anodic coupling of dibenzo-crown ethers. Part II. Influence of the complexing properties of the polyether rings 206(1986)115

Triphenylethene derivative

Polarographic studies of drugs of triphenylethene derivatives. Part I 226(1987)129

Triphenylphosphine oxide

An electrochemical investigation of the interaction between the superoxide ion and cations of group 2a in aqueous solutions 246 (1988)155

Tris(dimethylamino)sulphonium tetrafluoroborate

New organic electrolytes: tris(dialkylamino)sulfonium salts: $(R_2N)_3S^+X^-$ 248(1988)363

Triton X-100

Modification of human erythrocyte membrane potentials by the action of the polyoxyethylene detergent Triton X-100 211(1986)7

The role of non-ionic polyoxyethylene ether surfactants on ion transfer across aqueous/organic solution interfaces studied by polarography with the electrolyte dropping electrode 227(1987)171

Can the membrane potential of human erythrocytes suspended in isotonic unbuffered NaCl + KCl + sucrose media in the presence of cationic ionophore Triton X-100 be considered as the equilibrium membrane potential? 231 (1987)231

Trk system

An electrochemical study of energy-dependent potassium accumulation in *E. coli*. Part XI. The Trk system in anaerobically and aerobically grown cells 211(1986)417

Trypaflavine

Effect of poly(α-D-glutamic acid) on the polarographic reduction of 3,6-diaminoacridines 244(1988)235

Tryptophan

Peroxidase-catalyzed and electrochemical oxidation of L-tryptophan 211(1986)257

Tubercidin monophosphate

Electrochemical and photochemical oxidation of the deazapurine nucleotide drug tubercidin-5′-monophosphate 239(1988)161

Tubular electrode

Channel and tubular electrodes 205(1986)1

Mass transport to channel and tubular electrodes: the "Singh and Dutt approximation" 238(1987)43

Tubular graphite electrode

Linear sweep voltammetry at the tubular graphite electrode. Part III. Quasi-reversible processes 207(1986)41

Cyclic voltammetry at the tubular electrode. Part II. Quasi-reversible and totally irreversible processes 238(1987)33

Tungsten bronze electrode

The sodium responsive tungsten bronze electrode. An electrode for sodium ion analysis of DNA solutions 220(1987)225

Tungsten diselenide electrode

Photointercalation of hydrogen in p-type tungsten diselenide 209(1986)395

Preparation and electrochemical characterization of WSe_2 electrodes having a wide range of doping densities 234(1987)133

Electrochemical stabilization of illuminated single crystal WSe_2 anodes 242(1988)191

Tungsten electrode

On the kinetics of the cathodic deposition of aluminium on glassy carbon and tungsten electrodes from $AlCl_3$ + NaCl + KCl melts 210 (1986)127

Electrochemical behaviour of tungsten in alkaline media. Part I. NaOH solutions 243(1988)379

Electrical breakdown and pitting in anodic films on tungsten in halogen ion-containing solutions 248(1988)117

Tungsten oxide electrode

Photoelectrochemistry of polycrystalline n-WO_3. Electrochemical characterization and photoassisted oxidation processes 238(1987)129

Tungsten oxide film

Electrical and mechanical breakdown of anodic films on tungsten in aqueous electrolytes 248 (1988)99

Electrochemical preparation of electrodes modified with non-stoichiometric mixed-valent tungsten(VI, V) oxides 248(1988)305

Tungsten substrate

Photoelectrochemical properties of semiconductor diamond 228(1987)19

Tungstic acid

Surface modifications with heteropoly and isopoly oxometalates. Part I. Qualitative aspects of the activation of electrode surfaces towards the hydrogen evolution reaction 243(1988)87

Tungstomolybdodiphosphate

Surface modifications with heteropoly and isopoly oxometalates. Part II. Electrocatalytic behaviour of glassy carbon surfaces modified with 17-tungsto, 1-molybdo-diphosphate 243 (1988)105

Tungstosilicic acid

Electrocatalysis of cathodic reactions on titanium dioxide surfaces derivatised with tungstosilicic acid ($SiW_{12}O_{40}^{4-}$) 209(1986)391

Two-dimensional growth

Considerations of the spatial pattern of the 2D growth centres formed via time-dependent nucleation and growth mechanisms 209(1986)35

A computer simulation of two-dimensional growth 214(1986)589

Two-phase reaction

The role of phase transfer catalysts in two phase redox reactions 247(1988)203

U

Ultrafast electrode kinetics

Measurement of ultrafast electrode kinetics via steady-state voltammograms at microdisc electrodes 248(1988)467

Ultrahigh vacuum

Long-range structural effects in the anomalous voltammetry on ultra-high vacuum prepared Pt (111) 250(1988)301

Ultramicroelectrode

Effects of restricted diffusion at ultramicroelectrodes in brain tissue. The pool model: Theory and experiment for chronoamperometry 213(1986)31

Electrochemical detection for liquid chromatography using the wall–jet cell/ultramicroelectrode detector 216(1987)115

Examination of staircase, normal pulse and differential pulse voltammetry at inlaid ultramicroelectrodes using a computerized multi-time-domain measurement method 241 (1988)1

Fast sweep cyclic voltammetry at ultra-microelectrodes. Evaluation of the method for fast electron-transfer kinetic measurements 243 (1988)321

Ultramicroelectrode sensors and detectors. Considerations of the stability, sensitivity, reproducibility, and mechanism of ion transport in gas phase chromatography and in high performance liquid phase chromatography 244 (1988)81

Anodic stripping voltammetry at ultramicroelectrodes for metal speciation studies in aqueous solutions of low ionic strength 246 (1988)297

Ultramicroelectrodes for the study of the mechanism of electrosynthetic reactions. The hydrodimerisation of acrylonitrile 248(1988)229

Ultramicroelectrodes: cyclic voltammetry above one million V s^{-1} 248(1988)447

Ensembles of carbon paste ultramicroelectrodes 249(1988)339

Ultrasensitive voltammetry

Ultrasensitive voltammetric measurements based on coupling hydrogen catalytic systems with controlled interfacial accumulation of the catalyst 237(1987)281

Ultraviolet irradiation

The influence of ultra-violet irradiation on the determination of nickel and cobalt in natural waters by adsorption voltammetry 214(1986)21

Ultraviolet spectroscopy

An ultraviolet spectral and polarographic investigation of the acid–base and complexation behaviour of oxytetracycline hydrochloride 214 (1986)199

Unbuffered medium

Reduction of complexes in unbuffered solutions. A unified treatment of the reduction of complexes at a stationary planar electrode or at an expanding mercury electrode 208(1986)57

Undercutting

A method of obtaining a small number of nucleation sites and growing large crystal grains 239(1988)107

Underpotential deposition

Underpotential deposition and electrocatalysis 201(1986)217

Electrocatalytic influence of underpotential Tl, Pb and Bi monolayers on the electrochemical behaviour of rhodizonic acid and tetrahydroxy-1,4-benzoquinone on Pt in acid solutions 213 (1986)135

The single crystal metal–non-aqueous solvent interface. Underpotential deposition of Cd on Ag (111) in propylene carbonate 216(1987)261

Extending the metal interface generality of surface-enhanced Raman spectroscopy: underpotential deposited layers of mercury, thallium, and lead on gold electrodes 217(1987) 367

The effects of the underpotential and overpotential deposition of lead and thallium on silver on the Raman spectra of adsorbates 217 (1987)385

Some specific features of the catalytic role of upd foreign metal adatoms and water on the anodic oxidation of absolute methanol on Pt 221(1987)175

Effect of the nature of platinum group metals on the formation and properties of adatom silver coatings 224(1987)225

Investigation of ruthenium deposition onto a platinized platinum electrode in sulfuric acid media 230(1987)233

Cyclic voltammetric study of glucose oxidation on an oxide-covered platinum electrode in the presence of an underpotential-deposited thallium layer 231(1987)59

Catalytic influence of underpotential-deposited submonolayers of heavy metals on D-glucose oxidation on various noble metal electrodes in alkaline media 237(1987)93

The effect of underpotential deposition of heavy metals on the kinetics of the cathodic reduction of chromium(VI) and persulphates on platinum 237(1987)137

Underpotential metal deposition on gold, monitored in situ with a quartz microbalance 239(1988)321

Structural effects in electrocatalysis. Oxidation of D-glucose on Pt (100), (110) and (111) single crystal electrodes and the effect of upd adlayers of Pb, Tl and Bi 242(1988)221

An irreversible structure sensitive adsorption step in bismuth underpotential deposition at platinum electrodes 243(1988)419

Underpotential deposition of copper and silver on polycrystalline ruthenium electrodes 244 (1988)249

Underpotential deposition of silver on polyfaceted and electrochemically faceted Pt (100) electrodes. Application of the combined adsorption–desorption–nucleation and growth mechanism 244(1988)261

Partial charge transfer in the underpotential deposition of metals. Part I. On the nature of the deposits and the kinetics of their formation 245 (1988)1

Partial charge transfer in the underpotential deposition of metals. Part II. Mercury deposition on polycrystalline gold electrodes 245(1988)21

In-situ X-ray diffraction investigations of the UPD of Tl and Pb on Ag and Au electrodes 247(1988)297

Electroreduction of Ni^{2+} and Fe^{2+} in a fused electrolyte. Formation of a two-component alloy and the role of the underpotential deposition 248(1988)369

The relationship between the underpotential deposition of zinc and the penetration of hydrogen in ARMCO–iron substrates 248(1988) 421

Unified model

A unified model of the adiabatic reactions of electron transfer at metal electrodes 241(1988)45

Unusual quasi-reversibility

Unusual quasi-reversibility (UQR) or apparent non-kinetic hysteresis in cyclic voltammetry. An elaboration upon the implications of N-shaped free energy relationships as explanation 240 (1988)1

Unusual splitting

On the origin of the "unusual splitting" of voltammograms of the Pt (111) electrode 244 (1988)347

Uracil derivative

Adsorption and film formation of uracil derivatives at the mercury/electrolyte interface in the presence of different supporting electrolytes 213(1986)339

Urania–scandia fluorite

Urania–scandia + Pt composite electrodes for use in solid electrolyte cells 202(1986)93

Uranium ion

An investigation of the titanium electrode in acid solutions and acid solutions containing uranium(VI) ions 225(1987)139

Urate

Radical-trapping antioxidants *in vitro* and *in vivo* 232(1987)219

Urea

Enzyme sensor system for potentiometric urea determination in serum and milk 209(1986)69

Urine

Characterization and rapid evaluation of electrochemically oxidizable components in normal and pathological urine 232(1987)137

UV–visible reflectance spectroscopy

"In situ" investigation by simultaneous voltammetry and UV–visible reflectance spectroscopy of some viologen radicals adsorbed on a platinum electrode 218(1987)307

UV–visible spectrophotometry

Electrochromism of octaalkoxymethyl-substituted lutetium diphthalocyanine 237(1987) 61

V

Vacuum deposition

Oxygen reduction on vacuum-deposited and adsorbed transition-metal phthalocyanine films 214(1986)523

Vacuum evaporation

Hydrogen photoevolution at p-type silicon electrodes coated with discontinuous metal layers 228(1987)97

Electrochromic properties of vacuum evaporated organic thin films. Part I. Electrochromic thin films of the three primary colors 247(1988)193

Valence level

Valence levels of Ru(II) and Os(II) complexes studied by voltammetry and X-ray photoelectron spectroscopy 209(1986)135

Valinomycin

Donnan exclusion failure in low anion site density membranes containing valinomycin 223 (1987)51

Apparent ion-exchange current densities at valinomycin-based potassium ion-selective PVC membranes obtained with an ac-impedance method 229(1987)249

Potassium ion transfer across the nitrobenzene/water interface facilitated by valinomycin 234(1987)355

The kinetics of ionic transfer across adsorbed phospholipid layers 243(1988)455

Vanadium couple

Kinetics and mechanism of the V(III) + e^- ⇄ V(II) reaction at a mercury electrode in water + dimethylformamide mixtures 201(1986)283

Electrode processes of the V(III)/V(II) and Eu(III)/Eu(II) systems in mixed water + acetone solvents 230(1987)155

Solvent effects on the electrode kinetics of simple redox couples. Investigations on the electrochemical behaviour of the V(III)/V(II) system in water + acetonitrile mixtures 237 (1987)209

Vanadium hexacyanoferrate

Researches on chemically modified electrodes. Part XV. Preparation and electrochromism of the vanadium hexacyanoferrate film modified electrode 210(1986)31

Researches on chemically modified electrodes. Part XVI. Electron diffusion coefficient in vanadium hexacyanoferrate film 217(1987)49

Vanadium ion

Solvent effect on the rate of homogeneous and electrochemical electron exchange 247(1988)85

Nitrogen fixation. Part II. Nitrogen reduction by electrochemically generated vanadium(II) promoted by various organic ligands in basic methanol 250(1988)385

Vanadium pentoxide

The electrochemistry of molten $K_2S_2O_7$ + K_2SO_4 + V_2O_5 electrolytes 238(1987)163

Electrochemical behaviour of CuO + V_2O_5 systems in molten dimethyl sulfone at 150 °C 242(1988)181

Vapour phase

Application of a polymer solid electrolyte for the vapor-phase electrocatalysis of dioxygen reduction by some cobalt porphyrins 238(1987) 259

Vesicle

Differences in permeability of dioleoylphosphatidylcholine model membranes containing saturated or unsaturated phosphatidic acids 211(1986)167

Dielectric spectroscopy of energy coupling membranes: Chloroplast thylakoids 212(1986)45

Molecular control of cytochrome oxidase activity 212(1986)159

Effect of pH on the efficiency of the oxygen-evolving reaction in inside-out vesicles of thylakoids 212(1986)549

A voltammetric study of asymmetric viologens in an organic solvent, an aqueous solution and in vesicle systems 246(1988)337

Vibrating conductor

Calibration of the Kelvin vibrator for measurements of electronic work functions in a humid atmosphere 243(1988)337

Vibrational band

The interpretation of solution electrolyte vibrational bands in potential-difference infrared spectroscopy 239(1988)55

Vibrational effect

Solvent dynamics and vibrational effects in electron transfer reactions 204(1986)59

Vibrational spectrum

The analysis of vibrational spectra of species adsorbed at the electrode–solution interface. A theoretical model for the effects of potential on the observed spectra 225(1987)267

Vinyl compound

Correlation of the anodic peak potentials with the quantum mechanical properties of various vinyl compounds 237(1987)187

Vinylferrocene electrode

Chemical and mechanical properties of redox polymer-modified electrodes. Part II. Redox thermodynamics of plasma-polymerized vinylferrocene electrodes 219(1987)71

Vinyl monomer

Electrochemical behaviour of cellulosic cation membranes. Bi-ionic potentials in alkali systems 211(1986)113

Violamycin

Influence of the antitumour antibiotics daunomycin and violamycin B I on membranes of human erythrocytes. Passive electrical investigations 231(1987)81

Viologen

Structure changes of viologen + β-cyclodextrin inclusion complex corresponding to the redox state of viologen 210(1986)265

Catalysis of 1,2-dibromo-1,2-diphenylethane reduction on platinum and carbon felt electrodes coated by polypyrrole films containing 4,4′-bipyridinium groups. Effects of film thickness, film composition and comparison with homogeneous catalysis 224(1987)111

Substituent effects on electrochemical reduction of viologen dimer and trimer with ethylene spacer 239(1988)397

Comparative electrochemical studies of *N*-methyl-*N*′-hexadecyl viologen monomolecular films formed by irreversible adsorption and the Langmuir–Blodgett method 239(1988)441

The role of intramolecular association in the electrochemical reduction of viologen dimers and trimers 243(1988)143

Selective electrocatalytic reduction of hexachloroacetone on a viologen polymer modified electrode in aqueous media 245(1988) 313

A voltammetric study of asymmetric viologens in an organic solvent, an aqueous solution and in vesicle systems 246(1988)337

Self-assembled surfactant monolayers on electrode surfaces. The formation of surfactant viologen monolayers on gold and platinum 249 (1988)333

Viologen radical

"In situ" investigation by simultaneous voltammetry and UV–visible reflectance spectroscopy of some viologen radicals adsorbed on a platinum electrode 218(1987)307

"In situ" spectroelectrochemical studies of *N*,*N*′-dibenzyl and *N*,*N*′-diheptyl viologen radicals adsorbed on metallic (Pt, Au) electrodes 234(1987)329

Virial isotherm

Adsorption of dicarboxylic ions on the (210) gold face from solutions at constant cationic strength 240(1988)291

Viscosity

Dependence of the true rate constant of homogeneous electron transfer on solvent relaxation time and viscosity 209(1986)223

The rate-limiting steps of the rising phase of miniature end plate currents in the mouse diaphragm 231(1987)153

Visible absorption spectroscopy

A search for conditions permitting model behavior of the $Fe(CN)_6^{3-/4-}$ system 226(1987) 305

Visible transmission spectroscopy

Comparison of visible transmission spectroscopic and ellipsometric data obtained during the deposition of thin films on electrodes 244(1988) 353

Vitamin B_{12}

Electroreduction of O_2 catalyzed by vitamin B_{12} adsorbed on a graphite electrode 237(1987)145

Vitamin C

Radiolytic scanning of vitamin E–vitamin C oxidation–reduction mechanisms 232(1987)59

Vitamin E

Radiolytic scanning of vitamin E–vitamin C oxidation–reduction mechanisms 232(1987)59

Radical-trapping antioxidants *in vitro* and *in vivo* 232(1987)219

Volcano plot

State of surface oxide films at Pt anodes and "volcano" behaviour in electrocatalysis for anodic Cl_2 evolution 224(1987)163

Voltage-gated ion flux

Electrical double layers and voltage-gated ion fluxes 212(1986)559

Voltammetric detector

Charge transfer across a polymer gel/liquid interface. A voltammetric detector for a flow system 217(1987)213

Voltammetric maximum

Voltammetric maxima of the third kind from reactant adsorption at the HMDE 235(1987)343

Voltammetry

Phospholipid monolayers at the mercury/water interface 202(1986)253

Ion carrier properties of nigericin studied by voltammetry at the interface of two immiscible electrolyte solutions 204(1986)267

Electrochemical screening for electron acceptors: aromatic esters 207(1986)161

New aspects of the electrochemistry of heteropolyacids. Reduction currents as a probe of solvent–electrolyte interactions 208(1986)343

Valence levels of Ru(II) and Os(II) complexes studied by voltammetry and X-ray photoelectron spectroscopy 209(1986)135

Application of carbon-fiber microelectrodes to the study of non-conductive inverse microemulsions. Interpretation of the diffusion coefficients 210(1986)205

The influence of glucose and electrolyte composition on the voltammetric response and open-circuit potential decay of bright polycrystalline gold electrodes 212(1986)213

Voltammetric determination of cyadox using adsorptive accumulation in a flow-through system 214(1986)115

Voltammetric and spectral study of some aminotrinitrobenzenes and their radical anions 214(1986)213

Voltammetric studies on the adsorption and association of cytidine dinucleotides in solutions of varying pH at charged interfaces 214(1986)391

Effect of the oxygen layer at solid Ru electrodes on hydrogen oxidation in acid solution 214 (1986)547

Voltammetric studies of tellurium film and hydrogen telluride formation in acidic tellurite solution 215(1986)261

Effect of sphericity on the voltammetric (polarographic) log plot for reversible amalgam formation 218(1987)1

"In situ" investigation by simultaneous voltammetry and UV–visible reflectance spectroscopy of some viologen radicals adsorbed on a platinum electrode 218(1987)307

Electrochemical oxidation of the tris-1,10-phenanthroline iron(II) cation in the presence of sodium dodecylsulfate 219(1987)125

Voltammetric measurements with microelectrodes in low-conductivity systems 220 (1987)31

Electrochemical oxidation of 9-β-D-ribofuranosyluric acid in basic solution 223 (1987)119

Electrochemical oxidation of 6,8-dioxypurine 223(1987)143

Heterogeneous and homogeneous redox catalysed reduction of some sulfilimines 223(1987)185

The behaviour of electrodispersed platinum electrodes for the voltammetric electrooxidation of reduced carbon dioxide 224(1987)189

Electrochemical kinetics at microelectrodes. Part III. Equivalency between band and hemicylinder electrodes 225(1987)33

Quantitative analysis of the distribution of the hydrogen adsorption states at platinum surfaces. Part I. Application to Pt (100) in sulphuric acid medium 225(1987)205

Voltammetric study of ion transfer across the water/*o*-nitrophenyloctyl ether interface. Part I. Reversible process 226(1987)21

Anodic oxidation of heterogeneous germanium amalgam 226(1987)331

On the role of chemical steps in the anodic dissolution of illuminated n-type GaAs electrodes 228(1987)77

Ozone and oxygen evolution on PbO_2 electrodes in acid solution 228(1987)407

Structure and composition of the Ag (111) surface as a function of electrode potential in aqueous halide solutions 229(1987)1

An electrochemical examination of the coordination of O_2 and O_2^- with a Co^{II}-macrocyclic complex in dimethylsulfoxide 229 (1987)273

Kinetics of the anodic oxidation of isopropanol on chromium/titanium-oxide electrodes 229 (1987)339

Electrochemistry of a lutetium diphthalocyanine film in contact with an acidic aqueous medium 233(1987)77

Voltammetry of metal complex systems with different diffusion coefficients of the species involved. Part I. Analytical approaches to the limiting current for the general case including association/dissociation kinetics 234(1987)1

Voltammetry of metal complex systems with different diffusion coefficients of the species involved. Part II. Behaviour of the limiting current and its dependence on association/dissociation kinetics and lability 234(1987)17

Activation of carbon fiber microelectrodes by alternating current electrochemical treatment 234(1987)119

Voltammetric determination of indole in micellar and emulsified media 234(1987)175

Adsorption and reduction of iron and cobalt phthalocyanines in DMSO at glassy carbon and pyrolytic graphite electrodes 234(1987)297

"In situ" spectroelectrochemical studies of *N,N'*-dibenzyl and *N,N'*-diheptyl viologen radicals adsorbed on metallic (Pt, Au) electrodes 234(1987)329

Voltammetry of metal complex systems with different diffusion coefficients of the species involved. Part III. The current–potential relation for the general case including association/dissociation kinetics 235(1987)1

Computer-assisted voltammetry with a multi-level random signal. Part I. Generation of input potential signal and sampling timing of the response current 235(1987)117

The lithium salt of benzoquinone radical anion and voltammetric anomalies 235(1987)357

Electrochromism of octaalkoxymethyl-substituted lutetium diphthalocyanine 237(1987) 61

Ion transfer across the immiscible water–*o*-nitrotoluene interface 237(1987)113

Electrochemistry of organic acceptor compounds: aromatic anhydrides 238(1987)215

Mechanism of the electrochemical oxidation of 2-aminopyridine at a pyrolytic graphite electrode 242(1988)209

Voltammetric response for the diffusion-controlled electrodeposition onto growing hemispherical nuclei 243(1988)57

The electrochemistry of alkaline $K_3Cr(CN)_6$ solutions at p-GaAs 243(1988)161

Chemical and electrochemical equilibria and kinetics in aqueous Cr(III)/Cr(II) chloride solutions 244(1988)179

The bubble electrode — a new electrode for the combination of voltammetry, electrolysis and electron spin resonance spectrometry 245(1988) 105

Voltammetry at geometrically uneven electrodes. Part I. Chronoamperometry at model electrodes with rectangular hollow or protrusive surfaces 246(1988)1

Characterization of sulfur layers from reduced sulfur dioxide on porous platinum black/Teflon electrodes 246(1988)193

A voltammetric study of asymmetric viologens in an organic solvent, an aqueous solution and in vesicle systems 246(1988)337

Voltammetric characteristics of the RuO_2 film electrode in relation to the catalytic properties of RuO_2 for the photochemical production of hydrogen 247(1988)253

Catalysis of the electrochemical oxidation of CH_3OH by molybdenum-modified platinum 248(1988)181

Measurement of ultrafast electrode kinetics via steady-state voltammograms at microdisc electrodes 248(1988)467

Effects of the solution pH on the electrochemical behaviour of $Ru(bpy)_3^{2+}$ and $Fe(CN)_6^{3-}$ ions at a clay-modified electrode 249(1988)133

Theory of microelectrode voltammetry with little electrolyte 250(1988)1

Voltammetry of the complexes of the platinum metals with organic sulphides in acetonitrile 250 (1988)95

The interaction of CO_2 with gold electrodes in acid electrolyte followed through voltammetry 250(1988)183

Elimination of the influence of interfering ions in the voltammetry of catalytic hydrogen evolution in the presence of platinum salts 250 (1988)411

Volta potential

Experimental study of Volta potentials in water/nitrobenzene systems with anion adsorption 204(1986)273

Voltradiometry

A coupled voltammetric and radiometric (voltradiometric) study of the simultaneous adsorption of hydrogen and anions at platinized platinum electrodes 218(1987)337

Volume concept

On the volume concept for the Walden product 248(1988)15

W

Walden product

On the volume concept for the Walden product 248(1988)15

Wall-jet cell

Electrochemical detection for liquid chromatography using the wall-jet cell/ultramicroelectrode detector 216(1987)115

Wall-jet disc electrode

Theory of stationary current–voltage curves of redox-electrode reactions in hydrodynamic voltammetry. Part XI. Wall-jet electrodes 206 (1986)37

Wall-jet electrode

Dc anodic stripping voltammetry at the mercury-film wall-jet electrode 215(1986)123

Walsh function

Application of the fast Walsh–Hadamard transform and the fast Haar transform for electrochemical impedance measurements based on a periodic square-wave perturbation signal derived from Walsh functions 222(1987)367

Walsh–Hadamard transform

Application of the fast Walsh–Hadamard transform and the fast Haar transform for electrochemical impedance measurements based on a periodic square-wave perturbation signal derived from Walsh functions 222(1987)367

Walsh series

Comparison of linear sweep and staircase voltammetries using Walsh series 214(1986)141

Warburg response

The mechanism of the deposition of manganese dioxide. Part II. Electrode impedance studies 201(1986)113

Water

Energetics and dynamics of the interface of RuS_2 and implications for photoelectrolysis of water 201(1986)263

The structure of water at a neutral interface 206(1986)131

The influence of water on the electrodeposition of polypyrrole in acetonitrile 206(1986)139

An electrochemical study of the molecular and ionic dissociation of NO_2Cl in aprotic media 209(1986)323

Relationship of two electroactive forms of horse heart cytochrome *c* at gold and glassy carbon electrodes in water and methanol 218(1987)251

Erratum on the determination of the shift between the potential scales in liquid ammonia solutions and in aqueous solutions 225(1987)263

Electrochemical and chemical reductions of oxygen dissolved in aqueous solutions 232(1987) 13

Determination of trace water in propylene carbonate using hexafluoroacetone 234(1987)107

Electrocatalysis of O_2 reduction to water in different acid media by iron naphthalocyanines 246(1988)119

Influence of water on the electroreduction of 2-nitrophenylhydrazones in acetonitrile 246 (1988)399

Adsorption of β-cyclodextrin on the mercury electrode from water and a water + ethanol mixture 247(1988)287

Exchange of K^+ and Na^+ between water and PVC in the presence of different ionophores 248(1988)131

Reduction of oxygen to water on cobalt-nitride thin film electrodes prepared by the reactive RF sputtering technique 250(1988)73

Water + acetone mixture

Electrode processes of the V(III)/V(II) and Eu(III)/Eu(II) systems in mixed water + acetone solvents 230(1987)155

Adsorption stripping voltammetry of different solvated species of chlorophyll a in water + acetone mixtures 249(1988)89

Water + acetonitrile mixture

Effect of non-aqueous solvents on the chemisorption and orientation of aromatic compounds at smooth polycrystalline platinum electrodes: naphthohydroquinone and tetrahydroxybiphenyl in water + acetonitrile solutions 201(1986)153

Electrochemical behavior of the Eu(III/II)–EDTA system on a mercury electrode in water + dimethylsulphoxide (DMSO), water + acetonitrile (AN) and water + hexamethylphosphortriamide (HMPT) mixtures 226(1987)315

Solvent effects on the electrode kinetics of simple redox couples. Investigations on the electrochemical behaviour of the V(III)/V(II) system in water + acetonitrile mixtures 237 (1987)209

Water adsorption

Spectroscopic studies of water adsorption on iron group metals 228(1987)301

Water / dichloroethane interface

The double layer at the interface between two immiscible electrolyte solutions. Part III. Capacitance of the water/1,2-dichloroethane interface 225(1987)65

Water + dimethylsulphone mixture

Electrode kinetics of the Cu(II)/Cu(I) system at platinum in water + dimethylsulphoxide (DMSO) mixtures 250(1988)61

Water + dimethylsulphoxide mixture

Influence of temperature on the kinetics of Zn(II) electroreduction from water + dimethylsulfoxide mixtures 215(1986)287

Electrochemical behavior of the Eu(III/II)–EDTA system on a mercury electrode in water + dimethylsulphoxide (DMSO), water + acetonitrile (AN) and water + hexamethylphosphortriamide (HMPT) mixtures 226(1987)315

Solvent effect on the rate of homogeneous and electrochemical electron exchange 247(1988)85

Water + ethanol mixture

Adsorption of β-cyclodextrin on the mercury electrode from water and a water + ethanol mixture 247(1988)287

Water + hexamethylphosphortriamide mixture

Electrochemical behavior of the Eu(III/II)–EDTA system on a mercury electrode in water + dimethylsulphoxide (DMSO), water + acetonitrile (AN) and water + hexamethylphosphortriamide (HMPT) mixtures 226(1987)315

Electrode processes of the Eu(III)/Eu(II) system in water + hexamethylphosphortriamide mixtures 234(1987)263

Water / mercury interface

Phase transitions in mercury + quinoline derivative systems. The anodic formation of Hg(I)–8-hydroxyquinoline-5-sulfonic acid chelate 202(1986)203

Phase transition processes displayed by coumarin monolayers at the water–mercury interphase 214(1986)597

The two-dimensional condensation of 2-methyl-4,6-dihydroxy-pyrimidine at the water/mercury interface 249(1988)311

Water / nitrobenzene interface

Stochastic approach to the ion transfer kinetics across the interface between two immiscible electrolyte solutions. Comparison with the experimental data 204(1986)257

Ion carrier properties of nigericin studied by voltammetry at the interface of two immiscible electrolyte solutions 204(1986)267

Experimental study of Volta potentials in water/nitrobenzene systems with anion adsorption 204(1986)273

Cyclic voltammetry and chronopotentiometry with cyclic linear current scanning of terramycin at the water/nitrobenzene interface 214(1986)459

Electrochemistry of cadmium ion at the water/nitrobenzene interface 214(1986)465

Investigation of ion transfer across the membrane-stabilized interface of two immiscible electrolyte solutions. Part I 217(1987)253

Study on the transfer of the base electrolyte ion TBA^+ across the water/nitrobenzene interface by the linear current scanning method 234(1987) 71

Proton transfer across the water/nitrobenzene interface facilitated by acridine chloride 234 (1987)85

Potassium ion transfer across the nitrobenzene/water interface facilitated by valinomycin 234(1987)355

Adsorption of phospholipids at the interface between two immiscible electrolyte solutions. Part I. Equilibrium adsorption of phosphatidylcholines at the water/nitrobenzene interface 242(1988)277

Kinetic analysis of the picrate ion transfer across the interface between two immiscible electrolyte solutions from impedance measurements at the equilibrium potential 242(1988)291

Water / nitrotoluene interface

Ion transfer across the immiscible water–*o*-nitrotoluene interface 237(1987)113

Water / organic solvent interface

Transfer of ferricenium cation across water/organic solvent interfaces 216(1987)303

Streaming method study of interfaces between immiscible electrolyte solutions 235(1987)287

Water + organic solvent mixture

Potentiometric titration of aluminium with fluoride in organic solvent + water mixtures by use of a fluoride-selective electrode 248(1988)87

Wavelength

Amorphous semiconductor–electrolyte junction. Influence of the wavelength and oxide thickness on the photocharacteristics of a-Nb_2O_5 anodic films 228(1987)119

Wave shape

Linear sweep voltammetry at channel electrodes 206(1986)57

Weakly polar solvent

A quantum mechanical theory of the proton and electron transfer in weakly polar solvents 204 (1986)97

Wire electrode

Flow phenomena in FIA and flow electrolysis 239(1988)1

Wool fibre

The electrochemistry of 2-aminoacrylic acid derivatives in acidic media as studied by background corrected pulse polarographic techniques and controlled potential electrolysis 218(1987)213

Work function

A UPS, XPS and work function study of emersed silver, platinum and gold electrodes 215(1986)331

Calibration of the Kelvin vibrator for measurements of electronic work functions in a humid atmosphere 243(1988)337

Working curve

On the transposition of theoretical equations or working curves for rotating disk electrodes to those for channel electrodes and vice versa. Comments on a paper by Unwin and Compton 245(1988)299

X

X-ray diffraction

In-situ X-ray diffraction studies of Pt electrode/solution interfaces 229(1987)125

The electrochemistry of molten $K_2S_2O_7 + K_2SO_4 + V_2O_5$ electrolytes 238(1987)163

In-situ X-ray diffraction investigations of the UPD of Tl and Pb on Ag and Au electrodes 247(1988)297

In situ X-ray diffraction measurements of the surface structure of Pt in the presence of "weakly" adsorbed H 247(1988)311

X-ray photoelectron spectroscopy

Surface properties of polycrystalline platinum and their influence on formic acid oxidation 205(1986)151

Valence levels of Ru(II) and Os(II) complexes studied by voltammetry and X-ray photoelectron spectroscopy 209(1986)135

An investigation of the sulphur(−II)/sulphur(0) system on gold electrodes 216(1987)213

Electrochemical and XPS measurements on thin oxide films on zirconium 217(1987)159

Initial stages of electrooxidation of Pd (100) surfaces in sulfuric acid solution: an XPS study 217(1987)435

Oxygen reduction on glassy carbon in 0.1 *M* HCl: RDE and XPS study 220(1987)161

Xanthine oxidase

Electrochemical and xanthine oxidase-catalyzed oxidation of 6-thioxanthine 233(1987)49

Xanthosine

Electrochemical oxidation of xanthosine 216 (1987)137

Xeroderma pigmentosum

Deficiency in the catalase activity in human precancerous stages of *Xeroderma pigmentosum*. Comparison with XP, AT and Blomm's cultured fibroblasts and SV_{40} transformed human cell extracts 232(1987)271

Y

Yeast cell

Directional control of yeast cell division by electric stimulus 212(1986)235

Yttrium–barium–copper oxide

Electrochemistry at $YBa_2Cu_3O_7$ superconductor electrodes at temperatures above T_c 243(1988)465

The electrochemistry of $YBa_2Cu_3O_{7-\delta}$ in aqueous potassium hydroxide 248(1988)461

Yttrium–barium–copper oxide electrode

Electron transfer reactions to soluble redox couples at $Ba_2YCu_3O_7$ and CuO electrodes 249 (1988)205

Z

Zeolite

Electrochemical behavior of methyl viologen in zeolite particle films 208(1986)95

Carbon composite electrodes containing alumina, layered double hydroxides, and zeolites 243 (1988)209

Zeolite-modified electrode

Effects of solution pH on the voltammetric behaviour of ferrous/ferric ions at zeolite-modified electrodes 246(1988)63

The zeolite-modified carbon paste electrode 246 (1988)461

Zero point charge

A new method for the study of potential-dependent interface characteristics for solids 237(1987)171

Zero potential difference

Conditions enabling determination of entropy and enthalpy of activation of electrode reactions at zero metal–solution potential difference 210 (1986)167

Zeta potential

Evidence for ac fields produced by mammalian cells 231(1987)287

Zinc

Potentiodynamic passivation of zinc in aqueous KOH solutions 201(1986)85

Application of a backward feed and exhaust (BFE) type methanol anode to zinc electrowinning 205(1986)125

Dc anodic stripping voltammetry at the mercury-film wall–jet electrode 215(1986)123

Hydrodynamic effects of surfactants on the macromorphology of electrodeposited zinc and flow visualization. The flow-field throw 243 (1988)21

Faradaic impedance methods as applied to the study of the potentiodynamic passivation of zinc in alkaline media 247(1988)323

The relationship between the underpotential deposition of zinc and the penetration of hydrogen in ARMCO–iron substrates 248(1988) 421

Hydrodynamic effects on the macromorphology of electrodeposited zinc and flow visualization. A flat plate electrode in a channel flow cell 249 (1988)35

Hydrodynamic effects on the macromorphology of electrodeposited zinc and flow visualization. The rotating disk electrode 249(1988)63

Zinc complex

Electroanalytical chemistry of copper, lead and zinc complexes of amino acids at the ionic strength of seawater (0.70 *M* $NaClO_4$). Part III 208(1986)137

Isoporphyrin formation upon electrochemical oxidation of zinc tetrakis(4-sulfonato-phenyl)porphine in aqueous solution 246(1988) 363

Zinc ion

Electrode kinetic studies of the $Zn^{2+}/Zn(Hg)$ and $Li^{+}/Li(Hg)$ couples in dimethylsulphoxide + propylene carbonate solvent systems 207 (1986)177

Application of ASV for trace metal speciation. Part V. The pseudo-polarography of zinc by RGCE 214(1986)37

Binding of copper(II) and zinc(II) ions on various lignins 214(1986)331

Influence of temperature on the kinetics of Zn(II) electroreduction from water + dimethylsulfoxide mixtures 215(1986)287

Trace metal speciation by ASV. Part VII. Interaction of zinc with Cl^{-}, NO_3^{-}, I^{-}, SO_4^{2-} and OH^{-} 226(1987)253

Alternative interpretations of kinetic data: the reduction of zinc at mercury electrodes 233 (1987)275

The electrochemical oxidation of zinc studied by ellipsometry 234(1987)185

Zinc + nickel alloy

Electrodeposition of zinc + nickel alloy phases and electrochemical stripping studies of the anomalous codeposition of zinc 221(1987)211

Zinc oxide electrode

Pulsed laser-induced photopotentials at the cobalt-photosensitized ZnO/electrolyte interface 215(1986)161

Zinc surface

The electrochemical oxidation of zinc studied by ellipsometry 234(1987)185

Zinc tetraphenylporphyrin

Electrochemical and photoelectrochemical consequences of "doping" zinc tetraphenylporphyrin with axial pi acid ligands 221(1987)83

Zircaloy electrode

The electrochemical behaviour of Zircaloy-4 electrodes in acid iodide solution 240(1988)299

Zirconium electrode

Electrochemical and XPS measurements on thin oxide films on zirconium 217(1987)159

Zirconium ion

On the polarographic reduction of nitrate ion in the presence of zirconium(IV) 208(1986)117

Zirconium nitride

Efficient and stable oxygen evolution on zirconium nitride thin film electrodes prepared by the reactive RF sputtering technique 220 (1987)369

Zirconium oxide

The electrochemical behaviour of Zircaloy-4 electrodes in acid iodide solution 240(1988)299

Zirconium phosphate

Response to pH of an electrode made up of a monocrystal of α-$Zr(HPO_4)_2 \cdot H_2O$ 216(1987) 283

***Z* scheme**

In vitro photoelectrochemical model of the *Z* scheme in green plant photosynthesis 231(1987) 325
